Momentum Savings

Monthly Call December 5th

ETHANMANTHEY

Agenda

- Feedback Session
- Agriculture Market Today
- Lighting Distributor Research Kick Off
- Online Lighting Retail Interview Findings
- Updates on Appliance Standards

CARRIE COBB

What is the top reason you attend Momentum Savings monthly calls?

- 1. To get updates on new market research findings
- 2. To learn about the status of current studies
- 3. To hear about energy efficiency savings outside of utility programs
- 4. To understand how BPA tracks and quantified these energy savings from a technical perspective
- 5. Other:

What content would you like more of?

- 1. Research project updates (such as status on deliverable development and logistics around projects)
- 2. Short updates on market findings (such as sharing out findings from research, sales data analysis, interview analysis, momentum savings market analysis)
- 3. Energy Savings analysis and technical methodologies for tracking savings
- 4. Momentum Savings forecasts and tracking to goals
- 5. Trade show and market tracking information (such as key industry dynamics, regulations, what we learn at trade shows)

Webinar Best Practice Findings

- 1. Use pictures of the speaker, people like faces
- 2. A different voice every ten minutes
- 3. Use polls for keeping things interactive
- 4. All presenters in a room together to make it more human
- 5. Lots of visuals and movement

What do we know about agriculture within BPA's territory?

Lighting

Greenhouses

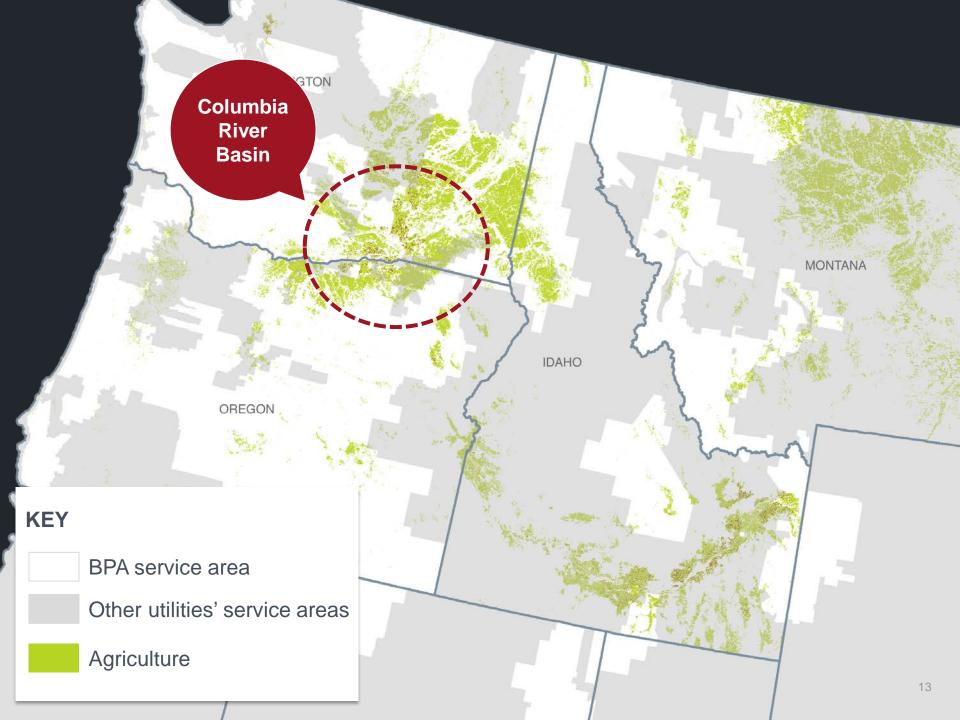

Irrigation

What do we know about irrigation in BPA territory?

Columbia River Basin Irrigation

BPA Irrigated 628,000 Acres

Non-BPA Irrigated 1,090,000 Acres

Non-BPA Irrigated 2,145,000 Acres

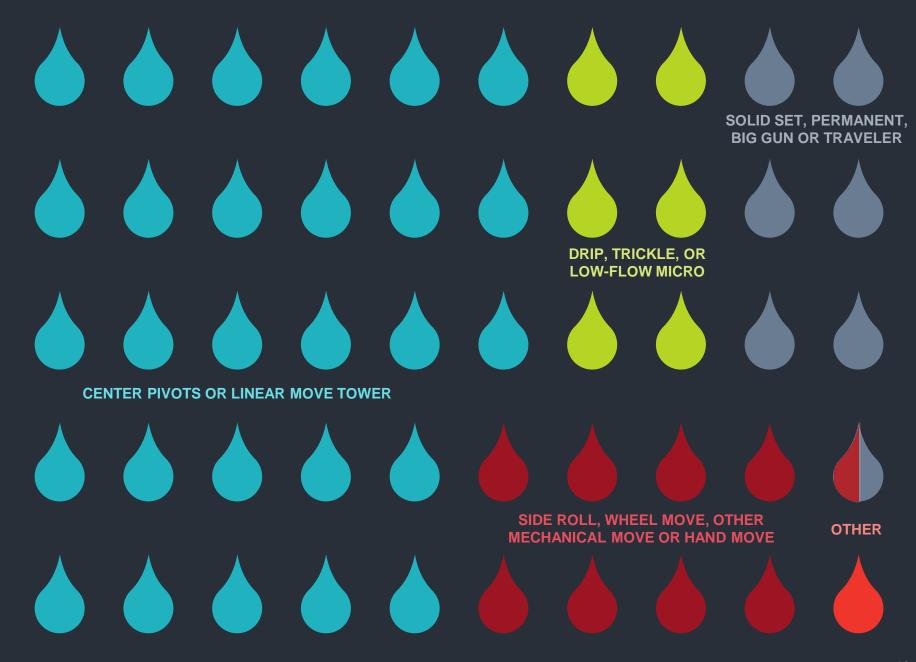

BPA Irrigated 151,000 Acres

In BPA's territory, there is roughly four times as much irrigated agriculture in the Columbia River Basin than in Idaho

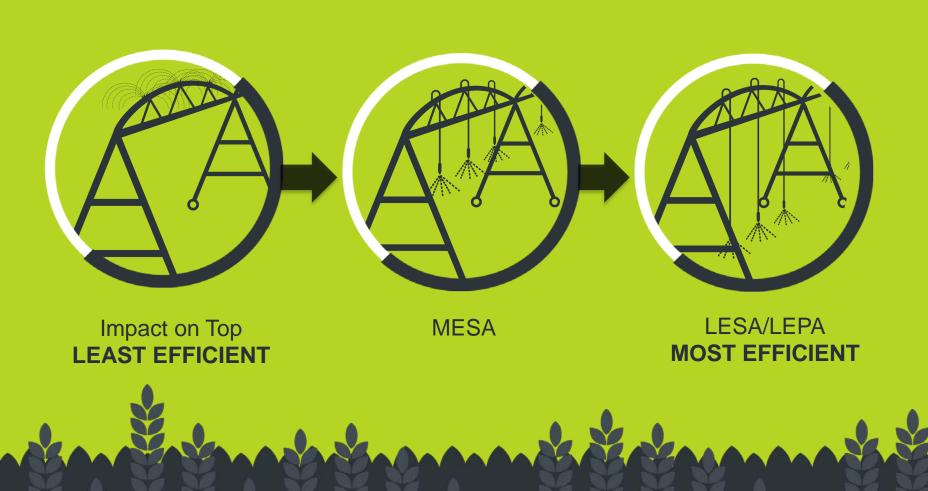

What types of irrigation systems are located in BPA territory?

What do we know about efficiency of irrigation systems?

FEDERAL APPLIANCE STANDARDS UPDATE

STANDARDS ADOPTED BY ADMINISTRATION

*As of June 20, 2016 Source: ASAP/ACEEE

PROCESSES THAT COULD IMPACT SOME "DONE" STANDARDS

Congressional Review Act (CRA). A "60 legislative day" Congressional review.

Error Correction Process: Before a standard is placed in the Federal Register, there is an "error correction" process which requires a 45 day waiting period.

Waiting Period: A 110 day period during which anybody can raise objections. The Secretary of Energy can decide to withdraw rules in response to objections.

STANDARDS THAT MIGHT BE IMPACTED

- (1) Ceiling fans (2) Uninterruptible power supplies (3) Portable ACs (4) Commercial boilers (5) Compressors Walk in coolers
- (1) Central AC/HP (DOE published this rule on 12/5)
- (2) Dedicated pool pumps

- (1) Dehumidifier
- (2) Battery chargers

EISA AND MANUFACTURED HOMES

Waiting to see on expanded coverage

These standards could be published in the federal register by January 20th, but would be subject to the Congressional Review Act.

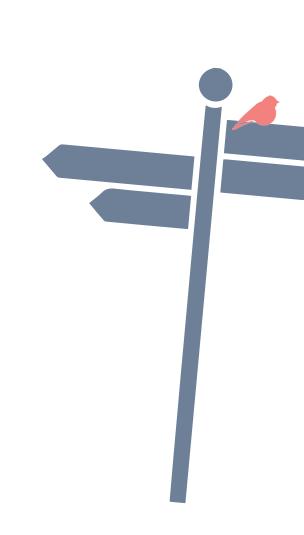

OUR NEXT CALL

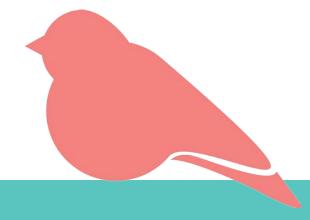

Hoping to include a guest speaker: Tom Eckman or Council staff

We will be trying to get more information on the process surrounding EISA and the manufactured homes standards for the January call

WATCH FOR

- LIGHTING RESEARCH RESULTS
 - RESIDENTIAL FINAL RESULTS
 - NON RESIDENTIAL DRAFT RESULTS
 - MARKET INTELLIGENCE BOOKLET
- DECEMBER 13TH AG PRESENTATION
- NATIONAL ACCOUNTS RESEARCH
- UPDATE ON STANDARDS

See you next month!

Next meeting: January 4th

Happy Holidays!
