

## Heat Pump Water Heaters – Qualified Products List

The following is a list of heat pump water heaters that meet specifications to qualify for Bonneville Power Administration’s (BPA) heat pump water heater reimbursement to public utilities in the Pacific Northwest. (Please note: BPA does not provide incentives directly to end users. Homeowners interested in this technology should contact their local utility.)

To qualify: Heat pump water heaters must be ENERGY STAR<sup>®</sup> qualified and meet the performance requirements of the Northern Climate Specification, managed by the Northwest Energy Efficiency Alliance (NEEA). Currently, BPA has approved only Tier 1 integrated heat pump water heaters\*
