

# New Multifamily Construction Qualified Programs List

For Low-Rise and Mid/High-Rise Applications

---

BPA does not manage any of the programs on this New Multifamily Construction Qualified Programs List. For questions or more information on each program, please contact programs directly.

Payments are an agreement between BPA and its customer utilities. Payments to end use-consumers or developers are a separate relationship between customer utilities and end users and may be subject to additional or different requirements and funding levels.

## **BPA Energy Efficiency New Multifamily Construction:**

The following programs have demonstrated to BPA that they are at least 10 percent more energy efficient than the 2015 Washington Energy Code and qualify for payments from BPA under its BPA Energy Efficiency New Multifamily Construction measure:

- **Built Green Four Star:** <https://www.builtgreenwashington.org/>
- **The US Department of Energy Zero Energy Ready Program:** <https://energy.gov/eere/buildings/zero-energy-ready-home>

## **BPA Zero Energy Ready New Multifamily Construction:**

The following programs have demonstrated to BPA that they are at least 25 percent more energy efficient than the 2015 Washington Energy Code and qualify for payments from BPA under its BPA Zero Energy Ready New Multifamily Construction measure:

- **Built Green Five Star:** <https://www.builtgreenwashington.org/>
- **International Living Future Institute 2030 Challenge + Reveal Label:** <https://living-future.org/reveal/>
- **Passive House Institute (PHI):** <http://www.passiv.de/en/index.html>
- **Passive House Institute US (PHIUS):** <https://multifamily.phius.org/service-group/phius-standard-now-within-reach>

Programs may be added at any time, and may be removed to coincide with new publication of a BPA Implementation Manual (next update October 1, 2019).
