Subject: [EXTERNAL] 7(f) rate for NLSL
Date: Tuesday, February 11, 2020 2:53:26 PM

Thank you for presenting this topic at the recent workshop. Tacoma Power only offers the general comment that any new proposal to serve NLSL load of load following customers should be a win-win for all preference customers and not create any new material risks or cost shifts.

Thank you for your consideration on this topic.
