- Seattle
- Snohomish - 6/20 *
- UAMPS
- No data from: UMPA, Grant, Chelan & Alberta

Data as of 6/27/00 at 6 PM

** denote by facilities data*

Data collection - in progress and consuming resources

Transmission Pricing WG

RTO West Pricing Data Models defined by RRG

- Option 1 - IndeGO type of facilities inclusion (FERC form 1 or equivalent submittal)
- Option 2 - Facilities designated as transmission by application of FERC 7 Factor test (Order 888) plus additional facilities to reach wholesale customers
- Option 3 - Facilities designated as transmission by application of FERC 7 Factor test (Order 888)

RRG Direction - no change, just a reminder

Transmission Pricing WG

Open Issues -

- WG still working through how to apply the 7 factor test - Current plan is to collect the data using the interpretation of the data supplying utility. Resolve any significant differences later.
- Struggling with "how to handle short term imputed energy from bundled sales".
 - \$ values is currently larger for some entities than in IndeGO
 - Know how much was sold but do not know where the energy was consumed, e.g. RTO load or export
- Financial Incentives to Join RTO - Transmission Owners to provide guidelines for RRG's review.

New challenges from business transactions changes since IndeGO.
