

# Calculator Retirements

## BPA will be retiring all out-of-date versions of our IS 2.0 Calculators

In an effort to simplify and stabilize our reporting system BPA will be retiring a number of older versions of our various calculators (e.g. Option 1 Custom Project Calculator). As of Jan 1, 2016 you will only be able to submit the calculator versions listed below; all older versions will no longer be accepted in IS 2.0.

If you have any projects that are in progress in a calculator version that is no longer valid you will not need to redo any work or transfer the existing data to a new version. BPA will be happy to migrate data in older versions of these calculators on your behalf; you will simply need to contact your EER for assistance.

Each of these calculators can be found on BPA's [IS 2.0 files](#) page.
