# Energy Smart Services

## FINANCIAL INCENTIVES & TECHNICAL ASSISTANCE

With today's skyrocketing energy costs, it makes good sense to be as energy efficient as possible. Seattle City Light offers financial incentives and free energy consulting services to help medium to large size businesses, manufacturing plants, institutions and government facilities\* reduce electricity use and save money.

### Financial Incentives

Let us reimburse your organization up to 70% of the cost for qualifying energy efficiency improvements:

- ✱ **Lighting, HVAC, Controls, Transformers, Insulation and Glazing:** We offer incentives for the installation of qualifying energy efficient lighting and equipment in your building.
- ✱ **Industrial Process Improvements:** Our industrial customers can also take advantage of incentives for process improvements that increase energy efficiency.
- ✱ **New Construction Incentives:** Seattle City Light will help build energy efficiency into your new construction project.

See reverse for a list of eligible measures and incentive amounts.

### Technical Assistance

We can provide assistance, information and ideas about design strategies and energy efficient equipment for your lighting and HVAC systems:

- ✱ **Facility Assessments:** Let us review your facility's needs and electricity use. We will prepare a report and an action plan to help reduce your operating costs. There is no charge for this service.
- ✱ **Energy Analysis Assistance:** We can reimburse your business for the professional design and engineering services you need to develop cost-effective conservation strategies for your major new construction or remodel project.
- ✱ **Building Commissioning Assistance:** Commissioning ensures that all newly installed equipment and systems are operating as the design intended. Qualifying new construction and major remodel projects can receive partial reimbursement for developing a commissioning plan that includes the review of design and construction documents.

## Standard Incentives

Examples of Standard Measures Funded	Incentive Amounts* (applied to first-year savings)
<b>New Lighting Fixtures</b> T-8 fluorescent with electronic ballasts Metal halide High-pressure sodium Exit signs**	13¢ per kWh saved - except 14¢ in New Constr. 13¢ per kWh saved - except 14¢ in New Constr. 13¢ per kWh saved - except 14¢ in New Constr. \$30 per sign
<b>Retrofit Lighting</b> T-12 to T-8 fluorescent Incandescent to fluorescent Exit signs**	10¢ per kWh saved 10¢ per kWh saved \$20 per sign
<b>Controls</b> HVAC Central lighting Daylighting controls Occupancy sensors - wall mount** Occupancy sensors - ceiling mount**	17¢–20¢ per kWh saved 21¢ per kWh saved 17¢–20¢ per kWh saved \$30 per sensor \$90 per sensor
<b>HVAC Equipment</b> Chillers Air conditioners Air-to-air heat pumps Hydronic heat pumps Variable speed drives for fans	23¢ or 29¢ per kWh saved 20¢ per kWh saved 20¢ per kWh saved 23¢ per kWh saved 23¢ per kWh saved
<b>Efficient Transformers</b>	23¢ per kWh saved
<b>Motors</b> Process loads Non-process loads	15¢ per kWh saved 23¢ per kWh saved

\*\*Simple Rebates

## Custom Incentives

Financial incentives may be available for other installations such as:

- ✱ Building envelope modifications like new windows or insulation
- ✱ Refrigeration system efficiency improvements
- ✱ Pumping efficiency improvements, including variable speed drives
- ✱ HVAC efficiency improvements
- ✱ Air compressor efficiency improvements
- ✱ Industrial process efficiency improvements
- ✱ Any innovative idea that saves kWh

**\*Limitations on Funding** To be eligible for Seattle City Light funding, a contract with Seattle City Light must be in place before any energy conservation measures are installed. The above rates are subject to change without notice. Seattle City Light funding is calculated based on the annual kWh savings multiplied by the funding rate and limited to 70% of the energy conservation measure (ECM) cost. When labor costs are not available, funding may be limited to 50% of the cost of ECM materials. Incentives for HVAC equipment are based on kWh savings beyond code-based performance values. More information on funding calculation procedures is available from City Light's Commercial and Industrial Section.
