Subject: Fiscal Year 2027 Net Requirements Determination and Response to Comments

To: Bonneville customers, stakeholders, and interested parties

Bonneville published the FY 2027 Net Requirements public notice and determinations of customers' Total Retail Load and Dedicated Resource data on August 1, 2026. The comment period closed on August 16, 2026. Bonneville received two comments during the comment period:

Benton PUD commented that their data were missing from the "Load Following Net Requirements Data" file. Bonneville has added Benton PUD's data to the file.

Cowlitz PUD commented that they would like to revise their FY 2027 load forecast. Bonneville and Cowlitz PUD worked together to revise their load forecast.

In addition, Bonneville has added Grays Harbor PUD and Pacific PUD to the Load Following Net Requirements data file, added Clark PUD, Emerald PUD, and Snohomish PUD to the Slice Block Net Requirements data file, and made a correction to Lewis PUD's FY 2027 load forecast.

Revised total retail load energy and peak forecasts are published in the FY 2027 Net Requirements Transparency section available at [Regional Dialogue - Bonneville Power Administration \(bpa.gov\)](https://www.bpa.gov/RegionalDialogue).
