### A. Powerex

Powerex appreciates the opportunity to comment on the Real Power Loss Return V17 Business Practice. It is our understanding that Section G of this business practice will be addressed in the BP-24 Rate Case, and will be finalized later. At this time Powerex does not have any specific comments on the business practice, but requests that Bonneville open another comment period for this business practice once Section G is populated prior to the implementation date of Oct. 1st, 2023. It is important that transmission customers have the opportunity to comment on the final draft of the business practice.

Thank you for considering our comments.

#### BPA Response

Thank you for your comment. When BPA finalizes BP-24 rates, the business practice will be updated to reflect the rates. At that time, the business practice will be put out for formal comments in accordance with TC-20 settlement business practice process.
