

Regional Dialogue Policy Implementation Modifications to the Regional Dialogue Proposal

| | |
|---|------------------------------------|
| Project: Regional Dialogue Policy Implementation – Service to Publics | As of: November 13, 2007 |
|---|------------------------------------|

Note: Full descriptions of all decisions are available in the Regional Dialogue Policy Implementation Decision Descriptions

| Decision Issue | Decision Description | Decision Date |
|--|---|----------------------|
| Load Following Service to Publics concepts (final product description pending RSS decisions) | <ol style="list-style-type: none"> 1. Provide Resource Flexibility for Load Following Customers with declared dispatchable resources 2. More flexibility in resource shapes for Load Following customers. | 11/13 |
| Block Product concept (final product description drafting underway) | <ol style="list-style-type: none"> 1. Increased flexibility in the shape of the Block Product. <ol style="list-style-type: none"> a. BPA will continue essentially the same block shaping flexibility that exists in the current contracts. b. BPA will offer essentially the same shaping capacity product in connection with stand-alone block purchases that it currently provides to Tacoma. However, unlike today, any shaping capacity a customer has rights to will be take-or-pay because BPA must reserve capacity sufficient to meet customer rights. c. BPA will allow Slice customers to choose between an annual flat blocks or flat monthly amounts in the shape of net requirements, calculated in the same way as the stand alone block. | 11/13 |
| Resource Support Services | Pricing Wind Integration Services: BPA agrees to price wind integration services under the RSS product at the marginal cost of providing that service. | 11/13 |
| Product Switching | Create Contract Right for Product Switching: BPA will provide customers a one-time right to switch products. By providing notice by FY 2017 the customer may switch its product effective FY 2020. | 11/13 |
| Tier 2 rate alternative concepts | <ol style="list-style-type: none"> 1. Initial Tier 2 commitment will be November 2009. 2. By August 2008, BPA intends to outline the structure for all Tier 2 rates alternatives that BPA intends to make available by the time deliveries begin October 2011. 3. BPA intends to take the necessary actions to offer Vintaged Renewable Tier 2 rates by November 2009 when customers are required to commit how their load above their HWM will be served. 4. BPA will offer the Load Growth Tier 2 rate as an alternative at contract signing. | 11/13 |
| Shared Rate Plan | BPA will retain the 500 aMW limit on the Shared Rate Plan. However rather than terminate the rate pool if the amount exceeds as suggested in the issue paper, if the amount exceeds 500 aMW BPA will establish a process to reduce the number of customers that are in the pool. | 11/13 |
| Scheduling Service | | |
| Environmentally Preferred Power | | |
| Bundled Power and Transmission Product | | |

Bonneville Power Administration
Issued November 13, 2007

Note: Decisions listed are not final decisions, those occur at contract signing or the conclusion of the TRM rate case.
