Subject: KlondikeIII/BiglowCanyon---Proposed 230kV Route Option

Gary,

Regarding the "North Alternative" along Herrin Lane between what your map labels Grace Medler Road and McNab Lane, Wasco Electric Cooperative has a single phase 7.2 kV distribution line. There are plans to rebuild (and possibly reroute) this line to three phase 12.47 kV and extend it into Rufus along Scott Canyon Road. It is important that WEC and BPA work together to avoid facility conflicts.

Please advise me of developments.

Thank you.

John C. Burgess
