PUD No 1 of Ferry County

Mr. Wright: The Commissioners of PUD No. 1 of Ferry County urge you to support the TIG approach for the operation and management of a NW transmission system. BPA has supplied our power for all these years and we don't want to see a change from that approach. TIG is closer to that approach than Grid West. One only has to look at the rest of the country to see that a Grid West approach does not work. It would create a whole new level of bureaucracy and we don't need that. It would also be cost prohibitive. Our consumers simply cannot afford a Grid West. Please listen to your preference-power customers! It's "TIG." Best regards, Bobbi Weller, Manager PUD No. 1 of Ferry County
