On Demand Resource Scheduling

Version ~~12~~13

This business practice sets forth BPA’s policy for scheduling an On Demand Resource on existing transmission rights.

For more information, visit the [BPA Transmission Business Practices webpage](#) or submit questions to techforum@bpa.gov.

Table of Contents

A. General Principles.....	1
B. Submitting an On Demand Resource Schedule.....	2
C. Activating an On Demand Resource	2
D. Limitations.....	3

A. General Principles

1. A ~~Transmission~~ Customer must contact BPA at least 30 ~~Calendar~~ ~~d~~Days prior to submitting the first schedule for an On Demand Resource. It will take a minimum of 30 ~~Calendar~~ ~~d~~Days for BPA to review, approve and implement a new On Demand Resource, including specifying technical requirements that must be met.
2. A ~~Transmission~~ Customer may submit more than one On Demand Resource schedule from an On Demand Resource. If a ~~Transmission~~ Customer submits more than one On Demand Resource schedule with the same Customer, all On Demand Resource schedules with that Customer must be deployed simultaneously unless the schedules are for third party supply of ~~b~~Balancing ~~r~~Reserves or ~~a~~when a qualifying contingency reserve event occurs under the Northwest Power Pool (NWPP) Reserve Sharing Group (RSG) Program Documentation. ~~qualifying contingency reserve event occurs.~~
3. The output of an On Demand Resource may be changed up and down once each during the hour of delivery unless a qualifying event under the NWPP RSG Program Documentation occurs.
 - a. During periods that BPA is in the Energy Imbalance Market (EIM) and providing Generation Imbalance Service under BPA OATT ~~s~~Schedule 9E, changes to the output or schedules of an On Demand Resource will be subject to EIM imbalance charges. See the BPA EIM Business Practice for more information.
4. The requesting ~~Transmission~~ Customer may allocate all or part of a Federal Columbia River Transmission System (FCRTS) Point-to-Point (PTP) Transmission reservation to an On Demand Resource schedule. The ~~Transmission~~ Customer may allocate any remaining Transmission Demand to standard transmission usage.
5. A ~~Transmission~~ Customer with an On Demand Resource schedule that is within BPA's Balancing Authority Area that is not using FCRTS ~~C~~capacity must demonstrate that it

has transmission capacity across BPA's Balancing Authority Area for its On Demand Resource schedule.

B. Submitting an On Demand Resource Schedule

1. A ~~Transmission~~ Customer must submit an e-Tag to set aside transmission for an On Demand Resource.
 - a. The e-~~T~~ tag type "CAPACITY" is required for an On Demand Resource schedule.
 - b. The maximum energy that can be called on during the hour for an On Demand Resource schedule is the Transmission Profile of the e-Tag for that hour.
 - c. The Energy Profile of the e-Tag for an On Demand Resource schedule must reflect the amount of energy expected to be generated by the resource at the beginning of the delivery hour.
2. The Transmission Profile may be changed up to 20 minutes prior to the hour of delivery.
3. The portion of the Transmission Demand that has been reserved for On Demand Resource scheduling cannot be resold or reassigned.
4. All Transmission Demand reserved for an On Demand Resource schedule, whether or not the resource is called on, will be included in determining whether the ~~Transmission~~ Customer has incurred an Unauthorized Increase Charge.

C. Activating an On Demand Resource

1. To activate/deactivate an On Demand Resource during the Operating Hour, including schedules for third party supply of ~~b~~Balancing ~~R~~eserves, the ~~Transmission~~ Customer must update the ~~E~~nergy ~~P~~rofile on the e-Tag, ~~with~~ start time, stop time, and duration of the transmission ramp.
 - a. For third party supply of ~~b~~Balancing ~~R~~eserves, all within-hour adjustments (up or down) will have a transmission ramp duration of ~~zero (0)~~ZERO minutes.
2. Activation of an On Demand Resource may occur:
 - a. Across the top of hour ramp from XX:50 to XX:10-; or
 - b. Via a within-hour adjustment to the Energy Profile.
3. Deactivation of an On Demand Resource ~~will always be~~ requires the Customer to set the Energy Profile to zero and may occur:
 - a. As a ramp out over the last 10 minutes of the hour from XX:50 to XX:60-; or
 - b. Via a within-hour adjustment to zero of the Energy Profile.
4. An On Demand Resource may start an hour partially loaded, which will ramp in across the top of hour ramp from XX:50 to XX:10. One additional adjustment in the ~~e~~Energy ~~p~~rofile up ~~or~~and down (to zero) is allowed within-hour.

D. Limitations

1. ~~BPA Transmission Services~~ may suspend delivery of an On Demand Resource into, out of, or through BPA's Balancing Authority Area if the reliability of the FCRTS is threatened.
2. ~~BPA Transmission Services~~ may establish a maximum On Demand Resource ramp rate for each On Demand Resource and may impose operating limitations when necessary to protect reliable operation.
3. An On Demand DEC Resource is an On Demand Resource where the ~~Transmission~~ Customer has the right to activate the Resource to move power from a Centroid to a Point of Delivery.
4. An On Demand DEC Resource may not be used to effect an arbitrage transaction through a Centroid by delivering power to that Centroid from a resource other than the resource or load for which ~~B~~Balancing ~~R~~Reserves are being supplied at the same time the On Demand DEC Resource is deployed.
5. ~~BPA Transmission Services~~ is the Path Operator of the Northwest AC Intertie (NWACI) North of the California-Oregon Border. An On Demand Resource over the NWACI, without regard to whose transmission rights are used, must be monitored and operated through BPA's Balancing Authority Area.
6. On Demand Resource schedules or other capacity schedules are not permitted on the DC Intertie.
7. Real-time *pro rata* ~~e~~Curtailments of transmission capacity that is being used to affect an On Demand Resource schedule will be calculated based upon the Transmission Profile. The resulting On Demand Resource schedule ~~e~~Curtailment will be communicated via the revised e-Tag from BPA indicating the new maximum allowable On Demand use.
