

EXCEEDED ENERGY SAVINGS GOAL

Teamwork and Ideas Help Double Energy Savings and Surpassing Goals

Project Overview

Pictured from left to right Weyerhaeuser's Jeremy, Russel and Ben, ESI's Blaine and Flathead's Andy and Don are just a few of the many people and organizations who have worked together to achieve these energy savings at Weyerhaeuser.

Weyerhaeuser, located in Kalispell, Montana, has recently completed their first year (out of the two year engagement) in the Strategic Energy Management (SEM) offering through Flathead Electric and Bonneville Power. They have set an energy savings goal in line with corporate energy savings targets of 2% energy savings per year. Through participation in the SEM program, and through diligent work, they have achieved 4.24% energy savings (1,381,850 kWh/year).

Weyerhaeuser's energy team has completed two Energy Challenges where they solicit energy savings ideas from coworkers. This has led to many great energy savings opportunities. Their energy team meets every week to discuss current and proposed energy savings items. These regular meetings and the sites involvement of many people in this SEM process have led to the sites success.
