

# **2012 BPA Rate Case Customer Workshop**

**Generation Inputs/Wind Balancing  
Service  
May 27, 2010**

# Agenda

1. Iberdrola's Scheduling Practices
2. Persistent Deviation Penalty Alternatives
3. "Smarter DSO 216"  
Providing as-available incremental generating capability to reduce curtailments
4. Wind Integration Charge Billing Determinant  
Using Generation Imbalance
5. Scaling Methodology Improvements
6. Wrap up and next steps

## About Today's Discussion

- Customer presentations on wind balancing issues.
- Today's discussion is preliminary and pre-decisional.
- We look forward to working together to better understand the issues that will help shape the development of the Initial Proposal.

# **Iberdrola Presentation**

## **Renewable Northwest Project Presentation**

## Next Steps

- **17 June 2010:**
  - Workshop will cover operating reserves, scaling methodology and the installed wind capacity forecast.

## Wrap Up

- BPA would like to continue to hear your feedback regarding the topics we discussed today.
- Share your view today or feel free to submit a written response to:
  - [techforum@bpa.gov](mailto:techforum@bpa.gov).
  - Please state **“2012 Rate Case”** in the subject line.
- Our intent is to understand customer interests and the priority of topics to capture in the parking lot. This information will help inform the topics to focus on for developing the workshop schedule.
- We look forward to working together on these complex issues.
