

Partial Service Profile TSR Validation

CBPI

April 19, 2023

Hamedah Dhalai

Disclaimer: This document contains proprietary screenshots and screen captures of the Reservation Module from Open Access Technology International (OATI). Do not distribute this material or use it outside the context of this video without specific authorization from OATI.

Current OATI Functionality

webSmartOASIS incorrectly approves TSRs where the profile is less than the service increment.

Enabling this validation will ensure only TSRs where the profile is equal to or larger than the service increment will be approved.

This validation will only affect hourly Rebids where the counteroffer is of a daily service increment or larger.

BPAT does not expect this to affect many transactions, solely clarifying an existing expectation.

Current state: Counteroffer on daily TSR

Updates to Requesting Transmission Service Business Practice

M.TSR Validation Denial Reasons

1. If a TSR is deemed INVALID, REFUSED or DECLINED, one of the denial reasons in Section M will be stated in the Seller Comment field of the TSR describing why the TSR was denied.

TSR Validation Rules	
Denial Reason (Seller Comments)	Rule Description
Partial Service Profile	Verifies that the TSR profile matches its service increment

Q.REBID Offers of Service

5. The profile of a REBID must be no less than the increment of service.
