

To the BPA,

This proposal KEC-4 to exterminate thousands of trout is a travesty. This plan goes against all the principles of humanity and especially in a U.S. Wilderness area that I have personally enjoyed. I even caught some of these "freak" fish and had just a good of time as if they were the "pure breed". Please make sure you have studied this action and will want to live with results. Leave the Wilderness alone.

Best regards,

Mike Lenci,
