Washington DC 20002

Dear Mr. Aamot,

The Bonneville Power Administration (BPA) has received your request for agency records made under the Freedom of Information Act, 5 U.S.C. § 552 (FOIA). The agency received your request on May 30, 2023. BPA has assigned your request a tracking number of BPA-2023-01054-F. Please use that tracking number in any correspondence with the agency regarding your FOIA request. This communication is the agency's formal acknowledgment and response to your information request.

### Request

"This is a request for records under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552 and the Privacy Act, 5 U.S.C. § 552a. This request should be considered under both statutes to maximize the release of records. Requester Information PII REMOVED. Records Sought[:] I request disclosure on the following records: All FOIA Logs, 2000 - present. If responsive records are found please include the all documents, all attachments, and all pertinent records regardless of format."

### Clarification

Via June 1 and July 18, 2023, emails to you, the agency sought your clarification on an acceptable definition for your request for a "FOIA Log." While seeking that clarification from you, the agency placed your request on hold, as permitted by the FOIA. BPA heard from you on July 18, 2023. The agency is removing your request from hold and is here proceeding with a response.

### Privacy Act

The above request does not comport with the agency's understanding of the Privacy Act at 5 U.S.C. § 552a. Therefore the agency has processed your request solely under the FOIA.

**Acknowledgement**

BPA reviewed your request and determined that it fulfills all of the criteria of a proper request under the FOIA and the U.S. Department of Energy's (DOE) FOIA regulations at Title 10, Code of Federal Regulations, Part 1004.

**Public Information**

Agency information responsive to your FOIA request can be found at the following web link:

<https://www.bpa.gov/about/who-we-are/freedom-of-information-act/requests-library>

**Response**

The agency's FOIA Office communicated with the DOE FOIA Office on the response to your records request. Responsive records were searched for and gathered. A total of 64 responsive pages accompany this communication. Of those 64 total pages, 29 pages are being released to you in full, with no redactions; 35 pages are being released to you with minor redactions applied under 5 U.S.C. § 552(b)(6) (Exemption 6) to protect Personally Identifiable Information (PII). A more detailed explanation of the applied exemptions follows.

Explanation of Exemptions

The FOIA generally requires the release of all agency records upon request. However, the FOIA permits or requires withholding certain limited information that falls under one or more of nine statutory exemptions (5 U.S.C. §§ 552(b)(1-9)). Further, section (b) of the FOIA, which contains the FOIA's nine statutory exemptions, also directs agencies to publicly release any reasonably segregable, non-exempt information that is contained in those records.

Exemption 6

Exemption 6 serves to protect PII contained in agency records, when no overriding public interest in the information exists. BPA does not find an overriding public interest in a release of the information redacted under Exemption 6 — specifically, the names of individual requesters or those named in the request who have a privacy interest based on the nature of the request, and PII belonging to certain individuals including home addresses, personal email addresses, and phone numbers. This information sheds no light on the executive functions of the agency and BPA finds no overriding public interest in its release. BPA cannot waive these redactions, as the protections afforded by Exemption 6 belong to individuals and not to the agency.

Lastly, as required by 5 U.S.C. § 552(a)(8)(A), information has been withheld only in instances where (1) disclosure is prohibited by statute, or (2) BPA foresees that disclosure would harm an interest protected by the exemption cited for the record. When full disclosure of a record is not possible, the FOIA statute further requires that BPA take reasonable steps to segregate and release nonexempt information. The agency has determined that in certain instances partial disclosure is possible, and has accordingly segregated the records into exempt and non-exempt portions.

**Fees**

There are no fees associated with processing your FOIA request.

**Certification**

Pursuant to 10 C.F.R. § 1004.7(b)(2), I am the individual responsible for the records search and release described above. Your FOIA request BPA-2023-01054-F is now closed, with the responsive agency records provided.

**Appeal**

Note that the records release certified above is final. Pursuant to 10 C.F.R. § 1004.8, you may appeal the adequacy of the records search, and the completeness of this final records release, within 90 calendar days from the date of this communication. Appeals should be addressed to:

Director, Office of Hearings and Appeals  
HG-1, L'Enfant Plaza  
U.S. Department of Energy  
1000 Independence Avenue, S.W.  
Washington, D.C. 20585-1615

The written appeal, including the envelope, must clearly indicate that a FOIA appeal is being made. You may also submit your appeal by e-mail to [OHA.filings@hq.doe.gov](mailto:OHA.filings@hq.doe.gov), including the phrase "Freedom of Information Appeal" in the subject line. (The Office of Hearings and Appeals prefers to receive appeals by email.) The appeal must contain all the elements required by 10 C.F.R. § 1004.8, including a copy of the determination letter. Thereafter, judicial review will be available to you in the Federal District Court either (1) in the district where you reside, (2) where you have your principal place of business, (3) where DOE's records are situated, or (4) in the District of Columbia.

Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows:

BPA-2018-00130-F	McCullough, Kathy	-	10/17/2017	I am not looking for proprietary information, just numbers that should be available to the general public. I am exercising my right under the Freedom of Information Act to request wind curtailment numbers, month by month, for the last ten years in the Columbia River Gorge. I am especially interested in this spring of 2017. If the curtailment is spread evenly across the Columbia Gorge wind projects, how much, per month, were the wind projects curtailed? 10%? Twelve percent? Were all the wind projects reimbursed for curtailing? How much, per project? Or were there other compensations? If the curtailments were not spread evenly across the various projects, why not? I am asking for solid numbers/percentages because we live under the Biglow Project, run by Portland General Electric (PGE). Our payments are based on the amount the towers turn. Our landlords are concerned that the towers were not turning on windy days, as their payments have been quite small. PGE blames it on BPA, and says it is only 1-2%. (10% over the 4500 megawatts in the gorge, and Biglow is a 450 megawatt project.) We live under the project, and we don't think we would notice a 1-2% curtailment. We think it is much more. Without numbers to compare, we don't know if PGE is turning off our towers because of mandatory curtailments or if they are curtailing at their discretion, to "save their assets." PGE maintains that this information is propriety and that BPA lawyers will not release it. I am cc'ing Joel Corcoran at Senator Merkley's office on this request for information, as I would like the information shared with their office, too.

BPA-2018-00574-F	Meridji, Tayeb	SNC-Lavalin	01/29/2018	We would like to make use of BPA's CORONA AND FIELD EFFECTS PROGRAM to evaluate EMF of submarine cables for a project in the US. Given that this software is widely used and its results well accepted in the industry, I was wondering if I could obtain a copy of it.

BPA-2018-00597-F	Chapman, Richard	-	02/02/2018	On or about January 3rd of 2011 my mother, Myrtle June Chapman; for whom I now have power of attorney (executed December 15, 2015) submitted a Freedom of Information Act request that was assigned your reference number BPA-2011-00430-F. That request was as follows: "Correspondence between Church of God and BPA together with submitted drawings relating to roadway crossing the right-of-way known as Tract No. VK-22 a.k.a. Vancouver-Kelso or Ross-Lexington No. 1. Specific to BPA case No. 920129 between 1990 and present" (then being about January 3rd of 2011) BPA responded with several documents on February 10, 2011. At the time this seemed to fully meet the needs of the request. However a recent review finds that a letter dated November 6, 1991 from Mrs. Renee M. Ferrera, Chief, Land Management Section for BPA to Mr. Donald E. Eby an architect for the First Church of God; relative to BPA case No. 920129 was omitted from the information provided. The existence of this letter is referenced in the letter from Mrs. Ferrera to Mr. Eby dated February 27, 1992. Said reference is found in the second sentence of the first paragraph of that letter which was provided under BPA FOIA number BPA-2011-00430-F. This seems to be just an oversight as there was included a letter from Mr. Eby to Mrs. Ferrea dated November 6, 1991 with some hand writing following the typed text which may have been mistaken for Mrs. Ferrera's reply. Please provide the above referenced letter from Mrs. Ferrera to Mr. Eby dated November 6, 1991. (Date Range for Record Search: From 11/06/1991 To 11/06/1991)

BPA-2019-	Berryhill, Jerome	-	04/05/2019	BPA document "Vegetation Clearance Standard TLM-STD-7-2-13 - Right of Way" contains the following text; "Determine the vegetation clearance by calculating the distance between the location of the conductor at Max Sag and the vegetation in question. There are two options for making a field

00713-F				determination and adjusting "as observed" clearances between vegetation and power lines. Option A: Iso-Clearance Map. Iso-clearance maps will show the vegetation height from ground that will violate clearance thresholds at a targeted geospatial location. These maps are available from Geospatial Services, in both hard copy format and a GIS overlay. An iso-clearance line will represent maximum allowable vegetation height that will not violate clearance thresholds. This is the preferred and most accurate method available." My request is for any iso-clearance maps that BPA has produced which cover any portion of my property located at (b) (6).
BPA-2019-00714-F	Berryhill, Jerome	-	04/05/2019	BPA document "Vegetation Clearance Standard TLM-STD-7-2-13 - Right of Way" contains the following text; "Determine the vegetation clearance by calculating the distance between the location of the conductor at Max Sag and the vegetation in question. There are two options for making a field determination and adjusting "as observed" clearances between vegetation and power lines. Option A: Iso-Clearance Map. Iso-clearance maps will show the vegetation height from ground that will violate clearance thresholds at a targeted geospatial location. These maps are available from Geospatial Services, in both hard copy format and a GIS overlay. An iso-clearance line will represent maximum allowable vegetation height that will not violate clearance thresholds. This is the preferred and most accurate method available. Following is the procedure to use: 1) Order iso-clearance data based on clearance thresholds in Table 4.1 2) Determine target vegetation's geospatial location. 3) Interpolate iso-clearance vegetation maximum allowable height from ground on iso-clearance map at that location. 4) Measure vegetation height and compare to iso-clearance value. 5) Vegetation height must be less than the iso-clearance value in order to not violate prescribed clearance thresholds." My request is for one or more iso-clearance maps that BPA has produced as part of this procedure.
BPA-2019-00715-F	Skinner, Rick	Western Pacific Engineering & Survey	04/08/2019	I am performing a survey in Section 2, Township 24, Range 27 East, W.M., located in Grant County, Washington - see the red highlighted box in the Survey overview.pdf file attached. There is a transmission line, highlighted in yellow, in the same pdf. I have found a copy of a survey done by the Washington DNR, in Section 16 - see the box highlighted in orange in the same pdf. That survey is shown in the three other attached pdf's, labled AFN 1065969, pages 1, 2 and 3. On Page 2 of that survey, I have circled with a yellow highlighter, and then underlined with a red pencil, all of the DNR's references to the Bonneville Power Administration. Most refer to the same call of an application 20726, DNR records, which I'm assuming you don't have, but would take a copy if you did. However, there are two other references on page two, that I'm hoping that I can get a copy of. They are "Sheet 38 of the plan and profile of the Columbia - G. Coulee line No. 4" and "sheet 148 of the plan and profile of the Covington -G. Coulee line No. 2". This reference is for a survey done a couple of sections away from the section I am working in. So I don't think that either sheet 38 or 148 are what I specifically need. Rather, I'll need sheets from starting there, going further northeast for up to perhaps 4 miles. Without looking at the plan set, I'm not sure specifically which sheets those would be though.
BPA-2019-00727-F	(b) (6)	-	04/09/2019	About a month ago a crew under contract to your organization cleared our driveway to facilitate your operations. They did a good job but I couldn't help but notice that they were mostly or entirely Hispanic. With the serious situation on our southern border with a large number of mostly hispanic people illegally entering our country, I would like to know if the crew that brushed my driveway were citizens or legal immigrants. Do your contract specifications call for laborers to be legally entitled to work in our country and is it enforced by your contract administrators? I would appreciate a response to this request. My address below should identify my property where the above work took place.

BPA-2019-00831-F	Berryhill, Jerome	-	05/03/2019	On Monday, July 9th, 2018, I received an e-mail from Carlos Mora Flores of BPA TFBV-Alvey, with subject "Vegetation concerns on (b) (6)". The message began; "Hello Mr. Berryhill, During a recent patrol of BPA's transmission lines, it was reported that the vegetation on your property is getting too tall and it poses a safety risk to you, your family, and pets." My request is for any records of that specific report, or, if the specific report cannot be identified, the most recent such report concerning (b) (6).

BPA-2019-00939-F	Berryhill, Jerome	-	05/28/2019	On Monday, January 28th, 2019, I received an e-mail from BPA employee Sandra Billings, which began; "Dr. Jerome Berryhill, In response to your email request, Bonneville Power Administration (BPA) looked at all the sag calculations and allowable vegetation heights, we can do a vegetation agreement with you based on the heights and the approximate area shown in the attached map." My request is for any documents BPA may have relating to the "sag calculations and allowable vegetation heights" to which Ms. Billings refers.
BPA-2019-00954-F	Berryhill, Jerome	-	06/03/2019	My request is in two parts; 1 - I want to know whether BPA has a vegetation agreement with Roosevelt Acres LLC, the entity owning taxlot 1704272301005. This is a large lot with a Manufactured Home Park on it, located north of Roosevelt Blvd in Eugene, between Bertlesen and Beltline Roads. BPA's Eugene-Bertelsen transmission line passes over an easement on this property. 2 - If such an agreement exists, I want to know the terms of the agreement.
BPA-2019-00991-F	McCoy, Matt	-	06/07/2019	This request concerns Snohomish County, Washington's parcel numbers 00384300003001 and 00384300003000. I believe in BPA records, this land may also be referred to as tract ID M-MU-23-A-82 (1970 fee) and Tract ID S-BL-17-A-90 (1964 easement). For background information, Bonneville acquired a transmission line right-of-way easement for Mile 17 of the Snohomish-Blaine No.1 line as Tract S-BL-17-A-90 in 1964. In the conveyance deed, the easement is described as a strip of land, 150' wide, centered on the survey line of the Snohomish-Blaine No.1 line. Subsequently, in 1970, BPA acquired a 150' strip of land in fee for Mile 23 of the Monroe-Custer No.2 line (Tract M-MU-23-A-82) on the westerly side of, and parallel to Tract S-BL-17-A-90. Mile 17 of Snohomish- Blaine No.1 is currently operated as Mile 23 of Monroe-Custer No.2, and Mile 23 of Monroe-Custer No.2 is currently operated as Mile 23 of Monroe-Custer No.1 as shown on BPA Map No. 144323. This request only seeks documents from the year 2000 to present. I request all documents in whole or in part surrounding these properties. I also request all communications, including letters, emails, or documents sent to 17518 Jordan Rd Arlington, WA 98223 and/or (b) (6) and/or (b) (6), as well as any other communications received from 17518 Jordan Rd Arlington, WA 98223 or (b) (6) and/or (b) (6). I also request any communications, internal or otherwise, concerning 17518 Jordan Rd Arlington, WA 98223, Snohomish County parcel number 00384300003000 (which, as described above, may be listed differently internally in your records), (b) (6) (b) (6), and/or (b) (6).

BPA-2019-01185-F	Berryhill, Jerome	-	07/30/2019	BPA sometimes purchases easements on private property for power transmission lines. It appears that at one time, BPA used a standard easement form, into which the property description was copied. If BPA currently uses a standard powerline easement document in the Willamette Valley, I request a blank copy. If there is more than one standard document, for different circumstances, I request a blank copy of each. If BPA does not currently have a standard easement document, I request examples of easements BPA has purchased for transmission lines in the Willamette Valley in the last twenty years. I request at least one example each of an easement for timberland and one for residential land, in each of the last four half-decades. Personal information may be redacted.
BPA-2019-01252-F	Perry, Edwin	Tonkon Torp LLP	08/13/2019	This request seeks historical information about the transmission lines that operate across my client's property. The lines in question are Hanford-Ostrander No. 1 (operated as Ostrander-Troutdale No. 1) and Knight-Ostrander No. 1. The property location in question is at Tract Nos. B-OC-26-A-71 and O-TR-7-A-35. The property owner is Sandy Automotive, LLC (principal: Mark Benson). My client's related inquiry has previously been assigned Case No. 20180309, although the information sought here was not provided previously despite written request. 1. From 1970 - 1980, how many towers and how many transmission lines were present across the subject property? 2. From 1970 - 1980, what volume of electrical current was transmitted on each line across the subject property? 3. Has the amount of electrical current transmitted across the subject property increased since 1970? If so, what volumes were transmitted in 1970 and what volumes are transmitted today? 4. What year was BPA's standard STD-DT-000017 adopted, and what standard was in effect in 1970? 5. What year were the National Electrical Safety Code requirements for maximum short-circuit current adopted and what code, if any, was in place in 1970?

BPA-2020-01144-F	Missel, Andrew	Advocates for the West	09/23/2020	This is a "follow-up" request to a request I sent to the Bonneville Power Administration ("BPA") on November 21, 2019 on behalf of Columbia Riverkeeper (request BPA-2020-00227-F). BPA has yet to release any records in response to that request, but it is my understanding that BPA has already collected records potentially responsive to the request. This request is identical to that request, but with an updated time frame. Specifically, this request seeks the same types of records as the previous request,1 but for the time period starting with the cut-off search date of the previous request: Any and all communications2 received by BPA from any of its wholesale customers3 or sent from BPA to any of its wholesale customers since the cut-off search date of the previous request that refer or relate to development of, consideration of, agreements to enter into, or negotiations about new long-term power contracts.4 2. Any and all records created or generated since the cut-off search date of the previous request that document, memorialize, or refer to any meetings, conversations, or other communications between BPA and its wholesale customers regarding development of, consideration of, agreements to enter into, or negotiations about new long-term power contracts. (Date Range for Record Search: From 1/7/2020 To 9/24/2020)

Please note that the Summit Ridge Wind Farm is likely referred to in some BPA records as the "Summit Ridge Wind Project." (Date Range for Record Search: From 1/1/2018 To 9/25/2020)
BPA-2020-01159-F	Albright, Douglas	Actuation Test Equipment Company	09/30/2020	The value I'm seeking is the cost of court-ordered spilling water to save fish in the Columbia River. This cost-value number is not readily available but a FOIA response in January of this year brought enough information to deduce this cost. I have already send my Microsoft Excel(R) spreadsheet and a cover letter to James J King and Jason E. Taylor of Bonneville Power Administration asking for clarification and a review of my logic and spreadsheet calculations to double-check my calculated answer. To get this inquiry on the record I'm submitting this FOIA request at Mr. King's suggestion. (There's no place on this form to attach the spreadsheet and cover letter, but they are already in Portland Oregon with Mr. King and Mr. Taylor.)

BPA-2021-00273-F	Berryhill, Jerome	-	01/08/2021	On Thursday, August 2nd, 2018, BPA Resource Specialist Carlos Mora Flores met with me at my property at (b) (6). He informed me that it was necessary for BPA to trim certain plants on my property in order to comply with certain federal regulations. I asked him which federal regulations those were, and he said that he would send them to me by e-mail. Later that afternoon, he sent an e-mail to me, at (b) (6). In that e-mail, he said; "Here're the links to Western Electricity Coordinating Council (WECC) and Federal Energy Regulatory Commission (FERC). Files were too large to send via email. https://www.wecc.biz/Pages/AboutWECC.aspx https://www.ferc.gov/ The image below show the vegetation outlined in red and this will need to be at approximately 7 feet tall, at all times to meet federal standard clearance requirement." Neither of these links leads to a document discussing federal regulations regarding plant trimming or clearance requirements, nor to any "file" that is too large for e-mail. My request is for the files Mr. Mora Flores referred to in his e-mail. (Date Range for Record Search: From 8/28/2020 To 1/1/2021)
BPA-2021-00278-F	Berryhill, Jerome	-	01/11/2021	In April of 2001, Ben Tilley, BPA Natural Resource Specialist, sent a letter to me, Jerome Berryhill, and my wife, Leslie Graymer, at our residence, (b) (6). Enclosed with the letter were two copies of a "Tree and Brush Control Agreement", signed by Mr. Tilley. The letter asked us to sign and return one of the copies. As we had not requested this document, it is my surmise that it was produced as part of a BPA program or initiative, intended to induce multiple property owners to sign such agreements. My request is for any documents relating to such a program or initiative, including statements of policy, draft or sample "Agreements", and reports on the progress of the program or initiative, whether in 2001 or before or after.

BPA-2021-00400-F	Berryhill, Jerome	-	02/16/2021	In an e-mail sent to me on Thursday, August 2nd, 2018, BPA Natural Resource Specialist Carlos Mora Flores wrote that "The image below show the vegetation outlined in red and this will need to be at approximately 7 feet tall, at all times to meet federal standard clearance requirement". The e-mail contained an embedded image. Below that image, he continued "It is difficult to determine the allowable height on the vegetation in the image below as it is to the side and not under the wires. However, this needs to be trim back to allow for at least 20 feet of clearance (distance from vegetation and wires) at all times. Myself or the crew will need to be on site with the laser range finder to measure the distance and figure out how far it will need to be trimmed to meet federal standards." My request is for 1) The "federal standard clearance requirement" mentioned in the first quote. 2) The "federal standards" mentioned in the second quote (Date Range for Record Search: From 8/2/2018 To 2/16/2021)
BPA-2021-00426-F	Berryhill, Jerome	-	02/24/2021	On Tuesday, January 22, 2019, BPA employee Sandra Billings sent an e-mail to BPA employee Annette Talbot in regard to the BPA easement on my property at (b) (6), in which she wrote; "This land owner has been very difficult for Carlos, and since this vegetation hit the Lidar list, we do not trim we remove vegetation as we clearly have rights to do." My request is for the complete "Lidar list" which "this vegetation hit", as well as for any policy documents regarding BPA's use of lidar in vegetation management. To clarify; my request is not merely for the portion of the list pertaining to my property. It is for the entirety of any "Lidar list" with one or more entries pertaining to my property.

BPA-2021-01035-F	Smith, Rebecca	The Wall Street Journal	08/19/2021	Dear FOIA Officer, I am requesting information that would enable me to understand Bonneville's purchase of goods and services from two related Chinese companies: Jiangsu Huapeng, also known as JSHP, a maker of transformers and other electric grid equipment, and Doubletree Systems Inc. which also makes systems for use by the power industry. The information I am requesting includes copies of any purchase agreements by Bonneville for goods and/or services provided by Jiangsu Huapeng (JSHP) and Doubletree Systems Inc. In addition, I request copies of any documents submitted by Jiangsu Huapeng and Doubletree as part of their bid submissions, most likely in response to solicitations by Bonneville or other expressions of interest in obtaining goods and services for Bonneville's electrical network. I request these documents for the following years: 2021, 2020, 2019, 2018, 2017 and 2016. I also request the bid solicitations or requisition documents prepared by Bonneville for the purchase of goods and/or services to which the two Chinese companies responded and any other related documents. I am requesting these documents as a representative of a news organization and with the intent of using the information to inform the public. Thank you very much. Regards, Rebecca Smith

BPA-2022-00100-F	Johnson, Larry	Law Office of Larry G. Johnson	11/01/2021	Request is hereby made for the following public records: A consulting firm in Massachusetts, Synapse, conducted within the last two or three years load flow studies (also known as power studies) to analyze a Puget Sound Energy (PSE) proposed project within King County, Washington, known as Energize Eastside. In a report about its conclusions drawn from those studies, Synapse claims to have discovered a Bulk Electric System (BES) vulnerability caused by a transmission line deficiency in King County, Washington. According to Synapse, this problem apparently has existed now from an indeterminate time into the present. Specifically, Synapse states in its report: "...our analysis shows that the current summer electric peak demand in King County has already triggered an operational need for the proposed transmission expansion to address system contingency scenarios and ensure the security of the Bulk Electric System." This request is for any and all documents in your possession, or to which you have ready access, that references or relates to any known security or other vulnerability problem(s) in the BES within King County, Washington, due to a transmission line deficiency. The time frame for this records request is from January 1, 2020, to the present. This request is satisfied if limited to notification(s) to or from you about any claimed, identified, or known security or other vulnerability problem in the BES within King County, Washington, due to a transmission line deficiency, and your responses thereto. This request includes but is not limited to records you have in your possession, or to which you have ready access, to or from the following entities: 1. Puget Sound Energy. 2. RC West (the Reliability Coordinator for the WECC region). 3. The Bonneville Power Administration. 4. Seattle City Light. 5. NorthernGrid (successor to ColumbiaGrid).
BPA-2022-	Albright, Douglas	Actuation Test Equipment	11/04/2021	want to update the spill-database provided by BPA a year ago to understand what has happened with FCRPS fish mortality mitigation efforts. Recently it was said that CRSO EIS decided that the spill would be raised 25% and the number of spilling dams increased from 8 to 14. Please update the figures

00119-F		Company		previously provided by BPA for Columbia River Spill mandated by the Federal court that are shown in the attached spreadsheet at this link: <a href="https://actuationtestequipment.com/Spill_Data.xlsx">https://actuationtestequipment.com/Spill_Data.xlsx</a> The link will open an Excel spreadsheet that contains the prior data supplied by BPA and a preliminary analysis that works the data out to tons of CO2 emissions. (AOC will have kittens when she sees this data...) Last time the data was only available for 2017, 2018 and 2019. An estimate for 2020 was subsequently provided which was helpful, but today it is hoped that final numbers for 2020 are finalized and available. For example, the past and current regime is to spill 1/2 of the water 1/2 of the year at 8 dams, and the new rule is 25% more spill while the number of dams increases from 8 to 14. Please forward any reports and memoranda that discuss this topic, list the names of the 14 dams and explain how the 25% increase will work. Thank you, Doug Albright

BPA-2022-00265-F	Garner, Mark	Klickitat PUD	12/17/2021	KPUD is doing a project on a ROW that is adjacent to BPA's North Bonneville-Midway No. 1 and Wautoma-Knight No. 1 powerlines. I am wondering if BPA has collected Lidar data for either of the lines, and since we share the ROW if it picked up some of our ROW and Powerlines as well. I am specifically looking for data that is from July 2013 or earlier between the following spans NBON-MIDW HB 377 and HB 378B of if the data is referenced on the WAUT-KNIT-1 line it would be FY 359 and FY 357. The NBON-MIDW section would be best because it reduces the amount of information requested and covers the entire area of interest for KPUD. I don't know if BPA was doing Lidar that early but If you could point me in the right direction for this request it would be greatly appreciated."
BPA-2022-00295-F	Rose, Isaac	-	01/04/2022	Pursuant to The Freedom of Information Act which grants access to copies of public records, we respectfully request records pertaining to any of the following types of obligations that you may possess: Uncashed/Unclaimed checks and funds Unclaimed tax refunds and performance bonds Tax Overpayments Outstanding and Refundable credit balances Checks Exempt from Unclaimed Property Reporting If some of this request is exempt from release, please release the remainder of the record which is allowed. BPA-2022-00328-F	Peterson, Darcey	King County Water District 90	01/10/2022	On June 28, 2021, the day that temperatures hit 110 degrees in Renton, Washington, there was a forest fire under BPA's power lines. I am looking for any information related to this fire. Duration, cause, extent, Number of parcels involved, etc. Here is a link to the coverage from the local paper: <a href="https://patch.com/washington/sammamish/brush-fire-reported-south-issaquah">https://patch.com/washington/sammamish/brush-fire-reported-south-issaquah</a> The District's resources (i.e. water) were used to fight this fire. We would like to recover the cost of this water (About \$12,000 to \$15,000). Our research indicates that the property that was damaged was primarily under BPA's power lines. We would like to gather more information to confirm this before we send you a bill for the water used to fight the fire. Any questions, please email me at <a href="mailto:darceyp@kcvwd90.com">darceyp@kcvwd90.com</a> . or call 425-444-7731. Sincerely, Darcey Peterson General Manager King County Water District No. 90

N Department of Energy Bonneville Power Administration Mail Drop 1399 P.O. Box 968 Richland, Washington 99352-0968 POWER SERVICES November 9, 2021 In reply refer to: DRAFT OY 2022 CFP Budget Mr. Brad Ford, Chief Financial Officer Public Utility District #1 of Lewis County P.O. Box 330 Chehalis WA 98532-0330 Dear Mr. Ford: Reference is made to your e-mail dated October 8, 2021, "2022 DRAFT Budget V.3", whereby on behalf of the Cowlitz Falls Project (CFP) you provided version 3 of the CFP Operating Year (OY) 2022 Budget. The Bonneville Power Administration (Bonneville) agrees to a portion of the Budget and desires additional information on the remaining items. Bonneville continues to share the Public Utility District #1 of Lewis County (Lewis) commitment to prioritizing the safe, efficient, and reliable operation of the CFP consistent with the Power Purchase Agreement (PPA) and prudent business operating practices. On October 14, 2021, update on October 19 and 27, Bonneville provided Lewis a listing of agreed to items from the Draft CFP OY 2022 Budget. These items are listed in Enclosure 1, with the remaining items listed in Enclosures 2 and 3. Enclosures 2 and 3 consist of items Bonneville has not yet reached mutual agreement with Lewis. During the October 19, 2021 OY 2022 Budget meeting, Bonneville verbally provided an explanation as to why we are unable to fund items. Those reasons are reiterated in Enclosure 2. Enclosure 3 is a list of line items specifically requiring a Justification Sheet (JS) and notes the reasoning behind why the associated project will not be receiving agreement in funding at this time. This is based on communications via email and JS meetings through October 29, 2021. In regards to projects listed in Enclosure 3, the funding will change as phases of on-going projects are completed. Bonneville would like to note that it is our desire to work together to reach agreement on remaining non-mutually agreed upon items in Enclosures 2 and 3, prior to the deadline of November 30, 2021, but feel it is important to document our current position on the complete CFP OY 2022 Budget that has been presented by Lewis and CFP staff at this time. Bonneville would be remiss in not expressing our appreciation to the Lewis team (Joe First, Brad Ford, Michelle Holmes, Nichole Lantau, Doug Streeter and Wendy Woody) for their diligence in working through the CFP OY 2022 Budget. Bonneville looks forward to the Lewis team's continued efforts on the items not yet agreed to. Any issues concerning the CFP OY 2022 Budget or the Cowlitz Falls Project should be directed to Bonneville's CFP manager Debbie

BPA-2022-01066-F	Albright, Douglas	Actuation Test Equipment Company	07/07/2022	This request is seeking information on Bonneville Power Administration Technology Innovation Opportunity grant for Project Number 1918-1556. Background: Hydro Review magazine (the most prestigious periodical of the hydropower industry) has requested memoriam for Lee Sheldon, a longtime advocate and proponent of hydropower efficiency optimization. Lee was on the Editorial Review Board of said magazine for many years. Lee worked for DOE in the Idaho Operations Office and Bonneville Power Administration. In 2013 Lee was teaching classes on hydropower at the Oregon institute of Technology. As a class project, the students developed a Joint Load Optimizer for Economic Dispatch (JLOED) under Lee's tutelage. The purpose of this computer software technology was to choreograph load allocation to the generating units in an entire powerplant to maximize aggregate power output of the entire dam. Their JLOED was a continuation and improvement of Lee's original creation of this technology in 1995 at/for Kleinschmidt Group in Portland Maine. A Hydro Review article (1) by the students reports that Bonneville Power Administration partially funded this effort with a Technology Innovation Opportunity grant (project number 1918-1556) to encourage the students' efforts and steer the project to maximize generated power and revenue at Grand Coulee Dam (USBR) to benefit the Federal Columbia River Power System (FCRPS). BPA-2023-00498-F	Hessler, Martin	Institute for Theoretical Physics	01/27/2023	Dear Mr King, in my group at the University of Münster, Germany, we perform research in the field of power grids and power outages. In 2015 you provided two time series of bus voltage frequency data from the Bonneville Power Administration prior to the power outage at 10th August 1996 to a colleague of mine, named Frank Ehebrect. His first contact was via the Freedom of Information Act with your (former?) colleague Ms Winn. I attach the official document. Recently, we analysed the data again with a more sophisticated approach and could achieve new interesting insights. Unfortunately, in 2015 the data was not provided with the specific location and the absolute clock times/begin of the measurements which is of great interest for interpreting the analysis results more carefully. Could you inform us about - the measurement location and - the absolute starting times of the measurements of both time series? Since the request was way back I try to give you the necessary information to identify the two time series. I guess the most promising way is to use the information of the old e-mail correspondence and corresponding official documents. Therefore I attach the full correspondence from my former colleague Frank Ehebrect and the official document from the FOIA request (FOIA BPA 2015-00987-F). At least the measurement starting time (15:29:40) is mentioned in this document for one of the two time series. The starting time should be counted among the longer time series in the original_datasets file which I attach. The detrended version (again the longer one) is shown in the detrended_datasets file which I attach as well. Thus, the longer dataset of which the measurement location is missing should cover the period of 15:29:40 up to ca. 15:48:55 in time steps of 0.05 s if I am right. The shorter time series and the corresponding detrended version shown in the original_datasets and detrended_datasets files, respectively, is provided without location and without absolute time. It contains a period of rounded 9,42 minutes. If the same time is assumed for the power outage event as for the longer time series which is around 15:48:55 we are looking for a time series covering the period from 15:39:38 up to 15:48:55. Additionally, it is previously analysed in figure 7 of the research article from Cotilla-Sanchez et al. I attach the preprint version of the article. I would be very grateful if you could find the measurement locations of these datasets as well as the confirmed absolute times, since they are of great scientific value and interest. I thank you in advance for your support and effort and I am looking forward to hear from you soon. Please feel free to contact me if there are any problems and let me know in which time horizon the information can be probably restored. I hope the research will be successful. Again thanks a lot and have a nice day! Yours sincerely, Martin Heßler (Intitute for Theoretical Physics, University of Münster, Germany) P.S.: Additionally I attach the official report of the power outage event starting at page 39. Unfortunately, the time series printed there start with the official outage time and we are instead looking for two time series minutes before the outage event. But maybe it is helpful anyways. BPA-2023-00543-F	James, Eve	Energy Keepers	02/08/2023	I am requesting information on how the Hungry Horse Dam costs are split between the capital costs, operations costs, and administrative costs for PNCA contract year 2012-13. I chose that contract year so that business sensitivity shouldn't be an issue. If that contract year is too far back for easily accessible records a more recent year would also be acceptable. I have the PNCA booklet values but trying to understand the accounting differences in how Hungry Horse Dam and Se?liš Ksanka Ql?ispe? (formerly Kerr) Dam arrive at the PNCA booklet values as the reasons for the differences are not explained in the PNCA or FERC regulations. Under the current PNCA methodology the differences have not been impactful but as the region explores different methodologies for calculating headwater benefits understanding the accounting differences becomes relevant. The Bureau of Reclamation works with BPA's asset management team in Power Services for the values that go into the PNCA submissions.

I am willing to pay all reasonable expenses incurred in the process of the FOIA request. My previous journalistic work has been featured in Muckrock, the Centcom press portal, local publications, among others. Respectfully, Colin Aamot (Date Range for Record Search: From 1/1/2000 To 5/30/2023)
HQ-2015-01691-F	Frowiss, Al	The Atomic Workers Advocacy Group	08/04/2015	Request applies to: Operations of the Grand Junctions Operations Office- Grand Junction, Co from 1945-1990. Seeking legal or contract documents between AEC/DOE and the General Services Administration (GSA) or AEC/DOE and USGS or AEC/DOE and Bureau of Reclamation. My understanding is that AEC/DOE owned/operated the facility and "leased" space to GSA, USGS and Bureau of Reclamation. Further, Seeking and Memoranda of Understanding/Requests for Services between AEC/DOE and those agencies, GSA, USGS, or Bureau of Reclamation.
