Distributed Energy Resources Utility Cross-Share & DER Potential Study Workshop

Bonneville's Distributed Energy Resources (DER) team invites utilities to share their experiences and discuss their interest in Demand Response, Energy Storage and other exciting Distributed Energy Resources topics. Some utilities in the Northwest have recent experience in this area while others are asking themselves whether resources like demand response, battery storage, or other innovative flexible energy resources may help them manage their loads and distribution grids more efficiently.

To facilitate the discussions between various utilities, BPA is pleased to host a Regional Utility Cross-Share event. This event will be kicked off with a 2 hour workshop where Cadmus will brief the audience on its current DER Potential Study efforts, followed by an informal opportunity for brief presentations and in-depth discussion between utilities. Past experience with these Cross Share events have proven them to be great environments for learning.

Where:  BPA Tri-Cities Office
2211 N. Commercial Ave, Pasco WA 99301

When:  November 7th & 8th 2017

Please note: This event is intended to encourage utilities to openly ask questions, share their experiences and hear others’ lessons learned. A phone bridge will be provided for parties who cannot attend. However, Vendors are not invited to attend, nor partake in the phone bridge.

Are you willing to share a quick presentation on your project? We are looking for short presentations, one-page informational, or any other materials. These sharing tools launch deep discussions that can be valuable to you as well as everyone in attendance.

Please respond by October 20th to ensure a spot on the Agenda!
