

BPA Energy Efficiency Weekly Announcements

August 7, 2025

New

Rescheduled: Momentum Savings and Market Research: August 2025 Quarterly Call

Join the BPA market research team's next quarterly call Wednesday, Aug. 13, from 9-10 a.m. (PDT). This call will provide team updates and present an overview of BPA's expert panel engagements during the development of BPA's 2022–2027 Interim Market Models. There will also be a brief refresher on the purpose and development process for the four Interim Market Models (Nonresidential Lighting, Residential Heating, Ventilation, and Air Conditioning (HVAC), Commercial HVAC, and Adjustable Speed Drives). Lastly, the call will summarize the various activities undertaken to engage with a panel of independent third-party experts and stakeholders for each model, as well as the values and outcomes of expert panel engagement...[More](#)

Multifamily New Construction Custom Project Eligibility Exception

As shared in the June 26, 2025 [October 2025 Implementation Manual Changes Presentation](#), for a whole-building analysis, customers may either leverage BPA Energy Efficient New Multifamily Construction UES measures or develop and submit a custom project using their own resources, as described in Section 4 of the Implementation Manual (IM). BPA may develop energy savings estimates for custom projects that address a single-targeted end-use. BPA is also allowing the application of the 2.86 percent commercial new construction building incremental cost rule to multifamily buildings. These changes are effective now, and energy efficiency representatives (EERs) are available to answer questions.

Fiscal Year 2025 Tentative End of Rate Period Deadlines

The [tentative deadlines](#) for end of rate period review and invoicing in the BPA Energy Efficiency Tracking System (BEETS) for fiscal year (FY) 2025 are available. These dates are subject to change and published on the [Energy Efficiency Important Dates](#) webpage.

General

Weatherization: Prime Window and Patio Door Replacement Requirement Exception

As shared in the June 26, 2025 [October 2025 Implementation Manual Changes Presentation](#), BPA will remove the Double-Pane Pre-condition of "metal frame only," for 11.8.2 Prime Window and Patio Door Replacement measure next rate period. BPA is adopting this requirement change starting July 2025 through Sept. 30, 2025. Energy efficiency representatives (EERs) are available to answer questions.

Starting a BPA Energy Efficiency Income Qualified Utility Program Video

A new webinar [video](#) is now available to help customer utilities learn about the requirements, qualifying measures, and available resources to successfully launch an income qualified program. The video also includes examples from utilities who have successfully implemented income qualified programs for their residential customers.
