

Grand Coulee Underground Town Feeders Replacement

The purpose of this project is to provide more reliable, consistent power to the Town of Grand Coulee Dam and minimize power outages before ownership transfer. Reclamation, BPA, and the Town established a Memorandum of Agreement in 2016 which will transfer ownership, operation, and maintenance of the new lines to the Town of Coulee Dam. BPA and Reclamation have provided technical assistance and are responsible for replacing feeders 1, 3, & 4 prior to transfer.
