

PNGC's Proposal: Power Factor Penalty – Transfer Service

Aleka Scott, PNGC

Customer Proposal for Transfer Service

Power Factor Penalty - Transfer Service- Customer Proposal:

d. Service by Transfer

Points of delivery that are served by transfer over another utility's transmission system will not be subject to the Power Factor Penalty Charge unless there are significant BPA-TS Network facilities between the party's points of delivery and the transferor's system. BPA may bill an applicable Power Factor Penalty Charge directly to the customer served by transfer if such billing is agreed to by BPA, the customer served by transfer, and the transferring utility.
