New Report on Codes and Standards Savings Posted -

BPA recently posted a report titled "Methodology for Quantifying the Energy Impacts of Building Codes and Appliance/Equipment Standards in the Northwest". This report provides a transparent methodology for modeling the impacts of both appliance standards and building codes, in order to properly account for energy efficiency in the region as well as claim savings towards the 6th Plan targets. This report may be accessed [here](#).

Please contact Carrie Cobb, clcobb@bpa.gov, with any questions.

Updates to the Commercial Technical Service Provider Process -

BPA has made changes to the process for acquiring commercial technical services from technical service providers. Changes will affect how customers acquire these services and how technical service providers are selected... [More](#)

New Behavior Based Energy Efficiency Funding Opportunity for Utilities -

BPA is seeking applications from BPA customer utilities for innovative behavior based energy efficiency (BBEE) pilot programs. BPA's goal is to enable, validate and increase the amount and persistence of energy savings achieved through BBEE programs in the Northwest. Applications are due November 7, 2011... [More](#)
