

Brown Bag: Commercial Sector Program Design

When: June 22nd, 2016

Time: 12:00 p.m. – 1:30 p.m.

**Commercial Sector Program Design Brown Bag:
June 22nd**

Over the past 12 months, BPA has been working with utility customers, regional stakeholders, and industry partners to assess utility needs and develop our next generation commercial sector energy efficiency program offering. Last fall, BPA presented a strawman program concept and received constructive and positive feedback from a wide range of customers and stakeholders.

In this brown bag, we evolve from program concept to an operational program design. We will provide a summary of the proposed program design, including timing and scope, implementation delivery methods, costs, and energy savings delivered.

Please note: The content of this Brown Bag will be the same information that was discussed on the Brown Bag held on May 18th
