Subject: [EXTERNAL] Post-2028 (Sept 8th presentation)

Thank you for the presentation on Sept 8th, We appreciate BPA working with customers on options and modeling those options. Two thoughts:

- 1) Slide 14 indicated support continuing for IRD and LDD discounts and Slide 17 Transfer service. Please note Tacoma has been silent on these two issues to date as these issues are subject to the careful balance achieved under the PPC concept paper filed in March. CHWM is a critical component of an overall package and our support for these other issues is contingent on the CHWM outcome.
- 2) We request BPA in its CHWM scenarios also show each customers RD “status quo” RHWM under each Tier 1 system size as a comparison

Thank you for consideration of these comments.
