 - 4.6.4 Within-Month Excess Factoring**

DOCUMENTATION SECTION 4.6.
Unauthorized Increase Charges and Excess Factoring Charges

This section provides documentation for BPA's proposed methodologies for the 02 Unauthorized Increase (UAI) charges and Excess Factoring charges. It is important to note that *the data results appearing in this section do **not** reflect proposed UAI or Excess Factoring charges*; rather, the data presented in this section are based on recent historical price index data, *and intended to illustrate the proposed methodologies* for the UAI charges and Excess Factoring charges. The applicable 02 UAI charges and Excess Factoring charges will be determined after each billing month of the rate period. This determination will incorporate price index information, as specified in the GRSPs, and compare the index-based charges against the GRSPs specified minimum charges to determine the applicable UAI and Excess Factoring charges.

Historical data illustrating the proposed methodology for the UAI charges for demand appears in section 4.6.1. Examples for the UAI charges for energy, again using historical price indexes, are presented in section 4.6.2. Section 4.6.3. presents examples for deriving the Within-Day Excess Factoring charges. The derivation of the Within-Month Excess Factoring charges is illustrated in Section 4.6.4.
