

BPA's Proposed Summer Falls & Main Canal Interconnection Project

I suggest an alternate route, south along the main canal then east to meet your presently proposed line going south. It would probably bother no one, and very little if any more expensive. It would probably all be on Bureau land or some other government entity that may be easier or nicer to deal with than the private citizens. And possibly less hard feeling's and hassles in the end.

Thank you for your consideration.

H.E. McDonald

Proposed Summer Falls/Main Canal Hydropower Interconnection

Legend

- | | |
|---|-------------------------------------|
| Hydropower Project | Proposed Substation - Alternative 1 |
| BPA Transmission Lines | Proposed Substation - Alternative 2 |
| Proposed Transmission Lines - Alternative 1 | Proposed Communications Site |
| Proposed Transmission Lines - Alternative 2 | Avista Transmission Lines |

Major Land Ownership

- | | |
|-----------------------|--------------|
| Bureau of Reclamation | State Land |
| Bureau of Land Mgmt. | Private Land |

Note: All proposed line and substation locations are estimates. Final locations to be determined.
