Subject: [EXTERNAL] BPA proposal to retire delayed loss return in BP24 (Oct 2023)
Date: Tuesday, December 14, 2021 6:46:42 AM

Good morning,

We missed the kick-off meeting last week, but Chelan is very interested in the proposed retirement of the delayed loss return option currently available for returning of transmission losses.

Chelan's PTP transmission use is for dynamically scheduled wind generation (Nine Canyon). The initial information appears to be very light on how after-the-fact type of tags would be treated under the proposal or what the options are for return outside of financial.

Please let me know if there is more discussion.

Thank you,

Jay Fintz
