Subject: Lyle Falls Fish Passage Project

I am pleased to submit the following comment on the proposed scope of the Draft EIS for the Lyle Falls Fish Passage Project on behalf of Klickitat County.

The Lyle Falls Fish Passage Project is but one element of a broader project, which is outlined in the Klickitat Subbasin Anadromous Fishery Master Plan. The scope of the EIS needs to address the entire project described in the Master Plan, including but not limited to the proposed Wahkiacus Hatchery and Acclimation Facility and the proposed changes to the Klickitat Fish Hatchery facilities and operations.

Thanks you for the opportunity to comment on the scope of the Draft EIS.

David McClure
