BPA: Libby (FEC) to Troy Proposed Rebuild

To Whom It May Concern:

I writing to voice my opinion on the BPA rebuild of the Libby Troy section of their 115KV line. I would have written earlier but I just heard about the proposals yesterday.

As a homeowner in the Big Horn Terrace subdivision I along with many others would like to see the line re-routed out of the subdivision to one of the other BPA proposals (Quartz Creek Alignment). Some of the proposals calls for doubling the voltage to 230KV and doubling the easement from 80 ft to 160 ft (Which means structures would have to be moved). I have three small children and I definitely don't want the voltage doubled over their heads.

I think re-routing the line out of the subdivision would be better for everyone concerned.

Thank You for your time and consideration on this matter.
