- I don't like this!
- There is an easement through the property. It has 2 impacts - it limits my land use & vehicles use it without permission. I have no problem with BPA or power company being on the easement.
- I do not want any widening of the easement and that could destroy my shop.
- You are growing nap weed all along the easement.
- This property is currently undergoing major changes i.e. new church facility & parking lots, entry roads, water, sewer, etc. We will need to discuss several things.
- The main church facility will be started 2006.
- Will the cutting of 2' trees be necessary on my land?
- Will I have enough space to install septic systems on my lots after line is installed?
- Will this right of way impact the value of my 3 lots?
- Where on my lots will the power line run?
- No (subsurface testing) in my yard as it has an underground sprinkle system.
- No spraying of the trees in my yard. Use flagging, no spray paint.

Please add the following comment to the Libby Troy comment log.

1. We request BPA move the line off the property to the hwy side of the river.
