FREEDOM OF INFORMATION ACT PROGRAM

November 12, 2019

In reply refer to: FOIA #BPA-2019-00412-F

Nathan Sandvig  
205 SE Spokane Street, Suite 300  
Portland, OR 97202  
Email: [nathan.sandvig@nationalgrid.com](mailto:nathan.sandvig@nationalgrid.com)

Dear Mr. Sandvig,

This communication is the Bonneville Power Administration's (BPA) final response to your request for agency records made under the Freedom of Information Act, 5 U.S.C. § 552 (FOIA). Your request was received on January 31, 2019 with an acknowledgement letter sent to you on February 12, 2019.

### **Request**

“1. Third AC Capacity Ownership Agreement between the Bonneville Power Administration and Snohomish County Public Utility District and any amendments;

2. Third AC Capacity Ownership Agreement between the Bonneville Power Administration and Puget Sound Energy and any amendments;

3. Third AC Capacity Ownership Agreement between the Bonneville Power Administration and PacifiCorp and any amendments;

4. Third AC Capacity Ownership Agreement between the Bonneville Power Administration and Seattle City Light and any amendments;

5. Third AC Capacity Ownership Agreement between the Bonneville Power Administration and Tacoma City Light and any amendments;

6. Third AC Capacity Ownership Agreement between the Bonneville Power Administration and Pacific Northwest Generating Cooperative, any amendments, and any assignment agreement to the Turlock Irrigation District or revised agreement incorporating such assignment;

7. Third AC Intertie Construction Agreements and agreements regarding commercial transmission rights for such facilities between the Bonneville Power Administration and PacifiCorp;

8. A copy of the Record of Decision for the Capacity Ownership Contracts for Non-Federal Participation in the Third AC Intertie.”

### **Clarification**

On February 12, 2019, via letter to the agency, you clarified your original request as follows:

“For the first six documents referencing the Capacity Ownership Agreements, we are requesting all amendments to the agreements but only the recent (past 12 months) revisions to provisions of the agreements that update numbers in the agreements.

For the documents in the seventh request (Third AC Intertie Construction Agreements and agreements regarding commercial transmission rights for such facilities between the Bonneville Power Administration and PacifiCorp), we are requesting all amendments or revisions.

For the eight item requested, we did not find the document at the web link sent and have been unable to find the document on the BPA website. We have found the March 1994 Record of Decision on Non-Federal Ownership. In the March 1994 ROD, BPA stated on page 21 that the final contract terms of the Capacity Ownership Contracts would [be] addressed in a separate Record of Decision. It is that Record of Decision that we have been unable to find on the BPA website.”

### **Response**

BPA conducted a search of electronic records in the agency’s Customer Contracts Administration office. That office located 3074 pages of records responsive to your request. Of that total 3074 pages, BPA is withholding 63 pages under 5 U.S.C. § 552(b)(4) (Exemption 4). The total number of pages accompanying this communication is 3011. An explanation of exemptions applied follows.

### **Explanation of Exemptions**

The FOIA generally requires the release of all government records upon request. However, the FOIA permits or requires withholding certain limited information that falls under one or more of nine statutory exemptions (5 U.S.C. §§ 552(b)(1-9)).

#### Exemption 4

In compliance with the FOIA, BPA provided Shell Energy with an opportunity to object to a public release of their third party information contained in the responsive agency records. That objection opportunity is provided for by Exemption 4 and DOE and BPA FOIA regulations and processes. Exemption 4 protects third party confidential commercial or financial information from public release. Shell Energy submitted their written objections. BPA evaluated those objections and the records objected to. Based on the objections received from Shell Energy, and the content of the records objected to, and U.S. Department of Justice guidance on the proper application of Exemption 4 to those records, BPA has accepted Shell Energy’s objections to the public release of their confidential information contained in the responsive agency records. U.S. Department of Justice information on the application of Exemption 4 can be found at the following web links:

<https://www.justice.gov/oip/blog/new-guidance-issued-exemption-4-foia>

<https://www.justice.gov/oip/exemption-4-after-supreme-courts-ruling-food-marketing-institute-v-argus-leader-media>

<https://www.justice.gov/oip/step-step-guide-determining-if-commercial-or-financial-information-obtained-person-confidential>

### **Related FOIA Responses**

Please note, the agency office performing the search for records for part 7 (above) of this request also performed the records search for your request BPA-2019-00410-F. Records responsive to BPA-2019-00412-F are also responsive to BPA-2019-00410-F. Therefore, for ease of review and processing, records responsive to part 7 of this request will be released with the agency's response to BPA-2019-00410-F—and *not* duplicated in this BPA-2019-00412-F response.

### **Fees**

There are no fees associated with the response to your request.

### **Certification**

Pursuant to 10 C.F.R. § 1004.7(b)(2), I am the individual responsible for the search, determination, and records release described above. Your FOIA request BPA-2019-00412-F is now closed with all available agency records provided.

### **Appeal**

The adequacy of the search may be appealed within 90 calendar days from your receipt of this letter pursuant to 10 C.F.R. § 1004.8. Appeals should be addressed to:

Director, Office of Hearings and Appeals  
HG-1, L'Enfant Plaza  
U.S. Department of Energy  
1000 Independence Avenue, S.W.  
Washington, D.C. 20585-1615

The written appeal, including the envelope, must clearly indicate that a FOIA appeal is being made. You may also submit your appeal by e-mail to [OHA.filings@hq.doe.gov](mailto:OHA.filings@hq.doe.gov), including the phrase "Freedom of Information Appeal" in the subject line. (The Office of Hearings and Appeals prefers to receive appeals by email.) The appeal must contain all the elements required by 10 C.F.R. § 1004.8, including a copy of the determination letter. Thereafter, judicial review will be available to you in the Federal District Court either (1) in the district where you reside, (2) where you have your principal place of business, (3) where DOE's records are situated, or (4) in the District of Columbia.

You may contact BPA's FOIA Public Liaison, Jason Taylor, at 503.230.3537, [jetaylor@bpa.gov](mailto:jetaylor@bpa.gov), or the address on this letter header for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS)

at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows:

Office of Government Information Services  
National Archives and Records Administration  
8601 Adelphi Road-OGIS  
College Park, Maryland 20740-6001  
E-mail: [ogis@nara.gov](mailto:ogis@nara.gov)  
Phone: 202-741-5770  
Toll-free: 1-877-684-6448  
Fax: 202-741-5769

Thank you for your interest in the Bonneville Power Administration.

Sincerely,

A handwritten signature in black ink, appearing to read "Candice D. Palen". The signature is fluid and cursive, with the first name being the most prominent.

AMENDATORY AGREEMENT  
to the  
PACIFIC NORTHWEST AC INTERTIE  
CAPACITY OWNERSHIP AGREEMENT  
executed by the  
UNITED STATES OF AMERICA  
DEPARTMENT OF ENERGY  
acting by and through the  
BONNEVILLE POWER ADMINISTRATION  
and  
PUGET SOUND POWER & LIGHT COMPANY

---

Section	Page
1. Definitions .....	2
2. Amendment of Agreement .....	2

This AMENDATORY AGREEMENT is executed as of Dec 20 1996, by the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION (Bonneville) and PUGET SOUND POWER & LIGHT COMPANY (Puget), a corporation of the State of Washington.

WI TN ES SETH:

WHEREAS the Parties on October 11, 1994, entered into the Pacific Northwest (**PNW**) AC **Intertie** Capacity Ownership Agreement, Contract No. **DE-MS79-94BP94521** (Agreement); and

WHEREAS the Federal Energy Regulatory Commission (**FERC**) has issued Order No. 888, "Promoting Wholesale Competition Through Open Access **Non-Discriminatory** Transmission Service by Public Utilities; Recovery of Stranded Costs By Public Utilities And Transmitting Utilities"; and

WHEREAS the Parties desire to amend the Agreement so as to comply with such Order No. 888,

NOW, THEREFORE, the Parties agree as follows:

1. **DEFINITIONS**

Capitalized terms used in this **Amendatory** Agreement, unless otherwise defined herein, have the respective meanings set forth for such terms in the **Agreement**.

2. **AMENDMENT OF AGREEMENT**

Subsection 3(b) of the Agreement is deleted in its entirety and the following is inserted in lieu thereof

**(b) Right to Wheel for Third Parties**

Puget may use its Scheduling Share to transmit any and all power and energy, whether or not such power or energy is owned by **Puget**. Puget shall have no obligation under this Agreement to make available to Bonneville any portion of **Puget's** Scheduling Share which is unused in any hour, and Bonneville **shall** not schedule over **Puget's** Scheduling Share without **Puget's** prior written consent.

Bonneville shall treat all scheduling information consistent with the standards of conduct contained in Part 37 of **FERC's** regulations.

IN WITNESS WHEREOF, the Parties hereto have executed this **Amendatory** Agreement.

**Subject: Amendment to Puget Sound Power & Light Company (Puget)  
PNW AC Intertie Capacity Ownership Agreement**

Dear Mr. Perigo:

Enclosed for your signature are two original copies, each signed by Puget, of an Amendatory Agreement to Puget's PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94521. On December 20, 1996, Puget and Bonneville Power Administration entered into the Amendatory Agreement by signing and exchanging a facsimile copy of the enclosed originals.

This amendment was requested by Puget in order to meet the requirement that public utilities that jointly own interstate transmission facilities with non-jurisdictional utilities offer transmission service over their share of the joint facilities. The requirement is contained in the Federal Energy Regulatory Commission Order No. 888, "Promoting Wholesale Competition Through Open Access Non-discriminatory Transmission Service by Public Utilities; Recovery of Stranded Costs by Public Utilities and Transmitting Utilities."

Please sign both originals and return one set to Puget.

Sincerely,

**Puget Sound Power & Light Company**

TRANSMISSION SERVICES

March 30, 2018

In reply refer to: TSE/TPP-2

Mr. George Marshall, Manager  
Transmission Policy and Contracts  
Puget Sound Energy, Inc.  
355 110<sup>th</sup> Avenue NE, MSC EST-06E  
Bellevue, WA 98004-5028

Subject: Contract No. DE-MS79-94BP94521

Dear Mr. Marshall:

Section 11(b)(1) of the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94521 (Capacity Ownership Agreement), between the Bonneville Power Administration (BPA) and Puget Sound Energy, Inc. (Puget) requires Puget to participate in the Remedial Action Scheme (RAS) necessary to maintain Puget's share of intertie capacity.

The RAS includes generator dropping to support north to south schedules on the AC Intertie. Puget has historically self-provided the RAS necessary to support the Puget share of intertie capacity. Therefore, the charges described below are not applicable to Puget, but the information is being provided for your records.

BPA has updated its charge for generator dropping service to account for two separate changes affecting its cost of providing the service: the 2016 upgrade of the DC Intertie and BPA's updated generator dropping rate set in the BP-18 Rate Case. The upgrade to the DC Intertie reduced the amount of generator dropping required because the DC Intertie rating went from 3,100 MW to 3,220 MW. The BP-18 Rate Case increased the cost of providing generator dropping service to reflect 1) the increase in O&M costs; 2) Grand Coulee 3rd power house outages; and 3) an increase in the Handy Whitman cost index.

The charge for generator dropping service has thus fluctuated as follows:

October 1, 2015 – February 28, 2018:	\$6.90 per MW/month
December 20, 2016 – September 30, 2017:	\$6.79 per MW/month
October 1, 2017 – present:	\$9.64 per MW/month

The new charge will be \$9.64 per MW/month.

TRANSMISSION SERVICES

January 28, 2019

In reply refer to: TSE/TPP-2

Mr. George Marshall, Manager  
Transmission Policy and Contracts  
Puget Sound Energy, Inc.  
355 110<sup>th</sup> Avenue NE, EST-6E  
Bellevue, WA 98004-5028

Subject: Contract No. DE-MS79-94BP94521

Dear Mr. Marshall:

Enclosed please find proposed amendments to the FY 2015 through FY 2020 Operating Plans. Sections 9(b)(2)(B)(iii) and 13(k) of the PNW AC Intertie Capacity Ownership Agreement (COA) allow operating plans to be amended to add replacement costs, or to increase forecasted costs. For the following Work Orders, Actual or Updated Costs exceed the Forecasted Costs by at least five percent. These Work Orders were included in prior operating plans, so the proposed Amendments to the Operating Plans below reflect the additional costs.

**Table 1**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>FY Operating Plans to be Amended</b>	<b>Forecasted Costs</b>	<b>Actual or Updated Costs<sup>1</sup></b>
00297236	Ashe-Marion No. 2 - Replace Spacer-Dampers (225.3 miles)	2016, 2018, 2019, 2020	\$4,404,125	\$4,750,000
TBD Dixonville 04	Dixonville Substation - Replace Series Capacitor Controls (PAC Project)	2015, 2016, 2017, 2018, 2019, 2020	\$600,000	\$972,000
TBD Grizzly 02	Grizzly Substation - Replace SCADA/Sequential Event Recorder (BPA Project)	2018, 2020	\$1 <sup>2</sup>	\$290,000
TBD Malin 18	Replace Sequential Event Recorder	2018, 2020	\$1 <sup>2</sup>	\$1,300,000

<sup>1</sup> The costs listed under the “Actual or Updated Costs” column are Direct Costs (without Indirect Costs or AFUDC costs). Please note that for work orders with the interim designation of “TBD”, the actual costs are not available at this time so the information listed in Table 1 is an updated cost (rounded).

<sup>2</sup> For the \$1 listed under the column “Forecasted Costs”, this was a placeholder representing that there will be a future cost. As of the date of this letter, we are providing updated information on the costs.

The following Work Orders are proposed to be *added* to the Operating Plans listed below.

**Table 2**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>FY Operating Plan(s) Proposed</b>	<b>Work Order Direct Costs as of the Date of this Letter</b>	<b>Work Order Approved &amp; Work Order Closed Dates</b>
00374787	Malin Substation - Replace Round Mountain Relays	2015, 2016, 2017, 2018	\$933,000	11/30/2014 & 1/17/2018
00439779	Ashe-Marion No. 2 - Emergency Replacement of Conductor	2017, 2018, 2019	\$4,300,000	3/7/2017 & 2/22/2018
00440381	Slatt Substation - Emergency Replacement of Breaker	2018, 2019	\$1,100,000	3/24/2017 & 11/27/2017

If you would like to recommend a revision to any forecasted cost or dispute the addition of a project, please do so through the Capacity Owner Committee (Committee). Sections 13(d), 13(e) and 13(m) of the COA detail the process and requirements. If we receive no recommendation from the Committee by February 25, 2019, the addition of these projects, as well as increased costs, will be considered accepted on February 25, 2019 according to the contract terms (See Sections 13(e) and 13(m)).

If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

**FY 2016 Schedule C**

Exhibit I

Prepared date: 1/28/2019

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2					
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$4,748,125				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 4/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$971,500	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order since 2013. This Work Order cost will be updated once BPA receives updated information from PacifiCorp.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared Date: 1/28/2019

**Project Work Order:** TBD Grizzly 02  
**Project Short Description:** Replace SCADA/Sequential Event Recorder (BPA Project)  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:**  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

February 12, 2018

In reply refer to: TSE/TPP-2

Mr. George Marshall, Manager  
Transmission Policy and Contracts  
Puget Sound Energy, Inc.  
355 110<sup>th</sup> Avenue NE, MSC EST-6E  
Bellevue, WA 98004-5028

Subject: Contract No. DE-MS79-94BP94521

Dear Mr. Marshall:

Listed in Table 1 below are the Schedule C Replacement Projects energized from April 2016 to April 2017. Table 1 summarizes the work order numbers, project information, and Puget Sound Energy, Inc's (Puget) pro rata shares of the project costs under Contract No. DE-MS79-94BP94521, PNW AC Intertie Capacity Ownership Agreement (COA). The Schedule Cs referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Document are enclosed.

**Table 1:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>9(b)(2)(B) Date<sup>1</sup></b>	<b>Puget Cost Share</b>
00339633	Chief Joseph Substation – Security Enhancements	7/7/2018	\$27,044
00356246	Grizzly Substation – Replace Analog Transfer Trip Equipment	7/21/2018	\$843
00356248	Sand Spring Compensation Station – Replace Analog Transfer Trip Equipment	8/5/2018	\$17,349
00401519	John Day Substation – Station Service Cable Replacement	2/7/2018	\$3,472
00404279	Fort Rock Compensation Station – Emergency Replacement of Transfer Switch Bank No. 1	7/10/2018	\$14,972

<sup>1</sup> The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed. Section 9(b)(2)(B) of the COA states that Bonneville Power Administration will render the bill for Replacement or Reinforcement Costs within 15 months following the date listed on which the project work order for the Replacement or Reinforcement is closed. When the 9(b)(2)(B) date shown above is in the past, such as for work order No. 00401519, it means that the work order was closed, but that the work order and Operating Plan were later amended. Work order No. 00401519 was amended to add the John Day Substation project cost pursuant to section 13(k) of the COA.

The charges for these projects will be included in Puget's February transmission bill to be sent in March 2018.

In addition, the Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00358697	Malin Substation – Replace Analog Transfer Trip Equipment	2018	Work Order Cancelled
00379615	Malin Substation – Malin Physical Security Enhancements	2016	Not applicable to COA
TBD Alvey 04	Alvey Substation – Replace Line Loss Logic Equipment for Marion Alvey Line	2016, 2018	Replaced by Work Order 00339242
TBD Alvey 05	Alvey Substation – Replace Equipment Related to Line Loss Logic/RAS	2016, 2018	Replaced by Work Order 00339242

If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

**Exhibit F Section:** B.15. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 9/30/2016  
**Work Order Completion Date:** 4/7/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,246,384	\$4,077,903	\$1,044,147	\$3,033,756	(\$1,212,628)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,123,192	\$1,015,644	\$260,056	\$755,589	(\$1,367,603)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$491,733	\$108,138	\$27,689	\$80,449	(\$411,284)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$81,678	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$6,861,309	\$5,201,685	\$1,331,891	\$3,951,472	(\$2,991,516)

**Notes:**

- 1/ This work order will be prorated for 5.9% to reflect that at Chief Joseph Substation, 1 out of 17 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$3,951,472 reflects the total costs from FY 2013-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2014-2017.
- 5/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 5.9% x \$3,951,472 = \$48,492 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			244		81,678.35

**Equipment Removal Cost Summary**

\$374,186.59 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$303,254.50 is direct cost and \$70,932.09 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00356246  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**In Service Date:** 1/13/2017  
**Work Order Completion Date:** 4/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$446,010	\$129,146	\$124,206	\$4,940	(\$441,070)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$223,005	\$53,529	\$51,482	\$2,047	(\$220,958)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$44,814	\$3,483	\$3,350	\$133	(\$44,681)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$150	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$713,829	\$186,158	\$179,038	\$7,271	(\$706,709)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$7,271 reflects the total costs from FY 2014-2018.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2018.
- 3/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this project is subject to 60% allocation. This Schedule C reflects only BPA's share of the costs associated with this work order.
- 4/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$7,271 = \$1,512 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$3,374	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$308,529	\$266,241	\$0	\$269,615	(\$42,288)

**Notes:**

- 1/ This work order will be prorated for 11.1% to reflect that at John Day Substation, 2 out of 18 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$269,615 reflects the total costs from FY 2016-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal year that is applicable to this work order is FY 2017.
- 5/ The forecast for this work order was amended per letter dated December 22, 2017.
- 6/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 11.1% x \$269,615 = \$6,225 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$2,004.54 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$1,382.44 is direct cost and \$622.10 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00404279  
**Project Short Description:** Emergency Replacement of Transfer Switch - Bank No. 1  
**Project Facility:** Fort Rock Compensation Station  
**Exhibit F Section:** B.10. Fort Rock 500 kV Compensation Station  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 2 below  
**In Service Date:** 12/22/2016  
**Work Order Completion Date:** 4/10/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/10/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference

28	<b>Footnotes</b>					
29	<sup>1/</sup> Percent (%) applied to PNWAC (right hand column of Exhibit F) is also listed at the top of the Schedule C.					
30	<sup>2/</sup> <b>Intertie Contract Proration</b> refers to contracts with PacifiCorp and PGE. In some cases the intertie cost proration is reflected in the Exhibit F to the specific Schedule C. As applicable, the percentage on row 7, above, is the cost percentage after the PacifiCorp/PGE costs are removed. If cell D7 is shaded and in italics, it means the Exhibit F percentage does not need to be applied to this cost share calculation.					
31	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, station general replacements, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.					
32	<sup>4/</sup> <b>Station General</b> is general expenses related to a particular substation that do not relate to specific pieces of power equipment. Examples include control houses, fences, gravel or security equipment. If the equipment in the work order is classified as station general and has a cost share percentage it will be displayed above.

TRANSMISSION SERVICES

June 1, 2018

In reply refer to: TSE/TPP-2

Mr. George Marshall, Manager  
Transmission Policy and Contracts  
Puget Sound Energy, Inc.  
355 110<sup>th</sup> Avenue NE, MSC EST-6E  
Bellevue, WA 98004-5028

Subject: Contract No. DE-MS79-94BP94521

Dear Mr. Marshall:

Enclosed for your records are two updated Exhibits: Exhibit F, Revision No. 1 and Exhibit G Revision No. 1 of the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94521, between the Bonneville Power Administration and Puget Sound Energy, Inc.

A draft Exhibit F, Revision No. 1 and draft Exhibit G, Revision No. 1 were provided as part of the document packet at the October 26, 2017 3<sup>rd</sup> AC Capacity Owners Annual Meeting.

The primary changes identified under Exhibit F, Revision No. 1 are as follows:

1. Add footnotes to clarify information throughout Exhibit F;
2. Add the Shunt Reactor at Alvey Substation, add the breakers and disconnect switches at Slatt Substation, and update several sections in this Exhibit F to reflect equipment added to the Intertie facilities over the years;
3. Add two disconnect switches at Grizzly Substation (for John Day terminals) and two disconnect switches at Marion Substation (for Buckley and Alvey line terminal) that were all inadvertently omitted from the original Exhibit F;
4. Add interchange meter references to Alvey Substation and Captain Jack Substation, add a Relay House to Alvey Substation, and add a Control House to Grizzly Substation and Malin Substation respectively to clarify treatment for these facilities; and
5. Add the percentages for most of the station general facilities at various substations.

The change under Exhibit G, Revision No. 1 is to update the addition of PacifiCorp and that Turlock Irrigation District is the permanent assignee of Power Resources Cooperative and not Pacific Northwest Generating Cooperative.

If you have any questions regarding this information, please contact me by June 18, 2018 at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

Digitally signed by  
jdo4978@bud.bpa.gov

Ms. Laura Hatfield, Puget Sound Energy, Inc.

Ms. Lisa MacKay, Puget Sound Energy, Inc.

Ms. Kim Gilliland, Bonneville Power Administration

2 Enclosures

*The purpose of this Exhibit F, Revision No. 1 is to: 1) add footnotes to provide clarity throughout Exhibit F; 2) update Section A.12 to reflect the line name change from McNary-Slatt to Coyote Springs-Slatt; 3) update Sections B.1 through B.14 to remove dispatcher one-line identification numbers for BPA and PacifiCorp; 4) update Section B.1 to add the Shunt Reactor at Alvey, add the Alvey Relay House and contents (relays, data systems, etc.), and add the Interchange Meter for the Dixonville 500 kV Transmission Line; 5) add a new Section B.2 for Bakeoven 500 kV Compensation Station; 6) update Sections B.3 through B.16 to add percentages for Station General; 7) update Section B.4 to change reference from Klamath Cogen to Snow Goose, add Shunt Capacitor information, and to add the Interchange Meter for the Malin No. 2 Transmission Line; 8) update Section B.6 to change references from Contract No. DE-MS79-86BP92299 to DE-MS79-94BP94332; 9) update Section B.8 to add the Grizzly Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 10) update Section B.9 to add MODs D#4130 and D#4139 of the breaker-and-a-half scheme for both Grizzly No. 2 and Grizzly No. 1 Line Terminals, respectively, in the John Day Substation that were inadvertently omitted from the original Exhibit F; 11) update Section B.10 to add the Malin Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 12) update Section B.11 to add MODs D#4385 and D#4378 in the Buckley Line Terminal and Alvey Line Terminal respectively that were inadvertently omitted from the original Exhibit F; 13) update Section B.12 to reflect that BPA has 50% (not 100%) cost share for the Dixonville Line Terminal; 14) update Section B.13 to change the title from Sand Spring to Sand Springs; 15) update Section B.14 to change from the McNary Line Terminal to the Coyote Springs Line Terminal at Slatt Substation, and; 16) update Section B.14 to add Breakers D#5043 and D#5045 and MODs D#5044 and D#5046 at Slatt Substation.*

<u>Marion No. 1 Line Terminal</u>		
• Breaker D#5084	50	100

<sup>2</sup> Portland General Electric Company's (PGE) Coyote Springs Substation was inserted between BPA's McNary Substation and BPA's Slatt Substations. Further, this update is to reflect the current transmission line name that is consistent with page D-8 of the FY 2019 Operating Plan. Only the portion of the costs associated with McNary-John Day line loop into BPA's Slatt Substation are allocated to the PNW AC Intertie. These costs are now identified as part of the Coyote Springs-Slatt No.1 and Slatt-John Day No. 1 Lines. In addition, the Transmission Tower structure numbers were renumbered from structure 108/1 to 29/1.

TRANSMISSION SERVICES

July 24, 2018

In reply refer to: TSE/TPP-2

Mr. George Marshall, Manager  
Transmission Policy and Contracts  
Puget Sound Energy, Inc.  
355 110<sup>th</sup> Avenue NE, MSC EST-6E  
Bellevue, WA 98004-5028

Subject: Contract No. DE-MS79-94BP94521

Dear Mr. Marshall:

Pursuant to Section 13(k) and 9(b)(2)(A)(v) of the PNW AC Intertie Capacity Ownership Agreement (COA), Contract No. DE-MS79-94BP94521 between Puget Sound Energy, Inc. (Puget) and the Bonneville Power Administration (BPA), I have enclosed for your review the amendment to the FY 2017 Operating Plan (Amendment).

The Amendment updates Schedules A, B, D, E, F, and G of the FY 2017 Operating Plan to reflect updated costs for FY 2017 and modifies the monthly charge related to those costs. Schedule ABFG is included to support Schedules A, B, F and G of the Operating Plan.

Each year's Operating Plan is used to forecast each Capacity Owner's allocation of qualifying expenses based on their ownership share. This monthly charge is included on each Capacity Owner's transmission bill. After the end of each fiscal year, the Operating Plan is amended to reflect actual, rather than forecasted costs. The pro-rata share of the difference between forecasted and actual costs is reflected as a one-time charge, or credit, on each Capacity Owner's transmission bill.

The actual costs are included in the "Actual" column of the Schedules A, B, D, E, F and G of the Amendment. The actual costs in Schedules D (General Plant), and E (Other-PacifiCorp) are *higher* than the forecast.

The other schedules show that actual costs in Schedules A (Operations), B (Maintenance), F (Contract and Rates), and G (Transmission Scheduling) are *lower* than the forecast.

Overall for FY 2017, actual costs for the BPA portion of the Third AC Intertie were *higher* than the forecasted costs communicated in the October 2, 2015 letter. The costs are higher by \$570,480, as shown on the summary page of the Amendment. The actual costs are \$233 per MW-month, compared to the forecasted costs of \$219 per MW-month in the 2015 letter.

The FY 2017 charge for Puget will be \$66,176 plus \$3,494 interest, calculated pursuant to Section 9(b)(2)(A)(vi) of the COA. Thus, Puget's total one time true-up charge will be \$69,670, in its July 2018 transmission bill to be sent in August 2018.

This letter also serves as notice of an amendment to add five Work Orders to the Schedule Cs of this FY 2017 Operating Plan. Note that one of the Work Orders listed below has been billed and the other was part of a cancellation notice.

<b>Work Order Number / FY 17 Operating Plan Page</b>	<b>Facility – Project Information</b>	<b>FY Operating Plan(s) Proposed</b>	<b>Work Order Direct Costs Estimate as of the Date of this Letter</b>
00248443/ Page 6	Alvey Substation – Replace Analog Transfer Trip Equipment	FY 2012, FY 2013, FY 2014, FY 2015, FY 2017	\$10,000,000
00329379/ Page 14	Marion-Alvey No. 1 – Access Road Improvements	FY 2017, FY 2018	\$729,000
00356246/ Page 28	Grizzly Substation – Replace Analog Transfer Trip Equipment	FY 2017, FY 2018	See Billing notice sent on February 12, 2018
00358697/ Page 29	Malin Substation – Analog Transfer Trip	FY 2017	See Cancellation notice sent on February 12, 2018

This letter also provides notice of amendment to the Schedule Cs of FY 2017 Operating Plan to increase the estimated cost related to the following Work Order:

1. Work Order 00339242 at Alvey Substation (Remedial Action Scheme) was originally forecasted for \$250k. Currently the estimated direct costs are nearly \$1.3M and preliminary notes state that the BPA cost share percentage will be 50%. Please refer to the WO Database Projections Report (June 12, 2018). The increased costs were originally provided in a report from PacifiCorp in April 2017. BPA's information from 2016, regarding the increase, is that the scope was broadened for changes in design, materials and construction.

In addition, we have updated the Schedule C, Table of Contents, to reflect current Work Order information, such as: cancelled Work Orders, Work Orders added to the FY 2017 Operating Plan, updates to Work Order completion dates, and Work Order descriptions.

Please review this information and respond through the Capacity Owners Committee (Committee) as provided in Sections 13(d), (e), and (m) of the COA. If the Committee recommends a revision(s) to any forecast cost, actual cost or General Plant Cost, in this Amendment, BPA will respond as provided in Section 13 of the COA. Pursuant to Sections 13(e) and (m) of the COA, if BPA does not receive a recommendation from the

Committee by August 20, 2018, the addition of these projects, together with the increased cost, will be considered accepted.

If you have any questions regarding this information, please contact me at (360) 619-6704.

Sincerely,

**FY 2017 Amended  
Operating Plan**

**Schedule A for FY 2017**

	Line No.	Forecast	Actual	Difference
<b>I. Operations Costs</b>				
<b>A. Allocation Factor</b>				
MFUs of Bonneville's PNW AC Intertie	1	81.0	81.0	
MFUs of the FCRTS	2	3,574	3,574	
MFU Allocation Factor (Line 1/Line 2 calculation rounded to two decimals)	3	2.27%	2.27%	
<b>B. Operations Functionalization Factor</b>				
Bonneville's total transmission-related systems operations cost from the rate case	4	\$78,999,106	\$79,341,107	
Bonneville's total system operations cost from rate case	5	\$78,999,106	\$79,341,107	
Operations functionalization factor (Line 4/Line 5)	6	100.00%	100.00%	
<b>C. Allocated Direct Cost</b>				
Bonneville's total system operations direct cost	7	\$67,037,127	\$72,602,467	\$5,565,340
Allocated Direct Cost of Operations Cost (Line 3 * Line 6 * Line 7)	8	\$1,519,308	\$1,645,439	\$126,131
<b>D. Indirect Cost</b>				
Bonneville's total system operations indirect cost	9	\$10,939,935	\$8,090,268	(\$2,849,667)
Indirect Cost of Operations Cost (Line 3 * Line 6 * Line 9)	10	\$247,939	\$183,355	(\$64,584)
<b>E. Overhead Cost</b>				
Bonneville's total system operations overhead cost	11	\$33,973,954	\$28,752,841	(\$5,221,113)
Overhead Cost of Operations Cost (Line 3 * Line 6 * Line 11)	12	\$769,975	\$651,645	(\$118,330)
<b>F. Operations Cost</b> (Line 8 + Line 10 + Line 12)	13	\$2,537,222	\$2,480,440	(\$56,782)

<1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.

<2 Technical Operations project reporting includes the 2017 KSI project Commercial Operations.

<3 Marketing Business Strategy and Assessment project reporting includes the three 2017 KSI projects Long-term Finance and Rates, Asset Management and Business Information Systems.

<4 Transmission Services Internal General & Administrative reporting includes the 2017 KSI project Safety and Occupational Health.

TBD Summer Lake 03	(See future billing notice letter for cancellation reason)	44

**Note 1:** For Exhibit I Schedule Cs billed, please refer to the letter previously provided per date stated above.

**Note 2:** The status of TBD Alvey Dix 01 project is determined each individual fiscal year. For FY 2017, the TBD Alvey Dix 01 has been removed from this FY 2017 operating plan.

**Key:**

Project (BPA) Work Order Status is for BPA project information prior to BPA Active (or Pending) work order status or prior to establishing a BPA work order number

Project (PAC) Work Order Status is for project information provided to BPA in April 2017 and June 2018 prior to establishing a BPA work order number

**FY 2017 Schedule C**

**Project Work Order:** 00248443  
**Project Short Description:** Install a New Shunt Reactor  
**Project Facility:** Alvey Substation  
**Exhibit F Section:** B.1. Alvey 500 kV Switchyard  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 2/24/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$9,939,138	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$4,969,569	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$2,618,206	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$17,526,913	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 7/24/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2017 Schedule C**

**Project Work Order:** 00329379  
**Project Short Description:** Access Road Improvements  
**Project Facility:** Marion-Alvey No. 1  
**Exhibit F Section:** A.11. Marion-Alvey 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**Estimated Energization Date:** 12/15/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$728,732				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$364,366				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$126,402				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,219,500				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. ## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

August 17, 2018

In reply refer to: TSE/TPP-2

Mr. George Marshall, Manager  
Transmission Policy and Contracts  
Puget Sound Energy, Inc.  
355 110<sup>th</sup> Avenue NE, MSC EST-6E  
Bellevue, WA 98004-5028

Subject: Contract No. DE-MS79-94BP94521

Dear Mr. Marshall:

Listed in Table 1 below are the Schedule C Replacement Projects energized from November 2014 to December 2017. Table 1 summarizes the work order numbers, project information, and Puget Sound Energy, Inc.'s (Puget) pro rata shares of the project costs under Contract No. DE-MS79-94BP94521, PNW AC Intertie Capacity Ownership Agreement (COA). The Schedule Cs referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Document are enclosed.

**Table 1:**

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date <sup>1</sup>	Puget Cost Share
00248443	Alvey Substation - Install a New Shunt Reactor	10/11/2018	\$1,566,518
00329379	Marion-Alvey No. 1 - Access Road Improvements	8/19/2018	\$33,142
00335841	Marion-Alvey No. 1 - Standalone Access Road: 10 miles (Related to 45 mile span of transmission line)	12/19/2018	\$186,488
00339242	Alvey Substation - Replace Remedial Action Scheme, Transfer Trip Equipment and Line Loss Relays on the Dixonville 500 kV line	10/13/2018	\$107,435

<sup>1</sup> The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed. Section 9(b)(2)(B) of the COA states that Bonneville Power Administration will render the bill for Replacement or Reinforcement Costs within 15 months following the date listed on which the project work order for the Replacement or Reinforcement is closed. When the 9(b)(2)(B) date shown above is in the past, such as for Work Order No. 00348163, it means that the Work Order was closed, but that the Work Order and Operating Plan were later amended. Work Order No. 00348163 was amended to add the John Day Substation project cost pursuant to Section 13(k) of the COA.

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date	Puget Cost Share
00348163	Grizzly-Captain Jack No. 1 - Land Rights Acquisition for Access Road, Structure 156/1	4/11/2018	\$11,367
00381350	Summer Lake Substation - Upgrade Engine Generator	1/6/2019	\$50,810
00396160	Dixonville Substation - 500 kV Relay Replacements to Meridian (PAC Project)	2/21/2019	\$66,007
00396161	Meridian Substation - 500 kV Relay Replacements to Dixonville (PAC Project)	2/21/2019	\$57,500

The charges for these projects will be included in Puget’s August transmission bill to be sent in September 2018.

In addition, the Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

Work Order No. for Schedule C	Facility – Project Information	Operating Plan(s) Listing this Work Order	Reason
00356249	Sycan Compensation Station - Replace Analog Transfer Trip Equipment for Sycan Bank No. 3	2016, 2019	Not Applicable
00432972	Malin Substation - SCADA Remote Terminal Unit (RTU) and Serial Event Recorder Replacement	2019	Work Order cancelled
00449853	Ashe-Marion No. 2 - Emergency Replacement of Access Road	2019	Work Order cancelled
TBD Malin 13	Malin Substation - Relay Replacement on the Round Mt. No 1 line	2015, 2017	Combined with TBD Malin 14 project
TBD Malin 14	Malin Substation - Relay Replacement on the Round Mt. No 2 line	2015, 2016, 2017	Combined into BPA Work Order #00374787
TBD Summerlake 03	Summerlake Substation - Work on BPA Relays on the Grizzly line	2015, 2017	Combined into BPA Work Order #00322042

Work Order No. for Schedule C	Facility – Project Information	Operating Plan(s) Listing this Work Order	Reason
TBD Sycan 01	Sycan Compensation Station - Replace Station Battery	2018	Combined into Work Order #00423702
TBD Sycan 02	Sycan Compensation Station - Station Service Engine Generator Upgrade	2018	Combined into Work Order #00423702
TBD Sycan 03	Sycan Compensation Station - Station Service Engine Generator Upgrade	2018	Combined into Work Order #00423702
TBD Sycan 04	Sycan Compensation Station - Update Grounding Equipment	2018	Combined into Work Order #00423702

If you have any questions regarding this information, feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

 Exhibit F Section: B.5. Alvey 500 kV  
 Percent of Project Cost Applied to PNW AC Intertie: 100%  
 In Service Date: 2/24/2017  
 Work Order Completion Date: 7/11/2017  
 Work Order Status: COMPLETE  
 Contract Section 9(b)(2)(B) Date: 10/11/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$9,939,138	\$9,485,755	\$0	\$9,485,755	(\$453,383)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$4,969,569	\$2,788,342	\$0	\$2,788,342	(\$2,181,227)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$2,618,206	\$1,052,746	\$0	\$1,052,746	(\$1,565,460)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$177,618	
<b>E. Total Replacement Costs and Reinforcement Costs</b>	5	\$17,526,913	\$13,326,844	\$0	\$13,504,462	(\$4,200,069)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$13,504,462 reflects the total costs from FY 2010-2017.
- 2/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 100% x 20.8% x \$13,504,462 = \$2,808,928 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$8,291.40 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$5,025.09 is direct cost and \$3,266.31 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$ 2,737	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
	5	\$174,390	\$95,257	\$0	\$97,994	(\$79,133)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$97,994 reflects the total costs from FY 2014-2017.
- 2/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 100% x 20.8% x \$97,994 = \$20,383 to be allocated pro rata among Capacity Owners.
- 3/ The forecast for this Work Order was amended per letter dated 12/22/2017.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

There were no retirement charges associated with this Work Order.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$886,643	\$748,147	\$0	\$768,448	(\$138,496)

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$768,448 reflects the total costs from FY 2015-2018.
- 2/ This Work Order will be subject to proration so that 57% of the cost will be applicable to Capacity Owners while 43% of the cost is Network cost (see top of this Exhibit).
- 3/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 57% x 20.8% x \$768,448 = \$91,107 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$5,176.05 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$3,137.00 is direct cost and \$2,039.05 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

TRANSMISSION SERVICES

September 28, 2018

In reply refer to: TSE/TPP-2

Mr. George Marshall, Manager  
Transmission Policy and Contracts  
Puget Sound Energy, Inc.  
355 110<sup>th</sup> Avenue NE, MSC EST-6E  
Bellevue, WA 98004-5028

Subject: Contract No. DE-MS79-94BP94521

Dear Mr. Marshall:

Enclosed is the proposed FY 2020 Operating Plan as required by Section 13(b)(2) of the PNW AC Intertie Capacity Ownership Agreement, Contract Number DE-MS79-94BP94521.

Pursuant to the FY 2020 Operating Plan, the projected FY 2020 monthly cost for each Capacity Owner is \$254 per MW-month.

The forecasted FY 2019 monthly cost is \$242 per MW-month, which will be reflected in your monthly transmission bills for the fiscal year starting October 1, 2018.

We will have a comprehensive discussion at the November 1, 2018 Annual Meeting. Prior to that meeting, please review the enclosed documents. If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Ochoa", is written over a faint, illegible background.

JUAN OCHOA

**Notes:**

<sup>1/</sup> Schedule C amounts are not included in Totals. Schedule C forecasts are presented separately (attached).

<sup>2/</sup> Southern Intertie North to South is 4800 MW; BPA's share is 72% or 3450 MW.

**FY 2020  
Operating Plan**

**Schedule A for FY 2020***Data taken from the BP-18 Rate Case*

	Line No.	Forecast	Actual	Difference
<b>I. Operations Costs</b>				
<b>A. Allocation Factor</b>				
MFUs of Bonneville's PNW AC Intertie	1	81.0		
MFUs of the FCRTS	2	3,574		
Allocation Factor (Line 1/Line 2)	3	2.27%		
<b>B. Operations Functionalization Factor</b>				
Bonneville's total transmission-related systems operations cost from the BP-18 Rate Case	4	\$100,314,727		
Bonneville's total system operations cost from the BP-18 Rate Case	5	\$100,314,727		
Operations functionalization factor (Line 4/Line 5)	6	100.00%		
<b>C. Allocated Direct Cost</b>				
Bonneville's total system operations direct cost	7	\$88,422,021		
Allocated Direct Cost of Operations Cost (Line 3 * Line 6 * Line 7)	8	\$2,003,969		
<b>D. Indirect Cost</b>				
Bonneville's total system operations indirect cost	9	\$11,892,706		
Indirect Cost of Operations Cost (Line 3 * Line 6 * Line 9)	10	\$269,533		
<b>E. Overhead Cost</b>				
Bonneville's total system operations overhead cost	11	\$38,012,116		
Overhead Cost of Operations Cost (Line 3 * Line 6 * Line 11)	12	\$861,495		
<b>F. Operations Cost</b> (Line 8 + Line 10 + Line 12)	<b>13</b>	<b>\$3,134,996</b>		

**Note:**

Line No. 4 above references 2.27% as the round up for 2.266368%.

This information is being released externally by BPA on 9/28/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020  
Operating Plan**

**Schedule B for FY 2020**

<i>Data taken from the BP-18 Rate Case</i>	Line No.	Forecast	Actual	Difference
<b>II. Maintenance Cost</b>				
<b>A. Power System Control (PSC) Maintenance Functionalization Factor</b>				
Bonneville's transmission-related PSC maintenance cost from the BP-18 Rate Case	1	<u>\$40,975,439</u>	_____	_____
Bonneville's total PSC maintenance cost from the BP-18 Rate Case	2	<u>\$40,975,439</u>	_____	_____

*Below is information about work orders added or removed, acronyms and further information.*

*NOTE: Tables on this page are intentionally blank, and will be updated when this operating plan is amended.*

<b>Work Order Numbers ADDED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

<b>Work Order Numbers REMOVED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

**Note 1:** The status of TBD Alvey-Dixonville 01 project is determined for each individual fiscal year.

**Note 2:** The status of TBD Dixonville-Meridian 02 project is determined for each individual fiscal year.

**Key:**

BPA Project Work Order Status is for BPA project information prior to BPA Active (or Pending) Work Order status or prior to establishing a BPA Work Order number.

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)  
  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,374,063				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$1,232,581				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$8,354,769				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 5/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00335885  
 Project Short Description: Land Rights Acquisition for Access Road, Structure 152/2  
 Project Facility: Ashe-Marion No. 2  
 Exhibit F Section: A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

Percent of Project cost applied to PNW AC Intertie: 25%  
 Estimated Energization Date: 11/15/2019  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,263,220				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$631,610				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$122,087				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,016,917				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Per Exhibit F, Section A.3. above, this Work Order will be subject to proration, such that 25% of the cost will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00355355  
**Project Short Description:** Upgrade Station Service  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.5. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 8/30/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,675,488				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$837,744				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$329,788				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,843,020				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will be prorated to reflect that at Chief Joseph Sub, 1 terminal out of 17 (500 kV) line terminals supports the AC Intertie.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00356244  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Fort Rock Compensation Station  
**Exhibit F Section:** B.7. Fort Rock 500 kV Compensation Station)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 1/13/2017  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$167,215	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$83,608	_____	_____	_____	_____

AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$139,784				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00416195  
**Project Short Description:** SCADA Replacement  
**Project Facility:** Captain Jack Substation  
**Exhibit F Section:** B.4. Captain Jack 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 9/27/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,811,734				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$905,867				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$225,459				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,943,060

Direct Costs of Replacements and Reinforcements	1	\$3,150,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$1,575,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$413,964				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$5,138,964				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C reflects BPA's 50% cost share for this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: TBD Alvey Dixonville 01  
 Project Short Description: Miscellaneous Right-of-Way Capital Repairs (PAC Project)  
 Project Facility: Alvey-Dixonville  
 Exhibit F Section: A.1. Alvey-Dixonville 500 kV  
 Percent of Project cost applied to PNW AC Intertie: 100%  
 Estimated Energization Date: 1/1/2020  
 Status: Project (PAC)  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$100,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$100,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Work Order represents BPA's 50% cost share obligation for work performed by PAC.

**FY 2020 Schedule C**

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs (Lines 1 + 2 + 3 + 4)</b>						
	5	\$971,500	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order (WO) since 2013. This WO cost information will be updated once received.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Project Work Order:** TBD Dixonville-Meridian 02  
**Project Short Description:** Miscellaneous Right-of-Way Capital Repairs (PAC Project)  
**Project Facility:** Dixonville-Meridian  
**Exhibit F Section:** A.6. Dixonville-Meridian 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 1/1/2020  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$100,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$100,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA owns 50% of the equipment covered by this Work Order. Therefore, 50% of costs are applicable to Capacity Owners. Please see Contract No. DE-MS79-94BP94332.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: TBD Grizzly 02  
 Project Short Description: Replace SCADA/Sequential Event Recorder (BPA Project)  
 Project Facility: Grizzly Substation  
 Exhibit F Section: B.8. Grizzly 500 kV  
 Percent of Project cost applied to PNW AC Intertie:  
 Estimated Energization Date:  
 Status: Project (BPA)  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$289,999				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$145,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$434,999				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

(Lines 1 + 2 + 3 + 4)	5	\$132,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

November 21, 2018

In reply refer to: TSE/TPP-2

Mr. George Marshall, Manager  
Transmission Policy and Contracts  
Puget Sound Energy, Inc.  
355 110<sup>th</sup> Avenue NE, MSC EST-6E  
Bellevue, WA 98004-5028

Subject: Contract No. DE-MS79-94BP94521

Dear Mr. Marshall:

Listed in Table 1 below is the Schedule C Replacement Project energized in June 2017. Table 1 summarizes the work order number, project information, and Puget Sound Energy, Inc.'s (Puget) pro rata share of the project costs under Contract No. DE-MS79-94BP94521, PNW AC Intertie Capacity Ownership Agreement. The Schedule C referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Document are enclosed.

**Table 1:**

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date	Puget Cost Share
00340156	Marion Substation – Transfer Trip Replacement	11/21/2018	\$24,331

The charge for this project will be included in Puget's November transmission bill to be sent in December 2018.

The Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00379612	Grizzly Substation – Physical Security Project	2017	General Plant
00381830	Malin Substation – Replacement of Communication Battery Charger	2017	General Plant
00381831	Fort Rock Compensation Station – Replacement of Communication Battery Charger	2017	General Plant
00381833	Sycan Compensation Station – Replacement of Communication Battery Charger	2017	General Plant
00384207	Buckley Substation – Replace Line Relay on Slatt Terminal	2019	Not Applicable
TBD Dixonville 05	Dixonville Substation – Regravel Yard	2018, 2019	Not Applicable

If you have any questions regarding this information, feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

**Project Work Order:** 00340156  
**Project Short Description:** Transfer Trip Replacement  
**Project Facility:** Marion Substation  
**Exhibit F Section:** B.11. Marion 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**In Service Date:** 6/2/2017  
**Work Order Completion Date:** 8/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 11/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,659,057	1,659,057.49	757,144.08	\$901,913	(\$757,144)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$829,529	478,287.80	218,276.21	\$260,012	(\$569,517)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$229,761	95,119.80	43,409.82	\$51,710	(\$178,051)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$46,136	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,718,347	\$2,232,465	\$1,018,830	\$1,259,771	(\$1,504,712)

**Notes:**

- 1/ For this Work Order, only one out of three terminals applies, so 33.3% of the costs will be applicable to the Capacity Owners.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$1,259,771 reflects the total costs from FY 2014-2018.
- 3/ Cost sharing percentage x One out of three terminals x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 50% x 33.3% x 20.8% x \$1,259,771 = \$43,629 to be allocated pro rata among Capacity Owners.
- 4/ The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed and will not receive additional charges.

This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$69,576.46 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$56,551.02 is direct cost and \$13,025.44 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

## Customer Billing Shares Document for November 21, 2018 Letter

24	Tacoma	0.0110
25	Turlock	0.0140
26	<b>Total</b>	<b>0.2080</b>
27	<b>Footnotes</b>	
28	<sup>1/</sup> <b>BPA Percent (%) owned</b> (left hand column of Exhibit F) reflects BPA's ownership share of each project and is included here for reference only, as row 3 above reflects only BPA's cost share of the project.	
29	<sup>2/</sup> <b>Percent (%) applied to PNW AC</b> (right hand column of Exhibit F) is also listed at the top of the Schedule C.	
30	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.	
31	<sup>4/</sup> <b>Station General</b> refers to elements in a substation that are not attributable to specific pieces of power equipment. Examples include control houses, water/drainage systems, fences, and yard rock.	
32	This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.	

*The purpose of this Exhibit F, Revision No. 1 is to: 1) add footnotes to provide clarity throughout Exhibit F; 2) update Section A.12 to reflect the line name change from McNary-Slatt to Coyote Springs-Slatt; 3) update Sections B.1 through B.14 to remove dispatcher one-line identification numbers for BPA and PacifiCorp; 4) update Section B.1 to add the Shunt Reactor at Alvey, add the Alvey Relay House and contents (relays, data systems, etc.), and add the Interchange Meter for the Dixonville 500 kV Transmission Line; 5) add a new Section B.2 for Bakeoven 500 kV Compensation Station; 6) update Sections B.3 through B.16 to add percentages for Station General; 7) update Section B.4 to change reference from Klamath Cogen to Snow Goose, add Shunt Capacitor information, and to add the Interchange Meter for the Malin No. 2 Transmission Line; 8) update Section B.6 to change references from Contract No. DE-MS79-86BP92299 to DE-MS79-94BP94332; 9) update Section B.8 to add the Grizzly Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 10) update Section B.9 to add MODs D#4130 and D#4139 of the breaker-and-a-half scheme for both Grizzly No. 2 and Grizzly No. 1 Line Terminals, respectively, in the John Day Substation that were inadvertently omitted from the original Exhibit F; 11) update Section B.10 to add the Malin Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 12) update Section B.11 to add MODs D#4385 and D#4378 in the Buckley Line Terminal and Alvey Line Terminal respectively that were inadvertently omitted from the original Exhibit F; 13) update Section B.12 to reflect that BPA has 50% (not 100%) cost share for the Dixonville Line Terminal; 14) update Section B.13 to change the title from Sand Spring to Sand Springs; 15) update Section B.14 to change from the McNary Line Terminal to the Coyote Springs Line Terminal at Slatt Substation, and; 16) update Section B.14 to add Breakers D#5043 and D#5045 and MODs D#5044 and D#5046 at Slatt Substation.*

<sup>2</sup> Portland General Electric Company's (PGE) Coyote Springs Substation was inserted between BPA's McNary Substation and BPA's Slatt Substations. Further, this update is to reflect the current transmission line name that is consistent with page D-8 of the FY 2019 Operating Plan. Only the portion of the costs associated with McNary-John Day line loop into BPA's Slatt Substation are allocated to the PNW AC Intertie. These costs are now identified as part of the Coyote Springs-Slatt No.1 and Slatt-John Day No. 1 Lines. In addition, the Transmission Tower structure numbers were renumbered from structure 108/1 to 29/1.

<sup>14</sup> Line relays at Summer Lake Substation on the Malin Transmission Line are 50%/50% cost shared between BPA and PacifiCorp via Contract No. DE-MS79-94BP94332.

*The purpose of this Revision No. 1 in the table below is to update the addition of PacifiCorp effective January 1, 1995, and the Capacity Owner name to reflect the permanent assignment from Power Resource Cooperative (PRC) to Turlock Irrigation District effective January 1, 2016.<sup>1</sup>*

### Capacity Owners

CAPACITY OWNER	CONTRACT NUMBER	CAPACITY OWNERSHIP SHARE (MW)	CAPACITY OWNERSHIP PERCENTAGE
<b>PSE</b>	DE-MS79-94BP94521	400	11.6
<b>Seattle</b>	DE-MS79-94BP94522	160	4.6
<b>Turlock</b>	DE-MS79-94BP94523	50	1.4
<b>Tacoma Power</b>	DE-MS79-94BP94524	41	1.1
<b>Snohomish</b>	DE-MS79-94BP94525	42	1.2
<b>PacifiCorp</b>	DE-MS79-95BP94628	32	0.9

<b>PSE</b>	Puget Sound Energy, Inc. formerly called Puget Sound Power & Light Company
<b>Seattle</b>	The City of Seattle, City Light Department aka Seattle City Light
<b>Turlock</b>	Turlock Irrigation District
<b>Tacoma Power</b>	City of Tacoma, Department of Public Utilities, Light Division dba Tacoma Power
<b>Snohomish</b>	Public Utility District No. 1 of Snohomish County
<b>PacifiCorp</b>	PacifiCorp

<sup>1</sup> Pacific Northwest Generating Company was updated to reflect PRC on November 30, 2000.

**FY 2016 Schedule C**

Exhibit I

Prepared date: 1/28/2019

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2					
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$4,748,125				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 4/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$971,500	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order since 2013. This Work Order cost will be updated once BPA receives updated information from PacifiCorp.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared Date: 1/28/2019

**Project Work Order:** TBD Grizzly 02  
**Project Short Description:** Replace SCADA/Sequential Event Recorder (BPA Project)  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:**  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$289,999				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$145,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$434,999				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this Schedule C may be subject to 60% allocation to determine the BPA costs associated with this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Malin 18  
**Project Short Description:** Replace Sequential Event Recorder (BPA Project)  
**Project Facility:** Malin Substation  
**Exhibit F Section:** B.10. Malin 500 kV  
**Percent of Project cost applied to PNW AC Intertie:**  
**Estimated Energization Date:** 5/31/2021  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,300,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$650,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,950,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract Nos. 14-03-29224, 14-03-29225 and DE-MS79-94BP94332 with PacifiCorp and/or Portland General Electric this Schedule C may be subject to 50% allocation to determine the BPA costs associated with this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** 00374787  
**Project Short Description:** Replace Round Mountain Relays  
**Project Facility:** Malin Substation  
**Exhibit F Section:** B.10. Malin 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**In Service Date:** 12/11/2017  
**Work Order Completion Date:** 1/17/2018  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 4/17/2019

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$932,978				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$466,489				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$103,916				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,503,383				

**Notes:**

- 1/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2018.
- 2/ This work order was previously TBD Round Mountain No. 01 and TBD Malin 07, 08, 09, 10, 11, 12 per notice in letters dated 6/30/2016 and 2/17/2017, respectively.
- 3/ Pursuant to Contract Nos. 14-03-29224, 14-03-29225 and DE-MS79-94BP94332 with PacifiCorp and/or Portland General Electric this Schedule C may be subject to 50% allocation to determine the BPA costs associated with this Work Order.
- 4/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2017 Schedule C**

Exhibit I

Prepared date: 1/28/2019

**Project Work Order:** 00439779  
**Project Short Description:** Emergency Replacement of Conductor  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

**Percent of Project cost applied to PNW AC Intertie:** 25%  
**In Service Date:** 1/31/2018  
**Work Order Completion Date:** 2/22/2018  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 5/22/2019

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,258,194				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,129,097				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$137,600				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$6,524,891				

**Notes:**

- 1/ Pursuant to Section A.3 of Exhibit F this Schedule C is 25% applicable to PNW AC Intertie.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2017-2018.
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. - <1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.
- <2 Technical Operations project reporting includes the 2017 KSI project Commercial Operations.
- <3 Marketing Business Strategy and Assessment project reporting includes the three 2017 KSI projects Long-term Finance and Rates, Asset Management and Business Information Systems.
- <4 Transmission Services Internal General & Administrative reporting includes the 2017 KSI project Safety and Occupational Health.

**FY 2017 Amended

TBD Summer Lake 03	(See future billing notice letter for cancellation reason)	44

**Note 1:** For Exhibit I Schedule Cs billed, please refer to the letter previously provided per date stated above.

**Note 2:** The status of TBD Alvey Dix 01 project is determined each individual fiscal year. For FY 2017, the TBD Alvey Dix 01 has been removed from this FY 2017 operating plan.

**Key:**

Project (BPA) Work Order Status is for BPA project information prior to BPA Active (or Pending) work order status or prior to establishing a BPA work order number

Project (PAC) Work Order Status is for project information provided to BPA in April 2017 and June 2018 prior to establishing a BPA work order number

**FY 2017 Schedule C**

**Project Work Order:** 00248443  
**Project Short Description:** Install a New Shunt Reactor  
**Project Facility:** Alvey Substation  
**Exhibit F Section:** B.1. Alvey 500 kV Switchyard  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 2/24/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$9,939,138	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$4,969,569	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$2,618,206	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$17,526,913	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 7/24/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,219,500				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 7/24/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			153		177,618.02

**Equipment Removal Cost Summary**

\$8,291.40 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$5,025.09 is direct cost and \$3,266.31 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

Project Work Order: 00339242  
 Project Short Description: Replace Remedial Action Scheme, Transfer Trip Equipment and Line Loss Relays on the Dixonville 500 kV line  
 Project Facility: Alvey Substation  
 Exhibit F Section: B.5. Alvey 500 kV  
 Percent of Project Cost Applied to PNWAC Intertie: 100%  
 In Service Date: 6/2/2017  
 Work Order Completion Date: 7/13/2017  
 Work Order Status: COMPLETE  
 Contract Section 9(b)(2)(B) Date: 10/13/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,222,998	\$683,386	\$0	\$683,386	(\$539,612)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$611,499	\$199,608	\$0	\$199,608	(\$411,891)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$171,894	\$19,076	\$0	\$19,076	(\$152,819)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$24,094	
<b>E. Total Replacement Costs and Reinforcement Costs</b>	5	\$2,006,391	\$902,070	\$0	\$926,164	(\$1,104,322)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ BPA owns 50 percent of the equipment covered by this Work Order. PacifiCorp's 50 percent share has already been subtracted from the "Actual" column, so no further adjustment is needed. See Exhibit F, column labeled "% BPA owned" and Contract No. DE-MS79-94BP94332.
- 2/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$926,164 reflects the total costs from FY 2013-2018.
- 3/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 100% x 20.8% x \$926,164 = \$192,642 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			304		24,093.97

**Equipment Removal Cost Summary**

\$70,768 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$57,239 is direct cost and \$13,529 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00348163  
**Project Short Description:** Land Rights Acquisition for Access Road, Structure 156/1  
**Project Facility:** Grizzly - Captain Jack No. 1  
**Exhibit F Section:** A.4. Grizzly - Captain Jack No. 1 500 kV  
**Percent of Project Cost Applied to**  
**PNW AC Intertie:** 100%  
**In Service Date:** 9/30/2017  
**Work Order Completion Date:** 1/11/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 4/11/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$106,555	\$95,257	\$0	\$95,257	(\$11,298)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$53,278	\$0	\$0	\$0	(\$53,278)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$14,558	\$0	\$0	\$0	(\$14,558)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$ 2,737	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
	5	\$174,390	\$95,257	\$0	\$97,994	(\$79,133)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$97,994 reflects the total costs from FY 2014-2017.
- 2/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 100% x 20.8% x \$97,994 = \$20,383 to be allocated pro rata among Capacity Owners.
- 3/ The forecast for this Work Order was amended per letter dated 12/22/2017.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

27	<b>Footnotes</b>									
28	<sup>1/</sup> BPA Percent (%) owned (left hand column of Exhibit F) reflects BPA's ownership share of each project and is included here for reference only, as row 3 above reflects only BPA's cost share of the project.									
29	<sup>2/</sup> Percent (%) applied to PNW AC (right hand column of Exhibit F) is also listed at the top of the Schedule C.									
30	<sup>3/</sup> Other Proration occurs when a project supports both inertie and non-inertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.									
31	<sup>4/</sup> Station General refers to elements in a substation that are not attributable to specific pieces of power equipment. Examples include control houses, water/drainage systems, fences, and yard rock.									
32	This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.									

**Project Work Order:** 00340156  
**Project Short Description:** Transfer Trip Replacement  
**Project Facility:** Marion Substation  
**Exhibit F Section:** B.11. Marion 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**In Service Date:** 6/2/2017  
**Work Order Completion Date:** 8/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 11/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,659,057	1,659,057.49	757,144.08	\$901,913	(\$757,144)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$829,529	478,287.80	218,276.21	\$260,012	(\$569,517)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$229,761	95,119.80	43,409.82	\$51,710	(\$178,051)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$46,136	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,718,347	\$2,232,465	\$1,018,830	\$1,259,771	(\$1,504,712)

**Notes:**

- 1/ For this Work Order, only one out of three terminals applies, so 33.3% of the costs will be applicable to the Capacity Owners.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$1,259,771 reflects the total costs from FY 2014-2018.
- 3/ Cost sharing percentage x One out of three terminals x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 50% x 33.3% x 20.8% x \$1,259,771 = \$43,629 to be allocated pro rata among Capacity Owners.
- 4/ The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed and will not receive additional charges.

This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$69,576.46 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$56,551.02 is direct cost and \$13,025.44 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**In Service Date:** 9/30/2016  
**Work Order Completion Date:** 4/7/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,246,384	\$4,077,903	\$1,044,147	\$3,033,756	(\$1,212,628)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,123,192	\$1,015,644	\$260,056	\$755,589	(\$1,367,603)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$491,733	\$108,138	\$27,689	\$80,449	(\$411,284)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$81,678	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$6,861,309	\$5,201,685	\$1,331,891	\$3,951,472	(\$2,991,516)

**Notes:**

- 1/ This work order will be prorated for 5.9% to reflect that at Chief Joseph Substation, 1 out of 17 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$3,951,472 reflects the total costs from FY 2013-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2014-2017.
- 5/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 5.9% x \$3,951,472 = \$48,492 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$446,010	\$129,146	\$124,206	\$4,940	(\$441,070)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$223,005	\$53,529	\$51,482	\$2,047	(\$220,958)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$44,814	\$3,483	\$3,350	\$133	(\$44,681)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$150	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$713,829	\$186,158	\$179,038	\$7,271	(\$706,709)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$7,271 reflects the total costs from FY 2014-2018.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2018.
- 3/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this project is subject to 60% allocation. This Schedule C reflects only BPA's share of the costs associated with this work order.
- 4/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$7,271 = \$1,512 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. **Equipment Removal Cost Summary**

\$3,242.20 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$2,157.40 is direct cost and \$1,084.76 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00401519  
**Project Short Description:** Station Service Cable Replacement  
**Project Facility:** John Day Substation  
**Exhibit F Section:** B.2. John Day 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 4/29/2016  
**Work Order Completion Date:** 11/7/2016  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 2/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$202,870	\$202,670	\$0	\$202,670	(\$200)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$101,435	\$60,366	\$0	\$60,366	(\$41,069)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$4,224	\$3,205	\$0	\$3,205	(\$1,019)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$3,374	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$308,529	\$266,241	\$0	\$269,615	(\$42,288)

**Notes:**

- 1/ This work order will be prorated for 11.1% to reflect that at John Day Substation, 2 out of 18 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$269,615 reflects the total costs from FY 2016-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal year that is applicable to this work order is FY 2017.
- 5/ The forecast for this work order was amended per letter dated December 22, 2017.
- 6/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 11.1% x \$269,615 = \$6,225 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

27	<b>Total</b>	<b>0.2080</b>				
28	<b>Footnotes</b>					
29	<sup>1/</sup> <b>Percent (%) applied to PNWAC</b> (right hand column of Exhibit F) is also listed at the top of the Schedule C.					
30	<sup>2/</sup> <b>Intertie Contract Proration</b> refers to contracts with PacifiCorp and PGE. In some cases the intertie cost proration is reflected in the Exhibit F to the specific Schedule C. As applicable, the percentage on row 7, above, is the cost percentage after the PacifiCorp/PGE costs are removed. If cell D7 is shaded and in italics, it means the Exhibit F percentage does not need to be applied to this cost share calculation.					
31	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, station general replacements, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.					
32	<sup>4/</sup> <b>Station General</b> is general expenses related to a particular substation that do not relate to specific pieces of power equipment. Examples include control houses, fences, gravel or security equipment. If the equipment in the work order is classified as station general and has a cost share percentage it will be displayed above.

Project Work Order: 00335841  
 Project Short Description: Standalone Access Road: 10 miles (Related to 45 mile span of transmission line)  
 Project Facility: Marion-Alvey No. 1  
 Exhibit F Section: A.9. Marion-Alvey 500 kV  
 Percent of Project Cost Applied to PNW AC Intertie: 50%  
 In Service Date: 2/15/2017  
 Work Order Completion Date: 9/19/2017  
 Work Order Status: COMPLETE  
 Contract Section 9(b)(2)(B) Date: 12/19/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$2,980,395	\$2,467,799	\$0	\$2,467,799	(\$512,596)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$1,490,198	\$622,061	\$0	\$622,061	(\$868,136)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$399,579	\$91,364	\$0	\$91,364	(\$308,215)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$34,083	
<b>E. Total Replacement Costs and Reinforcement Costs</b>	5	\$4,870,172	\$3,181,224	\$0	\$3,215,307	(\$1,688,948)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ The percent applicable to the PNW AC Intertie for this Work Order is 50%. Reference Exhibit F, % PNW AC Intertie column.
- 2/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$3,215,307 reflects the total costs from FY 2013-2017.
- 3/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 50% x 20.8% x \$3,215,307 = \$334,392 to be allocated pro rata among Capacity Owners.
- 4/ The forecast for this Work Order was amended per letter dated 12/22/2017.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Work Order 00335841**  
**Work Order Completion Date 9/19/2017**

**Interest Calculation**

<b>From</b>	<b>To</b>	<b>%</b>	<b>Days</b>	<b>Amount</b>	<b>Interest</b>
9/1/2017	12/31/2017		122	\$3,181,224	\$34,083.37
9/1/2017	9/29/2017	3.170%	29		8,011.24

10/31/2017	11/29/2017	3.216%	30		8,409.76
11/30/2017	12/31/2017	3.225%	32		8,994.58
			122		34,083.37

**Equipment Removal Cost Summary**

There were no retirement charges associated with this Work Order.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

Project Work Order: 00339242  
 Project Short Description: Replace Remedial Action Scheme, Transfer Trip Equipment and Line Loss Relays on the Dixonville 500 kV line  
 Project Facility: Alvey Substation  
 Exhibit F Section: B.5. Alvey 500 kV  
 Percent of Project Cost Applied to PNWAC Intertie: 100%  
 In Service Date: 6/2/2017  
 Work Order Completion Date: 7/13/2017  
 Work Order Status: COMPLETE  
 Contract Section 9(b)(2)(B) Date: 10/13/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,222,998	\$683,386	\$0	\$683,386	(\$539,612)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$611,499	\$199,608	\$0	\$199,608	(\$411,891)

**Equipment Removal Cost Summary**

There were no retirement charges associated with this work order.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

Contract No. DE-MS79-94BP94521

July 29, 1994

The Bonneville Power Administration  
P.O. Box 3621  
Portland, Oregon 97208-3621

Attention: Mr. Patrick McRae -- YC-911  
Senior Account Executive

**Re: Temporary Transmission Service**

Dear Patrick:

In response to your letter to Puget dated July 25, 1994, Puget Sound Power & Light Company ("Puget") agrees to provide to the Bonneville Power Administration ("Bonneville") temporary transmission service pursuant to and subject to the following:

1. Puget shall, subject to the immediately succeeding sentence, provide to Bonneville transmission service for the transmission to Bonneville's Ellensburg Substation of up to four (4) megawatts of electric power delivered by Bonneville to Puget's White River Substation (such electric power so delivered, "Electric Power"). Puget shall provide such transmission service for a three (3) week period (or for such longer period as Puget and Bonneville may agree upon) commencing at 0000 hours on any day from August 4, 1994, through August 15, 1994; provided, however that such transmission service shall be provided by Puget during such period only to the extent that system capability and energy are, in Puget's sole determination, available to Puget for such purpose.

2. Bonneville shall, at its own cost and expense, install and, during the period of service referred to in paragraph 1 above, operate and maintain metering equipment that will measure the energy delivered by Puget to Bonneville's Ellensburg Substation pursuant to this letter agreement.

[07772-0375/BA942090.032]

The Bonneville Power Administration  
Attention: Mr. Patrick McRae  
July 29, 1994  
Page 2

3. To compensate Puget for transmission losses incurred by Puget in providing the transmission service contemplated by this letter agreement, Bonneville shall, during each hour of the period of service referred to in paragraph 1 above, make available to Puget at Puget's White River Substation, contemporaneously with the delivery of Electric Power, an amount of power equal to (a) the amount of Electric Power delivered by Bonneville in such hour multiplied by (b) 1.085 (the same loss factor used for transmission service to the Teanaway point of delivery under the General Transfer Agreement).

4. This letter agreement is subject to the rules, regulations, orders and other requirements, now or hereafter in effect, of all regulatory authorities having jurisdiction over this letter agreement, Puget or Bonneville, including but not limited to the Federal Energy Regulatory Commission. All laws, ordinances, rules, regulations, orders and other requirements, now or hereafter in effect, of regulatory authorities that are required to be incorporated in agreements of this character are by this reference incorporated in this letter agreement.

5. This letter agreement may be amended only with the express written consent of both Bonneville and Puget and no provision of this letter agreement shall be varied or contradicted by any oral agreement, course of dealing or performance or otherwise except as may be set forth hereafter in a written agreement signed by both Bonneville and Puget.

The Bonneville Power Administration  
Attention: Mr. Patrick McRae

TRANSMISSION SERVICES

November 17, 2010

In reply refer to: TSE/TPP-2

Contract No. 10TX-14834  
Letter Agreement

Mr. Doug Faulkner  
Manager, Resource Integration  
Puget Sound Energy, Inc.  
P.O. Box 97034  
Bellevue, WA 98009-9734

Dear Mr. Faulkner:

This Letter Agreement (Agreement) reconciles the outstanding net over-return of losses by Puget Sound Energy, Inc. (Puget) to the Bonneville Power Administration (Bonneville) for transmission service for the time period between July 1, 2001 and August 31, 2009. Bonneville and Puget are sometimes referred to individually as "Party" and jointly as "Parties."

Therefore, Bonneville and Puget agree as follows:

1. From July 1, 2001, through August 31, 2009, Puget over-and-under returned losses for schedules under multiple contracts, resulting in a net over-return to Bonneville of 127,271 MWh. Bonneville agrees to financially compensate Puget for such net over-return. The Parties determined that the monthly average of the Dow Jones Mid-C Daily Index provides the best reflection of the cost to Puget of over-returning the transmission losses for the months involved. For the 127,271 MWh, this value is determined to be \$5,601,664.00. Attachments A, B and C describe the calculation of the 127,271 MWh of losses and the associated compensation amount of \$5,601,664.00.
2. In order to compensate Puget for the 127,271 MWh of net over-returns as described above, Bonneville shall pay Puget a lump sum amount of \$5,601,664.00. Bonneville shall pay such amount to Puget by electronic funds transfer no later than 20 days following the date Puget provides Bonneville with an invoice and its banking instructions for the payment.

*ma*

3. The Parties agree that this Agreement constitutes full and final settlement regarding over-and-under-returned losses by Puget to Bonneville during the period July 1, 2001, through August 31, 2009 for the following contracts:

14-03-001-14502	DE-MS79-88BP92427
14-03-001-13439	DE-MS79-88BP92461
14-03-45241	DE-MS79-90BP92781
DE-MS79-94BP93947	01TX-10748
14-03-001-13574	06TX-12195
14-03-39361	03TX-11539
DE-MS79-95BP93081	DE-MS79-94BP94521

Neither Party may pursue any further action against the other related to these losses, whether in dispute resolution, in court, at the Federal Energy Regulatory Commission or elsewhere, other than to enforce this Agreement.

4. This Agreement represents the entire agreement of the Parties. This Agreement supersedes any agreements and representation made by the Parties in all prior discussions, negotiations and agreements, whether oral or written, relating to the subject matter of this Agreement.

If you are in agreement with the foregoing terms and conditions, please indicate your agreement by signing both originals and returning one executed original to my attention at one of the following addresses:

**Re: Pacific Northwest AC Intertie Capacity Ownership Agreements  
-- Operating Plans for Fiscal Years 1996 and 1997**

Gentlemen and Ladies:

This letter refers to each of the PNW AC Intertie Capacity Ownership Agreements, Contract Nos. DE-MS79-94BP94521, DE-MS79-94BP94522, DE-MS79-94BP94523, DE-MS79-94BP94524, DE-MS79-94BP94525 and DE-MS79-94BP94528, as each has been amended to the date hereof (the "Capacity Ownership Agreements"). All capitalized terms used in this letter agreement, unless otherwise defined in this letter agreement, have the respective meanings set forth for such terms in the Capacity Ownership Agreements.

As provided in agreements between Bonneville and each of the Capacity Owners (i.e., Contract Nos. 95MS-95121, 95MS-95122, 95MS-95123, 95MS-95124, 95MS-95125 and 95MS-95126), Bonneville agreed to extend until December 8, 1995, the time limit for the Committee to recommend, pursuant to subsection 13(e) of the Capacity Ownership Agreements, revisions to the Operating Plans for fiscal years 1996 and 1997 submitted to the Committee by Bonneville on August 1, 1995 (the "Initial Operating Plans"). Pursuant to such agreements, Bonneville and the

Committee have in the meantime met in collaborative sessions to attempt to reach mutual agreement on elements of the Operating Plans. As a result of such sessions, Bonneville submitted to the Committee on December 6, 1995, revised Operating Plans for fiscal years 1996 and 1997 (the "Revised Operating Plans"). Each of the Capacity Owners and Bonneville, believing that agreement on elements of the Operating Plans has been reached, therefore agree as follows:

1. The Committee hereby submits to Bonneville the enclosed Revised Operating Plans as the Committee's recommended revisions to all of the forecast costs and General Plant Costs in the Initial Operating Plans pursuant to subsection 13(e) of the Capacity Ownership Agreements (the "Recommended Revisions").

2. Pursuant to subsection 13(g) of the Capacity Ownership Agreements, (a) Bonneville hereby accepts the Recommended Revisions in their entirety for all purposes of the Capacity Ownership Agreements, (b) Bonneville shall not reject the Recommended Revisions and (c) Bonneville shall not propose any action that is responsive to the Committee's Recommended Revisions and that is different from Bonneville's proposal contained in the Initial Operating Plans or in the Revised Operating Plans.

3. The Revised Operating Plans constitute, for all purposes of the Capacity Ownership Agreements, the Operating Plans setting forth the Operations Cost, Maintenance Cost, Replacement Costs and Reinforcement Costs, General Plant Cost, Other Costs, Contracts and Rates Costs, Power Costs, Power Scheduling Costs and End of Term Costs for fiscal years 1996 and 1997, until the Revised Operating Plans are amended (if at all) pursuant to subsection 13(k) of the Capacity Ownership Agreements.

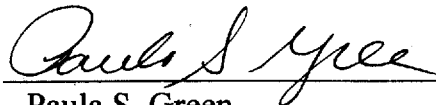

4. No amendment, change or other modification of this letter agreement shall be valid unless set forth in a writing hereafter signed by Bonneville and by or on behalf of each of the Capacity Owners.

Department of Energy  
Bonneville Power Administration

- <1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.
- <2 Technical Operations project reporting includes the 2017 KSI project Commercial Operations.
- <3 Marketing Business Strategy and Assessment project reporting includes the three 2017 KSI projects Long-term Finance and Rates, Asset Management and Business Information Systems.
- <4 Transmission Services Internal General & Administrative reporting includes the 2017 KSI project Safety and Occupational Health.

**Note 1:** For Exhibit I Schedule Cs billed, please refer to the letter previously provided per date stated above.

**Note 2:** The status of TBD Alvey Dix 01 project is determined each individual fiscal year. For FY 2017, the TBD Alvey Dix 01 has been removed from this FY 2017 operating plan.

**Key:**

Project (BPA) Work Order Status is for BPA project information prior to BPA Active (or Pending) work order status or prior to establishing a BPA work order number

Project (PAC) Work Order Status is for project information provided to BPA in April 2017 and June 2018 prior to establishing a BPA work order number

**FY 2017 Schedule C**

**Project Work Order:** 00248443  
**Project Short Description:** Install a New Shunt Reactor  
**Project Facility:** Alvey Substation  
**Exhibit F Section:** B.1. Alvey 500 kV Switchyard  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 2/24/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$9,939,138	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$4,969,569	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$2,618,206	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$17,526,913	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 7/24/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2017 Schedule C**

**Project Work Order:** 00329379  
**Project Short Description:** Access Road Improvements  
**Project Facility:** Marion-Alvey No. 1  
**Exhibit F Section:** A.11. Marion-Alvey 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**Estimated Energization Date:** 12/15/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$728,732				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$364,366				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$126,402				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,219,500				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

**Note:**

Line No. 4 above references 2.27% as the round up for 2.266368%.

This information is being released externally by BPA on 9/28/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020  
Operating Plan**

**Schedule B for FY 2020**

<i>Data taken from the BP-18 Rate Case</i>	Line No.	Forecast	Actual	Difference
<b>II. Maintenance Cost</b>				
<b>A. Power System Control (PSC) Maintenance Functionalization Factor</b>				
Bonneville's transmission-related PSC maintenance cost from the BP-18 Rate Case	1	<u>\$40,975,439</u>	_____	_____
Bonneville's total PSC maintenance cost from the BP-18 Rate Case	2	<u>\$40,975,439</u>	_____	_____
PSC maintenance functionalization factor (Line 1/Line 2)	3	<u>100.00%</u>	_____	_____
<b>B. Direct Cost</b>				
Total PSC direct maintenance cost	4	<u>\$40,975,439</u>	_____	_____
MFU Allocation Factor (Schedule A, Line 3)	5	<u>2.27%</u>	_____	_____
PSC direct maintenance cost Bonneville's PNW AC Intertie (Line 4 * Line 3 * Line 5)	6	<u>\$928,654</u>	_____	_____
Bonneville's direct cost of maintaining Bonneville's PNW AC Intertie excluding PSC maintenance cost	7	<u>\$1,431,906</u>	_____	_____
Direct Cost of Maintenance Cost (Line 6 + Line 7)	8	<u>\$2,360,560</u>	_____	_____
<b>C. Allocation Factor</b>				
Bonneville's total system maintenance direct cost	9	<u>\$163,326,808</u>	_____	_____
Allocation factor for Indirect Cost and Overhead Cost (Line 8/Line 9)	10	<u>1.45%</u>	_____	_____
<b>D. Indirect Cost</b>				
Bonneville's total system maintenance indirect cost	11	<u>\$11,009,818</u>	_____	_____
Indirect Cost of Maintenance Cost (Line 11 * Line 10)	12	<u>\$159,125</u>	_____	_____
<b>E. Overhead Cost</b>				
Bonneville's total system maintenance overhead cost	13	<u>\$66,061,129</u>	_____	_____
Overhead Cost of Maintenance Cost (Line 13 * Line 10)	14	<u>\$954,781</u>	_____	_____
<b>F. Maintenance Cost</b> (Lines 8 + 12 + 14)	<b>15</b>	<b><u>\$3,474,466</u></b>	_____	_____

**Note:**

Line No. 4 above references 2.27% as the round up for 2.266368%.

*Below is information about work orders added or removed, acronyms and further information.*

*NOTE: Tables on this page are intentionally blank, and will be updated when this operating plan is amended.*

<b>Work Order Numbers ADDED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

<b>Work Order Numbers REMOVED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

**Note 1:** The status of TBD Alvey-Dixonville 01 project is determined for each individual fiscal year.

**Note 2:** The status of TBD Dixonville-Meridian 02 project is determined for each individual fiscal year.

**Key:**

BPA Project Work Order Status is for BPA project information prior to BPA Active (or Pending) Work Order status or prior to establishing a BPA Work Order number.

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)  
  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,374,063				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$1,232,581				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$8,354,769				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 5/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00335885  
 Project Short Description: Land Rights Acquisition for Access Road, Structure 152/2  
 Project Facility: Ashe-Marion No. 2  
 Exhibit F Section: A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

Percent of Project cost applied to PNW AC Intertie: 25%  
 Estimated Energization Date: 11/15/2019  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,263,220				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$631,610				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$122,087				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,016,917				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Per Exhibit F, Section A.3. above, this Work Order will be subject to proration, such that 25% of the cost will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00355355  
**Project Short Description:** Upgrade Station Service  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.5. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 8/30/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,675,488				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$837,744				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$329,788				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,843,020				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will be prorated to reflect that at Chief Joseph Sub, 1 terminal out of 17 (500 kV) line terminals supports the AC Intertie.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00356244  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Fort Rock Compensation Station  
**Exhibit F Section:** B.7. Fort Rock 500 kV Compensation Station)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 1/13/2017  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$167,215				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$83,608				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$16,818				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$267,640				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration so that 2/3's of the costs will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00367753  
 Project Short Description: Ground Wire Replacement  
 Project Facility: John Day-Grizzly No. 1  
 Exhibit F Section: A.9. John Day-Grizzly No. 1 500 kV  
 Percent of Project cost applied to  
 PNW AC Intertie: 100%  
 Estimated Energization Date: 8/28/2020  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$535,621				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$267,811				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$114,896				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$918,328				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

AFUDC of Replacements and Reinforcements	3	\$225,459				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,943,060				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ The BPA ownership share for this equipment is 100% and please reference Exhibit F, Station General, in Section B.4.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00416257  
**Project Short Description:** Replace Overhead Ground Wire  
**Project Facility:** John Day-Grizzly No. 1  
**Exhibit F Section:** A.9. John Day-Grizzly No. 1 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 11/15/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$114,112				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$57,056				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$14,783				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$185,951				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00420153  
**Project Short Description:** Replace Potential Transformers  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.5. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:**  
**Estimated Energization Date:** 12/31/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$244,128				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$122,064				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$22,443				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$388,635				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will be prorated to reflect that at Chief Joseph Sub, 1 terminal out of 11 (230 kV) line terminals supports the AC Intertie.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$100,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$100,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Work Order represents BPA's 50% cost share obligation for work performed by PAC.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** TBD Dixonville 03  
**Project Short Description:** Relay Replacement on Alvey Line (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$241,789				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$241,789				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C reflects BPA's 50% cost share for this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs (Lines 1 + 2 + 3 + 4)</b>						
	5	\$971,500	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order (WO) since 2013. This WO cost information will be updated once received.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Project Work Order:** TBD Dixonville-Meridian 02  
**Project Short Description:** Miscellaneous Right-of-Way Capital Repairs (PAC Project)  
**Project Facility:** Dixonville-Meridian  
**Exhibit F Section:** A.6. Dixonville-Meridian 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 1/1/2020  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$100,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$100,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA owns 50% of the equipment covered by this Work Order. Therefore, 50% of costs are applicable to Capacity Owners. Please see Contract No. DE-MS79-94BP94332.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: TBD Grizzly 02  
 Project Short Description: Replace SCADA/Sequential Event Recorder (BPA Project)  
 Project Facility: Grizzly Substation  
 Exhibit F Section: B.8. Grizzly 500 kV  
 Percent of Project cost applied to PNW AC Intertie:  
 Estimated Energization Date:  
 Status: Project (BPA)  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$289,999				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$145,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$434,999				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

(Lines 1 + 2 + 3 + 4)	5	\$334,833				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Pacific Northwest AC Intertie Capacity**

**Assignment Agreement**

**between**

**The City of Seattle, by and through its City Light Department**

**and**

**EDF Trading North America, LLC**

15107  
and

94522

This Assignment Agreement ("**Assignment Agreement**"), is made and entered into this 31<sup>st</sup> day of August 2010, ("**Execution Date**") by and among The City of Seattle, a Washington municipal corporation, acting by and through its City Light Department with offices at 700 Fifth Ave., Seattle, WA 98104, ("**City Light**" or "**Assignor**"), and EDF Trading North America, LLC ("**Assignee**") with offices at 4700 W. Sam Houston Pkwy N., Suite 250, Houston, TX 77041. Assignee and City Light are sometimes individually referred to in this Assignment Agreement individually as "**Party**" and together as "**Parties**".

**RECITALS**

WHEREAS, City Light holds Capacity Ownership Rights to certain transmission capacity on the Pacific Northwest AC Intertie ("**PACI**") under its PNW AC Intertie Capacity Ownership Agreement with the Bonneville Power Administration dated September 27, 1994 ("**COA**"); and

WHEREAS, City Light is interested in partially assigning certain transmission capacity available under its COA for a limited term; and

WHEREAS, in accordance with Section 6 of the COA, City Light may, with the consent of Bonneville Power Administration, assign all or a portion of its Capacity Ownership Share and associated rights and obligations pursuant to the COA; and

WHEREAS, Assignee desires to obtain transmission capacity through a partial assignment of City Light's Capacity Ownership Share under the COA, and City Light desires to assign to Assignee a portion of its transmission capacity under the COA for a

period of five years and on the terms and conditions set forth in this Assignment Agreement.

NOW, THEREFORE, in consideration of the mutual agreements, covenants and conditions herein contained, the Parties agree as follows:

## **ARTICLE 1 DEFINITIONS**

As used in this Assignment Agreement, the following terms shall have the meanings set forth below. Certain other capitalized terms are defined where they appear in this Assignment Agreement. Capitalized terms used but not defined in this Assignment Agreement shall have the meaning set forth in the COA, BPA Tariff or BPA Business Practices as the case may be.

**"Affiliate"** means with respect to any Person, each Person that directly or indirectly, controls or is controlled by or is under common control with such designated Person. For purposes of this definition, "control" (including, with correlative meanings, the terms "controlled by" and "under common control with"), as used with respect to any Person, shall mean the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of such Person, whether through the ownership of voting securities or by contract or otherwise.

**"Assignee"** has the meaning set forth in the Preamble to this Assignment Agreement.

**"Assignee's Capacity Percentage"** means 2.087%. See Exhibit C for the table that identifies the assignee's capacity percentage as the ratio of the Assignee's Capacity Share, in MW north-to-south, to BPA's 3,450 MW PACI Rated Transfer Capability.

**"Assignee's Capacity Share"** means 72 MW north-to-south and 55 MW south-to-north and certain rights and obligations pursuant to the COA as specified in Section 3.2 of this Assignment Agreement.

**"Assignee's Scheduling Percentage"** is 1.5%, which means the Assignee's Capacity Share divided by the PNW AC Intertie Rated Transfer Capability.

**"Assignee's Scheduling Share"** means, for any given hour, the MW amount equal to the product of Assignee's Scheduling Percentage and the PNW AC Intertie

Operational Transfer Capability for such hour. At full north-to-south capacity of 4,800 MW, Assignee's Scheduling Share will be equal to 72 MW (4800 \* 1.5/100).

**"Assignment Agreement"** has the meaning set forth in the Preamble.

**"Assignor"** has the meaning set forth in the Preamble to this Assignment Agreement.

**"Balancing Authority"** means the responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Balancing Authority Area, and supports Interconnection frequency in real time. For purposes of this definition, the word "Interconnection" shall mean any one of the three major electric system networks in North America; Eastern, Western, and ERCOT.

**"Balancing Authority Area"** means the collection of generation, transmission and loads within the metered boundaries of the Balancing Authority. The Balancing Authority maintains load-resource balance within this area.

**"Bonneville Power Administration", "BPA" or "Bonneville"** means the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION.

**"BPA Business Practices"** refers to the policies and procedures set forth for doing business with BPA as amended from time to time and published by BPA in their Open Access Same Time Information System (OASIS).

**"BPA Tariff"** means BPA's Open Access Transmission Tariff in effect at the relevant time during the Term.

**"Business Day"** means any day other than Saturday, Sunday, or a legal public holiday as designed in Article 6103 of Title 5, U.S. Code or by Executive Order or federal statute or in accordance with WECC practice and variations as identified in the WECC prescheduling calendar.

**"Calendar Month"** means a month during the Term of this Assignment Agreement commencing at 0000 hours PPT on the first day of the month and ending at 2400 hours PPT on the last day of the month.

**"Capacity Owner"** has the meaning set forth in Section 1 of the COA.

**"Capacity Ownership Agreement" or "COA"** has the meaning set forth in the Recitals to this Agreement.

**"Capacity Ownership Rights"** has the meaning set forth in Section 1 of the COA.

**"Capacity Ownership Share"** has the meaning set forth in Section 1 of the COA.

**"City Light"** has the meaning set forth in the Preamble to this Assignment Agreement.

**"Commencement Time"** has the meaning set forth in Section 2.1.

**"Committee"** has the meaning set forth in Section 1 of the COA.

**"Consent Agreement"** has the meaning set forth in Section 2.2.

**"Credit Support"** means any of the following: a bond, Letter of Credit, guarantee or other reasonable and commercially priced security, in an amount as reasonably determined by City Light, and in a form and from a source approved by City Light.

**"Defaulting Party"** has the meaning set forth in Section 7.1.

**"Event of Default"** has the meaning set forth in Section 7.1.

**"Execution Date"** has the meaning set forth in the Preamble.

**"Interest Rate"** means, on any date, the per annum rate of interest equal to the Prime Rate plus two percent (2%) provided that the Interest Rate shall never exceed the maximum rate permitted by applicable law.

**"Letter of Credit"** means an irrevocable, transferable, standby letter of credit, reasonably acceptable in form and substance to the beneficiary thereof, which letter of credit is issued by a Qualified Institution.

**"Material Adverse Change"** means any effect, change, occurrence, development, condition or event that, individually or in the aggregate, has had or would reasonably be expected to have a material adverse effect (financial or otherwise) on Assignee's business, taken as a whole; provided that the following shall not be considered when determining whether a Material Adverse Change has occurred: any effect resulting from (a) any materially adverse change in economic conditions in the industry within the WECC region; (b) any materially adverse change in currency rates; (c) any materially adverse change in any laws or accounting rules generally applicable to similarly situated Persons; (d) any materially adverse change resulting from changes in the international, national, regional or local wholesale or retail gas or power markets, and renewable energy or emissions markets; (e) the commencement, occurrence or

intensification of any war, sabotage or armed hostilities; (f) acts of terrorism; or (g) any materially adverse change in Assignee's business which is cured (including by payment of money) before Assignor requests additional Credit Support.

**"Non-Defaulting Party"** has the meaning set forth in Section 7.1(a).

**"PACI"** has the meaning set forth in the Recitals.

**"Parties"** has the meaning set forth in the Preamble to this Assignment Agreement.

**"Payment Due Date"** has the meaning set forth in Section 5.2.

**"Pacific Prevailing Time"** means the prevailing time (i.e., Standard Time or Daylight Savings Time) on any given day in the Pacific Time Zone.

**"Person"** means any natural person, sole proprietorship, partnership, corporation, limited liability company, trust, joint venture, any governmental authority or any incorporated or unincorporated entity or association of any nature.

**"PNW AC Intertie Rated Transfer Capability"** means the north-to-south and south-to-north capability of the PNW AC Intertie to transfer power in a reliable manner as determined consistent with Prudent Utility Practice.

**"Point of Delivery"** or **"POD"** has the meaning set forth in Section 3.1.

**"Point of Receipt"** or **"POR"** has the meaning set forth in Section 3.1.

**"PPT"** means Pacific Prevailing Time.

**"Preschedule"** means the schedule submitted by the Assignee pursuant to paragraph 3.2(c)(ii)(A) for transactions prepared each Business Day for the period beginning 2400 hours of the current Business Day through 2400 hours of the next Business Day.

**"Prime Rate"** means the rate published in *The Wall Street Journal* under "Money Rates," as the "Prime Rate" from time to time (or, if more than one rate is published, the arithmetic mean of such rates), in either case determined as of the date the obligation to pay interest arises, but in no event more than the maximum rate permitted by Applicable Law.

**"Prudent Utility Practice"** has the meaning set forth in Section 1 of the COA.

**"Qualified Institution"** means a major U.S. commercial bank or a U.S. branch office of a foreign bank, in either case having (i) assets of at least USD \$10 billion and (ii) a Credit Rating from one or more of S&P, Moody's and Fitch, which Credit Rating is at least "A-" from S&P (in the event that such bank has a Credit Rating from S&P), "A3" from Moody's (in the event that such bank has a Credit Rating from Moody's) and "A-" from Fitch (in the event that such bank has a Credit Rating from Fitch).

**"Real Power Losses"** means energy lost during transmission of power caused by the electrical resistance of high-voltage transmission lines.

**"Real-time Schedule"** means a schedule, or change to the Preschedule, submitted during the period which begins when the Preschedule is deemed to be complete and concludes at 2400 hours on the day for which the Preschedule is submitted by Assignee.

**"Term"** has the meaning set forth in Section 2.1.

**"Termination Time"** has the meaning set forth in Section 2.1.

**"USD"** means United States Dollars.

## **ARTICLE 2**

### **TERM AND TERMINATION**

**2.1 Term and Termination.** Subject to Section 3.4, the **"Term"** shall commence at 0000 hours on November 1, 2010 (**"Commencement Time"**) and shall terminate at 2400 hours on October 31, 2015 (**"Termination Time"**) All times are PPT. In the event that the COA terminates prior to the Termination Time, this Assignment Agreement shall also terminate coincidentally with the termination of the COA, *provided, however* that if an Event of Default as set forth in Section 7.1(e) causes the termination of the COA, Assignee shall be entitled to a Termination Payment pursuant to section 7.2. Upon termination or expiration of this Assignment Agreement, all accrued liabilities shall survive until satisfied.

**2.2 Conditions Precedent.** This Assignment Agreement is conditional upon and shall not take effect or be enforceable against either Party until (1) confirmation by BPA through execution by BPA of a separate agreement consenting to the partial assignment to the Assignee of the Assignee's Capacity Share and the terms and

conditions of this Assignment Agreement, (the "Consent Agreement") and (2) BPA has completed all necessary scheduling system changes necessary to implement this Assignment Agreement.

### **ARTICLE 3**

#### **ASSIGNMENT OF CAPACITY OWNERSHIP SHARE**

**3.1 Product.** In accordance with the COA and this Assignment Agreement, City Light shall assign and transfer to the Assignee the Assignee's Capacity Share for the Term of this Assignment Agreement. Assignee shall have the right under this Assignment Agreement during any hour of the Term to schedule Assignee's energy up to the Assignee's Scheduling Share.

(a) The "Point of Receipt" or "POR" and "Point of Delivery" or "POD" shall be

(i) South-to-north (1) POR at the California-Oregon border, Captain Jack or Malin substations, and (2) POD at the Washington-Oregon border, John Day substation; and

(ii) North-to-south (1) POR at the Washington-Oregon border, John Day substation, and (2) POD at the California-Oregon border at Captain Jack or Malin substations.

#### **3.2 Assignee's Capacity Share Rights and Obligations.**

(a) During the Term, Assignee shall be entitled to use the Assignee's Capacity Percentage in any manner that is permitted under this Assignment Agreement and is consistent with both the COA and BPA Business Practices.

(b) **No Third Party Wheeling.**

(i) Except as expressly provided in subparagraph 3.2(b)(ii), Assignee shall not use its Assignee's Scheduling Share to transmit power or energy (except for inadvertent power flows) that Assignee does not own at the California-Oregon border or for which transmission Assignee receives any revenue that would be reportable in Assignee's accounting system where revenues received for wheeling for other entities would be booked.

(ii) If Assignee's Scheduling Share is not fully utilized by Assignee in any hour, Bonneville may schedule for such hour Bonneville's transactions (including, without limitation, Bonneville wheeling for other entities) and wheel such transactions, over the unused portion of Assignee's Scheduling Share for such hour but no longer than such hour. Assignee shall not be compensated for Bonneville's usage of any unused portion of Assignee's Scheduling Share. For purposes of this subparagraph 3.2(b)(ii), Assignee's Scheduling Share shall be deemed to be not fully utilized in a given hour to the extent that Assignee has not scheduled, or does not schedule, on a Preschedule or Real-time Schedule basis, any transaction for such hour for any MW amount of the Assignee's Scheduling Share.

(c) **Scheduling.**

(i) Assignee (and only Assignee) shall be entitled to schedule on the PNW AC Intertie, in any hour, a MW amount up to Assignee's Scheduling Share for such hour. The MW amount of Assignee's Scheduling Share deemed to be scheduled on the PNW AC Intertie pursuant to this Agreement, in any hour, shall be determined as the net of Assignee's north-to-south schedules and south-to-north schedules (net schedules) for such hour.

(ii) Assignee shall submit all schedules of Assignee's Scheduling Share on its own behalf in accordance with the procedures set forth in applicable interchange scheduling standards and BPA Business Practices with specific procedures and exceptions described in paragraphs 3.2(c)(ii)(A) and 3.2(c)(ii)(B). Such procedures may be varied by the mutual agreement of BPA and Assignee's schedulers. Such mutual agreement may, but need not, be written.

(A) **Preschedules.**

(1) Assignee shall submit its Preschedule by e-Tag in accordance with the provisions of the BPA Scheduling Transmission Service Business Practice.

(B) **Real-time Scheduling.** Real-time Schedules shall be submitted by e-Tag in accordance with the provisions of the BPA Scheduling Transmission Service Business Practice for scheduling transmission service or its successor.

(d) **Real Power Losses and Transmission Loss Factor.** Assignee shall be responsible for returning (or arranging for the return of) Real Power Losses to BPA associated with use of Assignee's Scheduling Share during the Term in a manner consistent with applicable BPA requirements. Assignee shall return losses, at its sole cost and expense, and in accordance with Exhibit E of the COA, Item A. Currently, the transmission loss factor is 2.5%, but can change pursuant to the terms of the COA.

### **3.3 City Light Rights and Obligations.**

(a) City Light shall request BPA provide Assignee any information not otherwise publicly available regarding changes to the PACI that would increase or decrease the Assignee's Scheduling Share

(b) In the event, pursuant to Section 7(b) of the COA, City Light is notified by BPA of a change in the PNW AC Intertie Rated Transfer Capability or a substantial change in the reliability criteria for determining the PNW AC Intertie Rated Transfer Capability not otherwise publicly available, City Light shall promptly notify Assignee of such adjustment.

(c) City Light shall make commercially reasonable, good faith efforts to persuade BPA to give fair consideration to Assignee's interests under Section 7(a) and 7(e) of the COA to the extent such interests have been expressed to BPA in writing.

(d) City Light will provide Assignee with the results of any BPA review under Section 13(c)(10) of the COA that results in a revision to the transmission loss factor in Exhibit E, Part A including any additional information provided to City Light by BPA that is pertinent to such review and the results of any arbitration should arbitration be pursued.

(e) City Light retains all rights and responsibilities with respect to the Capacity Owner's Committee under the COA.

(f) Upon execution of this Assignment Agreement, City Light shall provide, within 10 days, written notice to BPA of the assignment.

## **ARTICLE 4 PRICE, CREDIT**

**4.1 Payment Obligations:** During the Term Assignee shall be responsible for the following payment obligations associated with the Assignee's Capacity Share:

(a) **To City Light:** the Price for the Assignee's Capacity Share as shown in Exhibit A, and

(b) **To BPA:** any applicable ancillary services charges except those defined in or set forth on Schedule 1 (Scheduling, System Control and Dispatch Service as defined or similarly described in the BPA Tariff) and Schedule 2 (Reactive Supply and Voltage Control from Generation or Other Sources Service as defined or similarly described in the BPA Tariff) of the BPA Tariff, which will be paid by City Light.

**4.2 Credit Support.**

(a) During the Term, if there is any Material Adverse Change affecting Assignee, City Light, in its discretion, may require Assignee to provide Credit Support sufficient to assure that Assignee will continue to meet its current contractual obligations under this Assignment Agreement and its contractual obligations for the next twelve (12) Months from the date of the demand for Credit Support (or if the remaining Term of this Assignment Agreement is less than twelve (12) Months, for the remaining Term of this Assignment Agreement). Should Assignee be unable to provide the necessary Credit Support, Assignee shall require that EDF Trading Limited, Assignee's indirect parent corporation, shall provide the necessary Credit Support.

(b) Following a demand for Credit Support and until such time as Assignee is no longer experiencing or affected by a Material Adverse Change, Assignee or EDF Trading Limited, whichever the case may be, shall maintain satisfactory Credit Support on an ongoing, rolling basis sufficient to assure its current contractual obligations and its contractual obligations for the following twelve (12) Months. At the request of either Party, Credit Support shall be increased or decreased as appropriate once per calendar month such that the party providing Credit Support will be able to meet its then-current contractual obligations and its future contractual obligations under this Assignment Agreement for the next twelve (12) month period (or if the remaining Term of this Assignment Agreement is less than twelve (12) months, for the remaining Term of this Assignment Agreement).

(c) If Assignee or EDF Trading Limited fails to provide such Credit Support within ten (10) Days of a request for Credit Support or fails to maintain Credit Support as set forth above, City Light may suspend its performance under this Assignment Agreement until such Credit Support is posted or may treat the failure to provide Credit Support as a default and exercise its rights under Article 7 of this Assignment Agreement.

(d) At City Light's written request, Assignee or EDF Trading Limited shall furnish the City Light financial information as may be reasonably required to confirm that Assignee or EDF Trading Limited has not been affected by a Material Adverse Change.

## **ARTICLE 5**

### **BILLING AND PAYMENT**

**5.1 Monthly Billing.** No later than the tenth (10<sup>th</sup>) Day of each calendar month during the Term, City Light shall deliver to Assignee an invoice setting forth the total amount due for the purchase by Assignee of Assignee's Capacity Share for the immediately preceding month as described in Exhibit A.

**5.2 Payments to City Light.** Assignee shall pay the amount specified in the bill to City Light by electronic wire transfer of immediately available funds by the later of ten (10) Days after Assignee's receipt of City Light's invoice or the twentieth (20<sup>th</sup>) Day of the month in accordance with the wire transfer instructions set out in **Exhibit B, Contact Information**, as it may be changed from time to time; *provided, however*, that any changes to such wire transfer instructions shall not be effective until five (5) Business Days after the date on which notice of the change is sent to Assignee and if the due date is not a Business Day, Assignee shall pay the monthly bill on the Business Day following such due date ("**Payment Due Date**"). If Assignee fails to pay an amount when due, it will pay City Light interest on the unpaid balance at the Interest Rate from the Payment Due Date until payment in full.

## **ARTICLE 6**

### **NOTICES; CONTACTS**

6.1 All notices, requests, statements or payments from one Party to the other Party shall be made to the addresses specified in Exhibit B. All notices, requests, or statements from one Party to the other Party shall be made in writing. Notices required to be in writing shall be delivered by the United States Postal Service, hand delivery, overnight delivery, facsimile or e-mail. Notice from one Party to the other Party by facsimile shall (where confirmation of successful transmission is received) be deemed to have been received on the day on which it was transmitted (unless transmitted after 5:00 p.m. at the place of receipt or on a day that is not a Business Day, in which case it shall be deemed received on the next Business Day). Notice from one Party to the other Party by hand delivery or overnight delivery shall be deemed to have been received when delivered. Notices sent by e-mail must be confirmed by e-mail as received by the receiving Party. A Party may change its address by providing notice of the same in accordance herewith.

## **ARTICLE 7**

### **EVENT OF DEFAULT**

7.1 An **"Event of Default"** means with respect to a Party (the **"Defaulting Party"**):

(a) the failure by the Defaulting Party to make, when due, any payment required pursuant to this Assignment Agreement or the COA if such failure is not remedied within 2 Business Days after written notice of such failure is given to the Defaulting Party by the other Party (the **"Non-Defaulting Party"**);

(b) the failure by the Defaulting Party to provide or maintain Credit Support in accordance with the requirements of Section 4.2;

(c) the material breach of any other of the material covenants, terms or conditions of this Assignment Agreement or the COA, where such breach is not remedied within 10 days of written notice of such breach by the Non-Defaulting Party;

(d) the institution, with respect to the Defaulting Party (or any guarantor thereof), by the Defaulting Party (or any guarantor thereof) or by another Person, of a bankruptcy, reorganization, moratorium, liquidation or similar insolvency proceeding or other relief under any bankruptcy or insolvency law affecting creditors'

rights, or the presentation or institution of a petition for the winding-up or liquidation of the Defaulting Party; or

(e) the termination of the COA as a result of circumstances within SCL's reasonable control without Assignee's consent, which in all cases will be deemed to be an Event of Default with respect to Assignor.

**7.2 Rights Upon Event of Default; Termination Payment.** If an Event of Default occurs, the Non-Defaulting Party shall have the right to terminate this Assignment Agreement upon notice to the Defaulting Party, such notice of termination to be effective immediately upon receipt ("**Termination Date**").

(a) If City Light is the Defaulting Party, City Light will pay to Assignee (in addition to any other amounts which may be due from City Light to Assignee) within 10 Business Days after the Termination Date of this Agreement, as a termination payment with respect to this Assignment Agreement, the amount, if any, by which (i) the aggregate amount that Assignee, acting in a commercially reasonable manner, pays or, using its commercially reasonable efforts, would have paid to replace Assignee's Capacity Share for the period between the Termination Date and the Termination Time, exceeds (ii) the aggregate Price that Assignee would have paid in respect of the same such period pursuant to this Assignment Agreement if the Event of Default had not occurred (prorated for any partial Calendar Month on the basis of the number of days in such Calendar Month).

(b) If Assignee is the Defaulting Party, Assignee will pay to City Light (in addition to any other amounts which may be due from Assignee to City Light) within 10 Business Days after the Termination Date, as a termination payment with respect to the Assignee's Capacity Share, an amount equal to the positive difference, if any, obtained by subtracting (xx) the aggregate amount that City Light obtains or, using its commercially reasonable efforts, could have obtained for the Assignee's Capacity Share for the period between the Termination Date and the Termination Time from (yy) the aggregate Price that Assignee would have paid for each Calendar Month (or portion thereof) during that same period pursuant to this Assignment Agreement (prorated for any partial Calendar Month on the basis of the number of days in such Calendar Month).

**7.3 Rights upon Termination of COA.** If the COA terminates for a reason other than that set forth in Section 7.1(e) above, and if Assignor decides in its sole

discretion to pursue claims, and thereafter receives any damages or other compensation in connection with such termination from BPA, Assignor shall pay Assignee its proportionate share of such damages or other compensation, such proportion to be calculated by dividing Assignee's Capacity Share by Assignor's Capacity Ownership Share and factoring in the Assignee's limited duration of rights and obligations.

**7.4 Survival of Liability.** In no event shall termination of this Assignment Agreement for any reason relieve either Party of any liability for any amounts due or payable to the other Party with respect to any period prior to such termination.

## **ARTICLE 8**

### **REPRESENTATIONS AND WARRANTIES; ADDITIONAL COVENANTS**

**8.1 Representations and Warranties of the Parties.** Each Party represents and warrants to the other Party as of the Execution Date as follows:

(a) it is duly organized, validly existing and in good standing under the laws of the jurisdiction of its formation, is duly qualified to do business in those jurisdictions in which it is necessary for the conduct of its business and to enter into and perform the transactions contemplated by this Assignment Agreement and the Consent Agreement, except for failures which in the aggregate are not material to the other Parties, and has all requisite corporate or other similar power and authority and the legal right to own and operate its properties and to conduct its business as currently conducted;

(b) the execution, delivery and performance of this Assignment Agreement and the Consent Agreement and the consummation by it of the transactions contemplated hereby and thereby (i) are within its organizational powers and have been or will be duly authorized by all necessary action, and (ii) do not and will not, with the passing of time or giving of notice or both, violate or conflict with its articles or certificate of incorporation, by-laws or comparable constitutive or governing documents as currently composed, any law applicable to it, any order or judgment of any governmental authority applicable to it or any agreement to which it is a party or by which it is bound, nor will it result in the breach, default or termination of any agreement to which it is a party; and

(c) this Assignment Agreement and the Consent Agreement have been duly executed and delivered and constitute a legal, valid and binding obligation of such Party enforceable against such Party in accordance with its terms, except as such enforceability may be limited by Seattle Municipal Code 5.24.005, bankruptcy, insolvency or similar laws affecting the rights of creditors generally, and with regard to equitable remedies, to equitable defenses and the discretion of the court before which proceedings to obtain such remedies may be pending.

(d) except for Assignor's challenge to the Oregon Department of Revenue's tax assessment case (The City of Seattle, et. al. v. Oregon Department of Revenue, Oregon Tax Court No. TC-4946), there is no suit, action, claim, arbitration, proceeding or investigation pending or, to its knowledge, threatened against such Party before any governmental entity that relates to or involves it, or the COA;

(e) it understands and agrees that no Party is acting as a fiduciary, advisor or agent to any other Party with respect to this Consent Agreement or the transactions contemplated hereby; and

(f) no petition or notice has been presented, no order has been presented, no order has been made and no resolution has been passed for its bankruptcy, liquidation, winding-up or dissolution, and no receiver, trustee, custodian or similar fiduciary has been appointed over the whole or any part of any of its assets or income, and it has not received any notice that any other person has any plan or intention of, filing, making or obtaining any such petition, notice, order or resolution or of seeking the appointment of a receiver, trustee, custodian or similar fiduciary.

## **8.2 Additional Representations and Warranties and Covenants of City Light.**

- (a) City Light represents and warrants to Assignee that
  - (i) it is currently a party to the COA and has a Capacity Ownership Share under the COA;
  - (ii) it has the right and power pursuant to City of Seattle Ordinance 123276, subject to BPA approval, to assign all or a part of its Capacity Ownership Share to Assignee on the terms and subject to the conditions set forth in this Assignment Agreement;

- (iii) the COA is in full force and effect and has been duly authorized, executed and delivered by it, and constitutes a legal, valid, binding and enforceable agreement as to it;
- (iv) this Assignment Agreement and the Consent Agreement will not affect the validity of the COA, which will continue to be legal, valid, binding, enforceable and in full force and effect on substantially identical terms following the consummation of the transactions contemplated hereby;
- (v) it is not in breach of or in default under the COA, and it has no knowledge of an event that has occurred which with the passage of time or giving of notice or both would constitute such a default, result in a loss of rights or permit termination, modification or acceleration under, or result in the creation of any lien under the COA (except for Assignor's challenge to the Oregon Department of Revenue's tax assessment case (The City of Seattle, et. al. v. Oregon Department of Revenue, Oregon Tax Court No. TC-4946)) and no such event, condition or circumstance would occur or exist as a result of it entering into or performing its obligations under this Assignment Agreement or the Consent Agreement. It has no knowledge of any state of facts or condition that exists (i) that is or may be reasonably likely to be materially adverse to the rights or obligations of it under the COA or (ii) that is or would reasonably be expected to prevent the performance by it of any of its obligations hereunder or under the COA or the consummation of the transactions contemplated by this Assignment Agreement or the Consent Agreement;
- (vi) it has not entered into any written or oral amendments, supplements, or other modifications of the COA, except as described in the definition of "COA" set forth in the Consent Agreement;

- (vii) no amounts currently due under the COA are delinquent;
- (viii) no party to the COA has provided notice to it that it has repudiated, canceled, suspended, terminated or made any threat to cancel, suspend or otherwise terminate any provision thereof and to its knowledge, no such party is in or subject to a bankruptcy or insolvency proceeding; and
- (ix) there are no disputes, oral agreements or forbearance programs between Consenting Party and Assignor in effect as to the COA.

(b) City Light covenants and agrees that, in connection with this Assignment Agreement, it will comply with all applicable laws, codes, rules, regulations and the terms and conditions of the BPA Business Practices in effect at the applicable time, the COA and the Assignment Agreement, as well as any BPA requirements for the partial assignment of City Light's Capacity Ownership Share to the Assignee.

(c) City Light covenants and agrees that it will take no actions during the Term that would impair, limit or reduce the Assignee's Capacity Share or that would prevent, impair the rights associated with the Assignee's Capacity Share or prevent or limit the right and ability of Assignee to fully use it's Assignee's Capacity Share for its own account and benefit during the Term and subject to the conditions of this Assignment Agreement, provided, however that Assignee is not in breach of this Assignment Agreement.

### **8.3 Additional Covenants of Assignee.**

(a) Assignee covenants and agrees that it will at all times during the Assignment Term be and remain an Eligible Customer under the BPA Tariff.

(b) Assignee covenants and agrees that under and in connection with this Assignment Agreement, including any use by Assignee of the Assignee's Capacity Share, it shall comply with all applicable laws, codes, rules, regulations and the terms and conditions of this Assignment Agreement and the BPA Business Practices in effect at the applicable time and shall act in good faith and take no intentional actions that would impair any rights associated with the Assignee's Capacity Share, City Light's Capacity Ownership Share and the COA.

(c) Assignee covenants and agrees that it shall abide by the provisions of the COA to the extent such obligations are assigned to Assignee under this Assignment Agreement and the Consent Agreement as well as any BPA requirements for the partial assignment of City Light's Capacity Ownership Share to the Assignee.

(d) Assignee covenants and agrees that it shall take no actions that would prevent or limit the right and ability of City Light to fully use the Assignee's Capacity Share for City Light's own account and benefit after the Termination Time or expiration of this Assignment Agreement.

## **ARTICLE 9**

### **INDEMNITY OBLIGATIONS**

**9.1 Assignee** shall defend, indemnify and hold harmless City Light and its officers, partners, directors, members, managers, employees, agents, affiliates and representatives from any liabilities, damages, or penalties, including all related costs and expenses (including attorneys' fees), arising out of or resulting from Assignee's actions or inactions in the use of the Assignee's Capacity Share.

**9.2 City Light** shall defend, indemnify and hold harmless Assignee and its officers, partners, directors, members, managers, employees, agents, affiliates and representatives from any liabilities, damages, or penalties, including all related costs and expenses (including attorneys' fees), directly resulting from City Light's breach of any covenants in Section 8.2.

## **ARTICLE 10**

### **LIMITATION ON LIABILITY**

THE PARTIES ACKNOWLEDGE AND AGREE THAT NOTWITHSTANDING ANYTHING IN THIS AGREEMENT, NO PARTY SHALL BE LIABLE TO THE OTHER PARTIES FOR CONSEQUENTIAL OR INDIRECT LOSS OR DAMAGES OR ANY PUNITIVE, SPECIAL, INCIDENTAL OR EXEMPLARY DAMAGES, LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, BY STATUTE, IN TORT OR CONTRACT, UNDER ANY INDEMNITY PROVISION OR OTHERWISE.

## **ARTICLE 11**

### **MISCELLANEOUS**

**11.1. Currency.** All dollar amounts in this Assignment Agreement are referred to in U.S. dollars and all invoices and payments shall be in U.S. currency.

**11.2. Assignment.** Neither Party may further transfer or assign the rights and obligations under this Assignment Agreement of the Consent Agreement, in whole or in part, without the written consent of the other Party and BPA, which consent shall not be unreasonably withheld.

**11.3. Entire Agreement.** This Assignment Agreement, the attachments thereto and the Consent Agreement constitutes the entire agreement between the Parties with respect to the subject matter hereof. There are no prior or contemporaneous agreements or representations affecting the same subject matter other than those herein expressed. Except for any matters which, in accordance with the express provisions of this Assignment Agreement, may be resolved by oral agreement between the Parties, no amendment, modification or change herein shall be enforceable unless reduced to writing and executed by both Parties.

**11.4. Enurement.** This Assignment Agreement shall enure to the benefit of and be binding on the Parties and their respective successors and permitted assigns.

**11.5. Governing Law and Venue.** This Assignment Agreement shall be governed by and construed in accordance with the laws of the State of Washington, without regard to conflict of laws principles to the contrary. The Parties each irrevocably consents to the exclusive jurisdiction and venue of the Superior Courts of King County, Washington.

**11.6. No Waiver.** Except as otherwise provided herein or as agreed by the Parties, no provision of this Assignment Agreement shall be waived except in writing. Any waiver at any time by a Party of its rights with respect to a default under this Assignment Agreement, or any other matter arising in connection with this Assignment Agreement, shall not be deemed a waiver with respect to any other default or matter.

**11.7. Survival Arrangements.** All confidentiality and indemnity rights, all rights of a Party with respect to misrepresentations or breaches of covenants arising prior to any expiration or termination of this Assignment Agreement, and all obligations provided in this Assignment Agreement shall remain in effect for the purpose of compliance with such obligations, unless otherwise provided herein. Without limiting the generality of the foregoing, any obligation to pay any amount due, or any accrued or eligible liability, arising from or as a result of the application of this Assignment Agreement shall survive termination of this Assignment Agreement.

**11.8. No Third-Party Beneficiaries.** This Assignment Agreement is for the benefit of, and shall be enforceable by, the Parties only. This Assignment Agreement is not intended to confer any right or benefit on any third party. No action may be commenced or prosecuted against a Party by any third party claiming as a third-party beneficiary of this Assignment Agreement or any of the transactions contemplated by this Assignment Agreement.

**11.9. Relationship of the Parties.** City Light and Assignee agree that nothing contained in this Assignment Agreement shall be construed to create an association, partnership, trust, joint venture or agency relationship between or City Light and Assignee, or to impose a trust or partnership covenant, obligation or liability on or with regard to either Party. Each Party shall be individually and severally liable for its own obligations hereunder.

**11.10. Counterparts.** This Assignment Agreement may be executed in any number of counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Executed counterparts may be exchanged by fax as evidence of execution and delivery.

**11.11. Time of Essence.** Time is of the essence of this Assignment Agreement.

IN WITNESS WHEREOF, each Party has caused this Assignment Agreement to be executed by its duly authorized representative as of the date first written above.

**CONSENT AGREEMENT**

executed by

**THE UNITED STATES OF AMERICA**

**DEPARTMENT OF ENERGY**

acting by and through the

**BONNEVILLE POWER ADMINISTRATION**

and

**THE CITY OF SEATTLE, CITY LIGHT DEPARTMENT**

and

**EDF TRADING NORTH AMERICA, LLC**

THIS CONSENT AGREEMENT (Consent Agreement) is made and entered into this <sup>31<sup>st</sup></sup> day of August, 2010 (Effective Date) by and among the City of Seattle, by and through its City Light Department (Assignor), EDF Trading North America, LLC (Assignee) and the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION (Consenting Party) (Assignor, Assignee and Consenting Party are sometimes individually referred in this Consent Agreement as a "Party" and collectively as the "Parties").

WHEREAS, Assignor and Consenting Party are parties to the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94522, dated as of September 27, 1994, together with any and all amendments thereto (the COA);

WHEREAS, Assignee and Assignor have entered, or will enter, into that certain Assignment Agreement, attached hereto, whereby, Assignee will assume a partial assignment of the Assignor's rights and obligations in the COA (Assignment Agreement);

WHEREAS, Section 6 of the COA requires that Assignor obtain Consenting Party's prior written consent to assign or transfer any of its rights, duties and obligations under the COA. Assignor and Assignee desire to obtain such written consent, and Consenting Party desires to grant such consent in accordance with the terms hereof; and

10TX-15107, City of Seattle, City Light Department,  
Bonneville Power Administration and EDF Trading North America, LLC  
Consent Agreement

**RECEIVED**  
SEP 10 2010

WHEREAS, the Parties have entered into this Consent Agreement subject to the satisfaction of certain conditions precedent, as set forth herein.

NOW, THEREFORE, for and in consideration of the premises and the mutual covenants contained herein, and for other good and valuable consideration, the receipt, adequacy and legal sufficiency of which are hereby acknowledged, the Parties do hereby agree as follows:

1. ***Consent to Assignment.*** Effective as of the Effective Date and as required by Section 6 of the COA, Consenting Party hereby approves and consents to the assignment of certain rights and obligations arising out of the COA by Assignor to Assignee as more fully set forth in the Assignment Agreement.
2. ***Assumption of Obligations.*** Effective as of the Effective Time, Assignee shall perform the assigned obligations and responsibilities under the COA as fully set forth in the Assignment Agreement for the term of the Assignment Agreement (“Assignee’s Obligations”). For purposes of this Consent Agreement, “Effective Time” shall mean the Effective Date or the date by which the following conditions precedent have been satisfied, whichever is later:
  - (a) The Parties have fully executed this Consent Agreement; and
  - (b) The Assignment Agreement has become effective pursuant to Article 2 of such Assignment Agreement.

Consenting Party acknowledges and agrees to accept Assignee’s performance of the Assignee’s Obligations and relieves the Assignor of any performance obligation arising out of the Assignee’s Obligations during the term of the Assignment Agreement. Assignee shall perform the Assignee’s Obligations in compliance with the COA. All obligations other than the Assignee’s Obligations under the COA shall remain and be the obligation and responsibility of Assignor (the “Assignor’s Obligations”), including but not limited to those obligations relating to, resulting from, or arising out of any breach of contract or any other actual or alleged failure of Assignor to perform any of the Assignor’s Obligations, in each case arising out of, or relating to, the COA or the performance thereof prior to the Effective Time. Assignee shall not assume, discharge, perform or be responsible in any way for any Assignor’s Obligations. For purposes of this Consent Agreement, “Obligations” means indebtedness, obligations, duties and other liabilities, whether absolute, accrued, contingent, fixed or otherwise, or whether due or to become due with respect to the COA, including, but not limited to, any charges, fees, taxes, assessments, adders or surcharges imposed or authorized by any governmental entity and includes all operational matters.

3. **Additional Agreements.** The Consenting Party, Assignor and Assignee, as applicable, also agree to the following:
- (a) Assignor shall endeavor to provide a minimum of 60 days prior written notice to Consenting Party of any termination of the Assignment Agreement;
  - (b) Assignee shall arrange and maintain with Consenting Party a mutually agreeable point of delivery for return of losses; and
  - (c) Assignee's schedules are subject to the scheduling limitations of the COA and are not eligible for intra-hour scheduling unless otherwise agreed by Consenting Party.
  - (d) Consenting Party shall make available to Assignee on each Working Day, in accordance with Consenting Party's then-current BPA Business Practices or other policies, information regarding Bonneville's PNW AC Intertie Operational Transfer Capability with respect to Preschedule days as defined by the WECC Preschedule Calendar. In the event an emergency or uncontrollable force causes a change in Bonneville's PNW AC Intertie Operational Transfer Capability, Consenting Party shall notify Assignee of such change as soon as practicable.
4. **Capitalized Terms.** Capitalized terms used in this Consent Agreement and not otherwise defined shall have the respective meanings ascribed to such terms in the COA.
5. **Further Actions.** Each of the Parties hereto covenants and agrees, at its own expense, to execute and deliver, at the reasonable request of another Party hereto, such further instruments of transfer and assignment, and to take such other action, as such other Party may reasonably request to more effectively consummate the assignments and assumptions contemplated by this Consent Agreement.
6. **Governing Law.** This Consent Agreement shall be interpreted, construed, and enforced in accordance with Federal law, if applicable, or if no Federal law is applicable, with the laws of the State of Washington, without regard to conflict of laws principles to the contrary.
7. **Notices.** Any notice required under this Consent Agreement shall be in writing and shall be delivered in person; or with proof of receipt by a nationally recognized delivery service or by United States Certified Mail. Notices are effective when received. Any Party may change the name or address for receipt of notice by providing notice of such change. The Parties shall deliver notices to the following person and address:

8. **Termination.** If Consenting Party does not receive notice from Assignor and Assignee by September 15, 2010 that the Assignment Agreement has been fully executed, this Consent Agreement shall automatically terminate and be of no further force or effect unless otherwise agreed in writing.
9. **Entire Agreement.** This Consent Agreement, including documents expressly incorporated by reference, constitutes the entire agreement between the Parties. It supersedes all previous communications, representations, or contracts, either written or oral, which purport to describe or embody the subject matter of this Consent Agreement.
10. **No Third Party Beneficiaries.** Except as otherwise expressly provided herein, nothing in this Consent Agreement shall be construed or deemed to confer any right or benefit on, or to create any duty, liability, or obligation to, or standard of care with reference to, any third party, contractual or otherwise, on the part of any Party.
11. **Counterparts.** The Parties agree that this Consent Agreement may be executed in counterparts and that, when taken together, such counterparts constitute but one agreement.

VWD Via Fedex 9/3/10 @ 12:46pm m

12. **Assignment.** This Consent Agreement is binding on any successors and assigns of the Parties. Neither Party may further transfer or assign the rights and obligations under the Assignment Agreement or this Consent Agreement, in whole or in part, without the written consent of the other Party to the Assignment Agreement and the Consenting Party, which consent shall not be unreasonably withheld.

*IN WITNESS WHEREOF*, the Parties have executed this Consent Agreement as of the date first above written.

**Pacific Northwest AC Intertie Capacity**

**Assignment Agreement**

**between**

**The City of Seattle, by and through its City Light Department**

**and**

**EDF Trading North America, LLC**

15107  
and

94522

This Assignment Agreement ("**Assignment Agreement**"), is made and entered into this 31<sup>st</sup> day of August 2010, ("**Execution Date**") by and among The City of Seattle, a Washington municipal corporation, acting by and through its City Light Department with offices at 700 Fifth Ave., Seattle, WA 98104, ("**City Light**" or "**Assignor**"), and EDF Trading North America, LLC ("**Assignee**") with offices at 4700 W. Sam Houston Pkwy N., Suite 250, Houston, TX 77041. Assignee and City Light are sometimes individually referred to in this Assignment Agreement individually as "**Party**" and together as "**Parties**".

**RECITALS**

WHEREAS, City Light holds Capacity Ownership Rights to certain transmission capacity on the Pacific Northwest AC Intertie ("**PACI**") under its PNW AC Intertie Capacity Ownership Agreement with the Bonneville Power Administration dated September 27, 1994 ("**COA**"); and

WHEREAS, City Light is interested in partially assigning certain transmission capacity available under its COA for a limited term; and

WHEREAS, in accordance with Section 6 of the COA, City Light may, with the consent of Bonneville Power Administration, assign all or a portion of its Capacity Ownership Share and associated rights and obligations pursuant to the COA; and

WHEREAS, Assignee desires to obtain transmission capacity through a partial assignment of City Light's Capacity Ownership Share under the COA, and City Light desires to assign to Assignee a portion of its transmission capacity under the COA for a

period of five years and on the terms and conditions set forth in this Assignment Agreement.

NOW, THEREFORE, in consideration of the mutual agreements, covenants and conditions herein contained, the Parties agree as follows:

## **ARTICLE 1 DEFINITIONS**

As used in this Assignment Agreement, the following terms shall have the meanings set forth below. Certain other capitalized terms are defined where they appear in this Assignment Agreement. Capitalized terms used but not defined in this Assignment Agreement shall have the meaning set forth in the COA, BPA Tariff or BPA Business Practices as the case may be.

**"Affiliate"** means with respect to any Person, each Person that directly or indirectly, controls or is controlled by or is under common control with such designated Person. For purposes of this definition, "control" (including, with correlative meanings, the terms "controlled by" and "under common control with"), as used with respect to any Person, shall mean the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of such Person, whether through the ownership of voting securities or by contract or otherwise.

**"Assignee"** has the meaning set forth in the Preamble to this Assignment Agreement.

**"Assignee's Capacity Percentage"** means 2.087%. See Exhibit C for the table that identifies the assignee's capacity percentage as the ratio of the Assignee's Capacity Share, in MW north-to-south, to BPA's 3,450 MW PACI Rated Transfer Capability.

**"Assignee's Capacity Share"** means 72 MW north-to-south and 55 MW south-to-north and certain rights and obligations pursuant to the COA as specified in Section 3.2 of this Assignment Agreement.

**"Assignee's Scheduling Percentage"** is 1.5%, which means the Assignee's Capacity Share divided by the PNW AC Intertie Rated Transfer Capability.

**"Assignee's Scheduling Share"** means, for any given hour, the MW amount equal to the product of Assignee's Scheduling Percentage and the PNW AC Intertie

Operational Transfer Capability for such hour. At full north-to-south capacity of 4,800 MW, Assignee's Scheduling Share will be equal to 72 MW (4800 \* 1.5/100).

**"Assignment Agreement"** has the meaning set forth in the Preamble.

**"Assignor"** has the meaning set forth in the Preamble to this Assignment Agreement.

**"Balancing Authority"** means the responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Balancing Authority Area, and supports Interconnection frequency in real time. For purposes of this definition, the word "Interconnection" shall mean any one of the three major electric system networks in North America; Eastern, Western, and ERCOT.

**"Balancing Authority Area"** means the collection of generation, transmission and loads within the metered boundaries of the Balancing Authority. The Balancing Authority maintains load-resource balance within this area.

**"Bonneville Power Administration", "BPA" or "Bonneville"** means the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION.

**"BPA Business Practices"** refers to the policies and procedures set forth for doing business with BPA as amended from time to time and published by BPA in their Open Access Same Time Information System (OASIS).

**"BPA Tariff"** means BPA's Open Access Transmission Tariff in effect at the relevant time during the Term.

**"Business Day"** means any day other than Saturday, Sunday, or a legal public holiday as designed in Article 6103 of Title 5, U.S. Code or by Executive Order or federal statute or in accordance with WECC practice and variations as identified in the WECC prescheduling calendar.

**"Calendar Month"** means a month during the Term of this Assignment Agreement commencing at 0000 hours PPT on the first day of the month and ending at 2400 hours PPT on the last day of the month.

**"Capacity Owner"** has the meaning set forth in Section 1 of the COA.

**"Capacity Ownership Agreement" or "COA"** has the meaning set forth in the Recitals to this Agreement.

**"Capacity Ownership Rights"** has the meaning set forth in Section 1 of the COA.

**"Capacity Ownership Share"** has the meaning set forth in Section 1 of the COA.

**"City Light"** has the meaning set forth in the Preamble to this Assignment Agreement.

**"Commencement Time"** has the meaning set forth in Section 2.1.

**"Committee"** has the meaning set forth in Section 1 of the COA.

**"Consent Agreement"** has the meaning set forth in Section 2.2.

**"Credit Support"** means any of the following: a bond, Letter of Credit, guarantee or other reasonable and commercially priced security, in an amount as reasonably determined by City Light, and in a form and from a source approved by City Light.

**"Defaulting Party"** has the meaning set forth in Section 7.1.

**"Event of Default"** has the meaning set forth in Section 7.1.

**"Execution Date"** has the meaning set forth in the Preamble.

**"Interest Rate"** means, on any date, the per annum rate of interest equal to the Prime Rate plus two percent (2%) provided that the Interest Rate shall never exceed the maximum rate permitted by applicable law.

**"Letter of Credit"** means an irrevocable, transferable, standby letter of credit, reasonably acceptable in form and substance to the beneficiary thereof, which letter of credit is issued by a Qualified Institution.

**"Material Adverse Change"** means any effect, change, occurrence, development, condition or event that, individually or in the aggregate, has had or would reasonably be expected to have a material adverse effect (financial or otherwise) on Assignee's business, taken as a whole; provided that the following shall not be considered when determining whether a Material Adverse Change has occurred: any effect resulting from (a) any materially adverse change in economic conditions in the industry within the WECC region; (b) any materially adverse change in currency rates; (c) any materially adverse change in any laws or accounting rules generally applicable to similarly situated Persons; (d) any materially adverse change resulting from changes in the international, national, regional or local wholesale or retail gas or power markets, and renewable energy or emissions markets; (e) the commencement, occurrence or

intensification of any war, sabotage or armed hostilities; (f) acts of terrorism; or (g) any materially adverse change in Assignee's business which is cured (including by payment of money) before Assignor requests additional Credit Support.

**"Non-Defaulting Party"** has the meaning set forth in Section 7.1(a).

**"PACI"** has the meaning set forth in the Recitals.

**"Parties"** has the meaning set forth in the Preamble to this Assignment Agreement.

**"Payment Due Date"** has the meaning set forth in Section 5.2.

**"Pacific Prevailing Time"** means the prevailing time (i.e., Standard Time or Daylight Savings Time) on any given day in the Pacific Time Zone.

**"Person"** means any natural person, sole proprietorship, partnership, corporation, limited liability company, trust, joint venture, any governmental authority or any incorporated or unincorporated entity or association of any nature.

**"PNW AC Intertie Rated Transfer Capability"** means the north-to-south and south-to-north capability of the PNW AC Intertie to transfer power in a reliable manner as determined consistent with Prudent Utility Practice.

**"Point of Delivery"** or **"POD"** has the meaning set forth in Section 3.1.

**"Point of Receipt"** or **"POR"** has the meaning set forth in Section 3.1.

**"PPT"** means Pacific Prevailing Time.

**"Preschedule"** means the schedule submitted by the Assignee pursuant to paragraph 3.2(c)(ii)(A) for transactions prepared each Business Day for the period beginning 2400 hours of the current Business Day through 2400 hours of the next Business Day.

**"Prime Rate"** means the rate published in *The Wall Street Journal* under "Money Rates," as the "Prime Rate" from time to time (or, if more than one rate is published, the arithmetic mean of such rates), in either case determined as of the date the obligation to pay interest arises, but in no event more than the maximum rate permitted by Applicable Law.

**"Prudent Utility Practice"** has the meaning set forth in Section 1 of the COA.

**"Qualified Institution"** means a major U.S. commercial bank or a U.S. branch office of a foreign bank, in either case having (i) assets of at least USD \$10 billion and (ii) a Credit Rating from one or more of S&P, Moody's and Fitch, which Credit Rating is at least "A-" from S&P (in the event that such bank has a Credit Rating from S&P), "A3" from Moody's (in the event that such bank has a Credit Rating from Moody's) and "A-" from Fitch (in the event that such bank has a Credit Rating from Fitch).

**"Real Power Losses"** means energy lost during transmission of power caused by the electrical resistance of high-voltage transmission lines.

**"Real-time Schedule"** means a schedule, or change to the Preschedule, submitted during the period which begins when the Preschedule is deemed to be complete and concludes at 2400 hours on the day for which the Preschedule is submitted by Assignee.

**"Term"** has the meaning set forth in Section 2.1.

**"Termination Time"** has the meaning set forth in Section 2.1.

**"USD"** means United States Dollars.

## **ARTICLE 2**

### **TERM AND TERMINATION**

**2.1 Term and Termination.** Subject to Section 3.4, the **"Term"** shall commence at 0000 hours on November 1, 2010 (**"Commencement Time"**) and shall terminate at 2400 hours on October 31, 2015 (**"Termination Time"**) All times are PPT. In the event that the COA terminates prior to the Termination Time, this Assignment Agreement shall also terminate coincidentally with the termination of the COA, *provided, however* that if an Event of Default as set forth in Section 7.1(e) causes the termination of the COA, Assignee shall be entitled to a Termination Payment pursuant to section 7.2. Upon termination or expiration of this Assignment Agreement, all accrued liabilities shall survive until satisfied.

**2.2 Conditions Precedent.** This Assignment Agreement is conditional upon and shall not take effect or be enforceable against either Party until (1) confirmation by BPA through execution by BPA of a separate agreement consenting to the partial assignment to the Assignee of the Assignee's Capacity Share and the terms and

conditions of this Assignment Agreement, (the "Consent Agreement") and (2) BPA has completed all necessary scheduling system changes necessary to implement this Assignment Agreement.

### **ARTICLE 3**

#### **ASSIGNMENT OF CAPACITY OWNERSHIP SHARE**

**3.1 Product.** In accordance with the COA and this Assignment Agreement, City Light shall assign and transfer to the Assignee the Assignee's Capacity Share for the Term of this Assignment Agreement. Assignee shall have the right under this Assignment Agreement during any hour of the Term to schedule Assignee's energy up to the Assignee's Scheduling Share.

(a) The "Point of Receipt" or "POR" and "Point of Delivery" or "POD" shall be

(i) South-to-north (1) POR at the California-Oregon border, Captain Jack or Malin substations, and (2) POD at the Washington-Oregon border, John Day substation; and

(ii) North-to-south (1) POR at the Washington-Oregon border, John Day substation, and (2) POD at the California-Oregon border at Captain Jack or Malin substations.

#### **3.2 Assignee's Capacity Share Rights and Obligations.**

(a) During the Term, Assignee shall be entitled to use the Assignee's Capacity Percentage in any manner that is permitted under this Assignment Agreement and is consistent with both the COA and BPA Business Practices.

(b) **No Third Party Wheeling.**

(i) Except as expressly provided in subparagraph 3.2(b)(ii), Assignee shall not use its Assignee's Scheduling Share to transmit power or energy (except for inadvertent power flows) that Assignee does not own at the California-Oregon border or for which transmission Assignee receives any revenue that would be reportable in Assignee's accounting system where revenues received for wheeling for other entities would be booked.

(ii) If Assignee's Scheduling Share is not fully utilized by Assignee in any hour, Bonneville may schedule for such hour Bonneville's transactions (including, without limitation, Bonneville wheeling for other entities) and wheel such transactions, over the unused portion of Assignee's Scheduling Share for such hour but no longer than such hour. Assignee shall not be compensated for Bonneville's usage of any unused portion of Assignee's Scheduling Share. For purposes of this subparagraph 3.2(b)(ii), Assignee's Scheduling Share shall be deemed to be not fully utilized in a given hour to the extent that Assignee has not scheduled, or does not schedule, on a Preschedule or Real-time Schedule basis, any transaction for such hour for any MW amount of the Assignee's Scheduling Share.

(c) **Scheduling.**

(i) Assignee (and only Assignee) shall be entitled to schedule on the PNW AC Intertie, in any hour, a MW amount up to Assignee's Scheduling Share for such hour. The MW amount of Assignee's Scheduling Share deemed to be scheduled on the PNW AC Intertie pursuant to this Agreement, in any hour, shall be determined as the net of Assignee's north-to-south schedules and south-to-north schedules (net schedules) for such hour.

(ii) Assignee shall submit all schedules of Assignee's Scheduling Share on its own behalf in accordance with the procedures set forth in applicable interchange scheduling standards and BPA Business Practices with specific procedures and exceptions described in paragraphs 3.2(c)(ii)(A) and 3.2(c)(ii)(B). Such procedures may be varied by the mutual agreement of BPA and Assignee's schedulers. Such mutual agreement may, but need not, be written.

(A) **Preschedules.**

(1) **Assignee** shall submit its Preschedule by e-Tag in accordance with the provisions of the BPA Scheduling Transmission Service Business Practice.

(B) **Real-time Scheduling.** Real-time Schedules shall be submitted by e-Tag in accordance with the provisions of the BPA Scheduling Transmission Service Business Practice for scheduling transmission service or its successor.

(d) **Real Power Losses and Transmission Loss Factor.** Assignee shall be responsible for returning (or arranging for the return of) Real Power Losses to BPA associated with use of Assignee's Scheduling Share during the Term in a manner consistent with applicable BPA requirements. Assignee shall return losses, at its sole cost and expense, and in accordance with Exhibit E of the COA, Item A. Currently, the transmission loss factor is 2.5%, but can change pursuant to the terms of the COA.

### **3.3 City Light Rights and Obligations.**

(a) City Light shall request BPA provide Assignee any information not otherwise publicly available regarding changes to the PACI that would increase or decrease the Assignee's Scheduling Share

(b) In the event, pursuant to Section 7(b) of the COA, City Light is notified by BPA of a change in the PNW AC Intertie Rated Transfer Capability or a substantial change in the reliability criteria for determining the PNW AC Intertie Rated Transfer Capability not otherwise publicly available, City Light shall promptly notify Assignee of such adjustment.

(c) City Light shall make commercially reasonable, good faith efforts to persuade BPA to give fair consideration to Assignee's interests under Section 7(a) and 7(e) of the COA to the extent such interests have been expressed to BPA in writing.

(d) City Light will provide Assignee with the results of any BPA review under Section 13(c)(10) of the COA that results in a revision to the transmission loss factor in Exhibit E, Part A including any additional information provided to City Light by BPA that is pertinent to such review and the results of any arbitration should arbitration be pursued.

(e) City Light retains all rights and responsibilities with respect to the Capacity Owner's Committee under the COA.

(f) Upon execution of this Assignment Agreement, City Light shall provide, within 10 days, written notice to BPA of the assignment.

## **ARTICLE 4 PRICE, CREDIT**

**4.1 Payment Obligations:** During the Term Assignee shall be responsible for the following payment obligations associated with the Assignee's Capacity Share:

(a) **To City Light:** the Price for the Assignee's Capacity Share as shown in Exhibit A, and

(b) **To BPA:** any applicable ancillary services charges except those defined in or set forth on Schedule 1 (Scheduling, System Control and Dispatch Service as defined or similarly described in the BPA Tariff) and Schedule 2 (Reactive Supply and Voltage Control from Generation or Other Sources Service as defined or similarly described in the BPA Tariff) of the BPA Tariff, which will be paid by City Light.

**4.2 Credit Support.**

(a) During the Term, if there is any Material Adverse Change affecting Assignee, City Light, in its discretion, may require Assignee to provide Credit Support sufficient to assure that Assignee will continue to meet its current contractual obligations under this Assignment Agreement and its contractual obligations for the next twelve (12) Months from the date of the demand for Credit Support (or if the remaining Term of this Assignment Agreement is less than twelve (12) Months, for the remaining Term of this Assignment Agreement). Should Assignee be unable to provide the necessary Credit Support, Assignee shall require that EDF Trading Limited, Assignee's indirect parent corporation, shall provide the necessary Credit Support.

(b) Following a demand for Credit Support and until such time as Assignee is no longer experiencing or affected by a Material Adverse Change, Assignee or EDF Trading Limited, whichever the case may be, shall maintain satisfactory Credit Support on an ongoing, rolling basis sufficient to assure its current contractual obligations and its contractual obligations for the following twelve (12) Months. At the request of either Party, Credit Support shall be increased or decreased as appropriate once per calendar month such that the party providing Credit Support will be able to meet its then-current contractual obligations and its future contractual obligations under this Assignment Agreement for the next twelve (12) month period (or if the remaining Term of this Assignment Agreement is less than twelve (12) months, for the remaining Term of this Assignment Agreement).

(c) If Assignee or EDF Trading Limited fails to provide such Credit Support within ten (10) Days of a request for Credit Support or fails to maintain Credit Support as set forth above, City Light may suspend its performance under this Assignment Agreement until such Credit Support is posted or may treat the failure to provide Credit Support as a default and exercise its rights under Article 7 of this Assignment Agreement.

(d) At City Light's written request, Assignee or EDF Trading Limited shall furnish the City Light financial information as may be reasonably required to confirm that Assignee or EDF Trading Limited has not been affected by a Material Adverse Change.

## **ARTICLE 5**

### **BILLING AND PAYMENT**

**5.1 Monthly Billing.** No later than the tenth (10<sup>th</sup>) Day of each calendar month during the Term, City Light shall deliver to Assignee an invoice setting forth the total amount due for the purchase by Assignee of Assignee's Capacity Share for the immediately preceding month as described in Exhibit A.

**5.2 Payments to City Light.** Assignee shall pay the amount specified in the bill to City Light by electronic wire transfer of immediately available funds by the later of ten (10) Days after Assignee's receipt of City Light's invoice or the twentieth (20<sup>th</sup>) Day of the month in accordance with the wire transfer instructions set out in **Exhibit B, Contact Information**, as it may be changed from time to time; *provided, however*, that any changes to such wire transfer instructions shall not be effective until five (5) Business Days after the date on which notice of the change is sent to Assignee and if the due date is not a Business Day, Assignee shall pay the monthly bill on the Business Day following such due date ("**Payment Due Date**"). If Assignee fails to pay an amount when due, it will pay City Light interest on the unpaid balance at the Interest Rate from the Payment Due Date until payment in full.

## **ARTICLE 6**

### **NOTICES; CONTACTS**

6.1 All notices, requests, statements or payments from one Party to the other Party shall be made to the addresses specified in Exhibit B. All notices, requests, or statements from one Party to the other Party shall be made in writing. Notices required to be in writing shall be delivered by the United States Postal Service, hand delivery, overnight delivery, facsimile or e-mail. Notice from one Party to the other Party by facsimile shall (where confirmation of successful transmission is received) be deemed to have been received on the day on which it was transmitted (unless transmitted after 5:00 p.m. at the place of receipt or on a day that is not a Business Day, in which case it shall be deemed received on the next Business Day). Notice from one Party to the other Party by hand delivery or overnight delivery shall be deemed to have been received when delivered. Notices sent by e-mail must be confirmed by e-mail as received by the receiving Party. A Party may change its address by providing notice of the same in accordance herewith.

## **ARTICLE 7**

### **EVENT OF DEFAULT**

7.1 An **"Event of Default"** means with respect to a Party (the **"Defaulting Party"**):

(a) the failure by the Defaulting Party to make, when due, any payment required pursuant to this Assignment Agreement or the COA if such failure is not remedied within 2 Business Days after written notice of such failure is given to the Defaulting Party by the other Party (the **"Non-Defaulting Party"**);

(b) the failure by the Defaulting Party to provide or maintain Credit Support in accordance with the requirements of Section 4.2;

(c) the material breach of any other of the material covenants, terms or conditions of this Assignment Agreement or the COA, where such breach is not remedied within 10 days of written notice of such breach by the Non-Defaulting Party;

(d) the institution, with respect to the Defaulting Party (or any guarantor thereof), by the Defaulting Party (or any guarantor thereof) or by another Person, of a bankruptcy, reorganization, moratorium, liquidation or similar insolvency proceeding or other relief under any bankruptcy or insolvency law affecting creditors'

rights, or the presentation or institution of a petition for the winding-up or liquidation of the Defaulting Party; or

(e) the termination of the COA as a result of circumstances within SCL's reasonable control without Assignee's consent, which in all cases will be deemed to be an Event of Default with respect to Assignor.

**7.2 Rights Upon Event of Default; Termination Payment.** If an Event of Default occurs, the Non-Defaulting Party shall have the right to terminate this Assignment Agreement upon notice to the Defaulting Party, such notice of termination to be effective immediately upon receipt ("**Termination Date**").

(a) If City Light is the Defaulting Party, City Light will pay to Assignee (in addition to any other amounts which may be due from City Light to Assignee) within 10 Business Days after the Termination Date of this Agreement, as a termination payment with respect to this Assignment Agreement, the amount, if any, by which (i) the aggregate amount that Assignee, acting in a commercially reasonable manner, pays or, using its commercially reasonable efforts, would have paid to replace Assignee's Capacity Share for the period between the Termination Date and the Termination Time, exceeds (ii) the aggregate Price that Assignee would have paid in respect of the same such period pursuant to this Assignment Agreement if the Event of Default had not occurred (prorated for any partial Calendar Month on the basis of the number of days in such Calendar Month).

(b) If Assignee is the Defaulting Party, Assignee will pay to City Light (in addition to any other amounts which may be due from Assignee to City Light) within 10 Business Days after the Termination Date, as a termination payment with respect to the Assignee's Capacity Share, an amount equal to the positive difference, if any, obtained by subtracting (xx) the aggregate amount that City Light obtains or, using its commercially reasonable efforts, could have obtained for the Assignee's Capacity Share for the period between the Termination Date and the Termination Time from (yy) the aggregate Price that Assignee would have paid for each Calendar Month (or portion thereof) during that same period pursuant to this Assignment Agreement (prorated for any partial Calendar Month on the basis of the number of days in such Calendar Month).

**7.3 Rights upon Termination of COA.** If the COA terminates for a reason other than that set forth in Section 7.1(e) above, and if Assignor decides in its sole

discretion to pursue claims, and thereafter receives any damages or other compensation in connection with such termination from BPA, Assignor shall pay Assignee its proportionate share of such damages or other compensation, such proportion to be calculated by dividing Assignee's Capacity Share by Assignor's Capacity Ownership Share and factoring in the Assignee's limited duration of rights and obligations.

**7.4 Survival of Liability.** In no event shall termination of this Assignment Agreement for any reason relieve either Party of any liability for any amounts due or payable to the other Party with respect to any period prior to such termination.

## **ARTICLE 8**

### **REPRESENTATIONS AND WARRANTIES; ADDITIONAL COVENANTS**

**8.1 Representations and Warranties of the Parties.** Each Party represents and warrants to the other Party as of the Execution Date as follows:

(a) it is duly organized, validly existing and in good standing under the laws of the jurisdiction of its formation, is duly qualified to do business in those jurisdictions in which it is necessary for the conduct of its business and to enter into and perform the transactions contemplated by this Assignment Agreement and the Consent Agreement, except for failures which in the aggregate are not material to the other Parties, and has all requisite corporate or other similar power and authority and the legal right to own and operate its properties and to conduct its business as currently conducted;

(b) the execution, delivery and performance of this Assignment Agreement and the Consent Agreement and the consummation by it of the transactions contemplated hereby and thereby (i) are within its organizational powers and have been or will be duly authorized by all necessary action, and (ii) do not and will not, with the passing of time or giving of notice or both, violate or conflict with its articles or certificate of incorporation, by-laws or comparable constitutive or governing documents as currently composed, any law applicable to it, any order or judgment of any governmental authority applicable to it or any agreement to which it is a party or by which it is bound, nor will it result in the breach, default or termination of any agreement to which it is a party; and

(c) this Assignment Agreement and the Consent Agreement have been duly executed and delivered and constitute a legal, valid and binding obligation of such Party enforceable against such Party in accordance with its terms, except as such enforceability may be limited by Seattle Municipal Code 5.24.005, bankruptcy, insolvency or similar laws affecting the rights of creditors generally, and with regard to equitable remedies, to equitable defenses and the discretion of the court before which proceedings to obtain such remedies may be pending.

(d) except for Assignor's challenge to the Oregon Department of Revenue's tax assessment case (The City of Seattle, et. al. v. Oregon Department of Revenue, Oregon Tax Court No. TC-4946), there is no suit, action, claim, arbitration, proceeding or investigation pending or, to its knowledge, threatened against such Party before any governmental entity that relates to or involves it, or the COA;

(e) it understands and agrees that no Party is acting as a fiduciary, advisor or agent to any other Party with respect to this Consent Agreement or the transactions contemplated hereby; and

(f) no petition or notice has been presented, no order has been presented, no order has been made and no resolution has been passed for its bankruptcy, liquidation, winding-up or dissolution, and no receiver, trustee, custodian or similar fiduciary has been appointed over the whole or any part of any of its assets or income, and it has not received any notice that any other person has any plan or intention of, filing, making or obtaining any such petition, notice, order or resolution or of seeking the appointment of a receiver, trustee, custodian or similar fiduciary.

## **8.2 Additional Representations and Warranties and Covenants of City Light.**

- (a) City Light represents and warrants to Assignee that
- (i) it is currently a party to the COA and has a Capacity Ownership Share under the COA;
  - (ii) it has the right and power pursuant to City of Seattle Ordinance 123276, subject to BPA approval, to assign all or a part of its Capacity Ownership Share to Assignee on the terms and subject to the conditions set forth in this Assignment Agreement;

- (iii) the COA is in full force and effect and has been duly authorized, executed and delivered by it, and constitutes a legal, valid, binding and enforceable agreement as to it;
- (iv) this Assignment Agreement and the Consent Agreement will not affect the validity of the COA, which will continue to be legal, valid, binding, enforceable and in full force and effect on substantially identical terms following the consummation of the transactions contemplated hereby;
- (v) it is not in breach of or in default under the COA, and it has no knowledge of an event that has occurred which with the passage of time or giving of notice or both would constitute such a default, result in a loss of rights or permit termination, modification or acceleration under, or result in the creation of any lien under the COA (except for Assignor's challenge to the Oregon Department of Revenue's tax assessment case (The City of Seattle, et. al. v. Oregon Department of Revenue, Oregon Tax Court No. TC-4946)) and no such event, condition or circumstance would occur or exist as a result of it entering into or performing its obligations under this Assignment Agreement or the Consent Agreement. It has no knowledge of any state of facts or condition that exists (i) that is or may be reasonably likely to be materially adverse to the rights or obligations of it under the COA or (ii) that is or would reasonably be expected to prevent the performance by it of any of its obligations hereunder or under the COA or the consummation of the transactions contemplated by this Assignment Agreement or the Consent Agreement;
- (vi) it has not entered into any written or oral amendments, supplements, or other modifications of the COA, except as described in the definition of "COA" set forth in the Consent Agreement;

- (vii) no amounts currently due under the COA are delinquent;
- (viii) no party to the COA has provided notice to it that it has repudiated, canceled, suspended, terminated or made any threat to cancel, suspend or otherwise terminate any provision thereof and to its knowledge, no such party is in or subject to a bankruptcy or insolvency proceeding; and
- (ix) there are no disputes, oral agreements or forbearance programs between Consenting Party and Assignor in effect as to the COA.

(b) City Light covenants and agrees that, in connection with this Assignment Agreement, it will comply with all applicable laws, codes, rules, regulations and the terms and conditions of the BPA Business Practices in effect at the applicable time, the COA and the Assignment Agreement, as well as any BPA requirements for the partial assignment of City Light's Capacity Ownership Share to the Assignee.

(c) City Light covenants and agrees that it will take no actions during the Term that would impair, limit or reduce the Assignee's Capacity Share or that would prevent, impair the rights associated with the Assignee's Capacity Share or prevent or limit the right and ability of Assignee to fully use it's Assignee's Capacity Share for its own account and benefit during the Term and subject to the conditions of this Assignment Agreement, provided, however that Assignee is not in breach of this Assignment Agreement.

### **8.3 Additional Covenants of Assignee.**

(a) Assignee covenants and agrees that it will at all times during the Assignment Term be and remain an Eligible Customer under the BPA Tariff.

(b) Assignee covenants and agrees that under and in connection with this Assignment Agreement, including any use by Assignee of the Assignee's Capacity Share, it shall comply with all applicable laws, codes, rules, regulations and the terms and conditions of this Assignment Agreement and the BPA Business Practices in effect at the applicable time and shall act in good faith and take no intentional actions that would impair any rights associated with the Assignee's Capacity Share, City Light's Capacity Ownership Share and the COA.

(c) Assignee covenants and agrees that it shall abide by the provisions of the COA to the extent such obligations are assigned to Assignee under this Assignment Agreement and the Consent Agreement as well as any BPA requirements for the partial assignment of City Light's Capacity Ownership Share to the Assignee.

(d) Assignee covenants and agrees that it shall take no actions that would prevent or limit the right and ability of City Light to fully use the Assignee's Capacity Share for City Light's own account and benefit after the Termination Time or expiration of this Assignment Agreement.

## **ARTICLE 9**

### **INDEMNITY OBLIGATIONS**

**9.1 Assignee** shall defend, indemnify and hold harmless City Light and its officers, partners, directors, members, managers, employees, agents, affiliates and representatives from any liabilities, damages, or penalties, including all related costs and expenses (including attorneys' fees), arising out of or resulting from Assignee's actions or inactions in the use of the Assignee's Capacity Share.

**9.2 City Light** shall defend, indemnify and hold harmless Assignee and its officers, partners, directors, members, managers, employees, agents, affiliates and representatives from any liabilities, damages, or penalties, including all related costs and expenses (including attorneys' fees), directly resulting from City Light's breach of any covenants in Section 8.2.

## **ARTICLE 10**

### **LIMITATION ON LIABILITY**

THE PARTIES ACKNOWLEDGE AND AGREE THAT NOTWITHSTANDING ANYTHING IN THIS AGREEMENT, NO PARTY SHALL BE LIABLE TO THE OTHER PARTIES FOR CONSEQUENTIAL OR INDIRECT LOSS OR DAMAGES OR ANY PUNITIVE, SPECIAL, INCIDENTAL OR EXEMPLARY DAMAGES, LOST PROFITS OR OTHER BUSINESS INTERRUPTION DAMAGES, BY STATUTE, IN TORT OR CONTRACT, UNDER ANY INDEMNITY PROVISION OR OTHERWISE.

## **ARTICLE 11**

### **MISCELLANEOUS**

**11.1. Currency.** All dollar amounts in this Assignment Agreement are referred to in U.S. dollars and all invoices and payments shall be in U.S. currency.

**11.2. Assignment.** Neither Party may further transfer or assign the rights and obligations under this Assignment Agreement of the Consent Agreement, in whole or in part, without the written consent of the other Party and BPA, which consent shall not be unreasonably withheld.

**11.3. Entire Agreement.** This Assignment Agreement, the attachments thereto and the Consent Agreement constitutes the entire agreement between the Parties with respect to the subject matter hereof. There are no prior or contemporaneous agreements or representations affecting the same subject matter other than those herein expressed. Except for any matters which, in accordance with the express provisions of this Assignment Agreement, may be resolved by oral agreement between the Parties, no amendment, modification or change herein shall be enforceable unless reduced to writing and executed by both Parties.

**11.4. Enurement.** This Assignment Agreement shall enure to the benefit of and be binding on the Parties and their respective successors and permitted assigns.

**11.5. Governing Law and Venue.** This Assignment Agreement shall be governed by and construed in accordance with the laws of the State of Washington, without regard to conflict of laws principles to the contrary. The Parties each irrevocably consents to the exclusive jurisdiction and venue of the Superior Courts of King County, Washington.

**11.6. No Waiver.** Except as otherwise provided herein or as agreed by the Parties, no provision of this Assignment Agreement shall be waived except in writing. Any waiver at any time by a Party of its rights with respect to a default under this Assignment Agreement, or any other matter arising in connection with this Assignment Agreement, shall not be deemed a waiver with respect to any other default or matter.

**11.7. Survival Arrangements.** All confidentiality and indemnity rights, all rights of a Party with respect to misrepresentations or breaches of covenants arising prior to any expiration or termination of this Assignment Agreement, and all obligations provided in this Assignment Agreement shall remain in effect for the purpose of compliance with such obligations, unless otherwise provided herein. Without limiting the generality of the foregoing, any obligation to pay any amount due, or any accrued or eligible liability, arising from or as a result of the application of this Assignment Agreement shall survive termination of this Assignment Agreement.

**11.8. No Third-Party Beneficiaries.** This Assignment Agreement is for the benefit of, and shall be enforceable by, the Parties only. This Assignment Agreement is not intended to confer any right or benefit on any third party. No action may be commenced or prosecuted against a Party by any third party claiming as a third-party beneficiary of this Assignment Agreement or any of the transactions contemplated by this Assignment Agreement.

**11.9. Relationship of the Parties.** City Light and Assignee agree that nothing contained in this Assignment Agreement shall be construed to create an association, partnership, trust, joint venture or agency relationship between or City Light and Assignee, or to impose a trust or partnership covenant, obligation or liability on or with regard to either Party. Each Party shall be individually and severally liable for its own obligations hereunder.

**11.10. Counterparts.** This Assignment Agreement may be executed in any number of counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Executed counterparts may be exchanged by fax as evidence of execution and delivery.

**11.11. Time of Essence.** Time is of the essence of this Assignment Agreement.

IN WITNESS WHEREOF, each Party has caused this Assignment Agreement to be executed by its duly authorized representative as of the date first written above.

**SOUTHERN CALIFORNIA EDISON COMPANY**

THIS CONSENT AGREEMENT (Consent Agreement) is made and entered into this 31 day of January, 2013 (Effective Date) by and among the City of Seattle, by and through its City Light Department (SCL), EDF Trading North America, LLC (Assignor), Southern California Edison Company (Assignee) and the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION (BPA) (SCL, Assignor, Assignee and BPA are sometimes individually referred in this Consent Agreement as a "Party" and collectively as the "Parties").

WHEREAS, SCL and BPA are parties to the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94522, dated as of September 27, 1994, together with any and all amendments thereto (the COA);

WHEREAS, Assignor and SCL have entered into that certain Assignment Agreement, dated as of August 31, 2010, whereby, Assignor has assumed a partial assignment of the SCL's rights and obligations in the COA (First Assignment Agreement);

WHEREAS, Section 6 of the COA required that SCL obtain BPA's prior written consent to assign or transfer any of its rights, duties and obligations under the COA. Assignor and SCL obtained such written consent, and BPA granted such consent in that certain Consent Agreement among BPA, SCL and Assignor, dated August 31, 2010 (First Consent Agreement);

WHEREAS, Assignee and Assignor have entered (a) that certain Second Amended and Restated Transmission Resale Confirmation, dated January ~~28~~, 2013, for the Delivery Period 02/01/2013/0000 through 12/31/2013/2400 governed by that certain Transmission Resale Enabling Agreement between Assignor and Assignee, effective November 6, 2012 (Master Agreement) (First Resale), (b) that certain Amended and Restated Transmission Resale Confirmation, dated January ~~28~~, 2013, for the Delivery Period 01/01/2014/0000 through 12/31/2014/2400 governed by the Master Agreement (Second Resale) and (c) that certain Amended and Restated Transmission Resale Confirmation, dated January ~~28~~, 2013, for the Delivery Period 07/01/2015/0000 through 9/30/2015/2400 governed by the Master Agreement (Third Resale and together with the First Resale and the Second Resale, the Second Assignment Agreements), each of which may be fulfilled by assigning certain transmission rights and obligations that are the subject of the First Assignment Agreement; and

WHEREAS, Section 12 of the First Consent Agreement requires that Assignor obtain SCL's and BPA's prior written consent to transfer or assign the rights and obligations under the First Assignment Agreement or the First Consent Agreement. Each of Assignor and Assignee desires to obtain such written consent, and each of BPA and SCL desires to grant such consent, in accordance with the terms hereof.

NOW, THEREFORE, for and in consideration of the premises and the mutual covenants contained herein, and for other good and valuable consideration, the receipt, adequacy and legal sufficiency of which are hereby acknowledged, the Parties do hereby agree as follows:

1. **Consent to Assignment.** Effective as of the Effective Date and as required by Section 12 of the First Consent Agreement, BPA and SCL each hereby approves and consents to the assignment of certain rights and obligations arising out of the First Assignment Agreement by Assignor to Assignee as more fully set forth in the Second Assignment Agreements.
2. **Assumption of Obligations.** Effective as of the Effective Time, Assignee shall perform the assigned obligations and responsibilities set forth in the Second Assignment Agreements for the Delivery Period of each Second Assignment Agreement (Assignee's Obligations). For purposes of this Consent Agreement, "Effective Time" shall mean the later of the Effective Date or the date by which the Parties have fully executed this Consent Agreement.

Each of SCL and BPA acknowledges and agrees to accept Assignee's performance of the Assignee's Obligations and relieves the Assignor of any performance obligation arising out of the Assignee's Obligations during the Delivery Period of the Second Assignment Agreements; provided, however, Assignor shall not be relieved of its payment obligations to SCL. Assignee shall perform the Assignee's Obligations in compliance with the COA. All obligations other than the Assignee's Obligations shall remain and be the obligation and responsibility of Assignor (the Assignor's Obligations), including but not limited to those obligations relating to, resulting from, or arising out of any breach of contract or any other actual or alleged failure of Assignor to perform any of the Assignor's Obligations, in each case arising out of, or relating to, the First Assignment Agreement or the performance thereof prior to the Effective Time. Assignee shall not assume, discharge, perform or be responsible in any way for any Assignor's Obligations. For purposes of this Consent Agreement, "Obligations" means indebtedness, obligations, duties and other liabilities, whether absolute, accrued, contingent, fixed or otherwise, or whether due or to become due with respect to the First Assignment Agreement or the Second Assignment Agreements, as applicable, including, but not limited to, any charges, fees, taxes, assessments, adders or surcharges imposed or authorized by any governmental entity and includes all operational matters.

3. **Additional Agreements.** BPA and SCL (each, a Consenting Party), Assignor and Assignee, as applicable, also agree to the following:
  - (a) Assignor shall endeavor to provide a minimum of 60 days advance written notice to each Consenting Party of any early termination prior to the expiration date of the Second Assignment Agreements;

- (b) Assignee shall arrange and maintain with BPA a mutually agreeable point of delivery for return of losses;
- (c) Assignee's schedules are subject to the scheduling limitations of the COA and are not eligible for intra-hour scheduling unless otherwise agreed by BPA;
- (d) During the Delivery Periods, BPA shall make available to Assignee on each Working Day, in accordance with BPA's then-current BPA Business Practices or other policies, information regarding Bonneville's PNW AC Intertie Operational Transfer Capability with respect to Preschedule days as defined by the WECC Preschedule Calendar. In the event an emergency or uncontrollable force causes a change in Bonneville's PNW AC Intertie Operational Transfer Capability, BPA shall notify Assignee of such change as soon as practicable;
- (e) Assignee's scheduling rights under the Second Assignment Agreements may not be redirected; and
- (f) If Assignee's scheduling rights are not fully utilized by Assignee in any hour, BPA may schedule for such hour BPA's transactions, including wheeling transactions, over the unused portion of Assignee's scheduling rights for such hour but no longer than such hour. Assignee shall not be compensated for BPA's usage of any unused portion of Assignee's scheduling rights. Assignee's scheduling rights shall be deemed to be not fully utilized in a given hour to the extent that Assignee does not schedule, on a pre-schedule or real-time schedule basis, any transaction for such hour for any MW amount of the Assignee's scheduling rights, with such MW amount being the unused portion of Assignee's scheduling rights for such hour.

4. **Capitalized Terms.** Capitalized terms used in this Consent Agreement and not otherwise defined shall have the respective meanings ascribed to such terms in the COA.
5. **Further Actions.** Each of the Parties hereto covenants and agrees, at its own expense, to execute and deliver, at the reasonable request of another Party hereto, such further instruments of transfer and assignment, and to take such other action, as such other Party may reasonably request to more effectively consummate the assignments and assumptions contemplated by this Consent Agreement.
6. **Governing Law.** This Consent Agreement shall be interpreted, construed, and enforced in accordance with Federal law, if applicable, or if no Federal law is applicable, with the laws of the State of Washington, without regard to conflict of laws principles to the contrary.

7. **Notices.** Any notice required under this Consent Agreement shall be in writing and shall be delivered in person; or with proof of receipt by a nationally recognized delivery service or by United States Certified Mail. Notices are effective when received. Any Party may change the name or address for receipt of notice by providing notice of such change. The Parties shall deliver notices to the following person and address:

- 9. **No Third Party Beneficiaries.** Except as otherwise expressly provided herein, nothing in this Consent Agreement shall be construed or deemed to confer any right or benefit on, or to create any duty, liability, or obligation to, or standard of care with reference to, any third party, contractual or otherwise, on the part of any Party.
- 10. **Counterparts.** The Parties agree that this Consent Agreement may be executed in counterparts and that, when taken together, such counterparts constitute but one agreement.
- 11. **Assignment.** No Party may further transfer or assign the rights and obligations under the Second Assignment Agreements or this Consent Agreement, in whole or in part, without the written consent of the other Party to the Second Assignment Agreement and each Consenting Party, which consent shall not be unreasonably withheld.

IN WITNESS WHEREOF, the Parties have executed this Consent Agreement as of the date first above written.

June 29, 2010

In reply refer to: TSE/TPP-2

Mr. Robert Cromwell, Director Power  
Contracts and Resource Acquisition  
City of Seattle, City Light Department  
700 Fifth Avenue, Suite 2822  
Seattle, WA 98124-4023

Re: City of Seattle, City Light Department Partial Assignment of Capacity Owner Share

Dear Mr. Cromwell:

Over the past several months the City of Seattle, City Light Department (Seattle) and the Bonneville Power Administration (Bonneville) have been discussing a possible limited term assignment of a portion of Seattle's Third AC Capacity Ownership share. Provisions related to this transmission capacity are found in the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94522, between Seattle and Bonneville. Bonneville must approve any partial assignment except for an assignment by Seattle to another Capacity Owner of part of its Capacity Ownership Share and all of Seattle's rights and obligations with respect thereto. In addition to the requirements listed below, Bonneville reserves its rights under Section 6(a) of the Capacity Ownership Agreement to grant or withhold its approval based on specific information about the proposed Assignee.

In order to approve this prospective assignment, Bonneville requires the following:

- A Letter Agreement must be executed between Seattle, Bonneville and the Assignee prior to start of scheduling by the Assignee. This Letter Agreement would describe the rights and obligations under the Capacity Ownership Agreement that Seattle is assigning to the Assignee and any other arrangements or information that may be necessary to implement the assignment. The Letter Agreement's contract number would be referenced on the tags submitted by the Assignee.
- The Assignee must be responsible to Bonneville for returning losses.
- Seattle must retain all rights and responsibilities regarding payments under Section 9 of the Capacity Ownership Agreement.

JUN 29 2010

- Seattle must retain all Capacity Owner rights and responsibilities with respect to the Owners Committee including communications with Bonneville, attendance and voting.
- The monthly payment to Seattle by Bonneville under Section 3(b)(1)(B) of the Capacity Ownership Agreement for unused capacity must continue to be paid to Seattle rather than pro-rated between Seattle and the Assignee.
- Seattle shall give Bonneville written notice of the assignment within 10 days after the execution and delivery of the agreement effectuating the assignment between Seattle and the Assignee.

After execution of a Customer Data Entry (CDE) Agreement, the Assignee would be allowed access to Bonneville's CDE system to see its daily scheduling share. The scheduling share will be the Assignee's pro-rata allocation of Seattle's Scheduling Share between Seattle and the Assignee.

BPA will need 60 days notice prior to the start of scheduling by the Assignee so that we have adequate time to make the necessary scheduling system changes.

I hope that this information meets with Seattle's expectations regarding this assignment. Please do not hesitate to contact me if you need additional information.

Sincerely,

Toni L. Timberman  
Senior Transmission Account Executive  
Transmission Sales

Amendment No. 2  
Contract No. DE-MS79-94BP94522

**AMENDED**

**PNW AC INTERTIE AGREEMENT**

executed by the

**UNITED STATES OF AMERICA**

**DEPARTMENT OF ENERGY**

acting by and through the

**BONNEVILLE POWER ADMINISTRATION**

and

**THE CITY OF SEATTLE, CITY LIGHT DEPARTMENT**

This AMENDMENT No. 2 to the PNW AC Intertie Capacity Ownership Agreement (Agreement), Contract No. DE-MS79-94BP94522 is executed by the UNITED STATES OF AMERICA, DEPARTMENT OF ENERGY, acting by and through the BONNEVILLE POWER ADMINISTRATION (BPA) and THE CITY OF SEATTLE, CITY LIGHT DEPARTMENT (Seattle). BPA and Seattle are sometimes referred to individually as "Party" and collectively as "Parties" as the context suggests below.

This Amendment No. 2 updates Section 1, Sections 3b and 4a and 4b to incorporate Intra-Hour Scheduling. Amendment No. 1 was never executed by the Parties; however, this amendment is labeled as Amendment No. 2 for internal tracking purposes.

The Parties agree to the following:

**1. EFFECTIVE DATE**

This Amendment No. 2 shall take effect at 0000 hours on September 1, 2015 (Effective Date).

**2. AMENDMENT OF AGREEMENT**

This Amendment No. 2 amends the Agreement as follows:

Add the following WHEREAS clause:

WHEREAS the Parties amended sections 1, 3 and 4 of the Agreement to reflect changes in Seattle's rights as to its Scheduling Share;"

**3. DEFINITIONS.**

Section 1 is amended to add the following definitions:

"(y1) "Intra-Hour Scheduling Interval" means each of the four 15-minute intervals during an operating hour, the first such 15-minute interval starting at the start of the operating hour.

- (y2) "Intra-Hour Scheduling Interval Schedule" means a schedule representing an Intra-Hour Scheduling Interval, and may consist of either the submission of a new 15-minute schedule or adjustment to an hourly schedule."

Definition (bbb) is amended to read as follows:

- "(bbb) "Scheduling Share" means, for any given hour, the MW amount equal to the product of Seattle's Scheduling Percentage and the PNW AC Intertie Operational Transfer Capability for such hour. All references to Scheduling Share utilized during an hour or on an hourly basis shall also be interpreted to include a Scheduling Share as it may be utilized for an Intra-Hour Scheduling Interval, as applicable."

#### 4. **CAPACITY RIGHTS.**

Section 3(b) is amended to read as follows:

"(b) **Right to Wheel for Third Parties**

No later than 30 days after the Effective Date, Seattle shall notify Bonneville in writing of Seattle's decision to utilize its Scheduling Share pursuant to either paragraph 3(b)(1) or paragraph 3(b)(2), and Seattle shall have the right to utilize its Scheduling Share pursuant to the paragraph Seattle elects. Prior to Bonneville's receipt of such notification, Seattle shall utilize its Scheduling Share pursuant to paragraph 3(b)(1). If Seattle fails to make an election within the prescribed time period, Seattle shall be deemed to have elected the option set forth in paragraph 3(b)(1).

Seattle has elected to utilize its Scheduling Share pursuant to paragraph 3(b)(1). Therefore, paragraph 3(b)(2) does not apply."

Section 3(b)(1)(B) is amended to read as follows:

- "(B) If Seattle's Scheduling Share is not fully utilized by Seattle in any hour, Bonneville may use for such hour (including, without limitation, for Bonneville wheeling for other entities) the unused portion of Seattle's Scheduling Share for such hour but no longer than such hour. There shall be no charge to Bonneville for any such use of the unused portion of Seattle's Scheduling Share under this paragraph or under paragraph 4(b)(3). For purposes of this subparagraph 3(b)(1)(B), Seattle's Scheduling Share shall be deemed to be not fully utilized in a given hour to the extent that Seattle has not scheduled, or does not schedule, on a Preschedule, Intra-Hour Scheduling Interval, or Real-time Schedule basis, any transaction for such hour on any MW amount of Seattle's Scheduling Share."

**5. SCHEDULING.**

Sections 4(a) and 4(b) are amended to read as follows:

- “(a) Seattle shall be entitled to schedule on the PNW AC Intertie, in any hour, a MW amount up to Seattle's Scheduling Share for such hour. The MW amount of Seattle's Scheduling Share deemed to be scheduled on the PNW AC Intertie pursuant to this Agreement, in any hour, shall be determined as the net of Seattle's north-to-south schedules and south-to-north schedules (net schedules) for such hour. The un-used portion of Seattle's Scheduling Share shall be subject to adjustment as provided for in paragraph 4(b)(3).
- (b) Seattle shall submit all schedules of its Scheduling Share on its own behalf in accordance with the procedures set forth in paragraphs 4(b)(1), 4(b)(2) and 4(b)(3). Such procedures may be varied by the mutual agreement of the Parties' Schedulers. Such mutual agreement may, but need not, be written. All hours and intra-hour intervals referenced in paragraphs 4(b)(1), 4(b)(2) and 4(b)(3) are Pacific Time.”

Section 4(b)(2)(B) is amended to read as follows:

- “(B) Real-time Schedules for hourly scheduling shall be arranged for a full hour. Arrangements shall be completed no later than 20 minutes prior to that hour. Real-time Schedules for intra-hour scheduling shall be arranged as described in section 4(b)(3).”

Add Sections 4(b)(3)(A) through 4(b)(3)(D) as follows:

“(3) **Intra-Hour Scheduling**

- (A) Seattle, or any successive assignee of its rights in its Scheduling Share, may submit Intra-Hour Scheduling Interval Schedules up to 20 minutes prior to the applicable Intra-Hour Scheduling Interval for service to be provided pursuant to such schedules for use of its firm transmission capacity.
- (B) In instances where an Intra-Hour Scheduling Interval Schedule is not submitted, Seattle, or any successive assignee, shall be deemed to have submitted a 0 (zero) schedule but shall retain the right to submit an Intra-Hour Scheduling Interval Schedule in any subsequent Intra-Hour Scheduling Interval.
- (C) Use of firm transmission capacity associated with an Intra-Hour Scheduling Interval Schedule shall have priority over Bonneville's use of Seattle's unused Scheduling Share.
- (D) After 20 minutes prior to any Intra-Hour Scheduling Interval for service to be provided pursuant to Intra-Hour Scheduling Interval Schedules, any unused portion of Seattle's Scheduling Share shall be relinquished to Bonneville for the hour; provided however, any unused portion of Seattle's Scheduling Share shall be further subject to

Rec'd. 8/26/15 at 1:02pm via email  
Rec'd. 8/28/15 at 12:00pm hand delivered.  
Gm

adjustment for Intra-Hour Scheduling Interval Schedules submitted pursuant to this paragraph, by Seattle, or any successive assignee, for any subsequent Intra-Hour Scheduling Interval."

6. The Parties agree that all other terms and conditions of the Agreement remain the same.

7. **SIGNATURES**

The Parties have executed this Amendment as of the last date indicated below.

TRANSMISSION SERVICES

March 30, 2018

In reply refer to: TSE/TPP-2

Ms. Stefanie Johnson, Senior Power Analyst  
The City of Seattle, City Light Department  
700 5th Avenue, Suite 3220  
Seattle, WA 98104

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Section 11(b)(1) of the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94522 (Capacity Ownership Agreement), between the Bonneville Power Administration (BPA) and The City of Seattle, City Light Department (Seattle) requires Seattle to participate in the Remedial Action Scheme (RAS) necessary to maintain Seattle's share of intertie capacity.

The RAS includes generator dropping to support north to south schedules on the AC Intertie. Seattle has historically purchased generation dropping RAS service from BPA to fulfill that portion of its obligation under the Capacity Ownership Agreement.

BPA will continue to provide generator dropping service until such time as Seattle arranges to self-provide generator dropping to meet its obligations. If Seattle elects to provide its own generator dropping, Seattle must provide BPA with at least two years notice to allow time for necessary system adjustments. Consistent with Section 11(b)(1) of the Capacity Ownership Agreement, Seattle would also need to demonstrate to BPA that it has the ability to self-provide generator dropping.

BPA has updated its charge for generator dropping service to account for two separate changes affecting its cost of providing the service: the 2016 upgrade of the DC Intertie and BPA's updated generator dropping rate set in the BP-18 Rate Case. The upgrade to the DC Intertie reduced the amount of generator dropping required because the DC Intertie rating went from 3,100 MW to 3,220 MW. The BP-18 Rate Case increased the cost of providing generator dropping service to reflect 1) the increase in O&M costs; 2) Grand Coulee 3rd power house outages; and 3) an increase in the Handy Whitman cost index.

The charge for generator dropping service has thus fluctuated as follows:

- October 1, 2015 – February 28, 2018: \$6.90 per MW/month (Previous Charge)
- December 20, 2016 – September 30, 2017: \$6.79 per MW/month (Interim Charge)
- October 1, 2017 – present: \$9.64 per MW/month (New Charge)

The new charge of \$9.64 per MW/month will be reflected in Seattle's monthly transmission bills starting March 1, 2018. Seattle's March transmission bill will also reflect a true-up from December 2016 through February 2018 to reflect the changes in the charge for generator dropping. This true-up is summarized in the table below:

<b>Refund using Interim Charge minus Previous Charge (from period of December 20, 2016 to September 30, 2017)</b>	<b>Charge using New Charge minus Previous Charge (from period of October 1, 2017 to February 28, 2018)</b>	<b>One time amount to be billed using New Charge on Seattle's March 2018 transmission bill</b>
$[\$6.79 - \$6.90] \times 9 \text{ months and } 11 \text{ days} \times 160 \text{ MW} = - \$165$	$[\$9.64 - \$6.90] \times 5 \text{ months} \times 160 \text{ MW} = \$2,192$	$- \$165 + \$2,192 = \$2,027$

If you have any questions regarding this information, please contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Seattle, WA 98104

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Enclosed please find proposed amendments to the FY 2015 through FY 2020 Operating Plans. Sections 9(b)(2)(B)(iii) and 13(k) of the PNW AC Intertie Capacity Ownership Agreement (COA) allow operating plans to be amended to add replacement costs, or to increase forecasted costs. For the following Work Orders, Actual or Updated Costs exceed the Forecasted Costs by at least five percent. These Work Orders were included in prior operating plans, so the proposed Amendments to the Operating Plans below reflect the additional costs.

**Table 1**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>FY Operating Plans to be Amended</b>	<b>Forecasted Costs</b>	<b>Actual or Updated Costs<sup>1</sup></b>
00297236	Ashe-Marion No. 2 - Replace Spacer-Dampers (225.3 miles)	2016, 2018, 2019, 2020	\$4,404,125	\$4,750,000
TBD Dixonville 04	Dixonville Substation - Replace Series Capacitor Controls (PAC Project)	2015, 2016, 2017, 2018, 2019, 2020	\$600,000	\$972,000
TBD Grizzly 02	Grizzly Substation - Replace SCADA/Sequential Event Recorder (BPA Project)	2018, 2020	\$1 <sup>2</sup>	\$290,000
TBD Malin 18	Replace Sequential Event Recorder	2018, 2020	\$1 <sup>2</sup>	\$1,300,000

<sup>1</sup> The costs listed under the “Actual or Updated Costs” column are Direct Costs (without Indirect Costs or AFUDC costs). Please note that for work orders with the interim designation of “TBD”, the actual costs are not available at this time so the information listed in Table 1 is an updated cost (rounded).

<sup>2</sup> For the \$1 listed under the column “Forecasted Costs”, this was a placeholder representing that there will be a future cost. As of the date of this letter, we are providing updated information on the costs.

The following Work Orders are proposed to be *added* to the Operating Plans listed below.

**Table 2**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>FY Operating Plan(s) Proposed</b>	<b>Work Order Direct Costs as of the Date of this Letter</b>	<b>Work Order Approved &amp; Work Order Closed Dates</b>
00374787	Malin Substation - Replace Round Mountain Relays	2015, 2016, 2017, 2018	\$970,000	11/30/2014 & 1/17/2018
00439779	Ashe-Marion No. 2 - Emergency Replacement of Conductor	2017, 2018, 2019	\$4,300,000	3/7/2017 & 2/22/2018
00440381	Slatt Substation - Emergency Replacement of Breaker	2018, 2019	\$1,100,000	3/24/2017 & 11/27/2017

If you would like to recommend a revision to any forecasted cost or dispute the addition of a project, please do so through the Capacity Owner Committee (Committee). Sections 13(d), 13(e) and 13(m) of the COA detail the process and requirements. If we receive no recommendation from the Committee by February 25, 2019, the addition of these projects, as well as increased costs, will be considered accepted on February 25, 2019 according to the contract terms (See Sections 13(e) and 13(m)).

If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

**FY 2016 Schedule C**

Exhibit I

Prepared date: 1/28/2019

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2					
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$4,748,125				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 4/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$971,500				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order since 2013. This Work Order cost will be updated once BPA receives updated information from PacifiCorp.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared Date: 1/28/2019

**Project Work Order:** TBD Grizzly 02  
**Project Short Description:** Replace SCADA/Sequential Event Recorder (BPA Project)  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:**  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$289,999				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$145,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$434,999				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this Schedule C may be subject to 60% allocation to determine the BPA costs associated with this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

February 12, 2018

In reply refer to: TSE/TPP-2

Ms. Stefanie Johnson, Senior Power Analyst  
The City of Seattle, City Light Department  
700 5th Avenue, Suite 3220  
Seattle, WA 98104

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Listed in Table 1 below are the Schedule C Replacement Projects energized from April 2016 to April 2017. Table 1 summarizes the work order numbers, project information, and The City of Seattle, City Light Department's (Seattle) pro rata shares of the project costs under Contract No. DE-MS79-94BP94522, PNW AC Intertie Capacity Ownership Agreement (COA). The Schedule Cs referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Document are enclosed.

**Table 1:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>9(b)(2)(B) Date<sup>1</sup></b>	<b>Seattle Cost Share</b>
00339633	Chief Joseph Substation – Security Enhancements	7/7/2018	\$10,724
00356246	Grizzly Substation – Replace Analog Transfer Trip Equipment	7/21/2018	\$334
00356248	Sand Spring Compensation Station – Replace Analog Transfer Trip Equipment	8/5/2018	\$6,880
00401519	John Day Substation – Station Service Cable Replacement	2/7/2018	\$1,377
00404279	Fort Rock Compensation Station – Emergency Replacement of Transfer Switch Bank No. 1	7/10/2018	\$5,937

<sup>1</sup> The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed. Section 9(b)(2)(B) of the COA states that Bonneville Power Administration will render the bill for Replacement or Reinforcement Costs within 15 months following the date listed on which the project work order for the Replacement or Reinforcement is closed. When the 9(b)(2)(B) date shown above is in the past, such as for work order No. 00401519, it means that the work order was closed, but that the work order and Operating Plan were later amended. Work order No. 00401519 was amended to add the John Day Substation project cost pursuant to section 13(k) of the COA.

The charges for these projects will be included in Seattle's February transmission bill to be sent in March 2018.

In addition, the Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00358697	Malin Substation – Replace Analog Transfer Trip Equipment	2018	Work Order Cancelled
00379615	Malin Substation – Malin Physical Security Enhancements	2016	Not applicable to COA
TBD Alvey 04	Alvey Substation – Replace Line Loss Logic Equipment for Marion Alvey Line	2016, 2018	Replaced by Work Order 00339242
TBD Alvey 05	Alvey Substation – Replace Equipment Related to Line Loss Logic/RAS	2016, 2018	Replaced by Work Order 00339242

If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

**Project Work Order:** 00339633  
**Project Short Description:** Security Enhancements  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.15. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 9/30/2016  
**Work Order Completion Date:** 4/7/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,246,384	\$4,077,903	\$1,044,147	\$3,033,756	(\$1,212,628)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,123,192	\$1,015,644	\$260,056	\$755,589	(\$1,367,603)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$491,733	\$108,138	\$27,689	\$80,449	(\$411,284)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$81,678	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$6,861,309	\$5,201,685	\$1,331,891	\$3,951,472	(\$2,991,516)

**Notes:**

- 1/ This work order will be prorated for 5.9% to reflect that at Chief Joseph Substation, 1 out of 17 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$3,951,472 reflects the total costs from FY 2013-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2014-2017.
- 5/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 5.9% x \$3,951,472 = \$48,492 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			244		81,678.35

**Equipment Removal Cost Summary**

\$374,186.59 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$303,254.50 is direct cost and \$70,932.09 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00356246  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**In Service Date:** 1/13/2017

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$446,010	\$129,146	\$124,206	\$4,940	(\$441,070)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$223,005	\$53,529	\$51,482	\$2,047	(\$220,958)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$44,814	\$3,483	\$3,350	\$133	(\$44,681)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$150	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$713,829	\$186,158	\$179,038	\$7,271	(\$706,709)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$7,271 reflects the total costs from FY 2014-2018.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2018.
- 3/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this project is subject to 60% allocation. This Schedule C reflects only BPA's share of the costs associated with this work order.
- 4/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$7,271 = \$1,512 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			244		150.28

**Equipment Removal Cost Summary**

\$122.90 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$74.49 is direct cost and \$48.42 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$308,529	\$266,241	\$0	\$269,615	(\$42,288)

**Notes:**

- 1/ This work order will be prorated for 11.1% to reflect that at John Day Substation, 2 out of 18 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$269,615 reflects the total costs from FY 2016-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal year that is applicable to this work order is FY 2017.
- 5/ The forecast for this work order was amended per letter dated December 22, 2017.
- 6/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 11.1% x \$269,615 = \$6,225 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. 30	<sup>2/</sup> <b>Intertie Contract Proration</b> refers to contracts with PacifiCorp and PGE. In some cases the intertie cost proration is reflected in the Exhibit F to the specific Schedule C. As applicable, the percentage on row 7, above, is the cost percentage after the PacifiCorp/PGE costs are removed. If cell D7 is shaded and in italics, it means the Exhibit F percentage does not need to be applied to this cost share calculation.					
31	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, station general replacements, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.					
32	<sup>4/</sup> <b>Station General</b> is general expenses related to a particular substation that do not relate to specific pieces of power equipment. Examples include control houses, fences, gravel or security equipment. If the equipment in the work order is classified as station general and has a cost share percentage it will be displayed above.

Ms. Stefanie Johnson, Senior Power Analyst  
The City of Seattle, City Light Department  
700 5<sup>th</sup> Avenue, Suite 3220  
Seattle, WA 98104-5031

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Enclosed for your records are two updated Exhibits: Exhibit F, Revision No. 1 and Exhibit G Revision No. 1 of the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94522, between the Bonneville Power Administration and the City of Seattle, City Light Department.

A draft Exhibit F, Revision No. 1 and draft Exhibit G, Revision No. 1 were provided as part of the document packet at the October 26, 2017 3<sup>rd</sup> AC Capacity Owners Annual Meeting.

The primary changes identified under Exhibit F, Revision No. 1 are as follows:

1. Add footnotes to clarify information throughout Exhibit F;
2. Add the Shunt Reactor at Alvey Substation, add the breakers and disconnect switches at Slatt Substation, and update several sections in this Exhibit F to reflect equipment added to the Intertie facilities over the years;
3. Add two disconnect switches at Grizzly Substation (for John Day terminals) and two disconnect switches at Marion Substation (for Buckley and Alvey line terminal) that were all inadvertently omitted from the original Exhibit F;
4. Add interchange meter references to Alvey Substation and Captain Jack Substation, add a Relay House to Alvey Substation, and add a Control House to Grizzly Substation and Malin Substation respectively to clarify treatment for these facilities; and
5. Add the percentages for most of the station general facilities at various substations.

The change under Exhibit G, Revision No. 1 is to update the addition of PacifiCorp and that Turlock Irrigation District is the permanent assignee of Power Resources Cooperative and not Pacific Northwest Generating Cooperative.

If you have any questions regarding this information, please contact me by June 18, 2018 at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

Digitally signed by

<sup>2</sup> Portland General Electric Company's (PGE) Coyote Springs Substation was inserted between BPA's McNary Substation and BPA's Slatt Substations. Further, this update is to reflect the current transmission line name that is consistent with page D-8 of the FY 2019 Operating Plan. Only the portion of the costs associated with McNary-John Day line loop into BPA's Slatt Substation are allocated to the PNW AC Intertie. These costs are now identified as part of the Coyote Springs-Slatt No.1 and Slatt-John Day No. 1 Lines. In addition, the Transmission Tower structure numbers were renumbered from structure 108/1 to 29/1.

TRANSMISSION SERVICES

July 24, 2018

In reply refer to: TSE/TPP-2

Ms. Stefanie Johnson, Senior Power Analyst  
The City of Seattle, City Light Department  
700 5th Avenue, Suite 3220  
Seattle, WA 98104

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Pursuant to Section 13(k) and 9(b)(2)(A)(v) of the PNW AC Intertie Capacity Ownership Agreement (COA), Contract No. DE-MS79-94BP94522 between The City of Seattle, City Light Department (Seattle) and the Bonneville Power Administration (BPA), I have enclosed for your review the amendment to the FY 2017 Operating Plan (Amendment).

The Amendment updates Schedules A, B, D, E, F, and G of the FY 2017 Operating Plan to reflect updated costs for FY 2017 and modifies the monthly charge related to those costs. Schedule ABFG is included to support Schedules A, B, F and G of the Operating Plan.

Each year's Operating Plan is used to forecast each Capacity Owner's allocation of qualifying expenses based on their ownership share. This monthly charge is included on each Capacity Owner's transmission bill. After the end of each fiscal year, the Operating Plan is amended to reflect actual, rather than forecasted costs. The pro-rata share of the difference between forecasted and actual costs is reflected as a one-time charge, or credit, on each Capacity Owner's transmission bill.

The actual costs are included in the "Actual" column of the Schedules A, B, D, E, F and G of the Amendment. The actual costs in Schedules D (General Plant), and E (Other-PacifiCorp) are *higher* than the forecast.

The other schedules show that actual costs in Schedules A (Operations), B (Maintenance), F (Contract and Rates), and G (Transmission Scheduling) are *lower* than the forecast.

Overall for FY 2017, actual costs for the BPA portion of the Third AC Intertie were *higher* than the forecasted costs communicated in the October 2, 2015 letter. The costs are higher by \$570,480, as shown on the summary page of the Amendment. The actual costs are \$233 per MW-month, compared to the forecasted costs of \$219 per MW-month in the 2015 letter.

The FY 2017 charge for Seattle will be \$26,242 plus \$1,385 interest, calculated pursuant to Section 9(b)(2)(A)(vi) of the COA. Thus, Seattle's total one time true-up charge will be \$27,627, in its July 2018 transmission bill to be sent in August 2018.

This letter also serves as notice of an amendment to add five Work Orders to the Schedule Cs of this FY 2017 Operating Plan. Note that one of the Work Orders listed below has been billed and the other was part of a cancellation notice.

<b>Work Order Number / FY 17 Operating Plan Page</b>	<b>Facility – Project Information</b>	<b>FY Operating Plan(s) Proposed</b>	<b>Work Order Direct Costs Estimate as of the Date of this Letter</b>
00248443/ Page 6	Alvey Substation – Replace Analog Transfer Trip Equipment	FY 2012, FY 2013, FY 2014, FY 2015, FY 2017	\$10,000,000
00329379/ Page 14	Marion-Alvey No. 1 – Access Road Improvements	FY 2017, FY 2018	\$729,000
00356246/ Page 28	Grizzly Substation – Replace Analog Transfer Trip Equipment	FY 2017, FY 2018	See Billing notice sent on February 12, 2018
00358697/ Page 29	Malin Substation – Analog Transfer Trip	FY 2017	See Cancellation notice sent on February 12, 2018

This letter also provides notice of amendment to the Schedule Cs of FY 2017 Operating Plan to increase the estimated cost related to the following Work Order:

1. Work Order 00339242 at Alvey Substation (Remedial Action Scheme) was originally forecasted for \$250k. Currently the estimated direct costs are nearly \$1.3M and preliminary notes state that the BPA cost share percentage will be 50%. Please refer to the WO Database Projections Report (June 12, 2018). The increased costs were originally provided in a report from PacifiCorp in April 2017. BPA's information from 2016, regarding the increase, is that the scope was broadened for changes in design, materials and construction.

In addition, we have updated the Schedule C, Table of Contents, to reflect current Work Order information, such as: cancelled Work Orders, Work Orders added to the FY 2017 Operating Plan, updates to Work Order completion dates, and Work Order descriptions.

Please review this information and respond through the Capacity Owners Committee (Committee) as provided in Sections 13(d), (e), and (m) of the COA. If the Committee recommends a revision(s) to any forecast cost, actual cost or General Plant Cost, in this Amendment, BPA will respond as provided in Section 13 of the COA. Pursuant to Sections 13(e) and (m) of the COA, if BPA does not receive a recommendation from the

Committee by August 20, 2018, the addition of these projects, together with the increased cost, will be considered accepted.

If you have any questions regarding this information, please contact me at (360) 619-6704.

Sincerely,

On behalf of J. Diego Ochoa  
Transmission Account Executive  
Transmission Sales

TRANSMISSION SERVICES

August 17, 2018

In reply refer to: TSE/TPP-2

Ms. Stefanie Johnson, Senior Power Analyst  
The City of Seattle, City Light Department  
700 5th Avenue, Suite 3220  
Seattle, WA 98104

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Listed in Table 1 below are the Schedule C Replacement Projects energized from November 2014 to December 2017. Table 1 summarizes the work order numbers, project information, and The City of Seattle, City Light Department's (Seattle) pro rata shares of the project costs under Contract No. DE-MS79-94BP94522, PNW AC Intertie Capacity Ownership Agreement (COA). The Schedule C's referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Documents are enclosed.

**Table 1:**

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date <sup>1</sup>	Seattle Cost Share
00248443	Alvey Substation - Install a New Shunt Reactor	10/11/2018	\$621,205
00329379	Marion-Alvey No. 1 - Access Road Improvements	8/19/2018	\$13,142
00335841	Marion-Alvey No. 1 - Standalone Access Road: 10 miles (Related to 45 mile span of transmission line)	12/19/2018	\$73,952
00339242	Alvey Substation - Replace Remedial Action Scheme, Transfer Trip Equipment and Line Loss Relays on the Dixonville 500 kV line	10/13/2018	\$42,604

<sup>1</sup> The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed. Section 9(b)(2)(B) of the COA states that Bonneville Power Administration will render the bill for Replacement or Reinforcement Costs within 15 months following the date listed on which the project work order for the Replacement or Reinforcement is closed. When the 9(b)(2)(B) date shown above is in the past, such as for Work Order No. 00348163, it means that the Work Order was closed, but that the Work Order and Operating Plan were later amended. Work Order No. 00348163 was amended to add the John Day Substation project cost pursuant to Section 13(k) of the COA.

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>9(b)(2)(B) Date <sup>1</sup></b>	<b>Seattle Cost Share</b>
00348163	Grizzly-Captain Jack No. 1 - Land Rights Acquisition for Access Road, Structure 156/1	4/11/2018	\$4,508
00381350	Summer Lake Substation - Upgrade Engine Generator	1/6/2019	\$20,149
00396160	Dixonville Substation - 500 kV Relay Replacements to Meridian (PAC Project)	2/21/2019	\$26,175
00396161	Meridian Substation - 500 kV Relay Replacements to Dixonville (PAC Project)	2/21/2019	\$22,802

The charges for these projects will be included in Seattle's August transmission bill to be sent in September 2018.

In addition, the Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00356249	Sycan Compensation Station – Replace Analog Transfer Trip Equipment for Sycan Bank No. 3	2016, 2019	Not Applicable
00432972	Malin Substation – SCADA Remote Terminal Unit (RTU) and Serial Event Recorder Replacement	2019	Work Order cancelled
00449853	Ashe-Marion No. 2 – Emergency Replacement of Access Road	2019	Work Order cancelled
TBD Malin 13	Malin Substation – Relay Replacement on the Round Mt. No. 1 line	2015, 2017	Combined with TBD Malin 14 project
TBD Malin 14	Malin Substation – Relay Replacement on the Round Mt. No. 2 line	2015, 2016, 2017	Combined into BPA Work Order #00374787
TBD Summerlake 03	Summerlake Substation – Work on BPA Relays on the Grizzly line	2015, 2017	Combined into BPA Work Order #00322042

Work Order No. for Schedule C	Facility – Project Information	Operating Plan(s) Listing this Work Order	Reason
TBD Sycan 01	Sycan Compensation Station – Replace Station Battery	2018	Combined into Work Order #00423702
TBD Sycan 02	Sycan Compensation Station – Station Service Engine Generator Upgrade	2018	Combined into Work Order #00423702
TBD Sycan 03	Sycan Compensation Station - Station Service Engine Generator Upgrade	2018	Combined into Work Order #00423702
TBD Sycan 04	Sycan Compensation Station - Update Grounding Equipment	2018	Combined into Work Order #00423702

**Equipment Removal Cost Summary**

\$8,291.40 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$5,025.09 is direct cost and \$3,266.31 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Equipment Removal Cost Summary**

There were no retirement charges associated with this Work Order.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

Project Work Order: 00339242  
 Project Short Description: Replace Remedial Action Scheme, Transfer Trip Equipment and Line Loss Relays on the Dixonville 500 kV line  
 Project Facility: Alvey Substation  
 Exhibit F Section: B.5. Alvey 500 kV  
 Percent of Project Cost Applied to PNWAC Intertie: 100%  
 In Service Date: 6/2/2017  
 Work Order Completion Date: 7/13/2017  
 Work Order Status: COMPLETE  
 Contract Section 9(b)(2)(B) Date: 10/13/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,222,998	\$683,386	\$0	\$683,386	(\$539,612)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$611,499	\$199,608	\$0	\$199,608	(\$411,891)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$171,894	\$19,076	\$0	\$19,076	(\$152,819)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$24,094	
<b>E. Total Replacement Costs and Reinforcement Costs</b>	5	\$2,006,391	\$902,070	\$0	\$926,164	(\$1,104,322)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ BPA owns 50 percent of the equipment covered by this Work Order. PacifiCorp's 50 percent share has already been subtracted from the "Actual" column, so no further adjustment is needed. See Exhibit F, column labeled "% BPA owned" and Contract No. DE-MS79-94BP94332.
- 2/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$926,164 reflects the total costs from FY 2013-2018.
- 3/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 100% x 20.8% x \$926,164 = \$192,642 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

27	<b>Footnotes</b>									
28	<sup>1/</sup> BPA Percent (%) owned (left hand column of Exhibit F) reflects BPA's ownership share of each project and is included here for reference only, as row 3 above reflects only BPA's cost share of the project.									
29	<sup>2/</sup> Percent (%) applied to PNW AC (right hand column of Exhibit F) is also listed at the top of the Schedule C.									
30	<sup>3/</sup> Other Proration occurs when a project supports both inertie and non-inertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.									
31	<sup>4/</sup> Station General refers to elements in a substation that are not attributable to specific pieces of power equipment. Examples include control houses, water/drainage systems, fences, and yard rock.

TRANSMISSION SERVICES

September 28, 2018

In reply refer to: TSE/TPP-2

Ms. Stefanie Johnson, Senior Power Analyst  
The City of Seattle, City Light Department  
700 5th Avenue, Suite 3220  
Seattle, WA 98104

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Enclosed is the proposed FY 2020 Operating Plan as required by Section 13(b)(2) of the PNW AC Intertie Capacity Ownership Agreement, Contract Number DE-MS79-94BP94522.

Pursuant to the FY 2020 Operating Plan, the projected FY 2020 monthly cost for each Capacity Owner is \$254 per MW-month.

The forecasted FY 2019 monthly cost is \$242 per MW-month, which will be reflected in your monthly transmission bills for the fiscal year starting October 1, 2018.

We will have a comprehensive discussion at the November 1, 2018 Annual Meeting. Prior to that meeting, please review the enclosed documents. If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Ochoa".

**Note 1:** The status of TBD Alvey-Dixonville 01 project is determined for each individual fiscal year.

**Note 2:** The status of TBD Dixonville-Meridian 02 project is determined for each individual fiscal year.

**Key:**

BPA Project Work Order Status is for BPA project information prior to BPA Active (or Pending) Work Order status or prior to establishing a BPA Work Order number.

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)  
  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,374,063				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$1,232,581				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$8,354,769				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 5/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$267,640				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration so that 2/3's of the costs will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00367753  
 Project Short Description: Ground Wire Replacement  
 Project Facility: John Day-Grizzly No. 1  
 Exhibit F Section: A.9. John Day-Grizzly No. 1 500 kV  
 Percent of Project cost applied to  
 PNW AC Intertie: 100%  
 Estimated Energization Date: 8/28/2020  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$535,621				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$267,811				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$114,896				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$918,328				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$422,509				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$211,255				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$28,302				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$662,065				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00466505  
 Project Short Description: Ground Wire Replacement  
 Project Facility: Ashe-Marion No. 2  
 Exhibit F Section: A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

Percent of Project cost applied to PNW AC Intertie:  
 Estimated Energization Date: 9/1/2021  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$2,000,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$1,000,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$275,014				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$3,275,014				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Per Exhibit F, Section A.3. above, this Work Order will be subject to proration, such that 25% of the cost will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$3,843,976				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: TBD Meridian 06  
 Project Short Description: Replace 500 kV Series Cap Control (PAC Project)  
 Project Facility: Meridian Substation  
 Exhibit F Section: B.12. Meridian 500 kV Yard (BPA/PacifiCorp)  
 Percent of Project cost applied to PNW AC Intertie: 100%  
 Estimated Energization Date: 5/1/2018  
 Status: Project (PAC)  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

November 21, 2018

In reply refer to: TSE/TPP-2

Ms. Stefanie Johnson, Senior Power Analyst  
The City of Seattle, City Light Department  
700 5th Avenue, Suite 3220  
Seattle, WA 98104

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Listed in Table 1 below is the Schedule C Replacement Project energized in June 2017. Table 1 summarizes the work order number, project information, and The City of Seattle, City Light Department's (Seattle) pro rata share of the project costs under Contract No. DE-MS79-94BP94522, PNW AC Intertie Capacity Ownership Agreement. The Schedule C referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Documents are enclosed.

**Table 1:**

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date	Seattle Cost Share
00340156	Marion Substation – Transfer Trip Replacement	11/21/2018	\$9,649

The charge for this project will be included in Seattle's November transmission bill to be sent in December 2018.

The Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00379612	Grizzly Substation – Physical Security Project	2017	General Plant
00381830	Malin Substation – Replacement of Communication Battery Charger	2017	General Plant
00381831	Fort Rock Compensation Station – Replacement of Communication Battery Charger	2017	General Plant
00381833	Sycan Compensation Station – Replacement of Communication Battery Charger	2017	General Plant
00384207	Buckley Substation – Replace Line Relay on Slatt Terminal	2019	Not Applicable
TBD Dixonville 05	Dixonville Substation – Regravel Yard	2018, 2019	Not Applicable

If you have any questions regarding this information, feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

3 Enclosures

**Project Work Order:** 00340156  
**Project Short Description:** Transfer Trip Replacement  
**Project Facility:** Marion Substation  
**Exhibit F Section:** B.11. Marion 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**In Service Date:** 6/2/2017  
**Work Order Completion Date:** 8/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 11/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,659,057	1,659,057.49	757,144.08	\$901,913	(\$757,144)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$829,529	478,287.80	218,276.21	\$260,012	(\$569,517)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$229,761	95,119.80	43,409.82	\$51,710	(\$178,051)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$46,136	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,718,347	\$2,232,465	\$1,018,830	\$1,259,771	(\$1,504,712)

**Notes:**

- 1/ For this Work Order, only one out of three terminals applies, so 33.3% of the costs will be applicable to the Capacity Owners.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$1,259,771 reflects the total costs from FY 2014-2018.
- 3/ Cost sharing percentage x One out of three terminals x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 50% x 33.3% x 20.8% x \$1,259,771 = \$43,629 to be allocated pro rata among Capacity Owners.
- 4/ The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed and will not receive additional charges.

This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$69,576.46 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$56,551.02 is direct cost and \$13,025.44 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

26	<b>Total</b>	<b>0.2080</b>
27	<b>Footnotes</b>	
28	<sup>1/</sup> <b>BPA Percent (%) owned</b> (left hand column of Exhibit F) reflects BPA's ownership share of each project and is included here for reference only, as row 3 above reflects only BPA's cost share of the project.	
29	<sup>2/</sup> <b>Percent (%) applied to PNW AC</b> (right hand column of Exhibit F) is also listed at the top of the Schedule C.	
30	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.	
31	<sup>4/</sup> <b>Station General</b> refers to elements in a substation that are not attributable to specific pieces of power equipment. Examples include control houses, water/drainage systems, fences, and yard rock.	
32	This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.	

*The purpose of this Exhibit F, Revision No. 1 is to: 1) add footnotes to provide clarity throughout Exhibit F; 2) update Section A.12 to reflect the line name change from McNary-Slatt to Coyote Springs-Slatt; 3) update Sections B.1 through B.14 to remove dispatcher one-line identification numbers for BPA and PacifiCorp; 4) update Section B.1 to add the Shunt Reactor at Alvey, add the Alvey Relay House and contents (relays, data systems, etc.), and add the Interchange Meter for the Dixonville 500 kV Transmission Line; 5) add a new Section B.2 for Bakeoven 500 kV Compensation Station; 6) update Sections B.3 through B.16 to add percentages for Station General; 7) update Section B.4 to change reference from Klamath Cogen to Snow Goose, add Shunt Capacitor information, and to add the Interchange Meter for the Malin No. 2 Transmission Line; 8) update Section B.6 to change references from Contract No. DE-MS79-86BP92299 to DE-MS79-94BP94332; 9) update Section B.8 to add the Grizzly Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 10) update Section B.9 to add MODs D#4130 and D#4139 of the breaker-and-a-half scheme for both Grizzly No. 2 and Grizzly No. 1 Line Terminals, respectively, in the John Day Substation that were inadvertently omitted from the original Exhibit F; 11) update Section B.10 to add the Malin Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 12) update Section B.11 to add MODs D#4385 and D#4378 in the Buckley Line Terminal and Alvey Line Terminal respectively that were inadvertently omitted from the original Exhibit F; 13) update Section B.12 to reflect that BPA has 50% (not 100%) cost share for the Dixonville Line Terminal; 14) update Section B.13 to change the title from Sand Spring to Sand Springs; 15) update Section B.14 to change from the McNary Line Terminal to the Coyote Springs Line Terminal at Slatt Substation, and; 16) update Section B.14 to add Breakers D#5043 and D#5045 and MODs D#5044 and D#5046 at Slatt Substation.*

• Associated Line PTs	50	100

<sup>2</sup> Portland General Electric Company's (PGE) Coyote Springs Substation was inserted between BPA's McNary Substation and BPA's Slatt Substations. Further, this update is to reflect the current transmission line name that is consistent with page D-8 of the FY 2019 Operating Plan. Only the portion of the costs associated with McNary-John Day line loop into BPA's Slatt Substation are allocated to the PNW AC Intertie. These costs are now identified as part of the Coyote Springs-Slatt No.1 and Slatt-John Day No. 1 Lines. In addition, the Transmission Tower structure numbers were renumbered from structure 108/1 to 29/1.

Station General	100	57

<sup>13</sup> Cost Sharing of Station General at Slatt Substation is based on 2 out of 11 terminals applicable to the PNW AC Intertie.

<sup>14</sup> Line relays at Summer Lake Substation on the Malin Transmission Line are 50%/50% cost shared between BPA and PacifiCorp via Contract No. DE-MS79-94BP94332.

*The purpose of this Revision No. 1 in the table below is to update the addition of PacifiCorp effective January 1, 1995, and the Capacity Owner name to reflect the permanent assignment from Power Resource Cooperative (PRC) to Turlock Irrigation District effective January 1, 2016.<sup>1</sup>*

### Capacity Owners

CAPACITY OWNER	CONTRACT NUMBER	CAPACITY OWNERSHIP SHARE (MW)	CAPACITY OWNERSHIP PERCENTAGE
<b>PSE</b>	DE-MS79-94BP94521	400	11.6
<b>Seattle</b>	DE-MS79-94BP94522	160	4.6
<b>Turlock</b>	DE-MS79-94BP94523	50	1.4
<b>Tacoma Power</b>	DE-MS79-94BP94524	41	1.1
<b>Snohomish</b>	DE-MS79-94BP94525	42	1.2
<b>PacifiCorp</b>	DE-MS79-95BP94628	32	0.9

**PSE** Puget Sound Energy, Inc. formerly called Puget Sound Power & Light Company

**Seattle** The City of Seattle, City Light Department aka Seattle City Light

**Turlock** Turlock Irrigation District

**Tacoma Power** City of Tacoma, Department of Public Utilities, Light Division dba Tacoma Power

**Snohomish** Public Utility District No. 1 of Snohomish County

**PacifiCorp** PacifiCorp

---

<sup>1</sup> Pacific Northwest Generating Company was updated to reflect PRC on November 30, 2000.

**FY 2016 Schedule C**

Exhibit I

Prepared date: 1/28/2019

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2					
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$4,748,125				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 4/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$971,500	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order since 2013. This Work Order cost will be updated once BPA receives updated information from PacifiCorp.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared Date: 1/28/2019

**Project Work Order:** TBD Grizzly 02  
**Project Short Description:** Replace SCADA/Sequential Event Recorder (BPA Project)  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:**  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$289,999				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$145,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$434,999				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this Schedule C may be subject to 60% allocation to determine the BPA costs associated with this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Malin 18  
**Project Short Description:** Replace Sequential Event Recorder (BPA Project)  
**Project Facility:** Malin Substation  
**Exhibit F Section:** B.10. Malin 500 kV  
**Percent of Project cost applied to PNW AC Intertie:**  
**Estimated Energization Date:** 5/31/2021  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,300,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$650,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,950,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract Nos. 14-03-29224, 14-03-29225 and DE-MS79-94BP94332 with PacifiCorp and/or Portland General Electric this Schedule C may be subject to 50% allocation to determine the BPA costs associated with this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** 00339633  
**Project Short Description:** Security Enhancements  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.15. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 9/30/2016  
**Work Order Completion Date:** 4/7/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,246,384	\$4,077,903	\$1,044,147	\$3,033,756	(\$1,212,628)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,123,192	\$1,015,644	\$260,056	\$755,589	(\$1,367,603)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$491,733	\$108,138	\$27,689	\$80,449	(\$411,284)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$81,678	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$6,861,309	\$5,201,685	\$1,331,891	\$3,951,472	(\$2,991,516)

**Notes:**

- 1/ This work order will be prorated for 5.9% to reflect that at Chief Joseph Substation, 1 out of 17 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$3,951,472 reflects the total costs from FY 2013-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2014-2017.
- 5/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 5.9% x \$3,951,472 = \$48,492 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Work Order 00339633**

10/31/2017	11/30/2017	3.216%	31		10,571.04
			244		81,678.35

**Equipment Removal Cost Summary**

\$374,186.59 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$303,254.50 is direct cost and \$70,932.09 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$150	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$713,829	\$186,158	\$179,038	\$7,271	(\$706,709)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$7,271 reflects the total costs from FY 2014-2018.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2018.
- 3/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this project is subject to 60% allocation. This Schedule C reflects only BPA's share of the costs associated with this work order.
- 4/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$7,271 = \$1,512 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Work Order 00356246**  
**Work Order Completion Date 04/21/2017**

**Interest Calculation**

<b>From</b>	<b>To</b>	<b>%</b>	<b>Days</b>	<b>Amount</b>	<b>Interest</b>

10/31/2017	11/30/2017	3.216%	31		19.45
			244		150.28

**Equipment Removal Cost Summary**

\$122.90 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$74.49 is direct cost and \$48.42 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00356248

<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$3,374	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$308,529	\$266,241	\$0	\$269,615	(\$42,288)

**Notes:**

- 1/ This work order will be prorated for 11.1% to reflect that at John Day Substation, 2 out of 18 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$269,615 reflects the total costs from FY 2016-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal year that is applicable to this work order is FY 2017.
- 5/ The forecast for this work order was amended per letter dated December 22, 2017.
- 6/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 11.1% x \$269,615 = \$6,225 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. 27	<b>Total</b>	<b>0.2080</b>				
28	<b>Footnotes</b>					
29	<sup>1/</sup> <b>Percent (%) applied to PNWAC</b> (right hand column of Exhibit F) is also listed at the top of the Schedule C.					
30	<sup>2/</sup> <b>Intertie Contract Proration</b> refers to contracts with PacifiCorp and PGE. In some cases the intertie cost proration is reflected in the Exhibit F to the specific Schedule C. As applicable, the percentage on row 7, above, is the cost percentage after the PacifiCorp/PGE costs are removed. If cell D7 is shaded and in italics, it means the Exhibit F percentage does not need to be applied to this cost share calculation.					
31	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, station general replacements, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.					
32	<sup>4/</sup> <b>Station General</b> is general expenses related to a particular substation that do not relate to specific pieces of power equipment. Examples include control houses, fences, gravel or security equipment. If the equipment in the work order is classified as station general and has a cost share percentage it will be displayed above.

27	Footnotes									
28	<sup>1/</sup> BPA Percent (%) owned (left hand column of Exhibit F) reflects BPA's ownership share of each project and is included here for reference only, as row 3 above reflects only BPA's cost share of the project.									
29	<sup>2/</sup> Percent (%) applied to PNW AC (right hand column of Exhibit F) is also listed at the top of the Schedule C.									
30	<sup>3/</sup> Other Proration occurs when a project supports both inertie and non-inertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.									
31	<sup>4/</sup> Station General refers to elements in a substation that are not attributable to specific pieces of power equipment. Examples include control houses, water/drainage systems, fences, and yard rock.									
32	This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.									

**Project Work Order:** 00340156  
**Project Short Description:** Transfer Trip Replacement  
**Project Facility:** Marion Substation  
**Exhibit F Section:** B.11. Marion 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**In Service Date:** 6/2/2017  
**Work Order Completion Date:** 8/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 11/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,659,057	1,659,057.49	757,144.08	\$901,913	(\$757,144)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$829,529	478,287.80	218,276.21	\$260,012	(\$569,517)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$229,761	95,119.80	43,409.82	\$51,710	(\$178,051)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$46,136	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,718,347	\$2,232,465	\$1,018,830	\$1,259,771	(\$1,504,712)

**Notes:**

- 1/ For this Work Order, only one out of three terminals applies, so 33.3% of the costs will be applicable to the Capacity Owners.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$1,259,771 reflects the total costs from FY 2014-2018.
- 3/ Cost sharing percentage x One out of three terminals x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 50% x 33.3% x 20.8% x \$1,259,771 = \$43,629 to be allocated pro rata among Capacity Owners.
- 4/ The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed and will not receive additional charges.

This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$69,576.46 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$56,551.02 is direct cost and \$13,025.44 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

<1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.

<2 Technical Operations project reporting includes the 2017 KSI project Commercial Operations.

<3 Marketing Business Strategy and Assessment project reporting includes the three 2017 KSI projects Long-term Finance and Rates, Asset Management and Business Information Systems.

<4 Transmission Services Internal General & Administrative reporting includes the 2017 KSI project Safety and Occupational Health.

**FY 2017 Amended

TBD Alv Dix 01	10/7/2016, see Note 2	37
TBD Malin 13	(See future billing notice letter for cancellation reason)	41
TBD Malin 14	(See future billing notice letter for cancellation reason)	42
TBD Summer Lake 03	(See future billing notice letter for cancellation reason)	44

**Note 1:** For Exhibit I Schedule Cs billed, please refer to the letter previously provided per date stated above.

**Note 2:** The status of TBD Alvey Dix 01 project is determined each individual fiscal year. For FY 2017, the TBD Alvey Dix 01 has been removed from this FY 2017 operating plan.

**Key:**

Project (BPA) Work Order Status is for BPA project information prior to BPA Active (or Pending) work order status or prior to establishing a BPA work order number

Project (PAC) Work Order Status is for project information provided to BPA in April 2017 and June 2018 prior to establishing a BPA work order number

**FY 2017 Schedule C**

**Project Work Order:** 00248443  
**Project Short Description:** Install a New Shunt Reactor  
**Project Facility:** Alvey Substation  
**Exhibit F Section:** B.1. Alvey 500 kV Switchyard  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 2/24/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$9,939,138	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$4,969,569	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$2,618,206	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$17,526,913	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 7/24/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2017 Schedule C**

**Project Work Order:** 00329379  
**Project Short Description:** Access Road Improvements  
**Project Facility:** Marion-Alvey No. 1  
**Exhibit F Section:** A.11. Marion-Alvey 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**Estimated Energization Date:** 12/15/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$728,732				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$364,366				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$126,402				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,219,500				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

Ms. Stefanie Johnson, Senior Power Analyst  
The City of Seattle, City Light Department  
700 5th Avenue, Suite 3220  
Seattle, WA 98104

Subject: Contract No. DE-MS79-94BP94522

Dear Ms. Johnson:

Enclosed is the proposed FY 2020 Operating Plan as required by Section 13(b)(2) of the PNW AC Intertie Capacity Ownership Agreement, Contract Number DE-MS79-94BP94522.

Pursuant to the FY 2020 Operating Plan, the projected FY 2020 monthly cost for each Capacity Owner is \$254 per MW-month.

The forecasted FY 2019 monthly cost is \$242 per MW-month, which will be reflected in your monthly transmission bills for the fiscal year starting October 1, 2018.

We will have a comprehensive discussion at the November 1, 2018 Annual Meeting. Prior to that meeting, please review the enclosed documents. If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Ochoa", is written over a light blue horizontal line.

In reply refer to: PMT

SEP 26 1994

Amendatory Agreement No. 1  
Contract No. DE-MS79-94BP94523

Mr. Joseph W. Nadal  
Director of Power Management  
Pacific Northwest Generating Cooperative  
711 NE. Halsey, Suite 200  
Portland, OR 97232

Dear Mr. Nadal:

This letter constitutes an agreement between the United States of America, Department of Energy, acting by and through the Bonneville Power Administration (Bonneville) and the Pacific Northwest Generating Cooperative (PNGC), an Oregon cooperative corporation, to amend Contract No. DE-MS79-94BP94523 (Capacity Ownership Agreement), executed by PNGC on September 23, 1994, and responds to PNGC's August 24, 1994, letter regarding the Capacity Ownership Agreement. This letter agreement shall be effective upon the Effective Date of the Capacity Ownership Agreement and shall have the same term as the Capacity Ownership Agreement.

Bonneville and PNGC agree that subparagraphs 3(b)(2)(A) and 3(b)(2)(B) in the Capacity Ownership Agreement shall be deleted and the following language shall be substituted:

- (A) PNGC may use its Scheduling Share to transmit any and all power and energy, whether or not such power or energy is owned by PNGC. PNGC agrees to provide Bonneville access to its available unused Scheduling Share on any hour under terms and conditions comparable to those provided by Bonneville to PNGC under the open market provisions of section 5(c)(2) of Bonneville's Long-Term Intertie Access Policy, including any revisions or amendments thereto.
- (B) PNGC hereby waives any rights it may have under Exhibit B of the Long-Term Intertie Access Policy as Exhibit B existed on June 30, 1994, and any rights to access under the condition 1 provisions of section 5(c)(1) of Bonneville's Long-Term Intertie Access Policy, including any revisions or amendments thereto. PNGC does not waive any other rights it may have to transmission access on Bonneville's PNW-PSW Intertie including but not limited to: (1) firm transmission service on Bonneville's PNW-PSW Intertie; (2) transmission service under the open market provisions of section 5(c)(2) of

Bonneville's Long-Term Intertie Access Policy, including any revisions or amendments thereto; or (3) any rights to request an order from the Federal Energy Regulatory Commission under Section 211, or any other applicable section, of the Federal Power Act or any successor statute, requiring Bonneville to provide transmission service to PNGC consistent with the above.

PNGC and Bonneville agree to negotiate in good faith the terms and conditions under which PNGC shall be able to access Bonneville's PNW-PSW Intertie under the condition 1 provisions of section 5(c)(1) of Bonneville's Long-Term Intertie Access Policy as it existed on June 30, 1994.

In order for Bonneville to implement the changes to (A) and (B) reflected above, a new paragraph 3(b)(2)(D) needs to be added to the Capacity Ownership Agreement. The language follows:

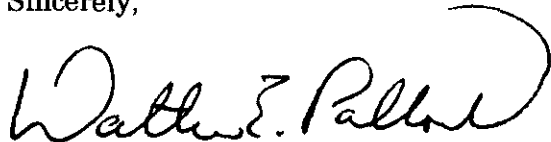

- (D) Bonneville shall not be obligated to provide wheeling under the open market provisions of section 5(c)(2) of Bonneville's Long-Term Intertie Access Policy, including any revisions or amendments thereto, until Bonneville has successfully developed software to allow Bonneville to provide such wheeling to PNGC or until December 27, 1994, which ever occurs sooner.

Further, the following amendments to subsection 4(a) are made. Delete the phrase "(and only PNGC)" in the first sentence. Before the first sentence, insert the following three sentences: "For purposes of this section 4, all references to PNGC shall mean PNGC or its designee. Any such designee shall be identified in writing by PNGC to Bonneville. Only one entity may submit schedules on PNGC's behalf at any one time."

In addition, the following amendment to Exhibit E, paragraph B, is made. Delete the phrase "subparagraph 3(b)(1)(C)" and replace it with the phrase "subparagraph 3(b)(1)(C) or 3(b)(2)(B)."

If the foregoing terms are acceptable to PNGC, please sign and return one copy of this letter agreement. The remaining copy is for your files.

Sincerely,

Walter E. Pollock  
Group Vice President, Marketing,  
Conservation and Production

**PACIFIC NORTHWEST AC INTERTIE  
CAPACITY OWNERSHIP AGREEMENT**  
executed by the  
**UNITED STATES OF AMERICA  
DEPARTMENT OF ENERGY**  
acting by and through the  
**BONNEVILLE POWER ADMINISTRATION**  
and  
**PACIFIC NORTHWEST GENERATING COOPERATIVE**

**Index**

<b>Section</b>		<b>Page</b>
1.	Definitions .....	2
2.	Amendment of Agreement .....	2

This AMENDATORY AGREEMENT is executed as of February 5, 1997 by the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION (hereinafter referred to as "BPA") and the PACIFIC NORTHWEST GENERATING COOPERATIVE (hereinafter referred to as "PNGC"), an Oregon cooperative corporation. The PNGC and BPA are sometimes referred to individually as "Party" and collectively as "Parties," as the context suggests below.

**W I T N E S S E T H :**

WHEREAS the Parties on September 27, 1994, entered into the Pacific Northwest AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94523 (Agreement); and

WHEREAS the Parties on September 30, 1994, entered into Amendatory Agreement No. 1 to the Agreement which revised subsection 3(b)(2); and

WHEREAS the Federal Energy Regulatory Commission (FERC) has issued Order No. 888, "Promoting Wholesale Competition Through Open Access Non-Discriminatory Transmission Service by Public Utilities; Recovery of Stranded Costs By Public Utilities and Transmitting Utilities;" and

WHEREAS the Parties desire to amend the Agreement so as to comply with such Order No. 888 and 889.

NOW, THEREFORE, the Parties agree as follows:

**1. DEFINITIONS**

Capitalized terms used in this Amendatory Agreement, unless otherwise defined herein, have the respective meanings set forth for such terms in the Agreement.

**2. AMENDMENT OF AGREEMENT**

Subsection 3(b) of the Agreement is deleted in its entirety and the following is inserted in lieu thereof:

**(b) Right to Wheel for Third Parties**

The PNGC may use its Scheduling Share to transmit any and all power and energy whether or not such power or energy is owned by PNGC. The PNGC shall have no obligation under this Agreement to make available to BPA any portion of PNGC's Scheduling Share which is unused in any hour, and BPA shall not schedule over PNGC's Scheduling Share without PNGC's prior written consent.

BPA shall treat all scheduling information consistent with the standards of conduct contained in 18 C.F.R. Part 37 of FERC's regulations.

IN WITNESS WHEREOF, the Parties hereto have executed this Amendatory Agreement.

Amendment No. 3  
Contract No. DE-MS79-94BP-94523

**AMENDMENT**  
executed by the  
**BONNEVILLE POWER ADMINISTRATION**  
and  
**POWER RESOURCES COOPERATIVE**  
(Formerly **PACIFIC NORTHWEST GENERATING COOPERATIVE**)

This AMENDMENT to the PNW AC Intertie Capacity Ownership Agreement, Contract Number 94PB-94523, (Agreement) is executed by the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION (BPA) and Power Resources Cooperative, formerly known as Pacific Northwest Generating Cooperative (Customer). The Customer and BPA are sometimes referred to individually as "Party", and collectively as "Parties" as the context suggests below.

This Amendment No. 3 (Amendment) to the Agreement between BPA and the Customer acknowledges that on March 7, 1996, amended articles of incorporation were filed by Customer with the Secretary of State of Oregon formally changing its name to Power Resources Cooperative (PRC).

BPA and the Customer agree:

1. **EFFECTIVE DATE**  
This Amendment shall take effect on the date executed by the Parties (Effective Date).
2. **AMENDMENT OF AGREEMENT**  
BPA and the Transmission Customer wish to amend the Agreement as follows:
  - (a) All references in the Agreement to "Pacific Northwest Generating Cooperative" or "PNGC" are hereby replaced with "Power Resources Cooperative."
3. **OTHER TERMS AND CONDITIONS UNAFFECTED**  
The Parties agree that all other terms and conditions of the Agreement are unaffected by this Amendment.

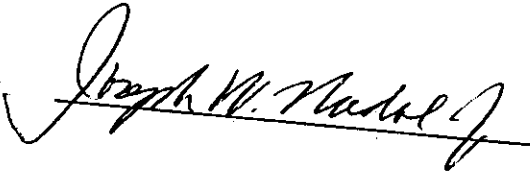

4.

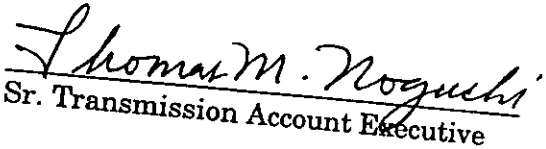

**SIGNATURES**

The signatories represent that they are authorized to enter into this Amendment on behalf of the Party for whom they sign.

Amendment No. 4  
Contract No. DE-MS79-94BP94523

**AMENDMENT**  
**executed by the**  
**UNITED STATES OF AMERICA**  
**DEPARTMENT OF ENERGY**  
**acting by and through the**  
**BONNEVILLE POWER ADMINISTRATION**  
**and**  
**TURLOCK IRRIGATION DISTRICT**

This AMENDMENT to the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94523, (Agreement) is executed by the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION (BPA) and Turlock Irrigation District (Customer). BPA and Turlock are sometimes referred to individually as "Party" and collectively as "Parties."

Power Resources Cooperative (PRC) has agreed to assign and delegate all of its rights and obligations under the Agreement to Customer, from and after 11:59:59 PM Pacific Prevailing Time (PPT) on December 31, 2015. Customer has agreed to accept and assume such assignment and delegation.

The Parties, acting through their authorized representatives, agree to the following:

1. **EFFECTIVE DATE**  
This Amendment shall take effect at 11:59:59 PM PPT on December 31, 2015 (Effective Date).
2. **AMENDMENT OF AGREEMENT**  
The Agreement is amended as follows:
  - (a) All references in the Agreement to "Power Resources Cooperative" are replaced with "Turlock Irrigation District."

DEC 23 2015

- (b) The reference "To Bonneville:" in Section 21(a) of the Agreement shall be deleted and replaced with:

"To Bonneville:  
 Attention: Transmission Account Executive for Turlock Irrigation District –  
 TSE-TPP-2  
 Phone: (360) 619-6016  
 FAX: (360) 619-6940"

If by First Class Mail:  
 Bonneville Power Administration  
 P.O. Box 61409  
 Vancouver, WA 98666-1409

If by Overnight Delivery Service:  
 Bonneville Power Administration – TSE/TPP-2  
 905 NE 11<sup>th</sup> Avenue  
 Portland, OR 97232

- (c) The reference "To Power Resources Cooperative:" in Section 21(a) of the Agreement shall be deleted and replaced with:

"To Turlock Irrigation District:  
 Power Resources Department  
 P.O. Box 949  
 333 East Canal Drive  
 Turlock, CA 95381-0949  
 Phone:(209) 883-8222  
 FAX: (209) 656-2149

3. The Parties agree that all other terms and conditions of the Agreement remain the same.

4. **SIGNATURES**

The Parties have executed this Amendment as of the last date indicated below.

Contract No. 16TX-16190

**CONSENT AGREEMENT**  
**executed by the**  
**UNITED STATES OF AMERICA**  
**DEPARTMENT OF ENERGY**  
**acting by and through the**  
**BONNEVILLE POWER ADMINISTRATION**  
**and**  
**POWER RESOURCES COOPERATIVE**  
**and**  
**TURLOCK IRRIGATION DISTRICT**

This CONSENT AGREEMENT (Agreement) is executed by and among the UNITED STATES OF AMERICA, Department of Energy, acting by and through the BONNEVILLE POWER ADMINISTRATION (BPA), POWER RESOURCES COOPERATIVE (PRC), and the TURLOCK IRRIGATION DISTRICT (TID). BPA, PRC, and TID are sometimes referred to individually as "Party," and collectively as "Parties" as the context suggests below.

**RECITALS**

WHEREAS, BPA and the Pacific Northwest Generating Cooperative (now known as PRC) entered into a Services Agreement, BPA Contract Number DE-MS79-94BP94309, executed as of December 29, 1994, as amended by Amendment No. 1, executed November 30, 2000, a true, correct and complete copy of which is attached hereto as Exhibit A (Services Agreement);

WHEREAS, BPA and PRC entered into a Transmission Agreement for formula power transmission service, BPA Contract Number DE-MS79-95BP94151, executed as of December 29, 1994, as amended by Amendment No. 1, executed November 30, 2000, and Exhibit C, Revision No. 12, effective as of October 1, 2015, a true, correct and complete copy of which is attached hereto as Exhibit B (FPT Agreement);

WHEREAS, BPA and PRC entered into a PNW AC Intertie Capacity Ownership Agreement, BPA Contract Number DE-MS79-94BP94523, entered into as of September 27, 1994, as amended by (a) Amendatory Agreement No. 1, executed as of September 30, 1994, (b) Amendatory Agreement No. 2, executed as of February 5, 1997, and (c) Amendment No. 3, effective as of November 30, 2000, a true, correct and complete copy of which is attached hereto as Exhibit C (Capacity Ownership Agreement) (the Services Agreement,

DEC 31 2015

FPT Agreement and the Capacity Ownership Agreement are collectively referred to as the Assigned Agreements);

WHEREAS, PRC has agreed to assign and delegate all of its rights, and obligations under the Assigned Agreements to TID, pursuant to an Assignment and Assumption Agreement between PRC and TID (the "Assignment and Assumption Agreement"), effective at 11:59:59 PM Pacific Prevailing Time (PPT) on December 31, 2015;

WHEREAS, TID has agreed to accept and assume PRC's assignment and delegation of the Assigned Agreements, effective at 11:59:59 PM PPT on December 31, 2015;

WHEREAS, PRC and TID have requested that BPA consent to said assignment, acceptance, delegation and assumption; and

WHEREAS, BPA is willing to consent to the assignment, acceptance, delegation and assumption of the Assigned Agreements from PRC to TID, subject to the terms and conditions provided herein.

NOW THEREFORE, the Parties, acting through their authorized representatives, agree as follows:

## **TERMS**

### **1. EFFECTIVE DATE**

This Agreement shall become effective at 11:59:59 PM PPT on December 31, 2015.

### **2. ACKNOWLEDGEMENT**

To the knowledge of BPA as of the date of its execution of this Agreement, (a) PRC has paid and performed its obligations as they became due under the Assigned Agreements, (b) there are no defaults by PRC under the Assigned Agreements, (c) BPA has made no claim against PRC under the Assigned Agreements (whether asserted or unasserted) that PRC has disputed, (d) the copies of the Assigned Agreements attached hereto are true, correct and complete, and (e) the Assigned Agreements remain in full force and effect. This acknowledgment does not preclude BPA from recovering from TID any liabilities relating to the period prior to the Effective Date of this Agreement such as billing adjustments should they be discovered after the Effective Date of this Agreement.

### **3. CONSENT AND RELEASE**

(a) BPA hereby consents to the assignment, acceptance, delegation and assumption of PRC's rights and obligations, under the Assigned Agreements to TID pursuant to the terms of the Assignment and Assumption Agreement. BPA's consent is subject to the express condition subsequent that TID shall execute the necessary documents amending the Assigned Agreements to reflect that, effective immediately after 11:59:59 PM Pacific Prevailing Time (PPT) on December 31, 2015, TID is a party to

the Assigned Agreements, substantially in the form attached hereto as Exhibits D, E and F.

(b) Upon delivery to BPA of (i) the fully executed Assignment and Assumption Agreement and (ii) fully executed originals of Exhibits D, E and F, BPA hereby releases PRC, effective on and after 11:59:59 PPT on December 31, 2015, from any and all liabilities and obligations arising out of or related to the Assigned Agreements.

**4. NO WAIVER**

The execution of this Agreement and the consummation of the transaction contemplated in this Agreement are not, and shall not be deemed to constitute, a waiver, forbearance or cure of any default arising prior to 11:59:59 PM PPT on December 31, 2015.

**5. GOVERNING LAW**

This Agreement shall be interpreted, construed, and enforced in accordance with Federal law.

**6. ENTIRE AGREEMENT**

This Agreement constitutes the entire agreement between the Parties. It supersedes all previous communications, representations, or contracts, either written or oral, which purport to describe or embody the subject matter of this Agreement.

**7. CONSENT**

BPA's consent to the assignment of the Assigned Agreements is subject to the express conditions contained herein.

**8. EXECUTION BY COUNTERPART**

This Agreement may be executed in a number of counterparts and shall be deemed to constitute a single document with the same force and effect as if all the Parties hereto having signed a counterpart had signed all other counterparts. Each Party shall deliver a signed counterpart to BPA, who will prepare a composite conformed copy and deliver the same to each Party.

**9. SIGNATURES**

The Parties have executed this Agreement as of the last date indicated below.

Dear Ms. Scott: *ALEKA*

Enclosed for signature are three originals of the Consent Agreement, Contract No. 16TX-16190 (Agreement), between Power Resources Cooperative (PRC), Turlock Irrigation District (TID), and the Bonneville Power Administration (BPA). This Agreement sets forth BPA's consent to PRC's full assignment of its rights and obligations of Services Agreement No. DE-MS79-94BP94309, Transmission Agreement Contract No. DE-MS79-95BP94151 and PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94523, to TID, effective January 1, 2016.

If PRC concurs, please sign all three originals of the Agreement, keep one original Agreement for your records and return one signed original to the following address below by the Close of Business December 23, 2015:

Turlock, CA 95380

JAN 4 2016

Additionally, for PRC's information, TID has been provided three originals of the Agreement including all six exhibits and instructed to provide both PRC and BPA a signed original of the Agreement. TID has also been provided two originals each of Amendment No. 2 to Service Agreement No. DE-MS79-94BP94309, Amendment No. 2 to Transmission Agreement Contract No. DE-MS79-94BP94151 and Amendment No. 4 to PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94523, (Amendments) for execution and instructed to provide an original of each the Amendments to BPA.

January 28, 2019

In reply refer to: TSE/TPP-2

Mr. James Farrar, Director  
Energy Markets  
Turlock Irrigation District  
333 E. Canal Drive  
Turlock, CA 95381

Subject: Contract No. DE-MS79-94BP94523

Dear Mr. Farrar:

Enclosed please find proposed amendments to the FY 2015 through FY 2020 Operating Plans. Sections 9(b)(2)(B)(iii) and 13(k) of the PNW AC Intertie Capacity Ownership Agreement (COA) allow operating plans to be amended to add replacement costs, or to increase forecasted costs. For the following Work Orders, Actual or Updated Costs exceed the Forecasted Costs by at least five percent. These Work Orders were included in prior operating plans, so the proposed Amendments to the Operating Plans below reflect the additional costs.

**Table 1**

Work Order No. for Schedule C	Facility – Project Information	FY Operating Plans to be Amended	Forecasted Costs	Actual or Updated Costs <sup>1</sup>
00297236	Ashe-Marion No. 2 - Replace Spacer-Dampers (225.3 miles)	2016, 2018, 2019, 2020	\$4,404,125	\$4,750,000
TBD Dixonville 04	Dixonville Substation - Replace Series Capacitor Controls (PAC Project)	2015, 2016, 2017, 2018, 2019, 2020	\$600,000	\$972,000
TBD Grizzly 02	Grizzly Substation - Replace SCADA/Sequential Event Recorder (BPA Project)	2018, 2020	\$1 <sup>2</sup>	\$290,000
TBD Malin 18	Replace Sequential Event Recorder	2018, 2020	\$1 <sup>2</sup>	\$1,300,000

<sup>1</sup> The costs listed under the “Actual or Updated Costs” column are Direct Costs (without Indirect Costs or AFUDC costs). Please note that for work orders with the interim designation of “TBD”, the actual costs are not available at this time so the information listed in Table 1 is an updated cost (rounded).

<sup>2</sup> For the \$1 listed under the column “Forecasted Costs”, this was a placeholder representing that there will be a future cost. As of the date of this letter, we are providing updated information on the costs.

The following Work Orders are proposed to be *added* to the Operating Plans listed below.

**Table 2**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>FY Operating Plan(s) Proposed</b>	<b>Work Order Direct Costs as of the Date of this Letter</b>	<b>Work Order Approved &amp; Work Order Closed Dates</b>
00374787	Malin Substation - Replace Round Mountain Relays	2015, 2016, 2017, 2018	\$970,000	11/30/2014 & 1/17/2018
00439779	Ashe-Marion No. 2 - Emergency Replacement of Conductor	2017, 2018, 2019	\$4,300,000	3/7/2017 & 2/22/2018
00440381	Slatt Substation - Emergency Replacement of Breaker	2018, 2019	\$1,100,000	3/24/2017 & 11/27/2017

If you would like to recommend a revision to any forecasted cost or dispute the addition of a project, please do so through the Capacity Owner Committee (Committee). Sections 13(d), 13(e) and 13(m) of the COA detail the process and requirements. If we receive no recommendation from the Committee by February 25, 2019, the addition of these projects, as well as increased costs, will be considered accepted on February 25, 2019 according to the contract terms (See Sections 13(e) and 13(m)).

If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

**FY 2016 Schedule C**

Exhibit I

Prepared date: 1/28/2019

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2					
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$4,748,125				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 4/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$971,500	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order since 2013. This Work Order cost will be updated once BPA receives updated information from PacifiCorp.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared Date: 1/28/2019

**Project Work Order:** TBD Grizzly 02  
**Project Short Description:** Replace SCADA/Sequential Event Recorder (BPA Project)  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:**  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

March 30, 2018

In reply refer to: TSE/TPP-2

Mr. James Farrar, Director  
Energy Markets  
Turlock Irrigation District  
333 E. Canal Drive  
Turlock, CA 95381

Subject: Contract No. DE-MS79-94BP94523

Dear Mr. Farrar:

Section 11(b)(1) of the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94523 (Capacity Ownership Agreement), between the Bonneville Power Administration (BPA) and Turlock Irrigation District (Turlock) requires Turlock to participate in the Remedial Action Scheme (RAS) necessary to maintain Turlock's share of intertie capacity.

The RAS includes generator dropping to support north to south schedules on the AC Intertie. Turlock has historically purchased generator dropping RAS service from BPA to fulfill that portion of its obligation under the Capacity Ownership Agreement.

BPA will continue to provide generator dropping service until such time as Turlock arranges to self-provide generator dropping to meet its obligations. If Turlock elects to provide its own generator dropping, Turlock must provide BPA with at least two years notice to allow time for necessary system adjustments. Consistent with Section 11(b)(1) of the Capacity Ownership Agreement, Turlock would also need to demonstrate to BPA that it has the ability to self-provide generator dropping.

BPA has updated its charge for generator dropping service to account for two separate changes affecting its cost of providing the service: the 2016 upgrade of the DC Intertie and BPA's updated generator dropping rate set in the BP-18 Rate Case. The upgrade to the DC Intertie reduced the amount of generator dropping required because the DC Intertie rating went from 3,100 MW to 3,220 MW. The BP-18 Rate Case increased the cost of providing generator dropping service to reflect 1) the increase in O&M costs; 2) Grand Coulee 3rd power house outages; and 3) an increase in the Handy Whitman cost index.

The charge for generator dropping service has thus fluctuated as follows:

- October 1, 2015 – February 28, 2018: \$6.90 per MW/month (Previous Charge)
- December 20, 2016 – September 30, 2017: \$6.79 per MW/month (Interim Charge)
- October 1, 2017 – present: \$9.64 per MW/month (New Charge)

The new charge of \$9.64 per MW/month will be reflected in Turlock's monthly transmission bills starting March 1, 2018. Turlock's March transmission bill will also reflect a true-up from December 2016 through February 2018 to reflect the changes in the charge for generator dropping. This true-up is summarized in the table below:

<b>Refund using Interim Charge minus Previous Charge (from period of December 20, 2016 to September 30, 2017)</b>	<b>Charge using New Charge minus Previous Charge (from period of October 1, 2017 to February 28, 2018)</b>	<b>One time amount to be billed using New Charge on Turlock's March 2018 transmission bill</b>
[\$6.79 - \$6.90] x 9 months and 11 days x 50 MW = - \$51	[\$9.64 - \$6.90] x 5 months x 50 MW = \$685	- \$51 + \$685 = \$634

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

February 12, 2018

In reply refer to: TSE/TPP-2

Mr. James Farrar, Director  
Energy Markets  
Turlock Irrigation District  
333 E. Canal Drive  
Turlock, CA 95381

Subject: Contract No. DE-MS79-94BP94523

Dear Mr. Farrar:

Listed in Table 1 below are the Schedule C Replacement Projects energized from April 2016 to April 2017. Table 1 summarizes the work order numbers, project information, and Turlock Irrigation District's (TID) pro rata shares of the project costs under Contract No. DE-MS79-94BP94523, PNW AC Intertie Capacity Ownership Agreement (COA). The Schedule Cs referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Document are enclosed.

**Table 1:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>9(b)(2)(B) Date<sup>1</sup></b>	<b>TID Cost Share</b>
00339633	Chief Joseph Substation – Security Enhancements	7/7/2018	\$3,264
00356246	Grizzly Substation – Replace Analog Transfer Trip Equipment	7/21/2018	\$102
00356248	Sand Spring Compensation Station – Replace Analog Transfer Trip Equipment	8/5/2018	\$2,094
00401519	John Day Substation – Station Service Cable Replacement	2/7/2018	\$419
00404279	Fort Rock Compensation Station – Emergency Replacement of Transfer Switch Bank No. 1	7/10/2018	\$1,807

<sup>1</sup> The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed. Section 9(b)(2)(B) of the COA states that Bonneville Power Administration will render the bill for Replacement or Reinforcement Costs within 15 months following the date listed on which the project work order for the Replacement or Reinforcement is closed. When the 9(b)(2)(B) date shown above is in the past, such as for work order No. 00401519, it means that the work order was closed, but that the work order and Operating Plan were later amended. Work order No. 00401519 was amended to add the John Day Substation project cost pursuant to section 13(k) of the COA.

The charges for these projects will be included in TID's February transmission bill to be sent in March 2018.

In addition, the Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00358697	Malin Substation – Replace Analog Transfer Trip Equipment	2018	Work Order Cancelled
00379615	Malin Substation – Malin Physical Security Enhancements	2016	Not applicable to COA
TBD Alvey 04	Alvey Substation – Replace Line Loss Logic Equipment for Marion Alvey Line	2016, 2018	Replaced by Work Order 00339242
TBD Alvey 05	Alvey Substation – Replace Equipment Related to Line Loss Logic/RAS	2016, 2018	Replaced by Work Order 00339242

If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 9/30/2016  
**Work Order Completion Date:** 4/7/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,246,384	\$4,077,903	\$1,044,147	\$3,033,756	(\$1,212,628)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,123,192	\$1,015,644	\$260,056	\$755,589	(\$1,367,603)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$491,733	\$108,138	\$27,689	\$80,449	(\$411,284)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$81,678	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$6,861,309	\$5,201,685	\$1,331,891	\$3,951,472	(\$2,991,516)

**Notes:**

- 1/ This work order will be prorated for 5.9% to reflect that at Chief Joseph Substation, 1 out of 17 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$3,951,472 reflects the total costs from FY 2013-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2014-2017.
- 5/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 5.9% x \$3,951,472 = \$48,492 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			244		81,678.35

**Equipment Removal Cost Summary**

\$374,186.59 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$303,254.50 is direct cost and \$70,932.09 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00356246  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**In Service Date:** 1/13/2017  
**Work Order Completion Date:** 4/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$446,010	\$129,146	\$124,206	\$4,940	(\$441,070)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$223,005	\$53,529	\$51,482	\$2,047	(\$220,958)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$44,814	\$3,483	\$3,350	\$133	(\$44,681)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$150	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$713,829	\$186,158	\$179,038	\$7,271	(\$706,709)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$7,271 reflects the total costs from FY 2014-2018.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2018.
- 3/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this project is subject to 60% allocation. This Schedule C reflects only BPA's share of the costs associated with this work order.
- 4/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$7,271 = \$1,512 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			244		150.28

**Equipment Removal Cost Summary**

\$122.90 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$74.49 is direct cost and \$48.42 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4			\$0	\$2,724	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$268,379	\$146,836	\$0	\$149,560	(\$121,544)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$149,560 reflects the total costs from FY 2014-2017.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2017.
- 3/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$149,560 = \$31,108 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			214		2,724.05

**Equipment Removal Cost Summary**

\$3,242.20 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$2,157.40 is direct cost and \$1,084.76 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00401519  
**Project Short Description:** Station Service Cable Replacement  
**Project Facility:** John Day Substation  
**Exhibit F Section:** B.2. John Day 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 4/29/2016  
**Work Order Completion Date:** 11/7/2016  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 2/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$202,870	\$202,670	\$0	\$202,670	(\$200)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$101,435	\$60,366	\$0	\$60,366	(\$41,069)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$4,224	\$3,205	\$0	\$3,205	(\$1,019)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$3,374	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$308,529	\$266,241	\$0	\$269,615	(\$42,288)

**Notes:**

- 1/ This work order will be prorated for 11.1% to reflect that at John Day Substation, 2 out of 18 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$269,615 reflects the total costs from FY 2016-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal year that is applicable to this work order is FY 2017.
- 5/ The forecast for this work order was amended per letter dated December 22, 2017.
- 6/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 11.1% x \$269,615 = \$6,225 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

27	<b>Total</b>	<b>0.2080</b>				
28	<b>Footnotes</b>					
29	<sup>1/</sup> <b>Percent (%) applied to PNWAC</b> (right hand column of Exhibit F) is also listed at the top of the Schedule C.					
30	<sup>2/</sup> <b>Intertie Contract Proration</b> refers to contracts with PacifiCorp and PGE. In some cases the intertie cost proration is reflected in the Exhibit F to the specific Schedule C. As applicable, the percentage on row 7, above, is the cost percentage after the PacifiCorp/PGE costs are removed. If cell D7 is shaded and in italics, it means the Exhibit F percentage does not need to be applied to this cost share calculation.					
31	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, station general replacements, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.					
32	<sup>4/</sup> <b>Station General</b> is general expenses related to a particular substation that do not relate to specific pieces of power equipment. Examples include control houses, fences, gravel or security equipment. If the equipment in the work order is classified as station general and has a cost share percentage it will be displayed above.

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

June 1, 2018

In reply refer to: TSE/TPP-2

Mr. James Farrar, Director  
Energy Markets  
Turlock Irrigation District  
333 E. Canal Drive  
Turlock, CA 95381

Subject: Contract No. DE-MS79-94BP94523

Dear Mr. Farrar:

Enclosed for your records are two updated Exhibits: Exhibit F, Revision No. 1 and Exhibit G Revision No. 1 of the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94523, between the Bonneville Power Administration and Turlock Irrigation District.

A draft Exhibit F, Revision No. 1 and draft Exhibit G, Revision No. 1 were provided as part of the document packet at the October 26, 2017 3<sup>rd</sup> AC Capacity Owners Annual Meeting.

The primary changes identified under Exhibit F, Revision No. 1 are as follows:

1. Add footnotes to clarify information throughout Exhibit F;
2. Add the Shunt Reactor at Alvey Substation, add the breakers and disconnect switches at Slatt Substation, and update several sections in this Exhibit F to reflect equipment added to the Intertie facilities over the years;
3. Add two disconnect switches at Grizzly Substation (for John Day terminals) and two disconnect switches at Marion Substation (for Buckley and Alvey line terminal) that were all inadvertently omitted from the original Exhibit F;
4. Add interchange meter references to Alvey Substation and Captain Jack Substation, add a Relay House to Alvey Substation, and add a Control House to Grizzly Substation and Malin Substation respectively to clarify treatment for these facilities; and
5. Add the percentages for most of the station general facilities at various substations.

The change under Exhibit G, Revision No. 1 is to update the addition of PacifiCorp and that Turlock Irrigation District is the permanent assignee of Power Resources Cooperative and not Pacific Northwest Generating Cooperative.

If you have any questions regarding this information, please contact me by June 18, 2018 at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

Digitally signed by

Transmission Account Executive  
Transmission Sales

cc:  
Ms. Young Linn, Bonneville Power Administration

2 Enclosures

*The purpose of this Exhibit F, Revision No. 1 is to: 1) add footnotes to provide clarity throughout Exhibit F; 2) update Section A.12 to reflect the line name change from McNary-Slatt to Coyote Springs-Slatt; 3) update Sections B.1 through B.14 to remove dispatcher one-line identification numbers for BPA and PacifiCorp; 4) update Section B.1 to add the Shunt Reactor at Alvey, add the Alvey Relay House and contents (relays, data systems, etc.), and add the Interchange Meter for the Dixonville 500 kV Transmission Line; 5) add a new Section B.2 for Bakeoven 500 kV Compensation Station; 6) update Sections B.3 through B.16 to add percentages for Station General; 7) update Section B.4 to change reference from Klamath Cogen to Snow Goose, add Shunt Capacitor information, and to add the Interchange Meter for the Malin No. 2 Transmission Line; 8) update Section B.6 to change references from Contract No. DE-MS79-86BP92299 to DE-MS79-94BP94332; 9) update Section B.8 to add the Grizzly Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 10) update Section B.9 to add MODs D#4130 and D#4139 of the breaker-and-a-half scheme for both Grizzly No. 2 and Grizzly No. 1 Line Terminals, respectively, in the John Day Substation that were inadvertently omitted from the original Exhibit F; 11) update Section B.10 to add the Malin Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 12) update Section B.11 to add MODs D#4385 and D#4378 in the Buckley Line Terminal and Alvey Line Terminal respectively that were inadvertently omitted from the original Exhibit F; 13) update Section B.12 to reflect that BPA has 50% (not 100%) cost share for the Dixonville Line Terminal; 14) update Section B.13 to change the title from Sand Spring to Sand Springs; 15) update Section B.14 to change from the McNary Line Terminal to the Coyote Springs Line Terminal at Slatt Substation, and; 16) update Section B.14 to add Breakers D#5043 and D#5045 and MODs D#5044 and D#5046 at Slatt Substation.*

<sup>2</sup> Portland General Electric Company's (PGE) Coyote Springs Substation was inserted between BPA's McNary Substation and BPA's Slatt Substations. Further, this update is to reflect the current transmission line name that is consistent with page D-8 of the FY 2019 Operating Plan. Only the portion of the costs associated with McNary-John Day line loop into BPA's Slatt Substation are allocated to the PNW AC Intertie. These costs are now identified as part of the Coyote Springs-Slatt No.1 and Slatt-John Day No. 1 Lines. In addition, the Transmission Tower structure numbers were renumbered from structure 108/1 to 29/1.

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

July 24, 2018

In reply refer to: TSE/TPP-2

Mr. James Farrar, Director  
Energy Markets  
Turlock Irrigation District  
333 E. Canal Drive  
Turlock, CA 95381

Subject: Contract No. DE-MS79-94BP94523

Dear Mr. Farrar:

Pursuant to Section 13(k) and 9(b)(2)(A)(v) of the PNW AC Intertie Capacity Ownership Agreement (COA), Contract No. DE-MS79-94BP94523 between Turlock Irrigation District (Turlock) and the Bonneville Power Administration (BPA), I have enclosed for your review the amendment to the FY 2017 Operating Plan (Amendment).

The Amendment updates Schedules A, B, D, E, F, and G of the FY 2017 Operating Plan to reflect updated costs for FY 2017 and modifies the monthly charge related to those costs. Schedule ABFG is included to support Schedules A, B, F and G of the Operating Plan.

Each year's Operating Plan is used to forecast each Capacity Owner's allocation of qualifying expenses based on their ownership share. This monthly charge is included on each Capacity Owner's transmission bill. After the end of each fiscal year, the Operating Plan is amended to reflect actual, rather than forecasted costs. The pro-rata share of the difference between forecasted and actual costs is reflected as a one-time charge, or credit, on each Capacity Owner's transmission bill.

The actual costs are included in the "Actual" column of the Schedules A, B, D, E, F and G of the Amendment. The actual costs in Schedules D (General Plant), and E (Other-PacifiCorp) are *higher* than the forecast.

The other schedules show that actual costs in Schedules A (Operations), B (Maintenance), F (Contract and Rates), and G (Transmission Scheduling) are *lower* than the forecast.

Overall for FY 2017, actual costs for the BPA portion of the Third AC Intertie were *higher* than the forecasted costs communicated in the October 2, 2015 letter. The costs are higher by \$570,480, as shown on the summary page of the Amendment. The actual costs are \$233 per MW-month, compared to the forecasted costs of \$219 per MW-month in the 2015 letter.

The FY 2017 charge for Turlock will be \$7,987 plus \$422 interest, calculated pursuant to Section 9(b)(2)(A)(vi) of the COA. Thus, Turlock's total one time true-up charge will be \$8,409, in its July 2018 transmission bill to be sent in August 2018.

This letter also serves as notice of an amendment to add five Work Orders to the Schedule Cs of this FY 2017 Operating Plan. Note that one of the Work Orders listed below has been billed and the other was part of a cancellation notice.

<b>Work Order Number / FY 17 Operating Plan Page</b>	<b>Facility – Project Information</b>	<b>FY Operating Plan(s) Proposed</b>	<b>Work Order Direct Costs Estimate as of the Date of this Letter</b>

00356246/ Page 28	Grizzly Substation – Replace Analog Transfer Trip Equipment	FY 2017, FY 2018	See Billing notice sent on February 12, 2018
00358697/ Page 29	Malin Substation – Analog Transfer Trip	FY 2017	See Cancellation notice sent on February 12, 2018

This letter also provides notice of amendment to the Schedule Cs of FY 2017 Operating Plan to increase the estimated cost related to the following Work Order:

1. Work Order 00339242 at Alvey Substation (Remedial Action Scheme) was originally forecasted for \$250k. Currently the estimated direct costs are nearly \$1.3M and preliminary notes state that the BPA cost share percentage will be 50%. Please refer to the WO Database Projections Report (June 12, 2018). The increased costs were originally provided in a report from PacifiCorp in April 2017. BPA's information from 2016, regarding the increase, is that the scope was broadened for changes in design, materials and construction.

In addition, we have updated the Schedule C, Table of Contents, to reflect current Work Order information, such as: cancelled Work Orders, Work Orders added to the FY 2017 Operating Plan, updates to Work Order completion dates, and Work Order descriptions.

Please review this information and respond through the Capacity Owners Committee (Committee) as provided in Sections 13(d), (e), and (m) of the COA. If the Committee recommends a revision(s) to any forecast cost, actual cost or General Plant Cost, in this Amendment, BPA will respond as provided in Section 13 of the COA. Pursuant to Sections 13(e) and (m) of the COA, if BPA does not receive a recommendation from the

Committee by August 20, 2018, the addition of these projects, together with the increased cost, will be considered accepted.

If you have any questions regarding this information, please contact me at (360) 619-6704.

Sincerely,

On behalf of J. Diego Ochoa  
Transmission Account Executive

Vancouver, WA 98666-1409

TRANSMISSION SERVICES

August 17, 2018

In reply refer to: TSE/TPP-2

Mr. James Farrar, Director  
Energy Markets  
Turlock Irrigation District  
333 E. Canal Drive  
Turlock, CA 95381

Subject: Contract No. DE-MS79-94BP94523

Dear Mr. Farrar:

Listed in Table 1 below are the Schedule C Replacement Projects energized from November 2014 to December 2017. Table 1 summarizes the work order numbers, project information, and Turlock Irrigation District's (Turlock) pro rata shares of the project costs under Contract No. DE-MS79-94BP94523, PNW AC Intertie Capacity Ownership Agreement (COA). The Schedule C's referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Documents are enclosed.

**Table 1:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>9(b)(2)(B) Date<sup>1</sup></b>	<b>Turlock Cost Share</b>
00248443	Alvey Substation - Install a New Shunt Reactor	10/11/2018	\$189,062
00329379	Marion-Alvey No. 1 - Access Road Improvements	8/19/2018	\$4,000
00335841	Marion-Alvey No. 1 - Standalone Access Road: 10 miles (Related to 45 mile span of transmission line)	12/19/2018	\$22,507
00339242	Alvey Substation - Replace Remedial Action Scheme, Transfer Trip Equipment and Line Loss Relays on the Dixonville 500 kV line	10/13/2018	\$12,966

<sup>1</sup> The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed. Section 9(b)(2)(B) of the COA states that Bonneville Power Administration will render the bill for Replacement or Reinforcement Costs within 15 months following the date listed on which the project work order for the Replacement or Reinforcement is closed. When the 9(b)(2)(B) date shown above is in the past, such as for Work Order No. 00348163, it means that the Work Order was closed, but that the Work Order and Operating Plan were later amended. Work Order No. 00348163 was amended to add the John Day Substation project cost pursuant to Section 13(k) of the COA.

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>9(b)(2)(B) Date</b>	<b>Turlock Cost Share</b>
00348163	Grizzly-Captain Jack No. 1 - Land Rights Acquisition for Access Road, Structure 156/1	4/11/2018	\$1,372
00381350	Summer Lake Substation - Upgrade Engine Generator	1/6/2019	\$6,132
00396160	Dixonville Substation - 500 kV Relay Replacements to Meridian (PAC Project)	2/21/2019	\$7,966
00396161	Meridian Substation - 500 kV Relay Replacements to Dixonville (PAC Project)	2/21/2019	\$6,940

The charges for these projects will be included in Turlock’s August transmission bill to be sent in September 2018.

In addition, the Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00356249	Sycan Compensation Station - Replace Analog Transfer Trip Equipment for Sycan Bank No. 3	2016, 2019	Not Applicable
00432972	Malin Substation - SCADA Remote Terminal Unit (RTU) and Serial Event Recorder Replacement	2019	Work Order cancelled
00449853	Ashe-Marion No. 2 - Emergency Replacement of Access Road	2019	Work Order cancelled
TBD Malin 13	Malin Substation - Relay Replacement on the Round Mt. No. 1 line	2015, 2017	Combined with TBD Malin 14 project
TBD Malin 14	Malin Substation - Relay Replacement on the Round Mt. No. 2 line	2015, 2016, 2017	Combined into BPA Work Order #00374787
TBD Summerlake 03	Summerlake Substation - Work on BPA Relays on the Grizzly line	2015, 2017	Combined into BPA Work Order #00322042

Work Order No. for Schedule C	Facility – Project Information	Operating Plan(s) Listing this Work Order	Reason
TBD Sycan 01	Sycan Compensation Station - Replace Station Battery	2018	Combined into Work Order #00423702
TBD Sycan 02	Sycan Compensation Station - Station Service Engine Generator Upgrade	2018	Combined into Work Order #00423702
TBD Sycan 03	Sycan Compensation Station - Station Service Engine Generator Upgrade	2018	Combined into Work Order #00423702
TBD Sycan 04	Sycan Compensation Station - Update Grounding Equipment	2018	Combined into Work Order #00423702

If you have any questions regarding this information, feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

Project Work Order: 00248443  
 Project Short Description: Install a New Shunt Reactor  
 Project Facility: Alvey Substation  
 Exhibit F Section: B.5. Alvey 500 kV  
 Percent of Project Cost Applied to PNW AC Intertie: 100%  
 In Service Date: 2/24/2017  
 Work Order Completion Date: 7/11/2017  
 Work Order Status: COMPLETE  
 Contract Section 9(b)(2)(B) Date: 10/11/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$9,939,138	\$9,485,755	\$0	\$9,485,755	(\$453,383)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$4,969,569	\$2,788,342	\$0	\$2,788,342	(\$2,181,227)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$2,618,206	\$1,052,746	\$0	\$1,052,746	(\$1,565,460)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$177,618	
<b>E. Total Replacement Costs and Reinforcement Costs</b>	5	\$17,526,913	\$13,326,844	\$0	\$13,504,462	(\$4,200,069)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$13,504,462 reflects the total costs from FY 2010-2017.
- 2/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 100% x 20.8% x \$13,504,462 = \$2,808,928 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			153		177,618.02

**Equipment Removal Cost Summary**

\$8,291.40 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$5,025.09 is direct cost and \$3,266.31 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$ 2,737	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
	5	\$174,390	\$95,257	\$0	\$97,994	(\$79,133)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$97,994 reflects the total costs from FY 2014-2017.
- 2/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 100% x 20.8% x \$97,994 = \$20,383 to be allocated pro rata among Capacity Owners.
- 3/ The forecast for this Work Order was amended per letter dated 12/22/2017.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

There were no retirement charges associated with this Work Order.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

(Lines 1 + 2 + 3 + 4)	5	\$886,643	\$748,147	\$0	\$768,448	(\$138,496)

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$768,448 reflects the total costs from FY 2015-2018.
- 2/ This Work Order will be subject to proration so that 57% of the cost will be applicable to Capacity Owners while 43% of the cost is Network cost (see top of this Exhibit).
- 3/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 57% x 20.8% x \$768,448 = \$91,107 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$5,176.05 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$3,137.00 is direct cost and \$2,039.05 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

TRANSMISSION SERVICES

September 28, 2018

In reply refer to: TSE/TPP-2

Mr. James Farrar, Director  
Energy Markets  
Turlock Irrigation District  
333 E. Canal Drive  
Turlock, CA 95381

Subject: Contract No. DE-MS79-94BP94523

Dear Mr. Farrar:

Enclosed is the proposed FY 2020 Operating Plan as required by Section 13(b)(2) of the PNW AC Intertie Capacity Ownership Agreement, Contract Number DE-MS79-94BP94523.

Pursuant to the FY 2020 Operating Plan, the projected FY 2020 monthly cost for each Capacity Owner is \$254 per MW-month.

The forecasted FY 2019 monthly cost is \$242 per MW-month, which will be reflected in your monthly transmission bills for the fiscal year starting October 1, 2018.

We will have a comprehensive discussion at the November 1, 2018 Annual Meeting. Prior to that meeting, please review the enclosed documents. If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Ochoa".

The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Notes:**

<sup>1/</sup> Schedule C amounts are not included in Totals. Schedule C forecasts are presented separately (attached).

<sup>2/</sup> Southern Intertie North to South is 4800 MW; BPA's share is 72% or 3450 MW.

**FY 2020  
Operating Plan**

**Schedule A for FY 2020***Data taken from the BP-18 Rate Case*

	Line No.	Forecast	Actual	Difference
<b>I. Operations Costs</b>				
<b>A. Allocation Factor</b>				
MFUs of Bonneville's PNW AC Intertie	1	81.0		
MFUs of the FCRTS	2	3,574		
Allocation Factor (Line 1/Line 2)	3	2.27%		
<b>B. Operations Functionalization Factor</b>				
Bonneville's total transmission-related systems operations cost from the BP-18 Rate Case	4	\$100,314,727		
Bonneville's total system operations cost from the BP-18 Rate Case	5	\$100,314,727		
Operations functionalization factor (Line 4/Line 5)	6	100.00%		
<b>C. Allocated Direct Cost</b>				
Bonneville's total system operations direct cost	7	\$88,422,021		
Allocated Direct Cost of Operations Cost (Line 3 * Line 6 * Line 7)	8	\$2,003,969		
<b>D. Indirect Cost</b>				
Bonneville's total system operations indirect cost	9	\$11,892,706		
Indirect Cost of Operations Cost (Line 3 * Line 6 * Line 9)	10	\$269,533		
<b>E. Overhead Cost</b>				
Bonneville's total system operations overhead cost	11	\$38,012,116		
Overhead Cost of Operations Cost (Line 3 * Line 6 * Line 11)	12	\$861,495		
<b>F. Operations Cost</b> (Line 8 + Line 10 + Line 12)	<b>13</b>	<b>\$3,134,996</b>		

**Note:**

Line No. 4 above references 2.27% as the round up for 2.266368%.

This information is being released externally by BPA on 9/28/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020  
Operating Plan**

**Schedule B for FY 2020**

<i>Data taken from the BP-18 Rate Case</i>	Line No.	Forecast	Actual	Difference

*Below is information about work orders added or removed, acronyms and further information.*

*NOTE: Tables on this page are intentionally blank, and will be updated when this operating plan is amended.*

<b>Work Order Numbers ADDED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

<b>Work Order Numbers REMOVED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

**Note 1:** The status of TBD Alvey-Dixonville 01 project is determined for each individual fiscal year.

**Note 2:** The status of TBD Dixonville-Meridian 02 project is determined for each individual fiscal year.

**Key:**

BPA Project Work Order Status is for BPA project information prior to BPA Active (or Pending) Work Order status or prior to establishing a BPA Work Order number.

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)  
  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,374,063				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$1,232,581				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$8,354,769				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 5/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Project Work Order:** 00335885  
**Project Short Description:** Land Rights Acquisition for Access Road, Structure 152/2  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)  
  
**Percent of Project cost applied to PNW AC Intertie:** 25%  
**Estimated Energization Date:** 11/15/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,263,220				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$631,610				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$122,087				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,016,917				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Per Exhibit F, Section A.3. above, this Work Order will be subject to proration, such that 25% of the cost will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00355355  
**Project Short Description:** Upgrade Station Service  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.5. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 8/30/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,675,488				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$837,744				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$329,788				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,843,020				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will be prorated to reflect that at Chief Joseph Sub, 1 terminal out of 17 (500 kV) line terminals supports the AC Intertie.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00356244  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Fort Rock Compensation Station  
**Exhibit F Section:** B.7. Fort Rock 500 kV Compensation Station)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 1/13/2017  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$167,215				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$83,608				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$16,818				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$267,640				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration so that 2/3's of the costs will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00367753  
 Project Short Description: Ground Wire Replacement  
 Project Facility: John Day-Grizzly No. 1  
 Exhibit F Section: A.9. John Day-Grizzly No. 1 500 kV  
 Percent of Project cost applied to  
 PNW AC Intertie: 100%  
 Estimated Energization Date: 8/28/2020  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$535,621				
<b>B. Indirect Cost and Overhead Costs</b>

AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$139,784				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00416195  
**Project Short Description:** SCADA Replacement  
**Project Facility:** Captain Jack Substation  
**Exhibit F Section:** B.4. Captain Jack 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 9/27/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,811,734				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$905,867				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$225,459				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,943,060				

**Notes:**

<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$3,150,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$1,575,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$413,964				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$5,138,964				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C reflects BPA's 50% cost share for this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$132,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

November 21, 2018

In reply refer to: TSE/TPP-2

Mr. James Farrar, Director  
Energy Markets  
Turlock Irrigation District  
333 E. Canal Drive  
Turlock, CA 95381

Subject: Contract No. DE-MS79-94BP94523

Dear Mr. Farrar:

Listed in Table 1 below is the Schedule C Replacement Project energized in June 2017. Table 1 summarizes the work order number, project information, and Turlock Irrigation District's (Turlock) pro rata share of the project costs under Contract No. DE-MS79-94BP94523, PNW AC Intertie Capacity Ownership Agreement. The Schedule C referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Documents are enclosed.

**Table 1:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>9(b)(2)(B) Date</b>	<b>Turlock Cost Share</b>
00340156	Marion Substation – Transfer Trip Replacement	11/21/2018	\$2,937

The charge for this project will be included in Turlock's November transmission bill to be sent in December 2018.

The Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00379612	Grizzly Substation – Physical Security Project	2017	General Plant
00381830	Malin Substation – Replacement of Communication Battery Charger	2017	General Plant
00381831	Fort Rock Compensation Station – Replacement of Communication Battery Charger	2017	General Plant
00381833	Sycan Compensation Station – Replacement of Communication Battery Charger	2017	General Plant
00384207	Buckley Substation – Replace Line Relay on Slatt Terminal	2019	Not Applicable
TBD Dixonville 05	Dixonville Substation – Regravel Yard	2018, 2019	Not Applicable

If you have any questions regarding this information, feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

Ms. Young Linn, Bonneville Power Administration

**Project Work Order:** 00340156  
**Project Short Description:** Transfer Trip Replacement  
**Project Facility:** Marion Substation  
**Exhibit F Section:** B.11. Marion 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**In Service Date:** 6/2/2017  
**Work Order Completion Date:** 8/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 11/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,659,057	1,659,057.49	757,144.08	\$901,913	(\$757,144)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$829,529	478,287.80	218,276.21	\$260,012	(\$569,517)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$229,761	95,119.80	43,409.82	\$51,710	(\$178,051)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$46,136	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,718,347	\$2,232,465	\$1,018,830	\$1,259,771	(\$1,504,712)

**Notes:**

- 1/ For this Work Order, only one out of three terminals applies, so 33.3% of the costs will be applicable to the Capacity Owners.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$1,259,771 reflects the total costs from FY 2014-2018.
- 3/ Cost sharing percentage x One out of three terminals x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 50% x 33.3% x 20.8% x \$1,259,771 = \$43,629 to be allocated pro rata among Capacity Owners.
- 4/ The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed and will not receive additional charges.

This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			426		\$46,136.38

**Equipment Removal Cost Summary**

\$69,576.46 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$56,551.02 is direct cost and \$13,025.44 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

## Customer Billing Shares Document for November 21, 2018 Letter

24	Tacoma	0.0110
25	Turlock	0.0140
26	<b>Total</b>	<b>0.2080</b>
27	<b>Footnotes</b>	
28	<sup>1/</sup> <b>BPA Percent (%) owned</b> (left hand column of Exhibit F) reflects BPA's ownership share of each project and is included here for reference only, as row 3 above reflects only BPA's cost share of the project.	
29	<sup>2/</sup> <b>Percent (%) applied to PNW AC</b> (right hand column of Exhibit F) is also listed at the top of the Schedule C.	
30	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.	
31	<sup>4/</sup> <b>Station General</b> refers to elements in a substation that are not attributable to specific pieces of power equipment. Examples include control houses, water/drainage systems, fences, and yard rock.	
32	This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.	

*The purpose of this Exhibit F, Revision No. 1 is to: 1) add footnotes to provide clarity throughout Exhibit F; 2) update Section A.12 to reflect the line name change from McNary-Slatt to Coyote Springs-Slatt; 3) update Sections B.1 through B.14 to remove dispatcher one-line identification numbers for BPA and PacifiCorp; 4) update Section B.1 to add the Shunt Reactor at Alvey, add the Alvey Relay House and contents (relays, data systems, etc.), and add the Interchange Meter for the Dixonville 500 kV Transmission Line; 5) add a new Section B.2 for Bakeoven 500 kV Compensation Station; 6) update Sections B.3 through B.16 to add percentages for Station General; 7) update Section B.4 to change reference from Klamath Cogen to Snow Goose, add Shunt Capacitor information, and to add the Interchange Meter for the Malin No. 2 Transmission Line; 8) update Section B.6 to change references from Contract No. DE-MS79-86BP92299 to DE-MS79-94BP94332; 9) update Section B.8 to add the Grizzly Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 10) update Section B.9 to add MODs D#4130 and D#4139 of the breaker-and-a-half scheme for both Grizzly No. 2 and Grizzly No. 1 Line Terminals, respectively, in the John Day Substation that were inadvertently omitted from the original Exhibit F; 11) update Section B.10 to add the Malin Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 12) update Section B.11 to add MODs D#4385 and D#4378 in the Buckley Line Terminal and Alvey Line Terminal respectively that were inadvertently omitted from the original Exhibit F; 13) update Section B.12 to reflect that BPA has 50% (not 100%) cost share for the Dixonville Line Terminal; 14) update Section B.13 to change the title from Sand Spring to Sand Springs; 15) update Section B.14 to change from the McNary Line Terminal to the Coyote Springs Line Terminal at Slatt Substation, and; 16) update Section B.14 to add Breakers D#5043 and D#5045 and MODs D#5044 and D#5046 at Slatt Substation.*

<sup>2</sup> Portland General Electric Company's (PGE) Coyote Springs Substation was inserted between BPA's McNary Substation and BPA's Slatt Substations. Further, this update is to reflect the current transmission line name that is consistent with page D-8 of the FY 2019 Operating Plan. Only the portion of the costs associated with McNary-John Day line loop into BPA's Slatt Substation are allocated to the PNW AC Intertie. These costs are now identified as part of the Coyote Springs-Slatt No.1 and Slatt-John Day No. 1 Lines. In addition, the Transmission Tower structure numbers were renumbered from structure 108/1 to 29/1.

<sup>1</sup> Pacific Northwest Generating Company was updated to reflect PRC on November 30, 2000.

**FY 2016 Schedule C**

Exhibit I

Prepared date: 1/28/2019

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2					
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$4,748,125				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 4/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$971,500				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order since 2013. This Work Order cost will be updated once BPA receives updated information from PacifiCorp.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared Date: 1/28/2019

**Project Work Order:** TBD Grizzly 02  
**Project Short Description:** Replace SCADA/Sequential Event Recorder (BPA Project)  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:**  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$289,999				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$145,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$434,999				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this Schedule C may be subject to 60% allocation to determine the BPA costs associated with this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Malin 18  
**Project Short Description:** Replace Sequential Event Recorder (BPA Project)  
**Project Facility:** Malin Substation  
**Exhibit F Section:** B.10. Malin 500 kV  
**Percent of Project cost applied to PNW AC Intertie:**  
**Estimated Energization Date:** 5/31/2021  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,300,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$650,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,950,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract Nos. 14-03-29224, 14-03-29225 and DE-MS79-94BP94332 with PacifiCorp and/or Portland General Electric this Schedule C may be subject to 50% allocation to determine the BPA costs associated with this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. **Project Work Order:** 00339633  
**Project Short Description:** Security Enhancements  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.15. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 9/30/2016  
**Work Order Completion Date:** 4/7/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,246,384	\$4,077,903	\$1,044,147	\$3,033,756	(\$1,212,628)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,123,192	\$1,015,644	\$260,056	\$755,589	(\$1,367,603)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$491,733	\$108,138	\$27,689	\$80,449	(\$411,284)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$81,678	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$6,861,309	\$5,201,685	\$1,331,891	\$3,951,472	(\$2,991,516)

**Notes:**

- 1/ This work order will be prorated for 5.9% to reflect that at Chief Joseph Substation, 1 out of 17 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$3,951,472 reflects the total costs from FY 2013-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2014-2017.
- 5/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 5.9% x \$3,951,472 = \$48,492 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			244		81,678.35

**Equipment Removal Cost Summary**

\$374,186.59 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$303,254.50 is direct cost and \$70,932.09 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00356246  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**In Service Date:** 1/13/2017  
**Work Order Completion Date:** 4/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$446,010	\$129,146	\$124,206	\$4,940	(\$441,070)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$223,005	\$53,529	\$51,482	\$2,047	(\$220,958)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$44,814	\$3,483	\$3,350	\$133	(\$44,681)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$150	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$713,829	\$186,158	\$179,038	\$7,271	(\$706,709)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$7,271 reflects the total costs from FY 2014-2018.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2018.
- 3/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this project is subject to 60% allocation. This Schedule C reflects only BPA's share of the costs associated with this work order.
- 4/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$7,271 = \$1,512 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

10/31/2017	11/30/2017	3.216%	31		19.45
			244		150.28

**Equipment Removal Cost Summary**

\$122.90 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$74.49 is direct cost and \$48.42 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Equipment Removal Cost Summary**

\$3,242.20 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$2,157.40 is direct cost and \$1,084.76 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00401519  
**Project Short Description:** Station Service Cable Replacement  
**Project Facility:** John Day Substation  
**Exhibit F Section:** B.2. John Day 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 4/29/2016  
**Work Order Completion Date:** 11/7/2016  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 2/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$202,870	\$202,670	\$0	\$202,670	(\$200)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$101,435	\$60,366	\$0	\$60,366	(\$41,069)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$4,224	\$3,205	\$0	\$3,205	(\$1,019)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$3,374	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$308,529	\$266,241	\$0	\$269,615	(\$42,288)

**Notes:**

- 1/ This work order will be prorated for 11.1% to reflect that at John Day Substation, 2 out of 18 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$269,615 reflects the total costs from FY 2016-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal year that is applicable to this work order is FY 2017.
- 5/ The forecast for this work order was amended per letter dated December 22, 2017.
- 6/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 11.1% x \$269,615 = \$6,225 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

28	<b>Footnotes</b>					
29	<sup>1/</sup> Percent (%) applied to PNWAC (right hand column of Exhibit F) is also listed at the top of the Schedule C.					
30	<sup>2/</sup> Intertie Contract Proration refers to contracts with PacifiCorp and PGE. In some cases the intertie cost proration is reflected in the Exhibit F to the specific Schedule C. As applicable, the percentage on row 7, above, is the cost percentage after the PacifiCorp/PGE costs are removed. If cell D7 is shaded and in italics, it means the Exhibit F percentage does not need to be applied to this cost share calculation.					
31	<sup>3/</sup> Other Proration occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, station general replacements, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.					
32	<sup>4/</sup> Station General is general expenses related to a particular substation that do not relate to specific pieces of power equipment. Examples include control houses, fences, gravel or security equipment. If the equipment in the work order is classified as station general and has a cost share percentage it will be displayed above.

AFUDC of Replacements and Reinforcements	3	\$399,579	\$91,364	\$0	\$91,364	(\$308,215)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$34,083	
<b>E. Total Replacement Costs and Reinforcement Costs</b>	5	\$4,870,172	\$3,181,224	\$0	\$3,215,307	(\$1,688,948)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ The percent applicable to the PNW AC Intertie for this Work Order is 50%. Reference Exhibit F, % PNW AC Intertie column.
- 2/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$3,215,307 reflects the total costs from FY 2013-2017.
- 3/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 50% x 20.8% x \$3,215,307 = \$334,392 to be allocated pro rata among Capacity Owners.
- 4/ The forecast for this Work Order was amended per letter dated 12/22/2017.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

There were no retirement charges associated with this Work Order.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

Project Work Order: 00339242

**Equipment Removal Cost Summary**

There were no retirement charges associated with this work order.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

28	<sup>1/</sup> BPA Percent (%) owned (left hand column of Exhibit F) reflects BPA's ownership share of each project and is included here for reference only, as row 3 above reflects only BPA's cost share of the project.									
29	<sup>2/</sup> Percent (%) applied to PNW AC (right hand column of Exhibit F) is also listed at the top of the Schedule C.									
30	<sup>3/</sup> Other Proration occurs when a project supports both inertie and non-inertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.									
31	<sup>4/</sup> Station General refers to elements in a substation that are not attributable to specific pieces of power equipment. Examples include control houses, water/drainage systems, fences, and yard rock.									
32	This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.									

**Project Work Order:** 00340156

**In Service Date:** 6/2/2017  
**Work Order Completion Date:** 8/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 11/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,659,057	1,659,057.49	757,144.08	\$901,913	(\$757,144)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$829,529	478,287.80	218,276.21	\$260,012	(\$569,517)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$229,761	95,119.80	43,409.82	\$51,710	(\$178,051)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$46,136	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,718,347	\$2,232,465	\$1,018,830	\$1,259,771	(\$1,504,712)

**Notes:**

- 1/ For this Work Order, only one out of three terminals applies, so 33.3% of the costs will be applicable to the Capacity Owners.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$1,259,771 reflects the total costs from FY 2014-2018.
- 3/ Cost sharing percentage x One out of three terminals x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 50% x 33.3% x 20.8% x \$1,259,771 = \$43,629 to be allocated pro rata among Capacity Owners.
- 4/ The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed and will not receive additional charges.

This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$69,576.46 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$56,551.02 is direct cost and \$13,025.44 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

- <1 Although the forecasts in this report are presented as point estimates, BPA operates a hydro-based system that encounters much uncertainty regarding water supply and wholesale market prices. These uncertainties, among other factors, may result in large range swings +/- impacting the final results in revenues, expenses, and cash reserves.
- <2 Technical Operations project reporting includes the 2017 KSI project Commercial Operations.
- <3 Marketing Business Strategy and Assessment project reporting includes the three 2017 KSI projects Long-term Finance and Rates, Asset Management and Business Information Systems.
- <4 Transmission Services Internal General & Administrative reporting includes the 2017 KSI project Safety and Occupational Health.

**Note 1:** For Exhibit I Schedule Cs billed, please refer to the letter previously provided per date stated above.

**Note 2:** The status of TBD Alvey Dix 01 project is determined each individual fiscal year. For FY 2017, the TBD Alvey Dix 01 has been removed from this FY 2017 operating plan.

**Key:**

Project (BPA) Work Order Status is for BPA project information prior to BPA Active (or Pending) work order status or prior to establishing a BPA work order number

Project (PAC) Work Order Status is for project information provided to BPA in April 2017 and June 2018 prior to establishing a BPA work order number

**FY 2017 Schedule C**

**Project Work Order:** 00248443  
**Project Short Description:** Install a New Shunt Reactor  
**Project Facility:** Alvey Substation  
**Exhibit F Section:** B.1. Alvey 500 kV Switchyard  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 2/24/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$9,939,138				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$4,969,569				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$2,618,206				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$17,526,913				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 7/24/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2017 Schedule C**

**Project Work Order:** 00329379  
**Project Short Description:** Access Road Improvements  
**Project Facility:** Marion-Alvey No. 1  
**Exhibit F Section:** A.11. Marion-Alvey 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**Estimated Energization Date:** 12/15/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$728,732				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$364,366				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$126,402				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$1,219,500				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.

This information is being released externally by BPA on 7/24/2018 as an ad hoc report or analysis generated for a specific purpose. **FY 2017 Schedule C**

**Project Work Order:** 00339242  
**Project Short Description:** Replace Remedial Action Scheme, Transfer Trip Equipment and Line Loss Relays on the Dixonville 500 kV line  
**Project Facility:** Alvey Substation  
**Exhibit F Section:** B.5. Alvey 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 8/30/2017  
**Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,222,998				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$611,499				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$182,585				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,017,082				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for the work order; each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided; Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C has had the 50% PacifiCorp costs removed from this work order.
- 5/ The costs in the Line #1 are from PacifiCorp information provided April 2017 to BPA.

This information is being released externally by BPA on 7/24/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

00367753	Ground Wire Replacement	John Day-Grizzly No. 1	08/28/20	12
00381451	Replace Three Breakers and a Disconnect Switch	Slatt Substation	09/30/19	13
00381549	Replace Breaker Failure Relays	Slatt Substation	09/30/19	14
00381820	Replace Slatt-Buckley and Slatt John Day Risers	Slatt Substation	09/30/19	15
00416195	SCADA Replacement	Captain Jack Substation	09/27/19	16
00416257	Replace Overhead Ground Wire	John Day-Grizzly No. 1	11/15/19	17
00420153	Replace Potential Transformers	Chief Joseph Substation	12/31/18	18
00423657 was TBD Sycan 01	Upgrading Equipment Associated with Sycan Bank No. 1	Sycan Compensation Station	09/15/18	19
00423664	Replace Disconnect Switches in Sycan Bank No. 1	Sycan Compensation Station	11/01/19	20
00423702 was TBD Sycan 02,03,04	Replace Station Service Engine Generator and Control Battery at Sycan Bank No. 3	Sycan Compensation Station	09/11/20	21
00441772	Overhead Ground Wire Replacement	John Day-Grizzly No. 2	11/15/19	22
00455995 was TBD Malin 03	Security Enhancement	Malin Substation	08/30/19	23
00460709	Replace Microwave Transfer Trip Relays	Grizzly Substation	12/02/19	24

*Below is information about work orders added or removed, acronyms and further information.*

*NOTE: Tables on this page are intentionally blank, and will be updated when this operating plan is amended.*

<b>Work Order Numbers ADDED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

<b>Work Order Numbers REMOVED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

**Note 1:** The status of TBD Alvey-Dixonville 01 project is determined for each individual fiscal year.

**Note 2:** The status of TBD Dixonville-Meridian 02 project is determined for each individual fiscal year.

**Key:**

BPA Project Work Order Status is for BPA project information prior to BPA Active (or Pending) Work Order status or prior to establishing a BPA Work Order number.

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)  
  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,374,063				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$1,232,581				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$8,354,769				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 5/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Project Work Order:** 00335885  
**Project Short Description:** Land Rights Acquisition for Access Road, Structure 152/2  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)  
  
**Percent of Project cost applied to PNW AC Intertie:** 25%  
**Estimated Energization Date:** 11/15/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,263,220				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$631,610				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$122,087				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,016,917				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Per Exhibit F, Section A.3. above, this Work Order will be subject to proration, such that 25% of the cost will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00355355  
**Project Short Description:** Upgrade Station Service  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.5. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 8/30/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,675,488				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$837,744				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$329,788				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,843,020				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will be prorated to reflect that at Chief Joseph Sub, 1 terminal out of 17 (500 kV) line terminals supports the AC Intertie.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00356244  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Fort Rock Compensation Station  
**Exhibit F Section:** B.7. Fort Rock 500 kV Compensation Station)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 1/13/2017  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$167,215				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$83,608				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$16,818				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$267,640				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration so that 2/3's of the costs will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00367753  
 Project Short Description: Ground Wire Replacement  
 Project Facility: John Day-Grizzly No. 1  
 Exhibit F Section: A.9. John Day-Grizzly No. 1 500 kV  
 Percent of Project cost applied to  
 PNW AC Intertie: 100%  
 Estimated Energization Date: 8/28/2020  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$535,621				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$267,811				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$114,896				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$918,328				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).

**FY 2020 Schedule C**

**Project Work Order:** 00420153  
**Project Short Description:** Replace Potential Transformers  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.5. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:**  
**Estimated Energization Date:** 12/31/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$244,128				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$122,064				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$22,443				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$388,635				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will be prorated to reflect that at Chief Joseph Sub, 1 terminal out of 11 (230 kV) line terminals supports the AC Intertie.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00423657  
**Project Short Description:** Upgrading Equipment Associated with Sycan Bank No. 1  
**Project Facility:** Sycan Compensation Station  
**Exhibit F Section:** B.15. Sycan 500 kV Compensation Station  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 9/15/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$5,707,621				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,853,811				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$426,054				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$8,987,486				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ The August 17, 2018 email regarding billing stated TBD Sycan 1 was combined into Work Order #00423702. It should have stated "Combined into Work Order #00423657".

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00423664  
**Project Short Description:** Replace Disconnect Switches in Sycan Bank No. 1  
**Project Facility:** Sycan Compensation Station  
**Exhibit F Section:** B.15. Sycan 500 kV Compensation Station  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 11/1/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,472,404	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$736,202	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$170,360	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,378,966	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. - 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C reflects BPA's 50% cost share for this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs (Lines 1 + 2 + 3 + 4)</b>						
	5	\$971,500	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order (WO) since 2013. This WO cost information will be updated once received.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: TBD Dixonville-Meridian 02  
 Project Short Description: Miscellaneous Right-of-Way Capital Repairs (PAC Project)  
 Project Facility: Dixonville-Meridian  
 Exhibit F Section: A.6. Dixonville-Meridian 500 kV  
 Percent of Project cost applied to PNW AC Intertie: 100%  
 Estimated Energization Date: 1/1/2020  
 Status: Project (PAC)  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$100,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$100,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA owns 50% of the equipment covered by this Work Order. Therefore, 50% of costs are applicable to Capacity Owners. Please see Contract No. DE-MS79-94BP94332.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: TBD Grizzly 02  
 Project Short Description: Replace SCADA/Sequential Event Recorder (BPA Project)  
 Project Facility: Grizzly Substation  
 Exhibit F Section: B.8. Grizzly 500 kV  
 Percent of Project cost applied to PNW AC Intertie:  
 Estimated Energization Date:  
 Status: Project (BPA)  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$289,999				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$145,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$434,999				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: TBD Malin 18  
 Project Short Description: Replace Sequential Event Recorder (BPA Project)  
 Project Facility: Malin Substation

Portland, Oregon 97208-3621

SEP 26 1994

In reply refer to: PMT

Amendatory Agreement No. 1  
Contract No. DE-MS79-94BP94524

Mr. Steven J. Klein  
Light Division Superintendent  
City of Tacoma, Department of Public Utilities  
3628 South 35th Street  
Tacoma, WA 98411

Dear Mr. Klein:

This letter constitutes an agreement between the United States of America, Department of Energy, acting by and through the Bonneville Power Administration (Bonneville) and the City of Tacoma, Department of Public Utilities (Tacoma), a municipal corporation operating and existing under the laws of the State of Washington, to amend Contract No. DE-MS79-94BP94524 (Capacity Ownership Agreement), executed by Tacoma on September 23, 1994. This letter agreement shall be effective upon the Effective Date of the Capacity Ownership Agreement and shall have the same term as the Capacity Ownership Agreement.

Bonneville and Tacoma agree that subparagraphs 3(b)(2)(A) and 3(b)(2)(B) in the Capacity Ownership Agreement shall be deleted and the following language shall be substituted:

- (A) Tacoma may use its Scheduling Share to transmit any and all power and energy, whether or not such power or energy is owned by Tacoma. Tacoma agrees to provide Bonneville access to its available unused Scheduling Share on any hour under terms and conditions comparable to those provided by Bonneville to Tacoma under the open market provisions of section 5(c)(2) of Bonneville's Long-Term Intertie Access Policy, including any revisions or amendments thereto.
- (B) Tacoma hereby waives any rights it may have under Exhibit B of the Long-Term Intertie Access Policy as Exhibit B existed on June 30, 1994, and any rights to access under the condition 1 provisions of section 5(c)(1) of Bonneville's Long-Term Intertie Access Policy, including any revisions or amendments thereto. Tacoma does not waive any other rights it may have to transmission access on Bonneville's PNW-PSW Intertie including but not limited to: (1) firm transmission service on Bonneville's PNW-PSW Intertie; (2) transmission service under the open market provisions of section 5(c)(2) of Bonneville's Long-Term Intertie Access Policy, including any revisions or

amendments thereto; or (3) any rights to request an order from the Federal Energy Regulatory Commission under Section 211, or any other applicable section, of the Federal Power Act or any successor statute, requiring Bonneville to provide transmission service to Tacoma consistent with the above.

Tacoma and Bonneville agree to negotiate in good faith the terms and conditions under which Tacoma shall be able to access Bonneville's PNW-PSW Intertie under the condition 1 provisions of section 5(c)(1) of Bonneville's Long-Term Intertie Access Policy as it existed on June 30, 1994.

In order for Bonneville to implement the changes to (A) and (B) reflected above, a new paragraph 3(b)(2)(D) needs to be added to the Capacity Ownership Agreement. The language follows:

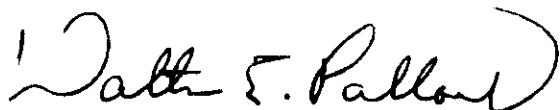

- (D) Bonneville shall not be obligated to provide wheeling under the open market provisions of section 5(c)(2) of Bonneville's Long-Term Intertie Access Policy, including any revisions or amendments thereto, until Bonneville has successfully developed software to allow Bonneville to provide such wheeling to Tacoma or until December 27, 1994, whichever occurs sooner.

Further, the following amendments to subsection 4(a) are made. Delete the phrase "(and only Tacoma)" in the first sentence. Before the first sentence, insert the following three sentences: "For purposes of this section 4, all references to Tacoma shall mean Tacoma or its designee. Any such designee shall be identified in writing by Tacoma to Bonneville. Only one entity may submit schedules on Tacoma's behalf at any one time."

In addition, the following amendment to Exhibit E, paragraph B, is made. Delete the phrase "subparagraph 3(b)(1)(C)" and replace it with the phrase "subparagraph 3(b)(1)(C) or 3(b)(2)(B)."

If the foregoing terms are acceptable to Tacoma, please sign and return one copy of this letter agreement. The remaining copy is for your files.

Sincerely,

Walter E. Pollock  
Group Vice President, Marketing,  
Conservation and Production

TRANSMISSION SERVICES

March 30, 2018

In reply refer to: TSE/TPP-2

Mr. Clay Norris, Power Section Manager  
City of Tacoma, Department of Public Utilities, Light Division  
3628 South 35<sup>th</sup> Street  
Tacoma, WA 98409-3115

Subject: Contract No. DE-MS79-94BP94524

Dear Mr. Norris:

Section 11(b)(1) of the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94524 (Capacity Ownership Agreement), between the Bonneville Power Administration (BPA) and City of Tacoma, Department of Public Utilities, Light Division (Tacoma) requires Tacoma to participate in the Remedial Action Scheme (RAS) necessary to maintain Tacoma's share of intertie capacity.

The RAS includes generator dropping to support north to south schedules on the AC Intertie. Tacoma has historically purchased generator dropping RAS service from BPA to fulfill that portion of its obligation under the Capacity Ownership Agreement.

BPA will continue to provide generator dropping service until such time as Tacoma arranges to self-provide generator dropping to meet its obligations. If Tacoma elects to provide its own generator dropping, Tacoma must provide BPA with at least two years notice to allow time for necessary system adjustments. Consistent with Section 11(b)(1) of the Capacity Ownership Agreement, Tacoma would also need to demonstrate to BPA that it has the ability to self-provide generator dropping.

BPA has updated its charge for generator dropping service to account for two separate changes affecting its cost of providing the service: the 2016 upgrade of the DC Intertie and BPA's updated generator dropping rate set in the BP-18 Rate Case. The upgrade to the DC Intertie reduced the amount of generator dropping required because the DC Intertie rating went from 3,100 MW to 3,220 MW. The BP-18 Rate Case increased the cost of providing generator dropping service to reflect 1) the increase in O&M costs; 2) Grand Coulee 3rd power house outages; and 3) an increase in the Handy Whitman cost index.

The charge for generator dropping service has thus fluctuated as follows:

- October 1, 2015 – February 28, 2018: \$6.90 per MW/month (Previous Charge)
- December 20, 2016 – September 30, 2017: \$6.79 per MW/month (Interim Charge)
- October 1, 2017 – present: \$9.64 per MW/month (New Charge)

The new charge of \$9.64 per MW/month will be reflected in Tacoma's monthly transmission bills starting March 1, 2018. Tacoma's March transmission bill will also reflect a true-up from December 2016 through February 2018 to reflect the changes in the charge for generator dropping. This true-up is summarized in the table below:

<b>Refund using Interim Charge minus Previous Charge (from period of December 20, 2016 to September 30, 2017)</b>	<b>Charge using New Charge minus Previous Charge (from period of October 1, 2017 to February 28, 2018)</b>	<b>One time amount to be billed using New Charge on Tacoma's March 2018 transmission bill</b>
$[\$6.79 - \$6.90] \times 9 \text{ months and } 11 \text{ days} \times 41 \text{ MW} = -\$42$	$[\$9.64 - \$6.90] \times 5 \text{ months} \times 41 \text{ MW} = \$562$	$-\$43 + \$575 = \$520$

TRANSMISSION SERVICES

January 28, 2019

In reply refer to: TSE/TPP-2

Mr. Clay Norris, Power Section Manager  
City of Tacoma, Department of Public Utilities, Light Division  
3628 South 35<sup>th</sup> Street  
Tacoma, WA 98409-3115

Subject: Contract No. DE-MS79-94BP94524

Dear Mr. Norris:

Enclosed please find proposed amendments to the FY 2015 through FY 2020 Operating Plans. Sections 9(b)(2)(B)(iii) and 13(k) of the PNW AC Intertie Capacity Ownership Agreement (COA) allow operating plans to be amended to add replacement costs, or to increase forecasted costs. For the following Work Orders, Actual or Updated Costs exceed the Forecasted Costs by at least five percent. These Work Orders were included in prior operating plans, so the proposed Amendments to the Operating Plans below reflect the additional costs.

**Table 1**

Work Order No. for Schedule C	Facility – Project Information	FY Operating Plans to be Amended	Forecasted Costs	Actual or Updated Costs <sup>1</sup>
00297236	Ashe-Marion No. 2 - Replace Spacer-Dampers (225.3 miles)	2016, 2018, 2019, 2020	\$4,404,125	\$4,750,000
TBD Dixonville 04	Dixonville Substation - Replace Series Capacitor Controls (PAC Project)	2015, 2016, 2017, 2018, 2019, 2020	\$600,000	\$972,000
TBD Grizzly 02	Grizzly Substation - Replace SCADA/Sequential Event Recorder (BPA Project)	2018, 2020	\$1 <sup>2</sup>	\$290,000
TBD Malin 18	Replace Sequential Event Recorder	2018, 2020	\$1 <sup>2</sup>	\$1,300,000

<sup>1</sup> The costs listed under the “Actual or Updated Costs” column are Direct Costs (without Indirect Costs or AFUDC costs). Please note that for work orders with the interim designation of “TBD”, the actual costs are not available at this time so the information listed in Table 1 is an updated cost (rounded).

<sup>2</sup> For the \$1 listed under the column “Forecasted Costs”, this was a placeholder representing that there will be a future cost. As of the date of this letter, we are providing updated information on the costs.

The following Work Orders are proposed to be *added* to the Operating Plans listed below.

**Table 2**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>FY Operating Plan(s) Proposed</b>	<b>Work Order Direct Costs as of the Date of this Letter</b>	<b>Work Order Approved &amp; Work Order Closed Dates</b>
00374787	Malin Substation - Replace Round Mountain Relays	2015, 2016, 2017, 2018	\$970,000	11/30/2014 & 1/17/2018
00439779	Ashe-Marion No. 2 - Emergency Replacement of Conductor	2017, 2018, 2019	\$4,300,000	3/7/2017 & 2/22/2018
00440381	Slatt Substation - Emergency Replacement of Breaker	2018, 2019	\$1,100,000	3/24/2017 & 11/27/2017

If you would like to recommend a revision to any forecasted cost or dispute the addition of a project, please do so through the Capacity Owner Committee (Committee). Sections 13(d), 13(e) and 13(m) of the COA detail the process and requirements. If we receive no recommendation from the Committee by February 25, 2019, the addition of these projects, as well as increased costs, will be considered accepted on February 25, 2019 according to the contract terms (See Sections 13(e) and 13(m)).

If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

**FY 2016 Schedule C**

Exhibit I

Prepared date: 1/28/2019

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2					
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$4,748,125				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 4/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2015 Schedule C**

Exhibit I  
Prepared date: 1/28/2019

**Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$971,500				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332, this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order since 2013. This Work Order cost will be updated once BPA receives updated information from PacifiCorp.

This information is being released externally by BPA on 1/28/2019 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2018 Schedule C**

Exhibit I  
Prepared Date: 1/28/2019

**Project Work Order:** TBD Grizzly 02  
**Project Short Description:** Replace SCADA/Sequential Event Recorder (BPA Project)  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:**  
**Status:** Project (BPA)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

February 12, 2018

In reply refer to: TSE/TPP-2

Mr. Clay Norris, Power Section Manager  
City of Tacoma, Department of Public Utilities, Light Division  
3628 South 35<sup>th</sup> Street  
Tacoma, WA 98409-3115

Subject: Contract No. DE-MS79-94BP94524

Dear Mr. Norris:

Listed in Table 1 below are the Schedule C Replacement Projects energized from April 2016 to April 2017. Table 1 summarizes the work order numbers, project information, and City of Tacoma, Department of Public Utilities, Light Division's (Tacoma) pro rata shares of the project costs under Contract No. DE-MS79-94BP94524, PNW AC Intertie Capacity Ownership Agreement (COA). The Schedule Cs referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Document are enclosed.

**Table 1:**

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date <sup>1</sup>	Tacoma Cost Share
00339633	Chief Joseph Substation – Security Enhancements	7/7/2018	\$2,565
00356246	Grizzly Substation – Replace Analog Transfer Trip Equipment	7/21/2018	\$80
00356248	Sand Spring Compensation Station – Replace Analog Transfer Trip Equipment	8/5/2018	\$1,645
00401519	John Day Substation – Station Service Cable Replacement	2/7/2018	\$329
00404279	Fort Rock Compensation Station – Emergency Replacement of Transfer Switch Bank No. 1	7/10/2018	\$1,420

<sup>1</sup> The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed. Section 9(b)(2)(B) of the COA states that Bonneville Power Administration will render the bill for Replacement or Reinforcement Costs within 15 months following the date listed on which the project work order for the Replacement or Reinforcement is closed. When the 9(b)(2)(B) date shown above is in the past, such as for work order No. 00401519, it means that the work order was closed, but that the work order and Operating Plan were later amended. Work order No. 00401519 was amended to add the John Day Substation project cost pursuant to section 13(k) of the COA.

The charges for these projects will be included in Tacoma's February transmission bill to be sent in March 2018.

In addition, the Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

<b>Work Order No. for Schedule C</b>	<b>Facility – Project Information</b>	<b>Operating Plan(s) Listing this Work Order</b>	<b>Reason</b>
00358697	Malin Substation – Replace Analog Transfer Trip Equipment	2018	Work Order Cancelled
00379615	Malin Substation – Malin Physical Security Enhancements	2016	Not applicable to COA
TBD Alvey 04	Alvey Substation – Replace Line Loss Logic Equipment for Marion Alvey Line	2016, 2018	Replaced by Work Order 00339242
TBD Alvey 05	Alvey Substation – Replace Equipment Related to Line Loss Logic/RAS	2016, 2018	Replaced by Work Order 00339242

If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

**Project Work Order:** 00339633  
**Project Short Description:** Security Enhancements  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.15. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 3 below  
**In Service Date:** 9/30/2016  
**Work Order Completion Date:** 4/7/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/7/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,246,384	\$4,077,903	\$1,044,147	\$3,033,756	(\$1,212,628)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,123,192	\$1,015,644	\$260,056	\$755,589	(\$1,367,603)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$491,733	\$108,138	\$27,689	\$80,449	(\$411,284)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$81,678	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$6,861,309	\$5,201,685	\$1,331,891	\$3,951,472	(\$2,991,516)

**Notes:**

- 1/ This work order will be prorated for 5.9% to reflect that at Chief Joseph Substation, 1 out of 17 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$3,951,472 reflects the total costs from FY 2013-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2014-2017.
- 5/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 5.9% x \$3,951,472 = \$48,492 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			244		81,678.35

**Equipment Removal Cost Summary**

\$374,186.59 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$303,254.50 is direct cost and \$70,932.09 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00356246  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Grizzly Substation  
**Exhibit F Section:** B.8. Grizzly 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**In Service Date:** 1/13/2017  
**Work Order Completion Date:** 4/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$446,010	\$129,146	\$124,206	\$4,940	(\$441,070)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$223,005	\$53,529	\$51,482	\$2,047	(\$220,958)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$44,814	\$3,483	\$3,350	\$133	(\$44,681)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$150	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$713,829	\$186,158	\$179,038	\$7,271	(\$706,709)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$7,271 reflects the total costs from FY 2014-2018.
- 2/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal years that are applicable to this work order are FY 2015-2018.
- 3/ Pursuant to Contract Nos. 14-03-56747 and DE-MS79-86BP92277 with Portland General Electric this project is subject to 60% allocation. This Schedule C reflects only BPA's share of the costs associated with this work order.
- 4/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$7,271 = \$1,512 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

(Lines 1 + 2 + 3 + 4)	5	\$308,529	\$266,241	\$0	\$269,615	(\$42,288)

**Notes:**

- 1/ This work order will be prorated for 11.1% to reflect that at John Day Substation, 2 out of 18 terminals support the AC Intertie.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$269,615 reflects the total costs from FY 2016-2017.
- 3/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 4/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal year that is applicable to this work order is FY 2017.
- 5/ The forecast for this work order was amended per letter dated December 22, 2017.
- 6/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x 11.1% x \$269,615 = \$6,225 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$2,004.54 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$1,382.44 is direct cost and \$622.10 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00404279  
**Project Short Description:** Emergency Replacement of Transfer Switch - Bank No. 1  
**Project Facility:** Fort Rock Compensation Station  
**Exhibit F Section:** B.10. Fort Rock 500 kV Compensation Station  
**Percent of Project cost applied to PNW AC Intertie:** Please see footnote # 2 below  
**In Service Date:** 12/22/2016  
**Work Order Completion Date:** 4/10/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 7/10/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$88,988	\$88,988	\$0	\$88,988	(\$0)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$44,494	\$36,118	\$0	\$36,118	(\$8,376)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$3,321	\$1,292	\$0	\$1,292	(\$2,029)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without Plant Costs)	4				\$2,668	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$136,803	\$126,398	\$0	\$129,066	(\$10,405)

**Notes:**

- 1/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by fiscal year. The adjusted actual of \$129,066 reflects the total costs from FY 2016-2017.
- 2/ Exhibit F does not specify percentages for Station General. Cost sharing for Station General is determined on a case by case basis to reflect how the project supports the AC Intertie.
- 3/ At the top of this Exhibit the first fiscal year related to this work order is listed. The other fiscal year that is applicable to this work order is FY 2017.
- 4/ The forecast for this work order was amended per letter dated December 22, 2017.
- 5/ Cost sharing percentage x Capacity Owner share of BPA cost x Line 5 Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 100% x 20.8% x \$129,066 = \$26,846 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 2/12/18 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

27	<b>Total</b>	<b>0.2080</b>				
28	<b>Footnotes</b>					
29	<sup>1/</sup> <b>Percent (%) applied to PNWAC</b> (right hand column of Exhibit F) is also listed at the top of the Schedule C.					
30	<sup>2/</sup> <b>Intertie Contract Proration</b> refers to contracts with PacifiCorp and PGE. In some cases the intertie cost proration is reflected in the Exhibit F to the specific Schedule C. As applicable, the percentage on row 7, above, is the cost percentage after the PacifiCorp/PGE costs are removed. If cell D7 is shaded and in italics, it means the Exhibit F percentage does not need to be applied to this cost share calculation.					
31	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, station general replacements, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.					
32	<sup>4/</sup> <b>Station General</b> is general expenses related to a particular substation that do not relate to specific pieces of power equipment. Examples include control houses, fences, gravel or security equipment. If the equipment in the work order is classified as station general and has a cost share percentage it will be displayed above.

TRANSMISSION SERVICES

June 1, 2018

In reply refer to: TSE/TPP-2

Mr. Clay Norris, Power Section Manager  
City of Tacoma, Department of Public Utilities, Light Division  
3628 South 35<sup>th</sup> Street  
Tacoma, WA 98409-3115

Subject: Contract No. DE-MS79-94BP94524

Dear Mr. Norris:

Enclosed for your records are two updated Exhibits: Exhibit F, Revision No. 1 and Exhibit G Revision No. 1 of the PNW AC Intertie Capacity Ownership Agreement, Contract No. DE-MS79-94BP94524, between the Bonneville Power Administration and City of Tacoma, Department of Public Utilities, Light Division.

A draft Exhibit F, Revision No. 1 and draft Exhibit G, Revision No. 1 were provided as part of the document packet at the October 26, 2017 3<sup>rd</sup> AC Capacity Owners Annual Meeting.

The primary changes identified under Exhibit F, Revision No. 1 are as follows:

1. Add footnotes to clarify information throughout Exhibit F;
2. Add the Shunt Reactor at Alvey Substation, add the breakers and disconnect switches at Slatt Substation, and update several sections in this Exhibit F to reflect equipment added to the Intertie facilities over the years;
3. Add two disconnect switches at Grizzly Substation (for John Day terminals) and two disconnect switches at Marion Substation (for Buckley and Alvey line terminal) that were all inadvertently omitted from the original Exhibit F;
4. Add interchange meter references to Alvey Substation and Captain Jack Substation, add a Relay House to Alvey Substation, and add a Control House to Grizzly Substation and Malin Substation respectively to clarify treatment for these facilities; and
5. Add the percentages for most of the station general facilities at various substations.

The change under Exhibit G, Revision No. 1 is to update the addition of PacifiCorp and that Turlock Irrigation District is the permanent assignee of Power Resources Cooperative and not Pacific Northwest Generating Cooperative.

If you have any questions regarding this information, please contact me by June 18, 2018 at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

Digitally signed by  
jdo4978@bud.bpa.gov

<sup>2</sup> Portland General Electric Company's (PGE) Coyote Springs Substation was inserted between BPA's McNary Substation and BPA's Slatt Substations. Further, this update is to reflect the current transmission line name that is consistent with page D-8 of the FY 2019 Operating Plan. Only the portion of the costs associated with McNary-John Day line loop into BPA's Slatt Substation are allocated to the PNW AC Intertie. These costs are now identified as part of the Coyote Springs-Slatt No.1 and Slatt-John Day No. 1 Lines. In addition, the Transmission Tower structure numbers were renumbered from structure 108/1 to 29/1.

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

July 24, 2018

In reply refer to: TSE/TPP-2

Mr. Clay Norris, Power Section Manager  
City of Tacoma, Department of Public Utilities, Light Division  
3628 South 35<sup>th</sup> Street  
Tacoma, WA 98409-3115

Subject: Contract No. DE-MS79-94BP94524

Dear Mr. Norris:

Pursuant to Section 13(k) and 9(b)(2)(A)(v) of the PNW AC Intertie Capacity Ownership Agreement (COA), Contract No. DE-MS79-94BP94524 between City of Tacoma, Department of Public Utilities, Light Division (Tacoma) and the Bonneville Power Administration (BPA), I have enclosed for your review the amendment to the FY 2017 Operating Plan (Amendment).

The Amendment updates Schedules A, B, D, E, F, and G of the FY 2017 Operating Plan to reflect updated costs for FY 2017 and modifies the monthly charge related to those costs. Schedule ABFG is included to support Schedules A, B, F and G of the Operating Plan.

Each year's Operating Plan is used to forecast each Capacity Owner's allocation of qualifying expenses based on their ownership share. This monthly charge is included on each Capacity Owner's transmission bill. After the end of each fiscal year, the Operating Plan is amended to reflect actual, rather than forecasted costs. The pro-rata share of the difference between forecasted and actual costs is reflected as a one-time charge, or credit, on each Capacity Owner's transmission bill.

The actual costs are included in the "Actual" column of the Schedules A, B, D, E, F and G of the Amendment. The actual costs in Schedules D (General Plant), and E (Other-PacifiCorp) are *higher* than the forecast.

The other schedules show that actual costs in Schedules A (Operations), B (Maintenance), F (Contract and Rates), and G (Transmission Scheduling) are *lower* than the forecast.

Overall for FY 2017, actual costs for the BPA portion of the Third AC Intertie were *higher* than the forecasted costs communicated in the October 2, 2015 letter. The costs are higher by \$570,480, as shown on the summary page of the Amendment. The actual costs are \$233 per MW-month, compared to the forecasted costs of \$219 per MW-month in the 2015 letter.

The FY 2017 charge for Tacoma will be \$6,275 plus \$331 interest, calculated pursuant to Section 9(b)(2)(A)(vi) of the COA. Thus, Tacoma's total one time true-up charge will be \$6,606, in its July 2018 transmission bill to be sent in August 2018.

This letter also serves as notice of an amendment to add five Work Orders to the Schedule Cs of this FY 2017 Operating Plan. Note that one of the Work Orders listed below has been billed and the other was part of a cancellation notice.

<b>Work Order Number / FY 17 Operating Plan Page</b>	<b>Facility – Project Information</b>	<b>FY Operating Plan(s) Proposed</b>	<b>Work Order Direct Costs Estimate as of the Date of this Letter</b>
00248443/ Page 6	Alvey Substation – Install a New Shunt Reactor	FY 2012, FY 2013, FY 2014, FY 2015, FY 2017	\$10,000,000
00329379/ Page 14	Marion-Alvey No. 1 – Access Road Improvements	FY 2017, FY 2018	\$729,000
00356246/ Page 28	Grizzly Substation – Replace Analog Transfer Trip Equipment	FY 2017, FY 2018	See Billing notice sent on February 12, 2018
00358697/ Page 29	Malin Substation – Analog Transfer Trip	FY 2017	See Cancellation notice sent on February 12, 2018

This letter also provides notice of amendment to the Schedule Cs of FY 2017 Operating Plan to increase the estimated cost related to the following Work Order:

1. Work Order 00339242 at Alvey Substation (Remedial Action Scheme) was originally forecasted for \$250k. Currently the estimated direct costs are nearly \$1.3M and preliminary notes state that the BPA cost share percentage will be 50%. Please refer to the WO Database Projections Report (June 12, 2018). The increased costs were originally provided in a report from PacifiCorp in April 2017. BPA's information from 2016, regarding the increase, is that the scope was broadened for changes in design, materials and construction.

In addition, we have updated the Schedule C, Table of Contents, to reflect current Work Order information, such as: cancelled Work Orders, Work Orders added to the FY 2017 Operating Plan, updates to Work Order completion dates, and Work Order descriptions.

Please review this information and respond through the Capacity Owners Committee (Committee) as provided in Sections 13(d), (e), and (m) of the COA. If the Committee recommends a revision(s) to any forecast cost, actual cost or General Plant Cost, in this Amendment, BPA will respond as provided in Section 13 of the COA. Pursuant to Sections 13(e) and (m) of the COA, if BPA does not receive a recommendation from the

Committee by August 20, 2018, the addition of these projects, together with the increased cost, will be considered accepted.

If you have any questions regarding this information, please contact me at (360) 619-6704.

Sincerely,

On behalf of J. Diego Ochoa  
Transmission Account Executive  
Transmission Sales

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

August 17, 2018

In reply refer to: TSE/TPP-2

Mr. Clay Norris, Power Section Manager  
City of Tacoma, Department of Public Utilities, Light Division  
3628 South 35<sup>th</sup> Street  
Tacoma, WA 98409-3115

Subject: Contract No. DE-MS79-94BP94524

Dear Mr. Norris:

Listed in Table 1 below are the Schedule C Replacement Projects energized from November 2014 to December 2017. Table 1 summarizes the work order numbers, project information, and City of Tacoma, Department of Public Utilities, Light Division's (Tacoma) pro rata shares of the project costs under Contract No. DE-MS79-94BP94524, PNW AC Intertie Capacity Ownership Agreement (COA). The Schedule C's referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Documents are enclosed.

**Table 1:**

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date <sup>1</sup>	Tacoma Cost Share
00248443	Alvey Substation - Install a New Shunt Reactor	10/11/2018	\$148,549
00329379	Marion-Alvey No. 1 - Access Road Improvements	8/19/2018	\$3,143
00335841	Marion-Alvey No. 1 - Standalone Access Road: 10 miles (Related to 45 mile span of transmission line)	12/19/2018	\$17,684
00339242	Alvey Substation - Replace Remedial Action Scheme, Transfer Trip Equipment and Line Loss Relays on the Dixonville 500 kV line	10/13/2018	\$10,188

<sup>1</sup> The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed. Section 9(b)(2)(B) of the COA states that Bonneville Power Administration will render the bill for Replacement or Reinforcement Costs within 15 months following the date listed on which the project work order for the Replacement or Reinforcement is closed. When the 9(b)(2)(B) date shown above is in the past, such as for Work Order No. 00348163, it means that the Work Order was closed, but that the Work Order and Operating Plan were later amended. Work Order No. 00348163 was amended to add the John Day Substation project cost pursuant to Section 13(k) of the COA.

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date	Tacoma Cost Share
00348163	Grizzly-Captain Jack No. 1 - Land Rights Acquisition for Access Road, Structure 156/1	4/11/2018	\$1,078
00381350	Summer Lake Substation - Upgrade Engine Generator	1/6/2019	\$4,818
00396160	Dixonville Substation - 500 kV Relay Replacements to Meridian (PAC Project)	2/21/2019	\$6,259
00396161	Meridian Substation - 500 kV Relay Replacements to Dixonville (PAC Project)	2/21/2019	\$5,453

The charges for these projects will be included in Tacoma's August transmission bill to be sent in September 2018.

In addition, the Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

Work Order No. for Schedule C	Facility – Project Information	Operating Plan(s) Listing this Work Order	Reason
00356249	Sycan Compensation Station – Replace Analog Transfer Trip Equipment for Sycan Bank No. 3	2016, 2019	Not Applicable
00432972	Malin Substation – SCADA Remote Terminal Unit (RTU) and Serial Event Recorder Replacement	2019	Work Order cancelled
00449853	Ashe-Marion No. 2 – Emergency Replacement of Access Road	2019	Work Order cancelled
TBD Malin 13	Malin Substation – Relay Replacement on the Round Mt. No. 1 line	2015, 2017	Combined with TBD Malin 14 project
TBD Malin 14	Malin Substation – Relay Replacement on the Round Mt. No. 2 line	2015, 2016, 2017	Combined into BPA Work Order #00374787
TBD Summerlake 03	Summerlake Substation – Work on BPA Relays on the Grizzly line	2015, 2017	Combined into BPA Work Order #00322042

 Project Short Description: Install a New Shunt Reactor  
 Project Facility: Alvey Substation  
 Exhibit F Section: B.5. Alvey 500 kV  
 Percent of Project Cost Applied to PNW AC Intertie: 100%  
 In Service Date: 2/24/2017  
 Work Order Completion Date: 7/11/2017  
 Work Order Status: COMPLETE  
 Contract Section 9(b)(2)(B) Date: 10/11/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$9,939,138	\$9,485,755	\$0	\$9,485,755	(\$453,383)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$4,969,569	\$2,788,342	\$0	\$2,788,342	(\$2,181,227)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$2,618,206	\$1,052,746	\$0	\$1,052,746	(\$1,565,460)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$177,618	
<b>E. Total Replacement Costs and Reinforcement Costs</b>	5	\$17,526,913	\$13,326,844	\$0	\$13,504,462	(\$4,200,069)
(Lines 1 + 2 + 3 + 4)						

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$13,504,462 reflects the total costs from FY 2010-2017.
- 2/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 100% x 20.8% x \$13,504,462 = \$2,808,928 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$8,291.40 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$5,025.09 is direct cost and \$3,266.31 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Notes:**

- 1/ Pursuant to Section 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$768,448 reflects the total costs from FY 2015-2018.
- 2/ This Work Order will be subject to proration so that 57% of the cost will be applicable to Capacity Owners while 43% of the cost is Network cost (see top of this Exhibit).
- 3/ Cost sharing percentage x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project the calculation is 57% x 20.8% x \$768,448 = \$91,107 to be allocated pro rata among Capacity Owners.

This information is being released externally by BPA on 8/17/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Equipment Removal Cost Summary**

\$5,176.05 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this Work Order. Of this amount, \$3,137.00 is direct cost and \$2,039.05 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

**Project Work Order:** 00396160

TRANSMISSION SERVICES

September 28, 2018

In reply refer to: TSE/TPP-2

Mr. Clay Norris, Power Section Manager  
City of Tacoma, Department of Public Utilities, Light Division  
3628 South 35<sup>th</sup> Street  
Tacoma, WA 98409-3115

Subject: Contract No. DE-MS79-94BP94524

Dear Mr. Norris:

Enclosed is the proposed FY 2020 Operating Plan as required by Section 13(b)(2) of the PNW AC Intertie Capacity Ownership Agreement, Contract Number DE-MS79-94BP94524.

Pursuant to the FY 2020 Operating Plan, the projected FY 2020 monthly cost for each Capacity Owner is \$254 per MW-month.

The forecasted FY 2019 monthly cost is \$242 per MW-month, which will be reflected in your monthly transmission bills for the fiscal year starting October 1, 2018.

We will have a comprehensive discussion at the November 1, 2018 Annual Meeting. Prior to that meeting, please review the enclosed documents. If you have any questions regarding this information, please feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Ochoa".

JUAN OCHOA

00381451	Replace Three Breakers and a Disconnect Switch	Slatt Substation	09/30/19	13
00381549	Replace Breaker Failure Relays	Slatt Substation	09/30/19	14
00381820	Replace Slatt-Buckley and Slatt John Day Risers	Slatt Substation	09/30/19	15
00416195	SCADA Replacement	Captain Jack Substation	09/27/19	16
00416257	Replace Overhead Ground Wire	John Day-Grizzly No. 1	11/15/19	17
00420153	Replace Potential Transformers	Chief Joseph Substation	12/31/18	18
00423657 was TBD Sycan 01	Upgrading Equipment Associated with Sycan Bank No. 1	Sycan Compensation Station	09/15/18	19
00423664	Replace Disconnect Switches in Sycan Bank No. 1	Sycan Compensation Station	11/01/19	20
00423702 was TBD Sycan 02,03,04	Replace Station Service Engine Generator and Control Battery at Sycan Bank No. 3	Sycan Compensation Station	09/11/20	21
00441772	Overhead Ground Wire Replacement	John Day-Grizzly No. 2	11/15/19	22
00455995 was TBD Malin 03	Security Enhancement	Malin Substation	08/30/19	23
00460709	Replace Microwave Transfer Trip Relays	Grizzly Substation	12/02/19	24

**Schedule C Table of Contents**

*Below is information about work orders added or removed, acronyms and further information.*

*NOTE: Tables on this page are intentionally blank, and will be updated when this operating plan is amended.*

<b>Work Order Numbers ADDED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

<b>Work Order Numbers REMOVED</b>	<b>Date of Correspondence</b>	<b>Page Number</b>

**Note 1:** The status of TBD Alvey-Dixonville 01 project is determined for each individual fiscal year.

**Note 2:** The status of TBD Dixonville-Meridian 02 project is determined for each individual fiscal year.

**Key:**

BPA Project Work Order Status is for BPA project information prior to BPA Active (or Pending) Work Order status or prior to establishing a BPA Work Order number.

**Project Work Order:** 00297236  
**Project Short Description:** Replace Spacer-Dampers (225.3 miles)  
**Project Facility:** Ashe-Marion No. 2  
**Exhibit F Section:** A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)  
  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/28/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$4,748,125				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,374,063				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$1,232,581				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$8,354,769				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA adopted the industry standard called Financial Accounting Standard No. 71 (FAS - 71) as of October 1, 2005 for Spacer Damper equipment. This calls for removal of indirect and AFUDC costs from Spacer Damper Work Orders.
- 5/ For this Work Order only a portion of the line applies: 99.34 miles for Buckley-Marion of the 224 miles Ashe-Marion transmission line which yields 44%. This will be further refined once the project final information is available. Pursuant to Exhibit F of this Capacity Ownership Agreement, the costs for this Work Order are such that the BPA costs are 25% of this Work Order.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00335885  
 Project Short Description: Land Rights Acquisition for Access Road, Structure 152/2  
 Project Facility: Ashe-Marion No. 2  
 Exhibit F Section: A.3. 500 kV Double Circuit between Buckley and Marion that supports the Buckley-Marion No. 1 and the Ashe-Marion No. 2 500 kV Circuits (Str. No. 1/3 to Marion, 159 km)

Percent of Project cost applied to PNW AC Intertie: 25%  
 Estimated Energization Date: 11/15/2019  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,263,220				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$631,610				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$122,087				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,016,917				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Per Exhibit F, Section A.3. above, this Work Order will be subject to proration, such that 25% of the cost will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00355355  
**Project Short Description:** Upgrade Station Service  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.5. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 8/30/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,675,488				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$837,744				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$329,788				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,843,020				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will be prorated to reflect that at Chief Joseph Sub, 1 terminal out of 17 (500 kV) line terminals supports the AC Intertie.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00356244  
**Project Short Description:** Replace Analog Transfer Trip Equipment  
**Project Facility:** Fort Rock Compensation Station  
**Exhibit F Section:** B.7. Fort Rock 500 kV Compensation Station)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 1/13/2017  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$167,215	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$83,608	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$16,818	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$267,640	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration so that 2/3's of the costs will be applicable to Capacity Owners.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: 00367753  
 Project Short Description: Ground Wire Replacement  
 Project Facility: John Day-Grizzly No. 1  
 Exhibit F Section: A.9. John Day-Grizzly No. 1 500 kV  
 Percent of Project cost applied to PNW AC Intertie: 100%  
 Estimated Energization Date: 8/28/2020  
 Status: ACTIVE  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$535,621				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$267,811				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$114,896				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$918,328				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

**FY 2020 Schedule C**

**Project Work Order:** 00420153  
**Project Short Description:** Replace Potential Transformers  
**Project Facility:** Chief Joseph Substation  
**Exhibit F Section:** B.5. Chief Joseph Substation  
**Percent of Project cost applied to PNW AC Intertie:**  
**Estimated Energization Date:** 12/31/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$244,128				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$122,064				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$22,443				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$388,635				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will be prorated to reflect that at Chief Joseph Sub, 1 terminal out of 11 (230 kV) line terminals supports the AC Intertie.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00423657  
**Project Short Description:** Upgrading Equipment Associated with Sycan Bank No. 1  
**Project Facility:** Sycan Compensation Station  
**Exhibit F Section:** B.15. Sycan 500 kV Compensation Station  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 9/15/2018  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$5,707,621				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$2,853,811				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$426,054				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$8,987,486				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ The August 17, 2018 email regarding billing stated TBD Sycan 1 was combined into Work Order #00423702. It should have stated "Combined into Work Order #00423657".

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**FY 2020 Schedule C**

**Project Work Order:** 00423664  
**Project Short Description:** Replace Disconnect Switches in Sycan Bank No. 1  
**Project Facility:** Sycan Compensation Station  
**Exhibit F Section:** B.15. Sycan 500 kV Compensation Station  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 11/1/2019  
**Status:** ACTIVE  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,472,404				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$736,202				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$170,360				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,378,966				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ This Work Order will likely be subject to proration, so that less than 100 percent of the cost will be applicable to Capacity Owners. However, while this Work Order remains in "ACTIVE" status, the analysis is premature. Therefore, this percentage is subject to change.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. **Project Work Order:** TBD Dixonville 04  
**Project Short Description:** Replace Series Capacitor Controls (PAC Project)  
**Project Facility:** Dixonville Substation  
**Exhibit F Section:** B.6. Dixonville 500 kV Station (BPA/PacifiCorp)  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 12/15/2016  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$971,500	_____	_____	_____	_____
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0	_____	_____	_____	_____
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0	_____	_____	_____	_____
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4		_____	_____	_____	_____
<b>E. Total Replacement Costs and Reinforcement Costs (Lines 1 + 2 + 3 + 4)</b>						
	5	\$971,500	_____	_____	_____	_____

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ Pursuant to Contract No. DE-MS-94BP94332 this Schedule C reflects BPA's 50% cost share for this Work Order. These forecasted costs were provided by PacifiCorp on April 28, 2017.
- 5/ In 2017, BPA contacted PacifiCorp to receive information about the increase in costs for this Work Order (WO) since 2013. This WO cost information will be updated once received.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

**Project Work Order:** TBD Dixonville-Meridian 02  
**Project Short Description:** Miscellaneous Right-of-Way Capital Repairs (PAC Project)  
**Project Facility:** Dixonville-Meridian  
**Exhibit F Section:** A.6. Dixonville-Meridian 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 100%  
**Estimated Energization Date:** 1/1/2020  
**Status:** Project (PAC)  
**Contract Section 9(b)(2)(B) Date:**

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$100,000				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$0				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$0				
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$100,000				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- 3/ Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- 4/ BPA owns 50% of the equipment covered by this Work Order. Therefore, 50% of costs are applicable to Capacity Owners. Please see Contract No. DE-MS79-94BP94332.

This information is being released externally by BPA on 9/28/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

Project Work Order: TBD Grizzly 02  
 Project Short Description: Replace SCADA/Sequential Event Recorder (BPA Project)  
 Project Facility: Grizzly Substation  
 Exhibit F Section: B.8. Grizzly 500 kV  
 Percent of Project cost applied to PNW AC Intertie:  
 Estimated Energization Date:  
 Status: Project (BPA)  
 Contract Section 9(b)(2)(B) Date:

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$289,999				
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$145,000				
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3					
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4					
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$434,999				

**Notes:**

- 1/ A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown above are for this Work Order. Each customer will be billed its pro-rata share of the total adjusted actual.
- 2/ Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).

## Department of Energy

Bonneville Power Administration  
P.O. Box 61409  
Vancouver, WA 98666-1409

TRANSMISSION SERVICES

November 21, 2018

In reply refer to: TSE/TPP-2

Mr. Clay Norris, Power Section Manager  
City of Tacoma, Department of Public Utilities, Light Division  
3628 South 35<sup>th</sup> Street  
Tacoma, WA 98409-3115

Subject: Contract No. DE-MS79-94BP94524

Dear Mr. Norris:

Listed in Table 1 below is the Schedule C Replacement Project energized in June 2017. Table 1 summarizes the work order number, project information, and City of Tacoma, Department of Public Utilities, Light Division's (Tacoma) pro rata share of the project costs under Contract No. DE-MS79-94BP94524, PNW AC Intertie Capacity Ownership Agreement. The Schedule C referenced in Table 1, the associated Interest Calculation and the Customer Billing Shares Documents are enclosed.

**Table 1:**

Work Order No. for Schedule C	Facility – Project Information	9(b)(2)(B) Date	Tacoma Cost Share
00340156	Marion Substation – Transfer Trip Replacement	11/21/2018	\$2,307

The charge for this project will be included in Tacoma's November transmission bill to be sent in December 2018.

The Schedule Cs listed in Table 2 below, will not be billed for the stated reasons:

**Table 2:**

Work Order No. for Schedule C	Facility – Project Information	Operating Plan(s) Listing this Work Order	Reason
00379612	Grizzly Substation – Physical Security Project	2017	General Plant
00381830	Malin Substation – Replacement of Communication Battery Charger	2017	General Plant
00381831	Fort Rock Compensation Station – Replacement of Communication Battery Charger	2017	General Plant
00381833	Sycan Compensation Station – Replacement of Communication Battery Charger	2017	General Plant
00384207	Buckley Substation – Replace Line Relay on Slatt Terminal	2019	Not Applicable
TBD Dixonville 05	Dixonville Substation – Regravel Yard	2018, 2019	Not Applicable

If you have any questions regarding this information, feel free to contact me at (360) 619-6704 or [jdochoa@bpa.gov](mailto:jdochoa@bpa.gov).

Sincerely,

JUAN OCHOA

Ms. Miki Foster, City of Tacoma, Department of Public Utilities, Light Division

## Customer Billing Shares Document for November 21, 2018 Letter

	A	B
1	<b>Facility:</b>	<b>Marion Substation Transfer Trip Replacement</b>
2	<b>Work Order Number:</b>	<b>00340156</b>
3	<b>Total from Schedule C:</b>	\$1,259,771
4	<b>Exhibit F, BPA percent owned (left hand column)<sup>1/</sup>:</b>	100%
5	<b>Exhibit F, percent applied to PNW AC (right hand column)<sup>2/</sup>:</b>	50%
6	<b>Other Proration<sup>3/</sup>:</b>	33.3%
7	<b>Exhibit F, Station General<sup>4/</sup>:</b>	no
8	<b>Schedule C Total After Proration:</b>	<b>\$209,752</b>
9	<b>Customer Percentage Applied from Exhibit G</b>	
10	Avangrid	\$2,517
11	PacifiCorp	\$1,888
12	Puget	\$24,331
13	Seattle	\$9,649
14	Tacoma	\$2,307
15	Turlock	\$2,937
16	Amount for cost sharing percentage note (formula that includes 20.8%) in Schedule C	\$43,629
17	<b>Check totals</b>	<b>\$209,752</b>
18	<b>Exhibit G</b>	
19	<b>Customer</b>	<b>Percentage</b>
20	Avangrid	0.0120
21	PacifiCorp	0.0090
22	Puget	0.1160
23	Seattle	0.0460
24	Tacoma	0.0110
25	Turlock	0.0140
26	<b>Total</b>	<b>0.2080</b>
27	<b>Footnotes</b>	
28	<sup>1/</sup> <b>BPA Percent (%) owned</b> (left hand column of Exhibit F) reflects BPA's ownership share of each project and is included here for reference only, as row 3 above reflects only BPA's cost share of the project.	
29	<sup>2/</sup> <b>Percent (%) applied to PNW AC</b> (right hand column of Exhibit F) is also listed at the top of the Schedule C.	
30	<sup>3/</sup> <b>Other Proration</b> occurs when a project supports both intertie and non-intertie uses. Examples include replacing multiple breakers at a substation where only a subset of the replacements support the Intertie, or work on a line that is part Network and part Intertie. In such cases a prorated share of the project costs are assigned to the Capacity Owners.	
31	<sup>4/</sup> <b>Station General</b> refers to elements in a substation that are not attributable to specific pieces of power equipment. Examples include control houses, water/drainage systems, fences, and yard rock.	
32	This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.	

**Project Work Order:** 00340156  
**Project Short Description:** Transfer Trip Replacement  
**Project Facility:** Marion Substation  
**Exhibit F Section:** B.11. Marion 500 kV  
**Percent of Project cost applied to PNW AC Intertie:** 50%  
**In Service Date:** 6/2/2017  
**Work Order Completion Date:** 8/21/2017  
**Work Order Status:** COMPLETE  
**Contract Section 9(b)(2)(B) Date:** 11/21/2018

	Line No.	Forecast	Actual	Less General Plant	Adjusted Actuals	Difference
<b>III. Replacement Costs and Reinforcement Costs</b>						
<b>A. Direct Cost</b>						
Direct Costs of Replacements and Reinforcements	1	\$1,659,057	1,659,057.49	757,144.08	\$901,913	(\$757,144)
<b>B. Indirect Cost and Overhead Costs</b>						
Indirect Costs and Overhead Costs of Replacements and Reinforcements	2	\$829,529	478,287.80	218,276.21	\$260,012	(\$569,517)
<b>C. AFUDC</b>						
AFUDC of Replacements and Reinforcements	3	\$229,761	95,119.80	43,409.82	\$51,710	(\$178,051)
<b>D. Interest</b>						
Interest Costs of Replacements and Reinforcements (Interest Calculated without plant costs)	4				\$46,136	
<b>E. Total Replacement Costs and Reinforcement Costs</b>						
(Lines 1 + 2 + 3 + 4)	5	\$2,718,347	\$2,232,465	\$1,018,830	\$1,259,771	(\$1,504,712)

**Notes:**

- 1/ For this Work Order, only one out of three terminals applies, so 33.3% of the costs will be applicable to the Capacity Owners.
- 2/ Pursuant to Sec. 13(c)(3), for each work order, costs are tracked by Fiscal Year (FY). The adjusted actual of \$1,259,771 reflects the total costs from FY 2014-2018.
- 3/ Cost sharing percentage x One out of three terminals x Capacity Owner share of BPA cost x Line E Adjusted Actuals = Capacity Owners' share of project cost. For this project, the calculation is 50% x 33.3% x 20.8% x \$1,259,771 = \$43,629 to be allocated pro rata among Capacity Owners.
- 4/ The 9(b)(2)(B) date is the date 15 months after the date on which the project work order for each Replacement or Reinforcement is closed and will not receive additional charges.

This information is being released externally by BPA on 11/21/2018 as an ad hoc report or analysis generated for a specific purpose. The information provided is based upon data found in Agency Financial Information but may not be found verbatim in an External Standard Financial Report or other Agency Financial Information release.

			426		\$46,136.38

**Equipment Removal Cost Summary**

\$69,576.46 worth of retirement charges are included in the adjusted actuals column of the main billing sheet for this work order. Of this amount, \$56,551.02 is direct cost and \$13,025.44 is indirect and overhead cost.

- A separate Schedule C will be provided in the Operating Plan for each Replacement and Reinforcement. The amounts shown in the attached correspondence are for the work order. Each customer will be billed its pro rata share of the total adjusted actual.
- Forecasts of Replacement Costs and Reinforcement Costs will be provided. Capacity Owners shall be billed for Replacements and Reinforcements using actual cost pursuant to section 9(b)(2)(B).
- Allowance for Funds Used During Construction (AFUDC) represents the estimated cost of interest on financing the construction of all BPA capital projects or BPA portion of capital projects. In instances where BPA owns a portion of the asset then BPA will only apply AFUDC to its portion of the asset.
- Expected In Service Date as used in Schedule C is the expected date of completion of the referenced work. If the In Service Date is in the future, it is a forecast and subject to change due to delays such as weather or material availability.
- Complete status as used in Schedule C is an accounting status used by BPA rather than construction status.

*The purpose of this Exhibit F, Revision No. 1 is to: 1) add footnotes to provide clarity throughout Exhibit F; 2) update Section A.12 to reflect the line name change from McNary-Slatt to Coyote Springs-Slatt; 3) update Sections B.1 through B.14 to remove dispatcher one-line identification numbers for BPA and PacifiCorp; 4) update Section B.1 to add the Shunt Reactor at Alvey, add the Alvey Relay House and contents (relays, data systems, etc.), and add the Interchange Meter for the Dixonville 500 kV Transmission Line; 5) add a new Section B.2 for Bakeoven 500 kV Compensation Station; 6) update Sections B.3 through B.16 to add percentages for Station General; 7) update Section B.4 to change reference from Klamath Cogen to Snow Goose, add Shunt Capacitor information, and to add the Interchange Meter for the Malin No. 2 Transmission Line; 8) update Section B.6 to change references from Contract No. DE-MS79-86BP92299 to DE-MS79-94BP94332; 9) update Section B.8 to add the Grizzly Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 10) update Section B.9 to add MODs D#4130 and D#4139 of the breaker-and-a-half scheme for both Grizzly No. 2 and Grizzly No. 1 Line Terminals, respectively, in the John Day Substation that were inadvertently omitted from the original Exhibit F; 11) update Section B.10 to add the Malin Control House and contents (relays, data systems, etc.) to clarify treatment of the Control House; 12) update Section B.11 to add MODs D#4385 and D#4378 in the Buckley Line Terminal and Alvey Line Terminal respectively that were inadvertently omitted from the original Exhibit F; 13) update Section B.12 to reflect that BPA has 50% (not 100%) cost share for the Dixonville Line Terminal; 14) update Section B.13 to change the title from Sand Spring to Sand Springs; 15) update Section B.14 to change from the McNary Line Terminal to the Coyote Springs Line Terminal at Slatt Substation, and; 16) update Section B.14 to add Breakers D#5043 and D#5045 and MODs D#5044 and D#5046 at Slatt Substation.*
