**Subject:** Proposed Libby Rebuild

Will your environmental studies look at:

1. Effect of steel on wildlife and aquatic plants and fish?
2. Would it present an "eye-sore" from the preserve trail that follows the river or from Hiway 2?
3. Effect of lightening hits.
4. If you install the higher wattage power lines, what effect will that have on people living near the lines?

I would like a more detailed map of the proposed rebuild area.

Thank you.

Any change in the location of power poles or power lines inside the Montana Department of Transportation (MDT) Right-of-Way will require a Utility Occupancy and Location Agreement to be completed and provided to the MDT Missoula District for review and approval. Please contact Nancy Edwards, Utility Agent, MDT Missoula District Office at 2100 W Broadway, P.O.Box 7039, Missoula, Montana 59807-7039, Telephone (406) 523-5826.
