

Jan. 9, 2009

To customers and interested parties:

BPA's Wind Integration Team has held a number of customer workshops to discuss how to proceed in connecting variable generating resources to the Federal Columbia River Transmission System. At the Wind Integration Team public workshop held on Friday, Jan. 9, the parties asked for one more chance to submit comments to BPA. BPA established the following timeline to accommodate the request while still resolving this issue in a timely manner.

- Jan. 14      Deadline for all comments to be submitted to BPA (please submit comments to [evking@bpa.gov](mailto:evking@bpa.gov)).
- Jan. 22      BPA will post response to comments.
- Jan. 23      BPA will hold the next Wind Integration Team customer workshop.
- Jan. 27      BPA will post the final document for "Connecting Variable Generating Resources to the Federal Columbia River Transmission System."

Thank you.
