1/ Federal Appropriation amounts are less than the amount per the FCRPS financial statements because the repayment obligation does not begin until the related assets are placed in service. Appropriation amounts exclude appropriations for construction work still in progress (CWIP), which was \$140.2 million in FY 2017. Unspent appropriations received by the COE and BOR as well as some adjustments are also excluded.

2/ Transmission principal is different from the Nonfederal repayment obligation due to: 1) premium bonds issued, 2) timing differences, and 3) transactions costs. Transmission is assigned the repayment obligation for these items, which equals the additional Federal prepayment made on Transmission's behalf.

3/ BPA's liabilities to Energy Northwest are part of the Regional Cooperation Debt Program (RCD), which extends Energy Northwest debt to pay down federal liabilities or preserve federal borrowing capacity.

NOTE: This data does not include irrigation assistance commitment of \$391.1 million at zero percent interest as of 2017 year-end.
