Dear Sir:

In my opinion this is just a waste of money. In the first place the M.F.W.P. introduced Mackis to these waters years ago, Now they blame the Mackis for killing off the Bulls. Then they planted shrimp in Flathead lake and this destroyed our salmon fishing. Now you want to kill off more fish in these lakes & streams. This is not going to save the native cut throat Trout, and its just going to distroy some more good fishing. I'd also like to know how you can poison a stream & kill off all the fish? Why not use this money to plant & improve the fishing? I have no faith in what the M.F.W.P. propose. Please give this a lot of thought before this is done.

Raymond F Nelring
