

Low-Income Project Information and Income Verification Form (Optional)

Check with the resident's local utility to determine eligibility, technical, documentation, and submission requirements. A purchase receipt, invoice, project and equipment information, and a review of income documentation may be required by the resident's utility and must be promptly submitted following project completion. All projects must be installed and completed according to the technical requirements outlined by the local utility.

*Rough opening sizes (used for the purposes of estimates) for windows and patio doors are often 105 – 110% of **actual** window order measurements. As a result, square footages provided by contractors for cost estimates may overestimate the total square footage by 10% or occasionally more). Final window measurements are used for calculating incentives. BPA allows up to 10% variance between rough opening sizes and total final invoiced window dimensions to account for variability.

INCOME VERIFICATION

A household may qualify for incentives if it meets at least one of the following criteria listed in Table 1 below. You may provide proof of income, either by providing verifiable documentation to your utility or Community Action Agency or by signing a self-attestation that your household meets at least one income qualification criteria.

Gross income includes all wages, tips, rental income, public assistance, social security or pensions, income from self-employment, alimony, interest, or any other sources of income defined by the IRS income tax return.
