

# BPA Energy Efficiency Weekly Announcements

## December 12, 2024

### New

#### Evaluation Projects Updated

Two evaluation projects, including a process evaluation of the Low Income program, an impact evaluation of the nonresidential lighting portfolio, have now been updated. These, as well as additional program updates, can be found here <https://www.bpa.gov/energy-and-services/efficiency/evaluation>. These evaluations provide valuable insight on process and cost-effectiveness of BPA's energy efficiency programs. Additionally, an impact evaluation of residential air source heat pumps and variable speed pumps have resumed, with results expected to be published in the summer of 2025.

#### Do It Yourself Winterization Tips

Share winterization tips with your customers before the next cold snap. Ice, snow, and freezing weather can be tough on homes. Fortunately, there are easy and inexpensive ways your customers and members can stay safe and warm this winter. BPA's Comfort Ready Home program has created a blog post and flyer with these [winterization tips](#).
