

## **Chemawa Replace Bank 2 Transformer**

This project aims to upgrade a transformer at Chemawa substation to ensure reliable power delivery. The existing equipment is experiencing overloads and is in poor condition. The main objective is to replace and upgrade the existing Transformer Bank 2 at Chemawa with a system spare currently located at Redmond Substation. A new system spare will be purchased and located at Redmond Substation. This will help reduce the risk of overloads and decrease the frequency of maintenance issues.
