Online Lighting Calculator Update

BPA has concluded its weekly series of Online Lighting Calculator (OLC) trainings for utilities and trade allies, which ran throughout March, April, and May. Thank you to everyone who attended and provided valuable feedback.

To support ongoing learning, BPA offers a variety of self-paced training resources, including the updated User Manual and a series of short tutorial videos available under the Resources on the [OLC Landing Page](#). These resources demonstrate common tasks in the tool, and BPA will continue to improve and expand over time.

Weekly OLC Office Hours are available through June 26. These optional sessions answer questions, assist with login issues, address user experience topics, and provide troubleshooting support. To join a session or add it to a calendar, participants are encouraged to visit the [OLC Landing Page](#) in the Training section and bring any questions.
