

Put your business in the best light with Lighting Equipment Upgrades

Before

After

Save as much as 50% of the lighting costs at your facility

The Seattle-Tacoma Airport lighting upgrade above is saving the Port of Seattle almost 1.5 million kilowatt-hours of electricity per year through the installation of energy-efficient fixtures and fluorescent lamps.

Other benefits of lighting upgrades might include:

- Reduced maintenance costs due to the longer life of the new equipment.
- Increased employee productivity and morale due to improved lighting intensity and fewer accidents.
- Positive reactions from customers visiting your business.
- Reduced environmental impact from electricity generation.
