

2010 BPA facts

Unless otherwise noted, information is for fiscal year 2010.

Profile

The Bonneville Power Administration is a federal nonprofit agency based in the Pacific Northwest. Although BPA is part of the U.S. Department of Energy, it is self-funding and covers its costs by selling its products and services. BPA markets wholesale electrical power from 31 federal hydro projects in the Columbia River Basin, one nonfederal nuclear plant and several other small nonfederal power plants. The dams are operated by the U.S. Army Corps of Engineers and the Bureau of Reclamation. About 30 percent of the electric power used in the Northwest comes from BPA.

BPA also operates and maintains about three-fourths of the high-voltage transmission in its service territory. BPA's service territory includes Idaho, Oregon, Washington, western Montana and small parts of eastern Montana, California, Nevada, Utah and Wyoming.

As part of its responsibilities, BPA promotes energy efficiency, renewable resources and new technologies. The agency also funds regional efforts to protect and rebuild fish and wildlife populations affected by hydropower development in the Columbia River Basin.

BPA is committed to providing public service and seeks to make its decisions in a manner that provides opportunities for input from all stakeholders. In its vision statement, BPA dedicates itself to providing high system reliability, low rates consistent with sound business principles, environmental stewardship and accountability.

BPA Mission

The Bonneville Power Administration's mission as a public service organization is to create and deliver the best value for our customers and constituents as we act in concert with others to assure the Pacific Northwest:

- an adequate, efficient, economical and reliable power supply;
- a transmission system that is adequate to the task of integrating and transmitting power from federal and nonfederal generating units, providing service to BPA's customers, providing interregional interconnections, and maintaining electrical reliability and stability; and
- mitigation of the Federal Columbia River Power System's impacts on fish and wildlife.

BPA is committed to cost-based rates and public and regional preference in its marketing of power. BPA will set its rates as low as possible consistent with sound business principles and the full recovery of all of its costs, including timely repayment of the federal investment in the system.

BPA Vision

BPA will be an engine of the Northwest's economic prosperity and environmental sustainability. BPA's actions advance a Northwest power system that is a national leader in providing:

- high reliability;
- low rates consistent with sound business principles;
- responsible environmental stewardship; and
- accountability to the region.

We deliver on these public responsibilities^{1/} through a commercially successful business.

^{1/} Our public responsibilities are defined by the four characteristics listed above.

Rates

Wholesale power rates^{2/} (10/1/10-9/30/11)

Non-Slice Priority Firm (average, ^{3/} undelivered)	2.88 cents/kWh
Priority Firm Exchange (average, undelivered)	4.87 cents/kWh
New Resources (flat, undelivered)	6.87 cents/kWh

^{2/} The rates shown do not include the cost of transmission. They also do not include the application of the Conservation Rate Credit.

^{3/} The actual rate paid by an individual customer will vary according to the shape of the load and the products and services purchased.

Transmission rates^{4/} (FYs 2010-2011)

Network rates:	
Firm	\$15.576/kW/yr
Nonfirm	.374 cents/kWh

Southern intertie rates:

Firm	\$15.516/kW/yr
Nonfirm	.372 cents/kWh

^{4/} Reflects the rates for point-to-point transmission service. All short-term firm and nonfirm rates are downwardly flexible.

2010 Financial Highlights

For the Federal Columbia River Power System

(\$ in thousands)

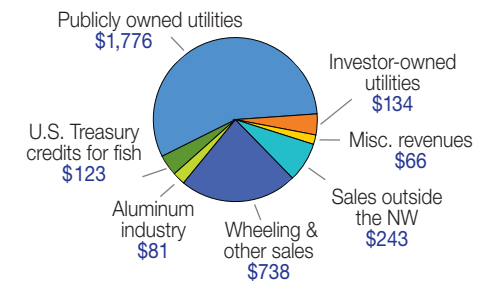

Total operating revenues ^{5/}	\$3,055,131
Total operating expenses	2,939,370
Net operating revenues	115,761
Net interest expense	243,342
Net expenses	(127,581)
Derivative instruments	(14,800)
Nonfederal debt management actions	(22,030)
Modified net expenses ^{6/}	\$ (164,411)

^{5/} Includes both power and transmission revenues.

^{6/} Management has determined that modified net revenues (expenses) are a better representation of the outcomes of normal operations during periods of debt management actions and fluctuations in derivative market prices. See BPA's 2010 Annual Report for more information.

Hydro: 12,531 aMW (44.5%)

Coal: 5,370 aMW (19.1%)

Combustion turbines: 3,261 aMW (11.6%)

Cogeneration: 2,715 aMW (9.6%)

Imports: 1,078 aMW (3.8%)

Nuclear: 1,030 aMW (3.7%)

Non-utility generation: 710 aMW (2.5%)

Other miscellaneous resources: 1,466 aMW (5.2%)

10/ Forecast figures from BPA's "2010 Pacific Northwest Loads & Resources Study." Firm resource projections before adjustment for reserves, maintenance and transmission losses. The hydro capacity is reduced by an operational peaking adjustment to estimate the monthly maximum operational capability that is available to meet the 1-hour peak load for 1937 critical-water conditions. For January 2011, the reduction is -4,569 peak MW.

Federal Generation (FY 2010)

Hydro generation	6,882 aMW
Total generation	7,994 aMW
60-min. hydro peak generation	15,696 MW
60-min. total peak generation	16,032 MW
All-time 60-min. total peak generation record (June 2002)	18,139 MW

Fish & Wildlife Costs

(\$ in millions)

FY 2010

BPA F&W program expense ^{11/} (does not include \$97.5 million capital)	\$199
Direct funded/reimbursable	70
Capital investment/fix expense	124
Total direct costs	\$393
Operational impacts:	
Replacement power purchases	\$310
Estimated foregone power revenues	99
Total F&W costs for FY 2010	\$802

BPA has committed nearly \$12 billion since 1978 to support Northwest fish and wildlife recovery.
