

Hi,

SUM-003

This is regarding the proposed Summer Falls/
main canal Hydropower interconnection. As we
discussed this is a sketch of our property &
how the line would affect us. The new line
would go right over where we planned
to build our house. The septic system, well
power lines are already in at a cost of
roughly \$15,500. The power line runs underground
200 ft from J street (which is the maximum
allowed) so the house can't be moved down
w/out running overhead lines. We also have
2 sets of power poles running through our
front yard. We chose this location for our
house because of view & relocating would be
difficult because the lower part of our property
is a wetland & there are restrictions on
where you can put the well & septic system.
We are ready to start building & would
like to get this resolved as soon as possible.
Please call if you have any questions.

Thanks
Jay & Carol Erdahl
