

**Tech Forum Exploder**  
**Montana Intertie Agreement**  
*6/24/10*

In response to a customer request at the June 17<sup>th</sup> workshop, below is the section of the Montana Intertie Agreement that provides for terminating the exchange discussed at workshop.

We expect to have more discussion on the Montana Intertie at the July 14<sup>th</sup> Rates Workshop. More meeting information will be made available at:

<http://www.bpa.gov/corporate/ratecase/2012/meetings.cfm>.

12. Capacity Exchange Contingent upon Transmission Agreement between Montana and Western.

In the event that Montana and Western do not reach agreement on transmission services to be provided to Western for transmission of electric power and energy between Western's system and Broadview, or if such agreement terminates before the term hereof, all provisions herein for a capacity exchange on the Montana Intertie and for firm services to be provided to Bonneville hereunder shall terminate and all payment provisions herein and the calculations in all exhibits hereto shall be revised by Bonneville to reflect that:

- (a) Bonneville's Transmission Demand goes to zero;
- (b) The Companies Intertie Charge will be calculated without an Exchange Credit.
