**Subject:** Proposed Language for Transmission Rate Case Settlement Agreement  
Barry, Bob, and Sarah,

Thanks for taking the time to consider the following proposal:

Before the start of the next transmission rate case, Bonneville Power Administration staff will, (1) work with interested transmission customers in an open and collaborative forum to define the parameters of a cost of service study that compares the services and costs of BPA's major transmission services, (2) complete the cost of service study, and (3) share the cost of service model with customers to ensure a clear and transparent comparison of the services.

I would be happy to discuss the proposed language in more detail before Friday or I plan to be in attendance for Friday afternoon's meeting as well and we can discuss then.

Thanks~  
Travis
