Description of Request: I would like a copy of this report. Thank you! System Impact Study for Oregon Trail Wind Farm, LLC 3/08/2006 Oregon Trail Wind Farm, LLC submitted long-term firm point-to-point (PTP) transmission service request 1145-02 to BPA TBL through the Open Access Transmission Tariff (OATT) process. The transmission service request is for 10MW with point-of-receipt (POR) at Demoss 115 and point-of-delivery (POD) at Troutdale 230. The SIS discusses options to accommodate this request including the need to upgrade the Demoss-Big Eddy 115kV line and Big Eddy 230/115 kV transformer, or reconnect existing generation to a future project being planned for generation interconnections into John Day substation. The System Impact Study report is available upon request subject to non-disclosure agreement. March 8, 2006.
