Air Source Heat Pump Conversion Form (without PTCS)

For converting to ducted air source and variable speed heat pumps. Not necessary if using the PTCS Program. All sections must be completed by the installer at the time of installation.

Eligibility:

- Available for existing single-family and existing manufactured homes
- Existing heating system type must be an electric forced air furnace (conversion)
- Heat pumps must be AHRI rated, and have a minimum of 9.0 HSPF and 14 SEER

Household & Heat Pump Compressor Information

Electric	Installation		Total heated		
utility	date		area of th	rea of the home: Sq Ft	
Installation					
address					
City		State		Zip	
Mailing Address, if different:					
Home type: Existing site-built Existing Manufactured: # of Sections 1 2 3					
Existing Heating System Being Replaced:					
☐ Electric forced air w/out AC ☐ Electric forced air w/ AC ☐ Other non-electric space heating:					
This measure doesn't apply if the existing heating system is an air source heat pump, ground source heat pump, natural gas furnace, or					
electric zonal—including ductless heat pumps. Please reference the PTCS program.					
Heat pump outdoor compressor type: Non variable speed Variable speed					

Documentation to submit with this form:

- Copy of this completed form
- Purchase receipt or invoice, including the heat pump make and model number
- AHRI Certificate
- If a variable speed compressor, include manufacturer documentation that the outdoor compressor includes variable speed or inverter driven technology (e.g. specification sheet, brochure, or screen shot). *Note: Including the text "variable speed" on the invoice will not satisfy this requirement. Additional documentation is required.*
- Utility: Please include any additional documentation requirements here.

Utility: Please include any necessary Privacy Act Notice(s) to your customers here.
