

How will Your Organization Deal with Soaring Energy Costs?

We'll show you how other companies have realized millions of dollars in savings by decreasing energy usage and increasing productivity.

Energy continues to be a dominant factor affecting the vitality and profitability of manufacturing businesses across the nation – and around the World.

Focus & Program:

This national Satellite Teleconference will focus on sound, proven management strategies as well as innovative technologies and techniques used to reduce energy costs, increase productivity, and maximize profits.

The program is geared to all manufacturing segments, including the nation's third largest manufacturing sector, Food Processing.

Registration:

Go to www.nwfpa.org to register, or call 503/327-2200.

PRODUCED BY

Teleconference Agenda • March 9, 2006
