

BP Glossary Update

1. Non-Trended Load Growth Proposed Glossary Definition

a. Initial Definition:

- i. New Network Load added to an existing NITS Customer's system that occurs only at a specific end-user consumer facility.

b. Revised after customer comments:

- i. Non-residential load above the Non-Trended Load Growth threshold identified in the NITS Business Practice, to be added to an existing NITS Customer's system at a specific end-user consumer facility, that is identified in a LaRC forecast.
