

**COPY OF MAY 29, 2002 E-MAIL FROM BUD KROGH CONFIRMING JUNE 3, 2002
RRG MEETING**

Hello Everyone –

This confirms the upcoming meeting on June 3 of the RTO West Regional Representatives Group (RRG) with FERC Chairman Pat Wood and staff members Allison Silverstein and Mike Coleman. The meeting will be held in the Multnomah/Holladay Rooms at the Doubletree Hotel Lloyd Center, 1000 N.E. Multnomah, Portland, OR 97232 - Phone (503) 281-6111. Starting time is 1:30 p.m. and we expect to end by 4:00 p.m.

The working agenda calls for separate panels to address two subjects: seams resolution approaches in the western interconnection and standard market design issues.

Panel 1 - Seams Resolution Approaches in the Western Interconnection

Introduction to Seams Steering Group - Western Interconnection
Structure and Memorandum of Understanding
Planning
Market Monitoring
Common Systems Interface Coordination
Congestion Management
Canadian Participation

Panel 2 - Standard Market Design Issues

Filing Utilities
Northwest Requirements Utilities
Northwest Energy Coalition (Environmental Community)
Marketers Interests
Public Generating Pool (Large Generators)

While panel members will make brief presentations on the issues of most concern to them, as we've always done with RRG meetings, RRG members will have opportunities to participate in the discussion. To the extent time allows, other attendees can comment as well.

We look forward to seeing you next Monday.

- Bud
